UTI - Contra Fund			
Investment Objective	<p>The fund aims to provide long-term capital appreciation/dividend distribution through investments in listed Indian equities and equity related instruments. The Fund's investment policies are based on insights from behavioral finance. The fund offers an opportunity to benefit from the impact of non-rational investors' behavior by focussing on stocks that are currently undervalued because of emotional and behavioral patterns present in the stock market.</p> <p>The scheme name UTI - Contra Fund is derived from the approach of contrarian investing. Contrarian investing refers to picking and investing in those stocks which are fundamentally strong. These stocks have a high intrinsic value but are currently out of favour or have been overlooked as the market has failed to recognize their potential. The lower price may also be due to investor reaction or behavior towards a company's recent news / information such as poor results, adverse publicity, legal issues or any negative information all of which may create doubts / apprehension about company's future prospects.</p> <p>Over a longer period of time the company's earnings drive the stocks prices and the true market price of a company is unlocked in tandem with its intrinsic value. The unlocked or realized value signifies / reflects the company's fundamentals.</p> <p>Investing contrarianly allows investor to own a portfolio at a bargained price and gain handsomely at the time of value realization. Buying "off season" and selling "in season" would be correct description of such portfolio management.</p>		
Asset Allocation Pattern of the scheme	Types of Instruments	Normal allocation (% of net assets)

Investment Strategy	<p>The fund will be unrestricted and diversified as the potential of the entire universe of equities present in the market could be tapped. The fund will adopt a bottom up approach to identify the universe of companies. The Fund will select stocks that are temporarily undervalued because of psychological patterns present in the stock market. The fund aims to systematically select Indian equities that are likely to be undervalued and hence outperform. Of the universe so selected, the stock picking will broadly be guided by the following criteria:</p> <ol style="list-style-type: none"> 1) The companies which are fundamentally sound and have long term growth potential, 2) The companies have attractive valuations. <p>Subject to the SEBI Regulations, the asset allocation pattern indicated above in respect of the entire scheme may change from time to time, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors. It must be clearly understood that the percentages stated above are only indicative and not absolute. These proportions can vary substantially depending upon the perception of the Investment Manager; the intention being at all times to seek to protect the interests of the Unit holders. Asset allocation pattern may be altered for short period on defensive considerations.</p>		
Comparison with existing schemes	The scheme works with an approach to benefit from non-rational behaviour of the investor/equity markets and focus on out of favour stocks. The portfolio would be a diversified portfolio of "out of favour" stocks which have strong fundamentals.

Investment Strategy	<p>Dividend Yield: Dividend Yield is the ratio (expressed as a percentage) of total dividend declared per share for the previous accounting year divided by the current market price at the time of investment. Dividend yield is calculated as under:</p> $\text{Dividend} = \text{D/P} * 100$ <p>Where,</p> <p>D = Total Dividend Per share declared for the previous accounting year.</p> <p>P = Current Market Price at the time of investment.</p> <p>The fund manager will invest primarily in equity shares that have a high dividend yield at the time of investment. Dividend Yield is considered as high if it is greater than the Dividend Yield of the Nifty last released / published by NSE on its website: www.nseindia.com. Other scrips selection criteria would only be applicable once the initial dividend yield criteria is fulfilled.</p> <p>Though the high dividend yield is the prime factor involved in the evaluation of a company's investment worthiness, investment decisions would not be based on high dividend yield alone. Other parameters such as Business Fundamentals, management competence, growth prospects, industry scenario etc. would also be considered. However, all other factors remaining favorable, investment would be made primarily in high dividend stocks as mentioned above.</p> <p>Under normal circumstances atleast 65% of the scheme's assets would be invested in high dividend yield stocks. The Scheme could also invest in equity shares of other companies i.e. other than high dividend stocks to the extent of 35% of the net assets.</p> <p>Further the scheme may also invest not exceeding 10% of the scheme's assets in debt instruments such as Convertible Debentures, Non Convertible Debentures, Secured Premium Notes, Zero Interest Bonds, Deep Discount Bonds, Short-term deposits, Floating Rates Bonds/Notes and Government securities and Money Market Instruments like Call Deposit, Repos, Commercial Paper, Certificate of Deposit, Treasury Bills etc. This is for providing ongoing liquidity & preservation of capital in a bear market.</p> <p>Subject to the SEBI Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors. It must be clearly understood that the percentages stated above are only indicative and not absolute. These proportions can vary substantially depending upon the perception of the Investment Manager the intention being at all times to seek to protect the interests of the Unit holders. Asset allocation pattern may be altered for short period on defensive considerations.</p> <p>It is perceived that high dividend yielding stocks have a limited downside especially in a falling/bearish market. It is a general belief that high dividend paying companies are rich in cash generations from its business. At the same time high dividend yield might indicate underpricing for the stock in spite of its cash generation. This might help to unlock potential growth for the stock prices. Hence, high dividend yield stocks provide good possibilities of capital appreciation in a reviving market, resulting in good capital gains.</p> <p>Thus, the investment strategy of the scheme would focus on identifying and investing in a basket of high dividend yield companies, which are expected to declare dividends on a consistent basis and also provide an opportunity for capital appreciation due to the high intrinsic value of the underlying stocks.</p>																				
Comparison with existing schemes	UTI Dividend Yield Fund is a diversified equity fund. The scheme portfolio primarily comprises of stocks which are high dividend yielding (on historical basis) or potential high dividend yielding stocks. The scheme has a good mix of companies across various sectors. The scheme aims to distribute regular dividends to its investors.

