

County wants to hear from you about how we are doing!

All 58 counties in the state are doing **case reviews and talking to clients** to find out if there are things we did that were great, and if there were things that could be done better.

County will be contacting you to meet with you soon. Your **participation is voluntary** and any information you share:

- is **confidential** (it won't be shared with your social worker or care provider),
- **will not affect the outcome** of your case, and
- **will not affect any benefits** you or your family may be receiving.

If you have any questions, please call the number below.
