ABSTRACT

A one-year followup study of the graduates of the Jackson County Adult Evening High School Completion Program was conducted. Thirty-seven mail questionnaires were sent, and followup requests were mailed to non-respondents. A total of 34 (91.89%) graduates responded. Among the conclusions reached are the following: (1) ages ranged from 18 to 51, with an average of 29; (2) the vast majority remain in the same geographical area, at least for one year after graduation; (3) nearly half experienced a job change or promotion; 62% of those reported that it was directly or indirectly related to the adult program; (4) more than half reported benefits other than financial ones; (5) nearly all would recommend the program to other non-graduates; (6) all but four felt the amount of work required for graduation was about the right amount; (7) all rated the quality of instruction as good or better; and (8) nearly half indicated that all required and elective subjects were helpful. Recommendations on the basis of this and earlier one- and four-year followup studies are made. The questionnaire and cover letters are appended. (KM)

A ONE-YEAR FOLLOW-UP STUDY
OF THE THIRTY-SEVEN GRADUATES
CLASS OF 1972
OF THE JACKSON COUNTY ADULT EVENING
HIGH SCHOOL COMPLETION PROGRAM

BY
JAMES R. GRAN
PROJECT ADMINISTRATOR

COMPLETED JUNE, 1973

AC014397

PREFACE

The Jackson County Adult Evening High School Completion Program has completed its seventh year of operation.

Adult students, upon completion of the requirements for graduation, are awarded regular high school diplomas by their resident school district if they live in Jackson County, or by the school attended in Jackson County if they are not residents of a school district in Jackson County.

A total of four hundred eighteen adults have completed their high school education by way of this program.

Each graduating class has been or will be the subject of a one and four-year follow-up study, that is, one and four years after graduation.

This study will concern itself with the Class of 1972, which had thirty-eight graduates.

ACKNOWLEDGEMENTS

We wish to acknowledge the members of the Class of 1972 who responded to the questionnaire used in this follow-up study.

We acknowledge also the members of this and earlier classes who by attending and graduating from high school via this program have set fine examples for others to follow.

To be commended also are the teachers and staff members for their contributions to the program at the sacrifice of time away from their families, as well as extra responsibilities in addition to their regular teaching duties.

Recognition is also given to the taxpayers of Jackson County, local school districts of Jackson County and the Jackson County Board of Education. This program would not be possible without the cooperation of these interested people.

CHAPTER I
BACKGROUND INFORMATION

The Problem:

Whenever public funds are invested in educational programs, a need exists to justify such expenditures to the agencies financing these programs as well as to the general public.

This adult program has made continuous use of pre-post test results, teacher and student evaluations, as well as one and four-year follow-up studies of our graduates in attempts to evaluate this adult program.

As far as our follow-up studies are concerned, our problem is to measure to some degree the benefits, if any, that have been experienced by our graduates. These benefits may be educational, social and/or financial.

The Purpose:

Our purpose is to measure these benefits, as evaluated or stated by the graduates at two intervals in time - one and four years after graduation.

These follow-up studies supplement the other above mentioned evaluating devices, and are perhaps the more meaningful and most valuable evaluations made of this program.

This particular one-year follow-up study will concern the graduates of the Class of 1972.

Related Studies:

The only related studies, to the knowledge of this writer, are those which have been made of this program.

The following studies have been made of this program:

1. One-Year Follow-Up Study - Class of 1967 - results published in Vocational Education Amendments of 1968, Part 2 - which were the results of hearings before the General Subcommittee on Education in the 90th Congress.
2. One-Year Follow-Up Study - Class of 1968 - results published in the October, 1969 issue of Research in Education, Volume 4, Number 9.
3. One-Year Follow-Up Study - Class of 1969 - results published in the October, 1970 issue of Research in Education, Volume 5, Number 10.
4. One-Year Follow-Up Study - Class of 1970 - results published in the August, 1971 issue of Research in Education, Volume 6, Number 8.
5. One-Year Follow-Up Study - Class of 1971 - results published in the September, 1972 issue of Research in Education, Volume 7, Number 9.
6. Four-Year Follow-Up Study - Class of 1967 - results published in the June, 1971 issue of Research in Education, Volume 6, Number 6.
7. Four-Year Follow-Up Study - Class of 1968 - results published in the July, 1972 issue of Research in Education, Volume 7, Number 7.
8. Four-Year Follow-Up Study - Class of 1969 - submitted to ERIC but not yet published.
9. A Comparative Analysis of Four-Year Follow-Up Studies of the Classes of 1967-1968-1969 - submitted to ERIC but not yet published.

