

Report on
5% sample check of U-DISE 2013,
Maharashtra

Submitted to

State Project Director
Maharashtra Prathamik Shikshan Parishad, Mumbai,

Indian Institute of Education,
128/ 2, J.P. Naik Path, Kothrud, Pune- 411038

Acknowledgment

Maharashtra had 8 educational regions which comprising 35 districts including Mumbai. Out of them 8 districts were selected for 5% of U-DISE sample checking from 8 regions. These districts were selected through SSA-Maharashtra with the help of guidelines received from NUEPA. U-DISE is the unique district information system of education the information was collected through schools and feed in computer at BRC level. Guidelines were issued by NUPEA and MHRD for 5% sample checking of UDISE. Order was issued by State Project Director, MPSP Mumbai to Indian Institute of Education for this work.

We are grateful thanks to State Project Director and Officers of **Maharashtra Prathmik Shikshan Parishad Mumbai** for fullest co-operation in successes fully completion of this work. District Education Officers, Assistant Project Officers and Programmers of districts gave best co-operation. Block education officers, headmaster at school level were very helpful.

We are grateful to Honorable Chairman and Honorable Secretary, BOT of IIE for inspiring as undertake this study and made valuable suggestion from time to time.

We thank all those who have helped in this field study directly or indirectly. We are grateful thanks to all of them.

M. S. Kamble
Nodal Officer (SSA & MDM Monitoring)
Indian Institute of Education, Pune

Glossary of Terms

Class Size:	Average number of students together in a class enrolled.
Completion rate:	The percentage of pupils/students enrolled at the beginning grade/year of the level of education that finished or graduated from the final grade/year at the end of the required number of years of that level of education.
Data:	Refers to the smallest unit or item, which represents a fact e.g. name, standard, age etc.
Database:	Refers to all related files compiled or put together as one group.
Education Management	
Information system:	Refers to an organized group of information and documentation services that collect, store, process, and analyse and disseminate information for educational planning and management.
Education system:	Refers to the entirely organized and sustained process of providing education to groups of people regardless of age according to their learning needs. The activities, structure and hierarchy may differ from one setting to another. The process of delivery to the learners comes in such basic forms as formal and Non-formal by either a public/government entity or a private organization.
Educational Management:	A process of creating conditions or situations necessary for maintaining quality of education.
Gross enrollment Ratio:	Refers to the total enrolment of students in a grade or level of education, regardless of age, expressed as percentage of the corresponding eligible official age-group population in a given school year.
Net enrollment Ratio:	Refers to the number of students enrolled in the official specific age group expressed as a percentage of the total population in that age group.

Repetition Rate:	Percentage of pupil/Students /who enroll in the same grade/year more than once to the number of pupils/ students enrolled in that grade/year during the previous year.
Rural Area:	Refers to areas outside of the municipal and city corporation areas.
Transition Rate:	Percentage of students who graduated from one level of education e.g. primary, secondary, etc. and moved on or enroll to the next higher level.
Urban Area:	Refers to the area covered by municipalities and city corporations in the country irrespective of locality.

Executive Summary

Free and compulsory education to all children up to the age of fourteen years is our constitutional commitment. The Govt. of India has initiated a number of programmes to achieve the goal of universalisation of elementary education. Among the several programs SSA is one of the integrated flagship program launched in 2001-2002 its aim to provide useful and quality elementary education to all children in the 6-14 age group by 2010.

For effective implementation of such large scale program collecting information, analyzing the results identifying corrective course, on the actual situation assume much significant. Accurate information is important to the originations engaged in education activities. Relevant information is vital for effective performance a managerial functions as planning organizing leading and control. It is also useful for proper implementation of program, realign strategies activities and to measure the results.

U-DISE data is collected through structured schedule consisting of information from school. Reports are being proposed and submitted to MHRD. In addition to establish information provided by the project authorities concerned, and external institutions conduct similar survey. As U-DISE five percent sample survey, the appropriate MIS in essence properly guards the SSA.

The present report is based on data collected through 5% sample of actual data in Maharashtra. The report is aimed a verification of data collected through U-DISE and to observe similarities as well as fluctuations and it is submitted for which Not only refining the data. But it is useful to internal consistency of data to facilitate decision making process in educational management.

As per the desire of the MHRD, GoI the 5% sample check of the survey data by an external research agency has been asked by the State Project Director, SSA. The Indian Institute of Education Pune has taken up the study in 8 Districts of Maharashtra i.e Raigad, Sindhudurg, Nandurbar, Solapur, Beed, Nanded, Gondiya, Washim. The report is aimed at verification of data collected through SURVEY and verifies data similarities as well as fluctuations, if any. In essence, thus report is solely aimed at verification of actual data collected and submitted and thus leading to refining and also to maintain internal consistency of data to facilitate decision-making process in educational management.

Findings of the Study

- 2012-13 of this year compare to DISE 2011-12. With the help of NIRD report for last year (2011-12).

After studying overall difference was observed in pre data (data feed from MIS format through BRC/DPO) and 5% sample survey data items 7.28% and thereby giving an accuracy level of 92.72%. The maximum difference in data is noticed in management of school, additional rooms, in position of teachers, condition of boundary wall, number of toilets, source of drinking water and School building. It may be happened because of the respondents inability to interpret the item or it may be wrongly reported figures in UDISE data / format. In the available comparable data, some schools did not provide the information about some of the items.

- It was found less difference than average, in comparison between pre data and sample survey data. In school category (2.73%), lowest/highest class, type of school(0.36%), shift school(3.19%), residential school (0.36%), electricity facility in school (5.93%), availability of playground (4.01%),availability of kitchen shed in (1.64%) school.
- The items like name of the school, establishment year/recognition year, name of H.M. number of blackboards in schools have not been reported properly. Hence, it was felt difficult to calculate the difference on such variables.
- Because of the full co operation of DPO /BRC officers/ official's we haven't faced problems for collecting the data from schools. But some schools were not opened within the stipulated date. Because of this situation were changed, for collecting data with help of BRC/ DPO officials.
- It is found that among the sample schools most of the school teachers come in time to school.
- More than 85% Head Masters/ concerned teacher were able to provide required information pertaining to school though records. Initial reaction of principal/head teacher was also good in most of the schools. The school record was available in most of the schools, the concerned authority was unable to provide perfect information from single register. 75% schools have school report card, 90.60% schools have photo copy of UDISE, 79.29% schools have display board but in most of the schools have not used it properly.