Investment Strategy	<p>Investment focus and asset allocation strategy</p> <p>Investment in Equities and Equity related Securities</p> <p>The broad Investment strategy of the Scheme will be to invest in equity and equity related securities of companies including those in the derivatives segment. The Scheme aims to build and maintain a diversified portfolio of equity stocks that has the potential to appreciate in the long run. Companies identified for selection in the portfolio will have the potential to grow at a reasonable rate in the long run.</p> <p>Investment in Gold ETFs:</p> <p>Gold has been generally considered as a safe haven during times of economic upheavals and volatile equity markets. Since Gold traded internationally is typically denominated in US dollars, any negative news about the US economy, adversely impacts the value of US Dollar against other currencies of the world and acts as one of the main factors for the rise in Gold Prices, as investors, especially those in US, generally seek to invest in Gold and Gold ETFs to protect their financial risk during such times.</p> <p>The Scheme may invest in Gold ETFs to manage the volatility of equity returns and downturn in equity markets depending upon the market conditions.</p>																		
Comparison with existing schemes	UTI Wealth Builder II has a diversified equity portfolio with gold exposure through investment in Gold ETFs.

<h2>Features Common to all Schemes</h2>																			
Risk Profile of the Scheme	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment. Scheme specific Risk Factors are summarized below:</p> <p>UTI – Nifty Index Fund (UTI-NIF)</p> <p>(a) UTI - NIF are passively managed index funds i.e. the amount collected under the scheme is invested in securities of companies comprising the CNX-Nifty in the same weightages as they have in the Nifty.</p> <p>(b) The composition of the CNX – Nifty is subject to changes that may be effected periodically by the IISL.</p> <p>(c) Performance of the CNX – Nifty will have a direct bearing on the performance of and UTI - NIF.</p> <p>(d) The extent of the Tracking error may have an impact on the performance of the UTI - NIF.</p> <p>UTI - MNC Fund</p> <p>There may be risk associated due to limited diversification of the portfolio.</p> <p>UTI - Master Value Fund</p> <p>The scheme will use a bottom up approach to investing. While the scheme will utilise in depth fundamental research to select stocks, there is always a potentially high element of risk. This risk arises from investing in mid cap and small cap stocks where the business is still young and growing and the business model in some cases is vulnerable to changes in macroeconomic or sector specific conditions.</p> <p>UTI – Mastershare Unit Scheme, UTI - Dividend Yield Fund, UTI - Leadership Equity Fund, UTI - Opportunities Fund & UTI - Contra Fund</p> <p>The scheme intends to deploy funds in money market instruments to maintain liquidity. To the extent that some assets/funds are deployed in money market instruments, the scheme will be subject to credit risk as well as settlement risk which might affect the liquidity of the scheme.</p> <p>UTI - Dividend Yield Fund</p> <p>Risk associated with high dividend yield stocks:</p> <p>Though the investments would be in companies having a track record of dividend payments, the performance of the scheme would inter-alia depend on the ability of these companies to sustain dividends in future. These stocks, at times, may be relatively less liquid as compared to growth stocks.</p> <p>UTI - Leadership Equity Fund</p> <p>The investment focus is on select companies/industries/sectors of the market and hence the portfolio may be concentrated in these companies/sectors/industries. This may make the portfolio vulnerable to factors that may affect these companies/sectors/industries in general thereby leading to increased volatility in the movement of the scheme's NAV.</p> <p>UTI - Opportunities Fund</p> <p>The investment focus is on select sectors of the market and hence the portfolio will be concentrated in select companies across these select sectors. This may make the portfolio vulnerable to factors that may affect these sectors in general thereby leading to increased volatility in the movement of the scheme's NAV.</p> <p>UTI - Contra Fund</p> <p>(a) Time Risk is inherent as to how long will it take for the companies to realize the true value can not be predicted. Further all times there may be risk of short term under performance.</p>																		