This current follow-up study is of the Class of 1972. It is hoped that the results of this study will be similarly submitted to and published by ERIC.

Assumptions:

The following assumptions are made:

1. The questions in the questionnaire will be correctly understood and honestly answered by the responding graduates.
2. The questions are pertinent and will measure to some degree the benefits experienced by these adult graduates as a result of attending and graduating from the adult evening high school program.

Questionnaire:

The questionnaire used in this one-year follow-up study is identical to the one used in the earlier studies.

A copy of the questionnaire is found in the List of Exhibits, Exhibit D.

Hypothesis:

If this adult program is accomplishing what it is supposed to accomplish, the lives of our graduates should have improved or be improving, since enrollment and graduation from this program.

The benefits experienced by our graduates should be recognizable and measurable to some degree by the graduates themselves. These benefits should be found in the areas of educational, social or financial gains. They may be job promotions or job changes, continued education, more pride, greater self-esteem, more confidence, better mental health, improved attitudes toward life, etc.

The benefits, as measured by these graduates Class of 1972, will be those occurring between enrollment and one year after graduation - relatively short term benefits. Later studies might well reveal benefits not appearing in a one-year study. Some, for example, may not enter the labor market or continue their education until their children are older. Other opportunities may not present themselves until a later date.

Results of this Study:

It is hoped that the results of this study will justify the continuation of this program, establishment of similar programs, encourage more adults to participate in these programs, and convince governmental and/or private agencies to financially support programs of this kind.

Indirectly, we hope that results of these studies would encourage local school districts to establish programs of their own, or participate in similar programs. In addition we would hope that they might reflect upon their own dropout problems and attempt to prevent dropouts by appropriate revision of unwise policies, curriculum requirements, etc.

Definition of Terms:

For the purpose of this study, the following terms are defined:

Housewife: A married woman not working for wages.

Part-time Worker: One who regularly works part-time for wages.

Full-time Worker: One who regularly works full-time for wages, salary, or profit.

Unemployed: One who is temporarily out of work.

Disabled: One who cannot work because of physical or mental handicaps.

Required Subjects: Subjects in which one unit of credit is required of all students in this adult program. These subjects are: English 10 and 11, Math, Science, American History and Government.

Elective Subjects: Any subject other than the required subjects.

Tuition Student: Any adult student who pays a tuition fee of any amount.

Non-Tuition Student: Any adult student who does not pay a tuition fee because of economic need or a physical handicap.

Many of these terms are also defined on the questionnaire where it was felt a misunderstanding might occur.

Method of Attack:

On March 13, 1973 thirty-seven letters, questionnaires, and self-addressed, stamped, return envelopes were mailed to the graduates of the Class of 1972. Two weeks were allowed to pass before a second letter, questionnaire, and return envelope were mailed to the non-respondents to the first request. Another two-week period was allowed to pass before the third letter, questionnaire, and return envelope were sent to the remaining non-respondents. Two more weeks passed before tabulation of the returns began.

Twenty-three of the thirty-seven graduates responded to the first request. Nine responded to the second request. Two responded to the third request.

A total of thirty-four graduates responded to the questionnaire out of a class of thirty-seven for a return of 91.89%.

While membership in the class of 1972 was thirty eight, one address was unknown and was not sent a questionnaire.

CHAPTER II

FINDINGS

General Information:

This portion of the questionnaire collected data about age, sex, addresses, head of household, marital status, and number of children in the family.

Information concerning the three non-respondents and the one member not surveyed will be included in this general information section where the information is available from our files.

Average Age:

Table I presents the present average ages of the class of 1972 by occupation and sex, including the three non-respondents and one member not surveyed.

TABLE I
PRESENT AVERAGE AGES
ADULT CLASS OF 1972

BY PRESENT OR LAST KNOWN OCCUPATION				
OCCUPATION	MEMBERSHIP	MDN	MEAN	RANGE

Disabled				
Men	1 (1 NR)	47	47	-
Women	-	-	-	-
<hr/>				
TOTAL CLASS OF 72 38		Class Avg. Age 29.0		

The present average ages of the graduates of the Class of 1972 would indicate that they have many years ahead of them in which to benefit financially and educationally. The average age of the total class membership is 29.05 years.

