### Course Description

This one-day conference, focusing on trauma related issues, is designed for healthcare professionals, nurses, EMTs, EMT-Ps working with trauma victims.

### Program Objectives:

- Understand how advanced imaging techniques can be used for outcome prediction after moderate and severe TBI in children.
- Provide better understanding of the differences of management and outcome in the geriatric population.
- Demonstrate the importance of documenting information when treating patients.
- State the role of the Medical Branch when utilizing the Incident Command System for a Mass Casualty Incident.
- Identify two items that can increase a community's readiness for disaster.
- List two trauma orthopedic emergencies.

### Course Credit

RCRMC, Education Services, is approved by the California Board of Registered Nursing provider number # CEP 511 for 6.5 hours. This course has been approved by California EMS CE Provider # 33-0006 for 6.5 hours of instructor-based CE. Certificate of completion is available for all Trauma Registrars.