The result of passing percentage of girls is higher than the boys in SSC and HSC result. Passing percentage of open category is higher than SC/ST.

Chapter: 1

Introduction

Free and compulsory education to all children up to the age of fourteen years is our constitutional commitment. The Govt. of India has initiated a number of programmes to achieve the goal of universalisation of elementary education. Among the several programs SSA is one of the integrated flagship program launched in 2001-2002 its aim to provide useful and quality elementary education to all children in the 6-14 age group by 2010.

For effective implementation of such large scale program collecting information, analyzing the results identifying corrective course, on the actual situation assume much significant. Accurate information is important to the originations engaged in education activities. Relevant information is vital for effective performance a managerial functions as planning organizing leading and control. It is also useful for proper implementation of program, realign strategies activities and to measure the results.

U-DISE data is collected through structured schedule consisting of information from school. Reports are being proposed and submitted to MHRD. In addition to establish information provided by the project authorities concerned, and external institutions conduct similar survey. As U-DISE five percent sample survey, the appropriate MIS in essence properly guards the SSA.

The present report is based on data collected through 5% sample of actual data in Maharashtra. The report is aimed a verification of data collected through U-DISE and to observe similarities as well as fluctuations and it is submitted for which Not only refining he data. But it is useful to internal consistency of data to facilitate decision making process in educational management.

1.1 General information :

Education Information:

Sr. No.	Introduction	Details
1	No. of District in State	35
2	No. of District allotted	8 district (one from each region)
3.	Name of District allotted	Raigad, Sindhudurg, Nandurbar, Solapur, Beed, Nanded, Gondiya, Washim
4.	1 st phase period of visit	1 st April 2013 to 30 th April 2013
5.	Dist. Covered in 1 st Phase	Raigad, Sindhudurag, Nandurbar, Soapur.
6.	2 nd phase period of visit	15 th June 2013 to 15 th July 2013
7.	Dist. Covered in 2 nd Phase	Nanded, Beed, Gondia, Washim

1.2 Study Area: The area chosen for sample study which consists of eight regions, one district was selected from each region. Eight districts were randomly selected for sample study. Total 1096 schools were visited as sample from eight districts.

Table 1. District wise number of schools visited:

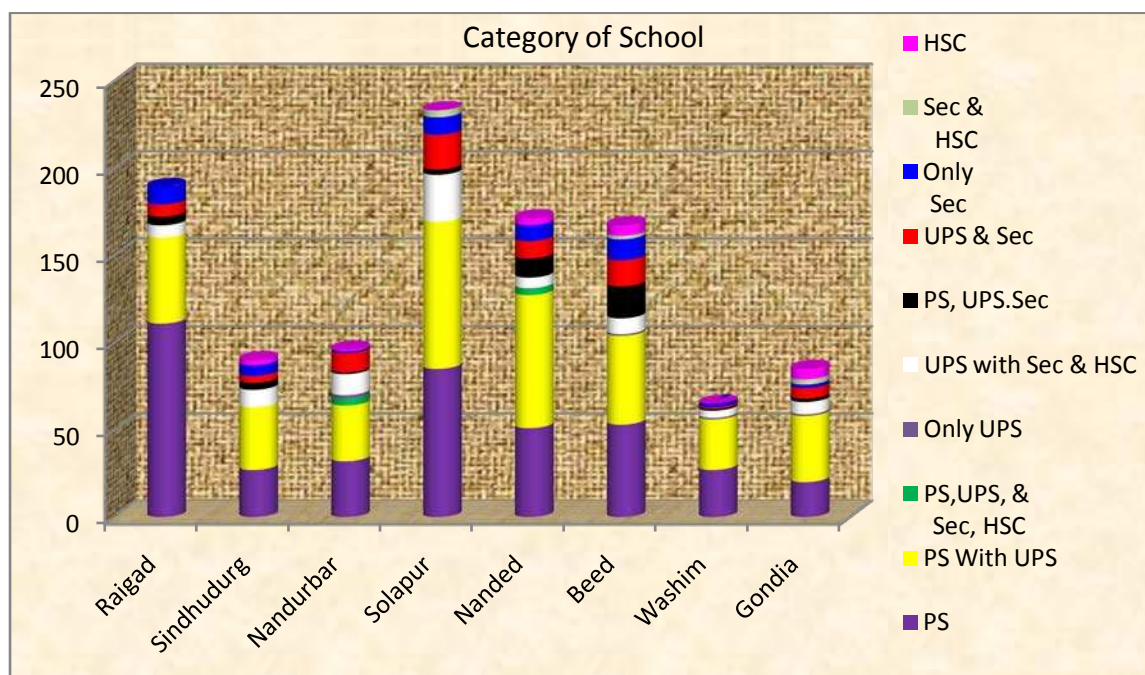

Sr No	Region	District	Total schools in district	5 % of schools	Total visited schools
1	Mumbai	Raigad	3778	189	189
2	Kolhapur	Sindhudurg	1773	89	90
3	Nashik	Nandurbar	1976	98	96
4	Pune	Solapur	4551	228	233
5	Aurangabad	Nanded	3493	172	171
6	Latur	Beed	3277	164	167
7	Amravati	Washim	1280	64	65
8	Nagpur	Gondia	1640	82	85
	Total		21768	1086	1096

As per order received by MPSP Mumbai numbers of schools were allocated as per 2012-13 U-DISE data. As per guidelines and MoU of 5 % of sample schools were selected. So the changed in number of schools. School list was provided by DPO officials for sample checking. In case of school was not opened for two visits or very difficult to visit or school was closed for long time, the other school was selected with the help of BRC Officer and DPO officials.