Ages and Sex:

Table II lists the detail of ages and sex by occupational classification.

TOTAL CLASS OF 1972		

Table III reveals very little movement of these graduates. The one in Virginia is serving a tour of duty in the Navy.

For the most part, these graduates tend to remain in this general area and will probably remain long enough to repay the cost of their education in this program many times over.

Head of Household:

Table IV reveals that fifteen members of the Class of 1972 are the head of a household, which includes two housewives and thirteen men.

The remaining class members, all women, are not head of the household. This number includes sixteen housewives, three part-time women workers, and four full-time women workers for a total of twenty-three who are not head of the household.

Children in Family:

Table VI will show that twenty-seven members of the Class of 1972 report having one or more children under the age of nineteen, while only four report having children age nineteen or older.

While it indicates that most members of this class had family responsibilities while attending adult night classes, the number of children in each family is not nearly as large as the families of many earlier graduating classes.

TOTAL CLASS OF 1972	38

Present Employer and Type of Work (One year after graduation):

Table X portrays the present employer and type of work one year after graduation. It also indicates part or full-time employment.

An asterisk preceding the type of work indicates an employer or job change between enrollment and one year after graduation.

A minus sign preceding the asterisk denotes a negative change, for example a worker returning to the role of housewife, full-time worker switching to part-time employment or a worker becoming disabled or unemployed.

Of the thirty-four respondents to the questionnaire, a total of seventeen are presently in the labor market. Fourteen of these are full-time and three part-time workers.

The changes observable in Table X are summarized below:

- 2 Housewives went to work full-time
- 2 Housewives went to work part-time
- 4 Full-time men workers changed employers
- 1 Full-time woman worker returned to the role of housewife
- 2 Part-time women workers returned to the role of housewives

These add up to eight positive changes and three negative changes.

Four housewives who had not been in the labor market at enrollment, were in the labor market one year after graduation. Two individuals who were part-time workers at enrollment were not in the labor market at one year after graduation. One full-time worker at enrollment was not in the labor market one year after graduation.

Reported Job Changes or Promotions:

While Table X enables us to determine the observed job changes, Table XI enables us to count the reported job changes or promotions as the respondents answered the question, "Have you had a change in jobs or promotion on the job since enrolling or graduating from the Adult Evening High School Program?"

The number of yes responses to this question agrees with the number of positive (eight) observed job changes.

TABLE XI

TOTAL RESPONDENTS - CLASS OF 1972 34

Changes or Promotions Related to the Program:

Table XII records the responses to the question, "If yes, has this change or promotion been a direct or indirect result of your attending and graduating from the Adult Evening School Program?"

It would appear that five of the eight positive changes are directly or indirectly related to the Adult program. This would represent 62½% of the changes being related to the program.

Plans to Continue Education:

Six of the thirty-four respondents indicated that they planned to continue their education beyond the high school level. Four were not sure, and twenty-four did not plan to continue their education beyond the high school level.

Approximately 18% of these respondents then, hope to continue their education.

Table XVI reports the responses to this question of continuing education beyond the high school level.

Table XVII lists the type of training desired by the "yes" respondents in the preceding table.

More High School Classes:

Over 29% of the respondents indicated a desire to study additional high school subjects.

Combining this percentage with the percentage planning to study subjects beyond the high school level gives us a combined percentage of approximately 47%. This would mean that nearly half the respondents of this class intend to study some subjects of either high school or above level at some future time.

Table XIX distributes their responses by occupational classification, while Table XX lists the subjects desired.

