---	--	--	--

28. DESCRIPTION OF PROJECT *(Include project info, services, benefit/value, results, relevance, references, photographs/diagrams, awards/certifications, team members)*

This project included a new Elementary School for grades K through 3rd, a new Middle School for grades 6th to 8th, and additions and renovations to the existing High School auditorium and entrance. The Elementary School is a single-story building with five classrooms for each grade. The Middle School has a three-story classroom wing with one grade level for each floor, and single-story wing to house the cafeteria, gymnasium, offices, media center, art, music, and special education. The High School auditorium is built directly in front of the existing theater and includes 1,000 seats and a stage with a 50 ft. high fly gallery. The backstage area includes a shop, storage area, and two dressing rooms.

NV5 is preparing the specified cost and resource-loaded baseline CPM schedule in compliance with the Ohio Facilities Construction Commission (OFCC) OAKS CI management system standards on all three projects. Furthermore, we are also preparing monthly schedule updates and schedule analysis during the planned 15 month construction duration.

NV5 successfully worked with Mid-American to coordinate the multiple contractors during schedule development and obtained approval of the overall master schedule for the Project.

27. PROJECT OWNER'S INFORMATION

a. PROJECT OWNER Whiting-Turner Contracting Company	b. POINT OF CONTACT NAME Doug Zwilling	c. POINT OF CONTACT PHONE NUMBER 216-260-0400	d. POINT OF CONTACT E-MAIL ADDRESS doug.zwilling@whiting-turner.com
---	--	---	---

28. DESCRIPTION OF PROJECT *(Include project info, services, benefit/value, results, relevance, references, photographs/diagrams, awards/certifications, team members)*

The contract work performed by Whiting-Turner included a group of new residential buildings, a new twelve hundred space parking garage, and the relocation of athletic playing fields including a new field house. The residential buildings included approximately 414,000 total sq. ft. of residential space and are built surrounding CWRU's new football/soccer field and track, along three sides, with the new parking garage closing the fourth side. The houses are comprised of 174 apartments, including full kitchens, living rooms, 749 single bedrooms with double beds, bathrooms, seven house lounges with fireplaces, air conditioning, thirteen group study halls, seven music practice rooms, indoor bike storage, six laundry rooms, fitness center, varsity locker and training rooms, convenience store, clock tower, and a cyber café.

NV5 assisted Whiting-Turner with the development of the overall master CPM project schedule which incorporated over thirty major subcontractors. Whiting-Turner also utilized NV5's staff to provide update services through the project duration. NV5 subsequently provided construction claims analysis in order to successfully resolve change impact and acceleration damage cost. The successful resolution was obtained through mediation with the owner and its designers.

The fast-tracked project delivery required phased design and release to construction for the housing units, field house, parking garage and athletic fields. This required the project schedule to be developed and maintained to support this phased approach.

The schedule was updated on a monthly basis and was utilized by the CM Team to aid in managing the project.

29. FIRMS FROM SECTION C INVOLVED WITH THIS PROJECT

a.	(1) FIRM NAME	(2) FIRM LOCATION <i>(City and State)</i>	(3) ROLE / RELATIONSHIP

25. TITLE AND LOCATION <i>(City and State)</i> John Carroll University – Murphy Hall Renovation University Hts., OH		26. YEAR COMPLETED CONSTRUCTION (if applicable) 2014
27. PROJECT OWNER'S INFORMATION		
a. PROJECT OWNER The Krill Company	b. POINT OF CONTACT NAME Dan Audia	c. POINT OF CONTACT PHONE NUMBER 216-357-4777
d. POINT OF CONTACT E-MAIL ADDRESS dan@krill.com		
28. DESCRIPTION OF PROJECT <i>(Include project info, services, benefit/value, results, relevance, references, photographs/diagrams, awards/certifications, team members)</i>		

Murphy Hall, originally build in 1964, is John Carroll University's largest residence hall at 95,000 sq. ft. The renovation and modification project included the complete demolition and renovation of the interiors while preserving the Gothic architecture that is part of John Carroll University's identity. In addition, two 8,000 sq. ft. additions were added to accommodate multiple updated living options, more private bathrooms, study areas, an open concept lounge, and health center.

NV5 engaged with the design/build construction manager and their subcontractors to develop the detailed design, bid, build construction CPM baseline schedule before construction started in the spring of 2013. In addition, NV5 prepared monthly schedule updates, changes impact analysis, and resequence / recovery schedules. The project completed on schedule in the summer of 2014.

The Project was completed on time and on budget with no claims or disputes. Murphy Hall has earned LEED Silver Certification, the first building on the John Carroll University campus with LEED certification

28. DESCRIPTION OF PROJECT *(Include project info, services, benefit/value, results, relevance, references, photographs/diagrams, awards/certifications, team members)*

Originally built in 1974, this aging structure required extensive interior and exterior renovations to become a four-star Westin hotel with its own signature restaurant in April 2014. Highlights of the project include complete interior renovation of all 484 guestrooms and all public spaces, replacement of all roofing and glazing, increased insulation, and new lighting and mechanical equipment which will produce significant energy savings and result in LEED certification of the project.