1.3 Distribution of sample schools visited by category and District:

District	Sample Size	Category of Schools									
		PS	PS with PS UPS	PS,UPS, & Sec, HSC	Only UPS	UPS with Sec & HSC	PS, UPS. Sec	UPS& Sec	Only Sec	Sec & HSC	HSC
		1	2	3	4	5	6	7	8	10	11
Raigad	189	111	49	0	0	7	5	7	10	0	0
Sindhudurg	90	27	36	0	0	10	4	4	6	0	3
Nandurbar	96	32	32	4	2	12	1	11	1	0	1
Solapur	233	85	84	0	0	27	3	20	10	4	0
Nanded	171	51	76	4	0	6	11	10	9	0	4
Beed	167	53	51	0	1	9	18	15	12	2	6
Washim	65	27	29	0	1	4	1	1	2	0	0
Gondia	85	20	38	0	1	7	2	6	2	3	6
Total	1096	406	395	8	5	82	45	74	52	9	20

Table 2. Category of schools

The above Table No.2 gives a clear view of district-wise and school category wise distribution of the sample. Out of total 1096 sample schools, 406 (37.04%) schools were selected from Primary schools , 395 (36.04%) schools from Primary with Upper Primary, 8 (0.72%) from primary with secondary and higher secondary sections, 5 (0.45%) from Upper primary only, 82 (7.48%) from Upper primary with secondary and Higher secondary sections, 45 (4.11%) from primary and Upper primary with secondary, 74 (6.75%) from Upper primary with secondary, 52 (4.74%) from only secondary, 9 (0.82%) from secondary with Higher secondary and 20 (1.82%) from only higher secondary respectively.

1.4 Selection process for schools:

As per guidelines received from NUEPA New Delhi through SSA of Maharashtra. The following procedure was carried out for selection of 5% sample checking of school.

The State Project Director, MPSP had given orders and the MoU was done in between State Project Director and Member secretary of institute on 31st March 2013. The District Education authorities were approached by the monitoring institute and were informed about the monitoring work of UDISE 5% sample of checking of schools assigned to the institute. The selection criteria fixed by NUPEA were communicated to DPO along the visit plan of the district. MPSP authorities gave the same instructions to the district authorities about 5 % of sample checking of UDISE, and provide necessary information and arrangements. Accordingly the correspondence and discussion on the

telephone with DPO has been started. A visit plan along with selecting criteria of schools had been sent well in advance to the DPO. DPO had send list of selected school before conducting the visit. As per list of selected school visit were conducted. The visit were conducted in the period of 3rd April 2013 to 30 April for 4 districts and 15th June to 15th July 2013for 4 districts.

1.5 Selection criteria for schools

Selection criteria of school provided by the NUEPA through MPSP. The selection criteria of school is as given below.

- a. Rural and Urban School
- b. All types of school management
- c. School Located in SC,ST and minority area
- d. Secondary and Higher secondary schools covered under DISE first time
- e. 5% school from block from districts.

The institute had send format and letter for selection of schools as per criteria. The schools were selected by Block level Officials and approved by of DPO. Five percent of the schools appropriately representing school across the state were selected for deriving sample for the study. While confining to the sampling care has been taken to emphasis, on type and category of schools by ensuring the representation of both rural and urban different types of management of schools namely Government, Private Aided, Private Unaided, Permanent Unaided, Tribal Department, Social Welfare, Unrecognized, etc.

1.6 OBJECTIVES OF THE REPORT

The main objectives of the study as:

1. Evaluate the quality check of the U-DISE Data
2. To find out similarity and dissimilarities filled U-DISE format by the school.
3. To find out difference of actual position and in U-DISE format.
4. Suggest measures for strengthening information along with causes regarding U-DISE to MPSP.

1.7 Limitations of the study

The study has confronted the following limitations

- Difference in formants for post enumerations survey and previously collected data.
- Coverage of all types of schools management
- Unfilled or wrongly filled columns in prescribed format by school.

NUEPA/ Govt. of India designed the format of sample checking was used for collection the data. The schools head teacher were not filled the MIS format properly from some of the schools.

Particularly in case of management there was found difficulty, as school had some aided and some unaided classes in those cases the criteria was not clear to filled the management. In same way the number of class rooms the small rooms were Not covered, result of XII format was different, difficulty to filling of enrollment for some schools.

1.8 Collection of Data

As per questionnaire was used as a tool, which was provided by NUEPA New Delhi through MPSP. It was approved with the help of MPSP officials

Span of less time and the task it required number of investigators. The investigators were identified and were selected from retired CRC coordinators, Extension Officers of education Dept. They were well known the DISE format. They were trained thoroughly in method of data collection. The schools were informed by DPO and BRC to keep record ready to the concern schools.

MPSP had given a letter to the DPO for local arrangement of investigator for visit the school from block level. Investigators observe the actual position and records thoroughly. They filled the provided form of UDISE with the help of Head Master/Principal of the school, in this way data was collected.

1.9 Analysis of Data:

Investigator collected data was feed in the excel sheet of each school, school data was also collected from DPO in the excel sheet format. Difference of the similar or dissimilar data was tabulated of each school. After summation (ignoring plus/ minus) of similarity or different was calculated for analysis and tabulating the data and report was formed.

Chapter: 2

Data Analysis between pre data and sample checking data of U D I S E

The data of UDISE was collected from school and feed in computer through BRC officials mostly by data entry operator. The data was collected from each school in the month of September to November 2013 over all the country. Out of them 5% selected schools data were checked by the institute. However it was studied that is there difference in the previous data and post survey data. As a result that randomly schools were selected from 4 districts in 1st phase and 4 districts in 2nd phase by trained experienced and qualified research investigators. Investigators fulfilled the UDISE format by visiting the schools. The fulfilled format of each schools data was feed in the excel. The excel format was send to the DPO. According to format DPO officials send school and item wise pri data to the institute, Pre data and post enumeration data was scrutinized, to find out similarity or dissimilarity of each item. In this way data was analyzed.