TABLE XXII

REASONS RESPONDENTS WOULD RECOMMEND ADULT PROGRAM
ADULT CLASS OF 1972

OCCUPATION	REASONS	NUMBER
Housewives	No response	1
	For myself it was a chance to finish high school. I had always regretted not having done so.	1
	Because I think it's important to have a diploma. You will need it also to get a job.	1
	I recommend any adult going to adult high school as it's the only chance they have to finish or complete high school and still continue their daily jobs.	1
	I think everyone should have a high school education.	1
	Because it completes your high school education. You learn so much more. You feel proud when you get your diploma.	1
	Because the way things are nowadays I think it is a wise thing to do.	1
	Nowadays so many jobs require a high school education for the job itself, or just the training for it.	1
	You will be able to understand things better.	1
	It gives you the chance to earn your diploma and learn more things than you would in high school.	1
	If nothing more than to get that diploma. It's important to me anyway.	1
	To better themselves for a future job and to understand more about living.	1
	It is a wonderful opportunity. I considered myself very lucky to be able to graduate and still be able to take care of my home and daughter.	1

Table XXII continued:

OCCUPATION	REASONS	NUMBER
	In the future you may like to attend college or work where they require it.	1
	Because the idea of finishing gives you a great feeling and to graduate you are doing something you wanted to do but thought you would never make it.	1
	For their own benefit of continuing their education and in finding a good job.	1
	Although I haven't had the chance to use mine yet, I do believe that it makes a person feel better and raise your spirits. It therefore makes me feel that someday I will be able to make something of my life and if ever left to take care of my family I will be able to do so.	1
Part-time Workers		
Men		
Women	Because I found out it's very worthwhile to keep on learning and I also broadens your mind.	1
	It would mean that they can do more with their lives.	1
	I feel everyone should have their high school education and it doesn't hurt anyone to brush up on classes.	1
Full-time Workers		
Men	No response	2
	To fulfill a goal in life and to learn more.	1
	To benefit themselves and others around them.	1
	To help himself and his family in making a better life.	1
	Job improvement.	1
	It will help a person sooner or later.	1
	They don't know when they will need the high school education. May get hurt or laid off and have to change jobs.	1

Table XXII continued:

OCCUPATION	REASONS	NUMBER
	Gives a better understanding of what's going on in everyday life.	1
	Almost every job requires a high school education.	1
Women	When I applied they asked if I had a high school education. Everyplace you apply asks this.	1
	I really enjoyed going and I'm sure others would to.	1
	Better job opportunities. Self-satisfaction.	1
	To better themselves.	1

OCCUPATION	WAYS TO IMPROVE	NUMBER
Housewives	No Response	8
	I think that the adult education in Jackson County is very good. I just wish more people would take more advantage of this opportunity.	1
	Can't think of a thing. I advise anyone to enroll. The teachers I had were great - they made classes very interesting. I hated to miss any of them.	1
	Just leave it the way it is.	1
	I found the larger the class the more interesting the class was.	1
	More often.	1
	Have more creative subjects so that it may provide a career.	1
	I think in Bookkeeping we could have used more instructing and less visiting among the students. Also the teacher could spend more time in the classroom.	1
	I don't believe it could be improved. It is just great the way it is.	1
	I think the best there is is what they have.	1

Most and Least Valuable Required Subjects:

Tables XXVI and XXVII illustrate the responses to these two questions.

Choices seem to depend upon individual likes, dislikes and individual usefulness more than anything else. Housewives liking math, for example, seem to like it because they can help their children with modern math problems at home. Men, on the other hand, appear to like math because it is useful in their job.

No doubt the popularity and/or ability of the teacher may enter into some choices, but predominately individual likes, dislikes, and usefulness seem to be the controlling factors.

Additional Comments:

The members of the Class of 1972 were also given the opportunity to make any additional comments they might wish to make in the last open ended question on the questionnaire.

While twenty did not respond to this question, fourteen did. Their comments are most interesting and informative.

Table XXXIII presents the additional comments made by the respondents of the Class of 1972.

TABLE XXXIII

ADDITIONAL COMMENTS

RESPONDENTS - ADULT CLASS OF 1972

OCCUPATION	COMMENT	NUMBER
Housewives	No Response	11
	I took a sewing course and find myself busy sewing at least 4 days a week. I have been asked to take a job sewing for a nursing home. I also make coats, men's pants as well as dresses since taking the course. In my spare time, I'm also nursemaid for my son in the hoghouse caring for baby pigs. I also drive a tractor during field work and have a very large garden.	1
	Thank you for the opportunity to get a high school education and diploma.	1
	Night school helped me more than high school ever did because it wasn't as rushed and I could learn more on my own, and doing things myself with our people around when you needed help.	1
	I applied for two jobs and on both I was hired, but my husband refused to let me work. However, if I should need to work I feel more secure about it.	1
	I want to thank everyone who helped me make it through to graduation, and everyone who put their time in to help the program and get it to work. I thank each and everyone of you.	1
	I sincerely hope that you, and all the instructors of adult education, keep up the wonderful work. Thank you.	1
	Total Housewives	17
Part-time Workers		
Men		
Women	I enjoyed every bit of school. I think as you're older you put more into studying. I wish I lived in Maquoketa. I'd enroll in more subjects because I don't think a person is too old to learn and its good clean entertainment. I also took a cake decorating course which I enjoyed very much.	1