NV5 provided onsite owner representation services for the out-of-town developers of this marquee project. Services included change order and payment application analysis, tracking of allowance work done on a time-and-material basis, schedule analysis, and quality control of construction. In addition, NV5 oversaw the pre-construction phase which included contract development, document review, project scope review and value engineering to reach a guaranteed maximum price. NV5 worked closely with the ownership team and adjusted its level of service as the project progressed through different stages

---	--	--	--

28. DESCRIPTION OF PROJECT *(Include project info, services, benefit/value, results, relevance, references, photographs/diagrams, awards/certifications, team members)*

The project consisted of a new four-story, 89,000 sq. ft. hotel near the Oklahoma City airport. The hotel includes 134 guest rooms, meeting rooms, fitness center, restaurant/lounge, and indoor swimming pool.

Initially, NV5 was commissioned by the surety to work with the general contractor to assess the overall project status and prepare a detailed completion CPM schedule to track and monitor progress. NV5's work scope expanded to include compiling subcontractor information to prepare and submit change order requests, and acting as a liaison between the surety, general contractor, subcontractors, and owner representatives. NV5 initiated, developed and maintained a detailed process to prepare and monitor the room-by-room project completion punchlist. NV5 also worked closely with the surety to negotiate and close-out subcontracts and to resolve claims in order to close-out the owner contract

34a. PROVIDE ANY ADDITIONAL INFORMATION REQUESTED BY THE CONTRACTING AUTHORITY. ATTACH ADDITIONAL SHEETS AS NEEDED.

Summary

NV5 is an experienced and qualified owner’s agent firm, but more importantly, we have the team depth to commit an experienced team or teams to your exciting project(s). As we believe you can see from reviewing our qualifications, we are a broadly-experienced firm with many repeat clients across Ohio and the country. As a company we make a pledge to our clients to provide them with the highest level of commitment to every detail of their project.

Our team has a diverse background in engineering, construction, cost management, and design to bring our clients a well-rounded approach. While serving a diversified spectrum of client types and building types, proactive project controls have been a cornerstone of our success since our inception.

While many firms are capable of getting the job done, we will excel in this role with your team. Several key items that will distinguish us from other firms seeking to work with you:

- We LISTEN first and will be an extension/partner of your team, executing projects in alignment with your philosophies, not our own pre-set agenda;
- Our firm’s “whatever it takes” mentality is contagious and invigorating;
- We take our work very seriously, but never take ourselves too seriously;
- We are proud and passionate about our focus on proactive management and risk mitigation;
- Our Chagrin Falls Office understands the nuances of Ohio construction;
- We focus on efficiency for ourselves and the project team. This will translate to cost savings on our services and across the project budget;
- We foster a strong team approach, which allows for great problem solving and creativity throughout the project.
- Architects, Engineers and Contractors like working with us because they know we are firm, but fair and that we plan projects well so that they can stay efficient in their efforts as well;
- We treat every dollar as if it was our own, and recognize the importance of transparency to the State and each local community;
- We are experienced with the Ohio Capital Projects Administration Process
- We have extensive experience in renovation projects within operational facilities, especially in the public sector
- We have the experience: over \$4.8B projects completed
- Our Project Controls resources have unparalleled skills and are the preferred choice for notable Ohio institutions such as Cleveland Clinic and University of Cincinnati when it comes to ensuring their projects are completed on time and under budget.

From design to construction and through close-out/staff move-in, our team is well versed in the challenges to help the Ohio Department of Natural Resources reach its goals. We realize each project has unique requirements and demands, which in turn requires a specific configuration of services from the Owners Agent to maximize value to each individual client. We look forward to an opportunity to be short listed and participate in the proposal stage so that we may further demonstrate our commitment to each specific project and community. Thank you again for considering us for this opportunity.

DISCLOSURE OF PAST PERFORMANCE

The Lead Firm or Joint Venture and all Consultants identified in Section C shall disclose any lawsuits or claims initiated by public owners or requests to address issues on past projects by responding to the following questions. Summarize all team member firms on one page. Please indicate "none" for each firm when appropriate.

1. List any lawsuits, claims, or demands, related to the company or organization's participation on any public contract, during the past 5 years, whether the lawsuit, claim or demand was initiated by the public owner against the company or organization or initiated against the company or organization in its capacity as a subcontractor.

NV5's Program Management Vertical has never been involved in any lawsuits or claims. However, a separate division of NV5 has had two claims within the last five years that were resolved for a nominal cost and the company was not found liable in either matter. The two claims summarized below for NV5, Inc. a California corporation (which was formerly known as Nolte Associates, Inc.):

- City of Manitou Springs v. Nolte, Colorado
- City of El Centro v. Nolte, California

2. In the past five years, has the company or organization been requested by a public owner to return to address construction workmanship, performance, or installation issues. If yes, please state the project and type of contract, and describe your response to the request.

No