Common variables between previous data (PD) and post emu nation post survey data (SD) was studying from this report. The established variables are given below.

- 1) Location of the school.
- 2) School category
- 3) Lowest and highest class in the school
- 4) Type of school
- 5) School management
- 6) Residential status
- 7) Part of shift school
- 8) Pre primary education
- 9) Sanctioned teacher and in position teacher
- 10) Status of school building
- 11) Number of room available Condition of class room
- 12) Number toilet for girls and boys
- 13) Source of drinking water
- 14) Availability of electricity
- 15) Availability of library and news paper
- 16) Availability of play ground
- 17) Availability of computers
- 18) Provision of Mid Day Meal
- 19) Status of kitchen shed
- 20) Children's enrollment in 2012-13
- 21) Result of X examination
- 22) Result of XII examination

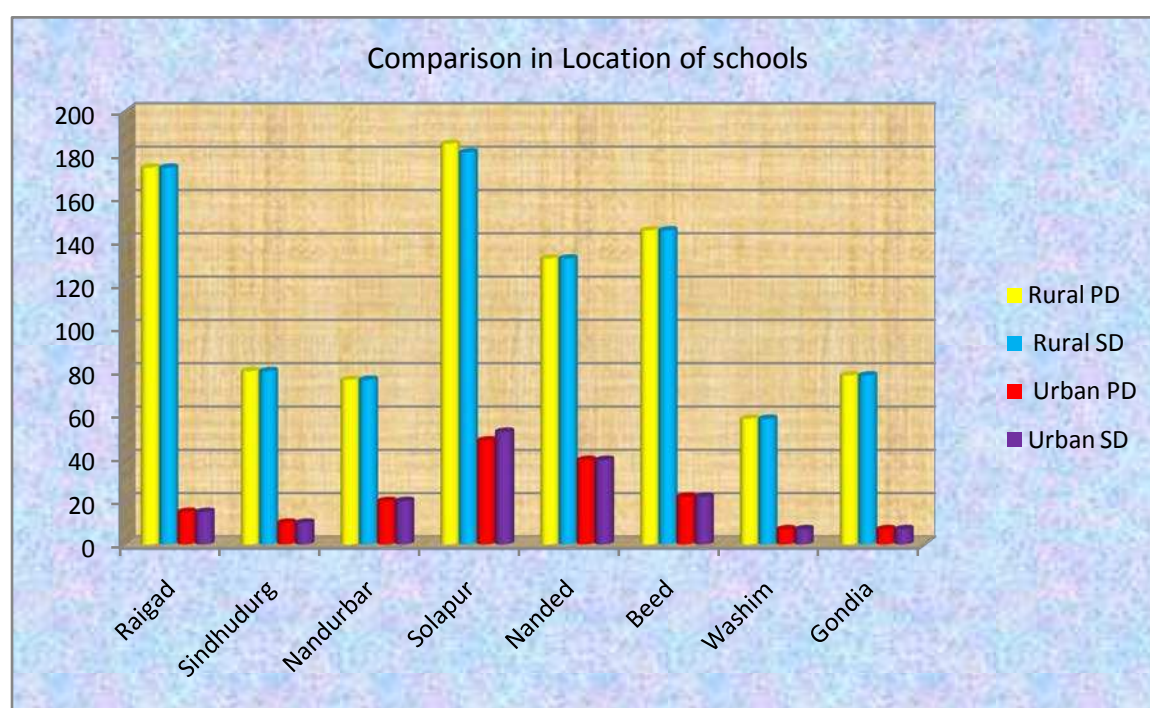

Each component of comparable variables were studied. The data was analyzed against previous (PD) and sample survey data (SD) as per sequence of format. The difference was calculated of each item. District wise total difference was tabulated and presented in graphical form also.

1. Location of Schools -

Table No. 3: Comparison of PD (Pre Data) with SD (Survey Data) on School Location

Location of Schools							
DISTRICT	Sample size	Rural			Urban		
		PD	SD	Diff	PD	SD	Diff
Raigad	189	174	174	0	15	15	0
Sindhudurg	90	80	80	0	10	10	0
Nandurbar	96	76	76	0	20	20	0
Solapur	233	185	181	4	48	52	4
Nanded	171	132	132	0	39	39	0
Beed	167	145	145	0	22	22	0
Washim	65	58	58	0	7	7	0
Gondia	85	78	78	0	7	7	0
Total	1096	928	924	4	168	172	4

- Quantitative Value of items as per SD Data (Survey Data) 1096
- Quantitative Value of items as per PD Data (Pre Data) 1096
- Quantitative Value of Diffs ignoring \pm signs 4
- Percentage Diff of SD Data (Survey Data) with PD Data (Pre Data) 0.36%

There was negligible difference in pre data and sample survey data of rural and urban. In some schools were situated in the area of MNC or Nagar Palika so the difference was found. The ward numbers were not given but the area was covered under Nagar Palika area from Administration department.

2. Name of the Schools –

The names of the schools were lengthy but U DISE information names were given in short forms. If you want to find out the information from name of the school from UDISE, it is very difficult to search the school. The names of the village were also given shortly this item is Not studied at time of sample survey.