CHAPTER III

SUMMARY-CONCLUSIONS-RECOMMENDATIONS

Summary:

As was mentioned in the preface, four hundred eighteen adults have completed their high school education by way of this adult evening school program in the seven years this program has been in operation.

During this same seven-year period, fifty to sixty dropouts occur annually in this county alone, and most of these dropouts have not participated in this adult program.

As beneficial as this adult program may be to its graduates, it is at best a remedial program. This program while necessary for those who have already dropped out of school, is at best only a partial answer.

What is needed by the schools is a preventive program - one which will prevent most dropouts from occurring. It is this type of program that we would encourage schools to devote their time, talent, and some funding.

Until the dropout problem is resolved, however, we heartily endorse adult programs of this type. The evidence gathered to date justifies the establishment and expansion of programs of this type.

This is the sixth one-year follow-up study of graduates of this program to have been completed. The results of this and earlier studies have been remarkably consistent in their results and findings. These results continue to justify the investment in this adult program, and should encourage other non-graduates to complete their high school education by way of this or similar programs.

Conclusions:

Upon the basis of this one-year follow-up study of the Class of 1972, the following conclusions are drawn, pertaining to this graduating class.

1. Present ages of the members of this class range from 18 to 51 with an average age of 29 years. They have many productive years ahead of them in which to benefit educationally, socially, financially, and in which to repay the cost of their education many times over.
2. Age, sex, marital status, and family responsibilities need not keep adults from completing their high school education. These factors did not keep members of this class from doing so.
3. The vast majority of the members of this class remain in this general geographic area, at least for one year after graduation. Some mobility is noted but is very limited in number.
4. Nearly 50% of those in the labor market experience a job change or promotion between enrollment and one year after graduation.
5. Sixty-two and one-half percent (62½%) of those experiencing a job change or promotion report that it was directly or indirectly related to the adult program.
6. The same 62½% reporting job changes or promotions also reported increased incomes.
7. More than half of the respondents report benefits other than financial ones. Such benefits as confidence, ability to speak in public, personal satisfaction, ability to help their children, increased knowledge, ability for additional education, understanding their job better, peace of mind, are among the benefits mentioned.
8. Approximately 18% of these respondents indicate a desire for additional training beyond high school level, and over 29% indicate a desire to take additional high school or interest subjects. This desire is remarkable when one considers that these were all dropouts at the time of enrollment in this adult program.
9. Nearly all (one individual did not answer this question) of the respondents would recommend this adult program to other non-graduates. Their reasons for recommending the program to others are most interesting and range from self-satisfaction to future plans.
10. All but four of the respondents felt the amount of work required for graduation was about the right amount. Four thought it was too little, but no one thought it to be too much.

11. All of the respondents rated the quality of instruction as good or better. Twelve said excellent, fifteen reported very good, and seven indicated good.
12. Few constructive criticisms were made for ways to improve the program. Most responses to this open ended question were generally complimentary.
13. Most and least liked required or elective subjects appear to be matters of personal likes or dislikes or usefulness of the subject to the individual. No revealing pattern of responses could be found other than the above.
14. Nearly half of these respondents indicated that all required and elective subjects were helpful, although many listed their preference.
15. About 20% of the membership of this class attended tuition-free.
16. Approximately 41+% of the respondents of this class made additional comments at the end of the questionnaire all favorable save one.
17. While a high school diploma is no guarantee of a job or success (it never has been), a high school education and diploma does make a significant difference for the better in the lives of our graduates.

