

CHICK EMBRYO PROJECT THE BEGINNING OF LIFE ORDER FORM

For questions or other information, call 746-3709

*Due to demand and limited resources, we are no longer able to provide more than two incubators to one school during the March project. However, at this time, we are able to accommodate more than two incubators at one school during the February project. We're sorry for any inconvenience, but this ensures that all schools in Tulsa County have an opportunity to participate in this project.

Students learn how the life cycle works by incubating and hatching eggs. This 21-day project can be incorporated into science, language arts, and math curriculums. The fee is \$25.00 per unit which includes an air-forced incubator, auto-turner and eggs. Instructors also receive teacher's guide and attend an orientation session, if desired. Reservations are processed on a first come, first served basis. **The reservation is not processed until payment is received.**
