

Family Tree Chart on Google Docs

There is a really detailed and easy-to-use family tree chart on Google Docs. Here's how you access it!

1. In Google Docs, click Create New and choose From Template.

2. A search page will open. Type "Family tree" and click Search Templates. You will see the Family Tree Chart at the top of the results. Click Use this Template.

3. The Family Tree chart will open in Google Docs. Click in the name space to rename the document.

The screenshot shows a Google Docs document titled "Maurine Watkins family tree" (highlighted in yellow) with a lock icon indicating it is "Private to only me". The document is open in a spreadsheet view. The title bar shows "Google docs" and the document name. The menu bar includes "File", "Edit", "View", "Insert", "Format", "Data", "Tools", and "Help". The toolbar contains various icons for undo, redo, print, insert, and formatting. The formula bar shows "My Family Tree". The spreadsheet grid has columns A through I and rows 1 through 22. In cell A1, the text "My Family Tree" is displayed in a large blue font. Below it, in cell A2, is the text "Family Tree Template". In cell A3, there is a copyright notice "© 2011 Vertex42.com". In cell A7, there is a note: "No 1 is the same as no. ___ on chart ___". The chart consists of five nodes, each represented by a colored box with a name field and birth/death information. Node 2 (blue) is in cell A14, Node 4 (dark blue) is in cell E4, Node 5 (purple) is in cell E5, Node 8 (dark blue) is in cell H8, and Node 9 (purple) is in cell H9. Each node has a "Name" field, a "B:" field for birth date, and a "D:" field for death date, with "[Date]" and "[Place]" placeholders. Node 8 also has an "M:" field for marriage date and place. The text "Chart no. ___" is visible in the upper right area of the spreadsheet.

4. Now that the document is saved with a new name, you can edit and share the family tree with others in Google Docs and work on it at your convenience!