Recommendations:

As a result of this and earlier one and four-year follow-up studies, the following recommendations are made:

1. That efforts continue to be made to attract adult non-graduates to this and similar programs. Such efforts might well include employer sponsorship, provision for babysitting services, mileage allowances, payment to attend classes, etc. Funds, however, will need to be found to provide many of these subsidies.
2. That this adult program be continued as long as enrollments justify, until such time as it might be absorbed by local or area schools.
3. That similar programs be established in other localities, and that they be adequately financed from local, state, and national sources.
4. That graduates be allowed to participate in this program as long as this interest remains.
5. That efforts be made by local schools to resolve the dropout problem through development of preventative programs. This may well entail the revision of school policies, curriculum, administrative policies, granting of credit, scheduling, etc., as well as experimental approaches to the problem.

6. That area schools and colleges bring additional educational opportunities to adults by providing evening classes in the local communities. These classes should include college credit courses, interest subjects, and perhaps most importantly vocational-technical training for secondary and post-secondary students. Minimal enrollments should be required and subjects offered at minimal expense to the students.
7. That state wide dropout studies be conducted. It is not enough to count the numbers. If preventative measures are to be taken, the real causes of dropouts need to be known. Once the causes are known, recommendations need to be made and implemented.
8. That local school districts conduct follow-up studies of their students - both dropouts and graduates - in an effort to help evaluate their programs as well as to assist in resolving the dropout problem.
9. That follow-up studies continue to be made of this program as long as it is possible to do so.
10. That the results of these studies be publicized to attract more non-graduates to this and similar programs.

Jackson County Adult Evening High School Completion Program
Courthouse

Maquoketa, Iowa 52060

Phone: 652-3213

Dear Graduate of 1972:

It has been a little less than a year since you received your high school diploma, earned in the Adult Evening School Program. Even though you have graduated, we are still interested in you and what you are doing.

You can be of great assistance to us if you will complete the enclosed questionnaire and return it to us in the enclosed self-addressed, stamped envelope.

This will help us to evaluate our adult program through the experiences and eyes of our graduates. This is truly the "acid" test or evaluation of our program.

As you are probably aware, the class of 1969 completed and returned a similar questionnaire. A 100% return was achieved.

You may be assured that the information obtained through this study will be used for program evaluation purposes, and that no names will be used in reporting the results of this study.

We do ask that you answer the questions completely and honestly, so that the study will be as valid as possible. Your participation in this study may well determine not only the continuation of this program, but the establishment of similar programs throughout the country.

Please complete and return the questionnaire now! A delay may mean more and unnecessary expense to our program.

If you would like a copy of the results of this study, please check the box at the top of the questionnaire and a copy will be sent to you as soon as the study is complete.

I thank you in advance for your prompt return of this completed questionnaire and I hope this letter finds you in the best of health and circumstance.

Sincerely yours,

JRG:jam

James R. Gran, Administrator

JACKSON COUNTY ADULT EVENING HIGH SCHOOL COMPLETION PROGRAM
Court House
Maquoket, Iowa 52055 Phone: 652-3213

Dear Graduate of 1972:

We have not received, as yet, the questionnaire which was mailed to you about two weeks ago, and we miss and need your response.

We know that you want this study to be as meaningful and accurate as possible. You can help us reach this goal by sending us your completed questionnaire as soon as possible.

In case you have inadvertently misplaced or lost the first questionnaire, we are enclosing another one along with a self-addressed stamped return envelope.

Your participation in this study is most important since many of the decisions affecting this program as well as others will be based upon the results of this study.

So won't you please take a few minutes of your time to complete and return this questionnaire? Thank you for helping us make this study complet.

Sincerely,

James R. Gran
Administrator

EXHIBIT C. - THIRD LETTER

JACKSON COUNTY ADULT EVENING HIGH SCHOOL COMPLETION PROGRAM
Courthouse
Maquoketa, Iowa 52060 Phone: 652-3213

Dear Graduate of 1972:

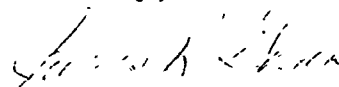

Of the 37 adults who graduated with the Class of 1972, only a few have not returned their completed questionnaires.

Won't you please make the study 100% successful by completing the questionnaire now and returning it today?

Another form and return envelope are enclosed for your convenience.

Thank you for participating in this study and insuring our 100% return.

Sincerely,

James R. Gran
Administrator

Yes I want a copy of the results of this follow-up study.