3. Comparison on PD and SD on school category –

(A) Table No.4: Comparison of PD (Pre Data) with SD (Survey Data) on Category of Schools

Category of Schools																
DISTRICT	Sample size	Primary			Primary with Upper Primary			Primary with Up. Pr. & Sec. / High Secondary			Upper Primary only			UPS with Sec or HSC		
		PD	SD	Diff	PD	SD	Diff	PD	SD	Diff	PD	SD	Diff	PD	SD	Diff
Raigad	189	113	111	2	47	49	2	0	0	0	0	0	0	7	7	0
Sindhudurg	90	25	27	2	38	36	2	0	0	0	0	0	0	10	10	0
Nandurbar	96	33	32	1	31	32	1	4	4	0	3	2	1	13	12	1
Solapur	233	85	85	0	84	84	0	0	0	0	0	0	0	27	27	0
Nanded	171	51	51	0	76	76	0	7	4	3	0	0	0	6	6	0
Beed	167	53	53	0	49	51	2	3	0	3	1	1	0	9	9	0
Washim	65	27	27	0	29	29	0	0	0	0	1	1	0	4	4	0
Gondia	85	20	20	0	38	38	0	0	0	0	1	1	0	8	7	1
Total	1096	407	406	5	392	395	7	14	8	6	6	5	1	84	82	2

Continued Table

Category of Schools																
DISTRICT	Sample size	PS, UPS & Sec			UPS & Sec			Only Sec			Sec. & HSC			Only HSC		
		PD	SD	Diff	PD	SD	Diff	PD	SD	Diff	PD	SD	Diff	PD	SD	Diff
Raigad	189	5	5	0	7	7	0	10	10	0	0	0	0	0	0	0
Sindhudurg	90	4	4	0	4	4	0	6	6	0	0	0	0	3	3	0
Nandurbar	96	1	1	0	9	11	2	1	1	0	0	0	0	1	1	0
Solapur	233	3	3	0	20	20	0	10	10	0	4	4	0	0	0	0
Nanded	171	8	11	3	11	10	1	8	9	1	0	0	0	4	4	0

Total	1096	430	428	2	365	369	4	190	191	5	111	108	3

- a) Quantitative Value of items as per SD (Survey Data) 1096
b) Quantitative Value of items as per PD (Pre Data) 1096
c) Quantitative Value of Diffs ignoring \pm signs 14
d) Percentage Diff of SD (Survey Data) with PD (Pre Data) 1.28%

There was negligible difference in item of lower and higher classes. It was observed that the difference on UDISE and survey data was occurs, due to some of the schools had not properly filled the U-DISE format data. The school had not known whether the unaided and unrecognized classes are covered in the data format. The school had not properly filled the data. Clear guidelines should be given to the school.

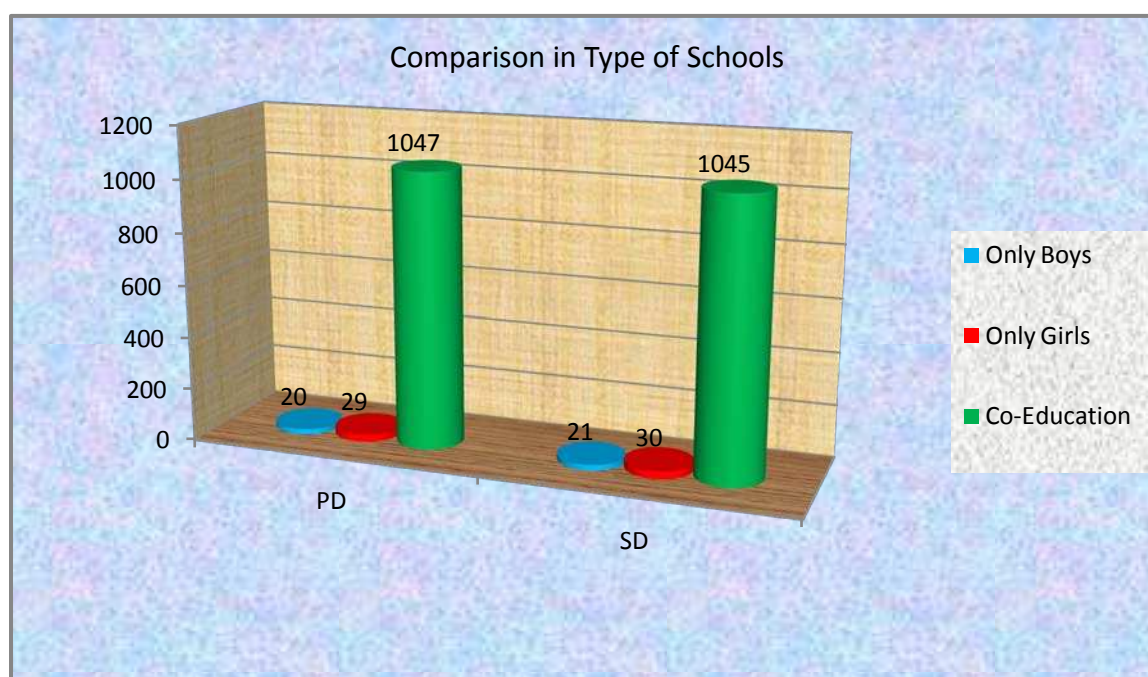

5. Type of schools –

Table No.7: Comparison of PD (Pre Data) with SD (Survey Data) on type of schools

DISTRICT	Sample Size	Type of Schools								
		Boys only			Girls only			Co-educational		
		PD	SD	Diff	PD	SD	Diff	PD	SD	Diff
Raigad	189	3	3	0	2	2	0	184	184	0
Sindhudurg	90	1	1	0	0	0	0	89	89	0
Nandurbar	96	6	6	0	6	6	0	84	84	0
Solapur	233	6	6	0	2	2	0	225	225	0
Nanded	171	0	1	1	5	6	1	166	164	2
Beed	167	1	1	0	10	10	0	156	156	0
Washim	65	2	2	0	3	3	0	60	60	0
Gondia	85	1	1	0	1	1	0	83	83	0
Total	1096	20	21	1	29	30	1	1047	1045	2

- a) Quantitative Value of items as per SD (Survey Data) 1096
- b) Quantitative Value of items as per PD (Pre Data) 1096
- c) Quantitative Value of Diffs ignoring \pm signs 4
- d) Percentage Diff of SD (Survey Data) with PD (Pre Data) 0.36%

With those figures it was concluded that there is negligible difference. This is because of negligence of school. The some schools had not filled the information in the MIS format.

