## **E-RATE YEAR 18 (2015/2016) Request for Proposals**

### Specifications:

This RFP is part of our development for the Desert Sands Unified School District Private Cloud. We began the process of informally evaluating several technologies toward the DSUSD Private Cloud during the 2010-2011 school year. This RFP is part of the future technologies that our district will implement in the next five (5) years.

In this RFP we have included components that are both eligible and ineligible under the E-rate program. The majority of the components are not eligible and the components that qualify for discount under the e-rate guidelines will be indicated below.

### Trade Names and Alternatives:

For convenience in designation on the plans or in the specifications, certain articles or materials to be incorporated in the work may be designated under a trade name or in the name of a manufacturer and his catalogue information. The use of an alternative article or material which is of equal quality and of the required characteristics for the purpose intended will be permitted, subject to the following requirements: The burden of proof as to the quality and suitability of alternatives shall be upon the Service Provider and he shall furnish all information necessary as required by the District. The District shall be the sole judge as to the quality and suitability of alternative articles or materials and his decision shall be final. Whenever the specifications permit the substitution of a similar or equivalent material or article, no tests or action relating to the approval of such substitute material will be made until the request for substitution is made in writing by the Service Provider, enclosed in the sealed bid packet, and accompanied by complete data as to the equality of the material or article proposed.

The Desert Sands Unified equipment is CISCO, however any equivalent or better may be considered as long as RFP specifications are met.