Follow-up Questionnaire
 Graduates-Class of 1972
 Jackson County Adult Evening High School

General Information:

NAME: _____
 Last First Middle
 PRESENT ADDRESS: _____
 RFD BOX STREET

Present Age: _____ Sex: _____
 in years M or F

Head of Household: Yes _____ No _____

 CITY STATE ZIP CODE

Marital Status: Single _____ Married _____
 Divorced _____ Widowed _____ Separated _____

Check one classification below which best describes your present status:

If married at any time, the number of children in your family: 18 yrs or below _____
 19 yrs or above _____

- Housewife (not working for wages) _____
- Part-time worker (regularly work _____
 part-time
- Full-time worker (regularly work _____
 full-time
- Unemployee worker (temporarily _____
 out of work
- Disabled (cannot work) _____
- Other classification not listed above (Please be specific): _____

Example: if you are employed part or full-time and are also a housewife, check part or full-time worker. Housewife, as used here, indicates you do not work for wages at all.

QUESTIONS:

- 1a. Were you employed at the time you enrolled in the Adult Evening School? Yes _____ No _____
- 1b. If yes, was this part or full-time work? Part-time _____ Full-time _____
- 1c. If yes, by whom were you employed? _____
- 1d. If yes, give type of work or job description of the work. _____
- 2a. Are you employed at the present time? Yes _____ No _____
- 2b. If yes, is this part or full-time work? Part-time _____ Full-time _____
- 2c. If yes, by whom are you presently employed? _____
- 2d. If yes, give type of work or job description of the work. _____

- 3a. Have you had a change in jobs or a promotion on the job since enrolling or graduating from the Adult Evening High School Program? Yes _____
No _____
- 3b. If yes, has this change or promotion been a direct or an indirect result of your attending and graduating from the Adult Evening School Program?
Direct Result _____
Indirect Result _____
Not related to schooling _____
- 3c. If yes, did your income also increase as a direct or indirect result of your completing the Adult Program? Yes _____
No _____
- 4a. Have you benefitted in any other ways, (other than job promotion or change of jobs), by attending and graduating from the Adult High School Program? Yes _____
No _____
- 4b. If yes, in what other ways have you benefitted? _____

- 5a. Do you plan to continue your education beyond high school? Yes _____
No _____
- 5b. If yes, what type of training or education do you plan to continue with? _____

- 5c. Where (what school) do you plan to attend to obtain this training? _____

- 6a. Graduates are now permitted to enroll in the Adult Program, but were not allowed to do so at the time you graduated. Would you be interested in taking additional high school subjects? Yes _____
No _____
- 6b. If yes which subjects would you be most interested in studying? _____

- 7a. Would you recommend that any adult who did not complete his/her high school education do so by attending the Adult High School Program? Yes _____
No _____
- 7b. If yes, why? _____

- 7c. If no, why not? _____

8. In your opinion the amount of work required for graduation was:
- Too much _____
About right _____
Too little _____
9. In your opinion, the quality of instruction you received in the Adult High School Program was:
- Excellent _____
Very good _____
Good _____
Fair _____
Poor _____
10. List any ways in which you think the Adult High School Program could be improved for adult students. _____

11. In completing the following statements in 11 and 12, please confine your choices to subjects that you studied in the Adult High School Program. Required subjects were: English 10 & 11, Math, Science, American History, and Government. Electives would be any other subjects. If you do not feel any one subject was most or least helpful - check box in 11c and 12c.
- 11a. List the one required subject you studied in this program that has been the most valuable (helpful) to you. _____
- 11b. List the one required subject you studied in the program that has been the least valuable (helpful) to you. _____
- 11c. I do not feel any one required subject was most or least helpful. _____
(In other words, all subjects I took were helpful to me.)
- 12a. List the one elective subject you studied in this program that has been the most valuable (helpful) to you. _____
- 12b. List the one elective subject you studied in this program that has been the least valuable (helpful) to you. _____
- 12c. I do not feel any one elective subject was most or least helpful. _____
(In other words all subjects I took were helpful.)
13. At the time you were enrolled were you a tuition or a non-tuition student?
- Tuition _____
Non-Tuition _____
14. If you have any other comments that you would care to make that may not have been covered by the questionnaire, you may make them here.