1. School management –

Table No.8.1 : Comparison of PD (Pre Data) with SD (Survey Data) on Elementary Section (1 to 7)

Management of Primary Schools																		
District	Managed by Education Department			Tribal / Social Welfare Department			Local body			Private Aided			Other / Unrecognized			Unaided / Private Unaided

- a) Quantitative Value of items as per SD (Survey Data) 92
- b) Quantitative Value of items as per PD (Pre Data) 102
- c) Quantitative Value of Diffs ignoring \pm signs 33
- d) Percentage Diff of SD (Survey Data) with PD (Pre Data) 35.87%

It was observed from the above Tables that there was negligible difference of pre data and sample survey data. In Govt. / ZP/MNC school there was negligible difference was found. In some of private schools difference was found. Primary section 55 (5.86%) secondary section 36 (15.79%) Higher Secondary 33 (35.87%) It was because of in main column of management it was shown, but in separate sections Primary, Secondary, & Higher Secondary they had not shown in the format. Difference was found due to the recognition of schools. The school had not study the Govt. resolutions of aided and unaided schools had more than one sections in the same premises. Separate U-DISE code was allocated for some school. Some schools have no idea to fill the management code number for Aided/Unaided/Unrecognized where more than one type of school. It is suggested to give clear guide lines regarding management.

Shift School & Residential Status of School

Table No. 9: Comparison of PD with SD (Survey Data) on part of shift school & Residential status of school

Part of Shift School								Residential Status of Schools					
DISTRICT	Sample size	Yes			No			Yes			No		
		PD	SD	Diff	PD	SD	Diff	PD	SD	Diff	PD	SD	Diff
Raigad	189	13	20	7	176	169	7	1	2	1	188	187	1
Sindhudurg	90	7	12	5	83	78	5	1	2	1	89	88	1

Total	1096	139	128	35	957	968	35	48	48	4	1048	1048	4

- Quantitative Value of items as per SD (Survey Data)- 1096
- Quantitative Value of items as per PD (Pre Data)- 1096
- Quantitative Value of Diffs ignoring \pm signs – Shift school – 35, Residential - 4
- Percentage Diff of SD (Survey Data)with PD (Pre Data)– 3.19%, 0.36%

Shift school -

3.19% difference was observed in item of shift school. The arrangement of the school was either in one session or two sessions, because availability of classrooms. The shift schools were arranged in morning session for secondary / Hr Secondary or elementary education and in afternoon vice versa. Mostly shift schools were observed in private schools. It was found 128 shift schools from sample survey from 8 districts.

Residential School –

With the help of comparison of UDISE and sample survey it was found that there was negligible difference in residential school. It was observed that residential schools were established from social welfare dept. and Trial Development dept. directly or recognized by these departments. It was found there were 48 residential schools in sample survey from 8 districts.

Medium of school –

Table No.10: Difference of medium of school in U-DISE and sample survey

Sr No.	District	Visited Schools	Difference found in medium of schools	% in difference
1	Raigad	189	7	3.70
2	Sindhudurg	90	18	20.00
3	Nandurbar	96	20	20.83
4	Solapur	233	11	4.72
5	Nanded	171	15	8.77
6	Beed	167	16	9.58
7	Washim	65	9	13.65
7	Gondia	85	8	9.41
	Total	1096	104	9.49

In 1096 schools there was 104 schools were found (9.49%) difference in the medium of schools as per pre data and sample survey data. Most of them were found in more than one medium school. Some schools had not mentioned all categories as per medium.

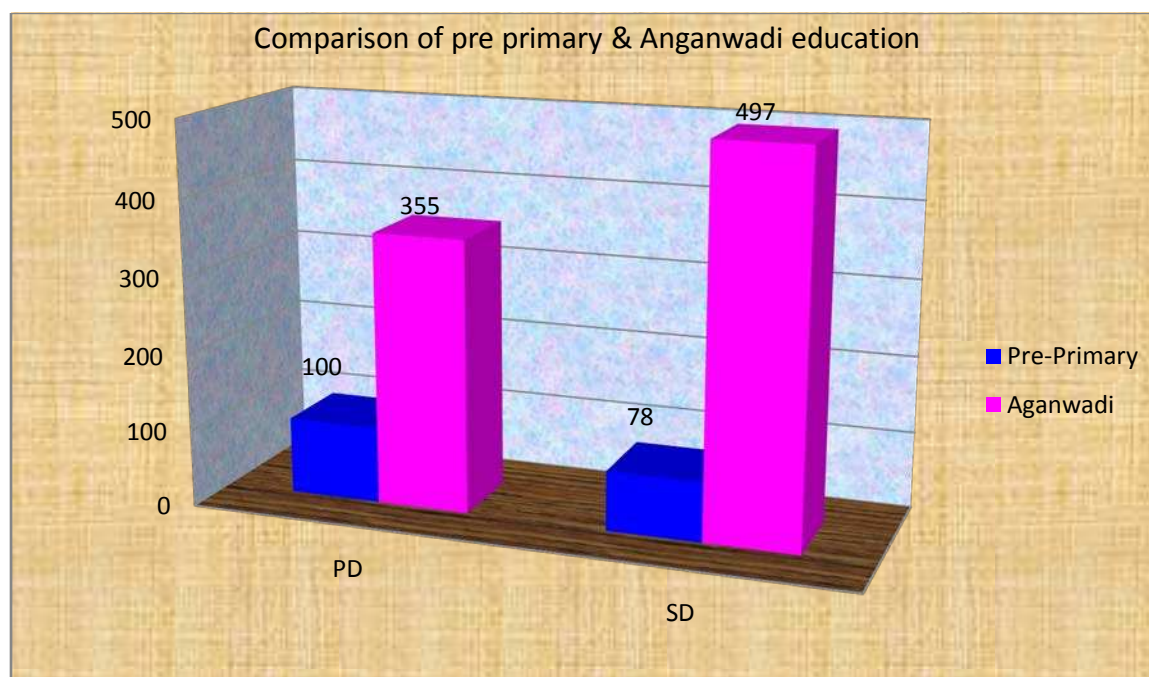

It is suggested to have clear guide lines for more than one medium of school. If school had more than one medium then they have No idea to gave enrollment, some schools were allocated two or more.