- (b) The scheme aims to invest in stocks which are undervalued as they are out of favour currently with the anticipation that soon the stock will find their true price. But, due to various reasons it may so happen that such stocks continue to languish and are not able to attain the price discovery.
- UTI - Banking Sector Fund**
- (a) The Bank's performance is highly correlated to the performance of the economy and the financial markets which in turn depends on the domestic economic growth, state of the global economy and business & consumer confidence, among other factors. Any event disturbing the dynamic balance of these diverse factors would directly or indirectly affect the performance of the Bank.
- (b) Increased competition in the banking sector has raised the overall standards in respect of the level of quality of services demanded. Thus, the banks are vulnerable to any changes in the quality of services demanded /provided.
- (c) Any changes in the Govt. policy pertaining to taxation / regulations etc might have significant bearing on the sector. Also any change in structural reforms / banking regulations act can have an adverse affect on the working of the banks.
- (d) The financial sector is also vulnerable to the interest rate movements / exchange rate fluctuations which might adversely affect their profitability.
- UTI - Infrastructure Fund**
- (a) Sectors like Metals, Building Materials, Oil & Gas, Chemicals, etc. are exposed to the variations in commodity prices like metal, crude, polymers, etc. Hence any domestic or international factors affecting the price movements will have an adverse affect.
- (b) Any changes in Govt. policy / regulation / reforms etc. affecting infrastructure industries such as Power, Housing, Infrastructure, etc may have a significant bearing on the companies.
- UTI - Mid Cap Fund**
- (a) Due to general illiquidity in the small cap securities, realisation of investment objective may take more time than expected.
- (b) These companies being smaller in size may get affected adversely due to prolonged recession /economic slowdown.
- UTI - Transportation & Logistics Fund**
- (a) The automobile sector is vulnerable to the domestic as well as the world economy. Events such as recession, war, monsoon, political upturn, etc. in India as well as in the export markets may adversely affect the companies.
- (b) Taxes and other levies imposed by the Gol on the acquisition and ownership of vehicles as well as increase in fuel prices may have an adverse effect on the demand.
- (c) Excessive competition from domestic as well as international players will have a significant bearing on the sector.
- (d) Price variations in the key input materials of auto components may affect profitability to that extent.
- (e) The companies are subject to risks arising from exchange rate fluctuations.
- (f) Changes in emission norms affect the costs and hence profitability of auto companies.
- Sector Specific Risk Factors UTI - Growth Sectors Fund**
- The objective of the scheme is to invest predominantly in the stocks of respective sectors as indicated elsewhere in the Scheme Information Document or of those sectors which may be added later; which may be subject to the sector specific risks due to the change in government policies relating to the concerned sector and sector specific new developments in the Indian and the international markets. There is a risk associated with non-diversification of the portfolio of a fund across different sectors of the economy.
- Energy Fund**
- A fluctuation in the international crude prices will impact the margins of oil marketing companies negatively in case they are not able to pass on the higher cost to the consumers. As most of the companies in the Petro-Sector are in the public sector, any action or inaction on the part of Government may affect the valuation of oil companies. Petrochemicals being commodities, their prices are subject to cyclical fluctuations and thus may affect the profitability of companies engaged in their production.
- Pharma and Health Care Fund**
- (a) Pricing of drugs is subject to price control and any reduction in prices of bulk drugs/formulations manufactured by pharma companies may affect the valuation of the concerned companies adversely.
- (b) Proposed pruning of list of drugs from Drug Price Control Order (DPCO) may take longer than expected.
- (c) High competition in the generics market may impact the margins of Indian pharma companies.
- (d) Other barriers for growth of pharma companies could be inadequate patent infrastructure, weak redressal system for patent infringement etc.
- (e) INR appreciation may hit Pharma companies competitiveness and margins.
- Services Sector Fund**
- (a) Prolonged recession / economic slow-down may affect most of the industries in the service sector.
- (b) Increased competition in most of the industries in the service sector, has raised the overall standards in respect of the level of quality of services demanded. Thus, the companies in this sector are vulnerable to any changes in the quality of services demanded / provided.
- (c) Presence of unorganized sector on account of low capital requirements and few entry barriers poses a significant risk to the organized players in some of the industries engaged in service sector.
- (d) Any changes in the Govt. policy pertaining to taxation / regulations etc might have significant bearing on the services sector.
- UTI - Wealth Builder Fund – Series II**
- Risk factors relating to investments in Gold ETFs:**
- (a) The price of gold may fluctuate due to various reasons which are:
- (i) Global gold supplies and demand, which is influenced by factors such as forward selling by gold producers, purchases made by gold producers to unwind gold hedge positions, central bank purchases and sales, and productions and cost levels in major gold producing countries such as the South Africa, the United States and Australia.
 - (ii) Investor's expectations with respect to the rate of inflation.
 - (iii) Currency exchange rates.
 - (iv) Interest rates
 - (v) Investment and trading activities of commodity funds/hedge funds.
 - (vi) Global or regional political, economic or financial events and situations.
- In addition, there is no assurance that gold will maintain its long-term value in terms of purchasing power in the future. In the event that the price of gold declines, the value of investment in units in which the scheme has invested will, in general decline proportionately.
- (b) There may be certain circumstances that may motivate large-scale sales of gold by the issuer of Gold ETFs which could decrease the price of gold and adversely affect the value of investment in the Gold ETFs in which the Scheme has invested.
- (c) The gold underlying the Gold ETFs in which the Scheme has invested may be subject to loss, damage, theft, or restriction on access. There is a risk that part or all of the underlying gold of the Gold ETFs could be lost, damaged or stolen. Access to the said gold could also be restricted by natural events (such as earthquake) or human actions (such as terrorist attack). Any of these actions may adversely affect the investment value of the Gold ETFs in which the Scheme has invested.