Pre Primary Education – There were two types for pre primary education first is pre primary section called other than Anganwadi (Balwadi) second is the Anganwadi. Pre primary education facility was not attached for each primary education.

Table No. 11: Comparison of PD (Pre Data) with SD (Survey Data) on Pre primary education and Anganwadi in school

Pre-Primary Education in Schools Premises								Anganwadi available in Schools premises					
DISTRICT	Sample Size	Yes			No			Yes			No		
		PD	SD	Diff	PD	SD	Diff	PD	SD	Diff	PD	SD	Diff
Raigad	189	27	12	15	162	177	15	63	101	38	126	88	38
Sindhudurg	90	9	10	1	81	80	1	41	47	6	49	43	6

a)	Quantitative Value of items as per SD (Survey Data)-	1096	
b)	Quantitative Value of items as per PD (Pre Data)–	1096	
		Pre Primary	Anganwadi
c)	Quantitative Value of Diff's ignoring \pm sign -	30	142
d)	Percentage Diff of SD (Survey Data) with PD (Pre Data)	2.73%	12.96%

It was observed that there was difference in pre primary and Anganwadi education. It was observed because of some private schools have pre primary section but they have not shown in MIS form. In same way the difference was mostly occurring in Z.P. schools had not mentioned Anganwadi due to the Anganwadi was not attached to school. Anganwadi was situated in village outside of the premises. It is suggest clear norm of premises for Anganwadi.

Staff Details

Table No.12: Comparison of PD (Pre Data) with SD (Survey Data) regarding teaching staff sanctioned and in-position teachers post.

Sanctioned and In-Position Regular Teachers							
DISTRICT	Sample size	Sanctioned Teachers			In-Position Teachers		
		PD	SD	Diff	PD	SD	Diff
Raigad	189	1091	1168	77	952	1101	149
Sindhudurg	90	707	698	9	640	673	33
Nandurbar	96	643	967	324	886	932	46
Solapur	233	2329	2362	33	2256	2325	69
Nanded	171	1338	1489	15	102	1352	1250

Total	1096	9014	9557	631	7096	9100	2034

	<u>Sanctioned</u>	<u>In-Position</u>
a) Quantitative Value of items as per SD (Survey Data)-	9557	9100
b) Quantitative Value of items as per PD (Pre Data)	9014	7696
c) Quantitative Value of Diffs ignoring \pm signs	631	2034
d) Percentage Diff of SD (Survey Data) with PD (Pre Data)–	6.60	22.35

It was observed the difference 631 (6.60%) in sanction post and 2034 (22.35%) in in-position of teacher. It was because of not proper feeding of these figures in the format mainly from private schools, these schools had not provided the contract basis staff / staff appointed in unaided schools. In Nanded and Washim district had not in position staff in most of the school.