	<p>(d) Impact cost risk: Impact costs are implicit costs also which is paid by liquidity demanders to liquidity providers. Generally, the best bid and ask prices quoted in the market are for only small transactions. Larger transactions may have to be executed at even less favorable prices. The additional cost is called an impact cost. For eg. if the ruling market price of a security is ₹ 500/- one may be able to buy/sell small quantities for that price. But, if one wishes to buy/sell huge quantities he might have to pay /receive higher/lower price. Similarly, absence of adequate liquidity of Gold ETF units may impact the cost of purchasing and selling the Gold ETF units.</p> <p>(e) Changes in indirect taxes like custom duties for import, sales tax, VAT or any other levies will have an impact on the valuation of gold and consequently the NAV of the units in which the scheme has invested.</p>

The holding period for applicability of load will be considered from the date of such switch to Direct Plan.</p> <p>(b) However, no exit load shall be levied for switch of investments from Existing Plan made directly without an ARN Code (whether the investments were made before or after January 1, 2013) to Direct Plan of the scheme (subject to statutory taxes and levies, if any). Comparison with existing schemes	UTI-Bond Fund is an income scheme investing in medium to long term duration papers with the flexibility to invest in short term papers based on investment views. The scheme takes active duration calls along with credit calls and thus witnesses a certain amount of volatility compared to ultra short term or short term category of funds. In terms of risk return matrix, the Bond Fund would be in a higher risk-return quadrant vis-à-vis the Ultra Short Term category.

It has the ability to mimic a Cash Fund when interest rates are rising thereby preserving capital and it can generate the attractive returns of an Income Fund when interest rates are declining. It will be a fund which could be positioned between a short term fund and a medium/long term fund.																					
Comparison with existing schemes	UTI-Dynamic Bond Fund will be an aggressively managed Fund taking active duration calls.

Investment Strategy	The scheme would seek to invest in debt instruments of varying credit rating with the intent of generating returns and at the same time ensuring reasonable liquidity. The scheme would invest in a reasonably diversified portfolio comprising debt instruments like debentures, securitized debt in the form of well seasoned pools / single loan PTCs etc to capitalize on investment opportunities in debt segment which are currently mispriced and which in the view of the fund manager has a potential for some rectification.	
Comparison with existing schemes	UTI-Income Opportunities Fund may invest upto 50% of its net assets in securities carrying a rating below AA (or equivalent) predominantly investing across credit spectrum unlike the UTI Bond Fund which will restrict its papers to high quality debt of rating AA- & above only. The period and mode of contribution once exercised is final and cannot be changed. (b) When the unit holder joins the 10 year plan, the amount of each contribution shall be 1/20th of the target amount in the case of the half-yearly mode of payment and 1/10th of the target amount in the case of the annual mode of payment. In the event of non-receipt of an instalment from the unitholder, premium will be paid to the Life Insurance Corporation of India or any other insurance company by redeeming the existing units subject to authorisation by the unitholder in the application form and availability of sufficient units in the unitholder's folio.