Status of building –

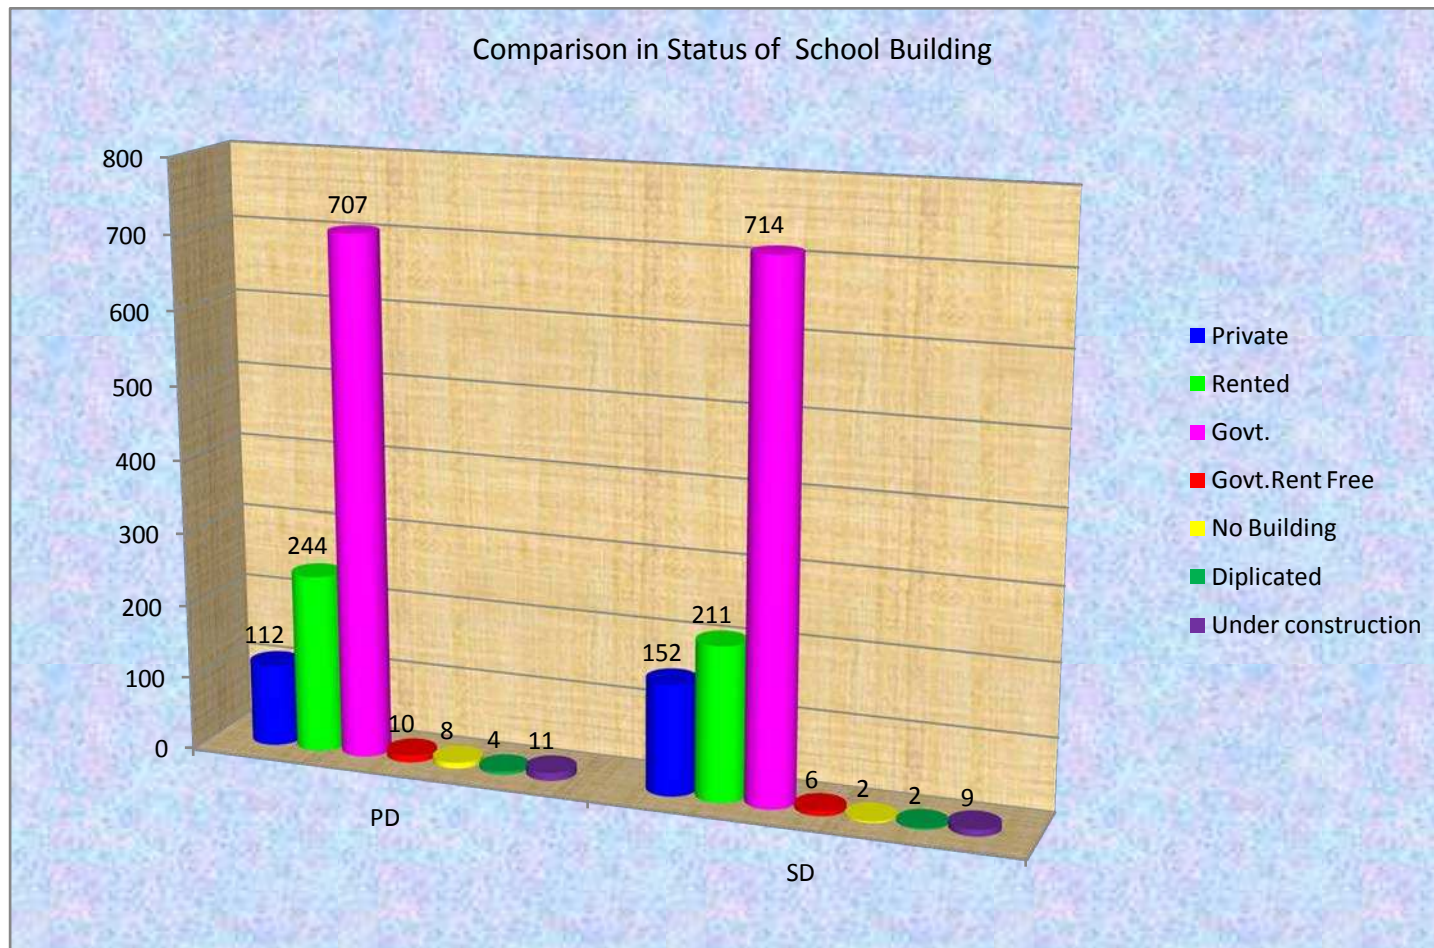

As per UDISE format status of building covers whether the building is private, Rented, Government, government rent free, No building etc

Table No. 13: Comparison of PD (Pre Data) with SD (Survey Data) on status of school building

DISTRICT	Sample size	Status of School Building																				
		Private			Rented			Government			Government school in rent free building			No Building			Dilapidated			Under construction		
		PD	SD	Diff	PD	SD	Diff	PD	SD	Diff	PD	SD	Diff	PD	SD	Diff	PD	SD	Diff	PD	SD	Diff

- a) Quantitative Value of items as per SD (Survey Data)- 1096
- b) Quantitative Value of items as per PD (Pre Data)- 1096
- c) Quantitative Value of Diffs ignoring \pm signs - 118
- d) Percentage Diff of SD (Survey Data)with PD (Pre Data)- 10.77

From this Table it was observed some of the school had not correctly filled the data. From some private schools provided the information as rented building instead of private. The building was contracted of institute's property and used for private educational purpose. The rent was received to institute by Govt. therefore school had provided as rented in MIS format, but actually building was not rented. It is suggested to give proper guidelines in this matter.

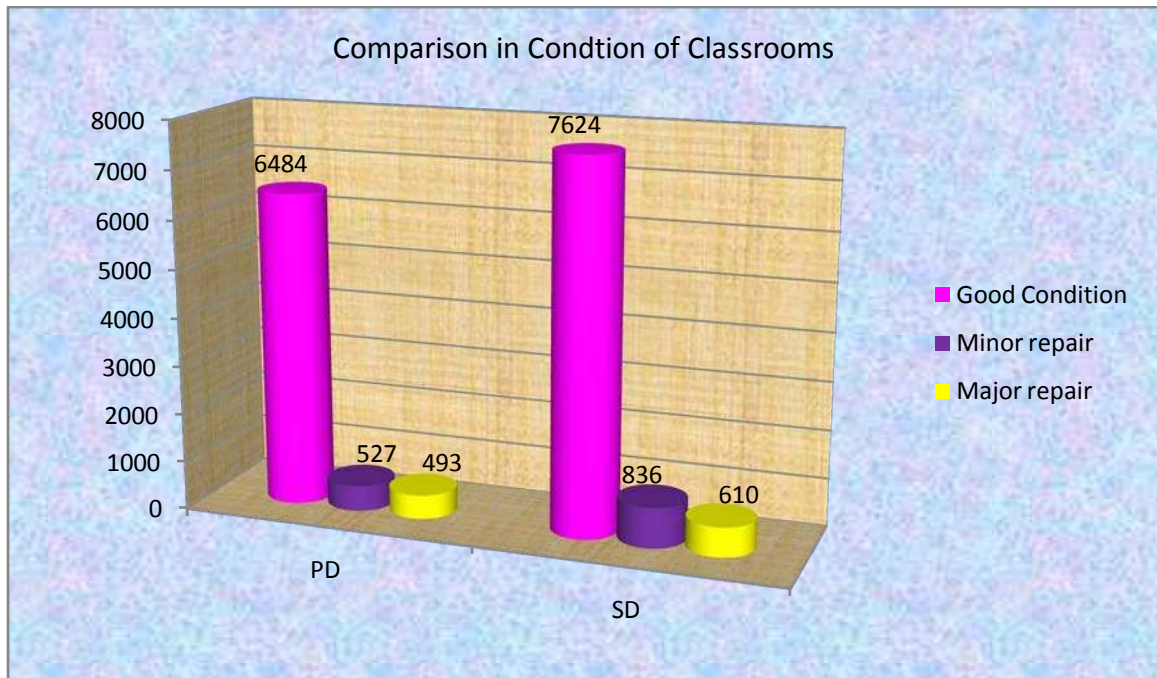

Classroom availability and their condition –

As formal education is based on classroom method, there is need of classroom for each standard for instructional purpose. Classrooms were available for each grade and their divisions.

Table no.14: Comparison of PD data (Pre Data) with SD data (Survey Data) on condition of rooms

No. of Class Rooms for Instructional purpose including additional rooms and their Condition													
DISTRICT	Sample size	No. of Rooms			Good condition			Minor repairs			Major Repairs		
		PD	SD	Diff	PD	SD	Diff	PD	SD	Diff	PD	SD	Diff

Total	1096	9288	9564	974	6484	7624	1180	527	836	309	493	610	133

	<u>No. of Rooms</u>	<u>Condition</u>
a) Quantitative Value of items as per SD (Survey Data)-	9288	9070
b) Quantitative Value of items as per PD (Pre Data)	9564	7504
c) Quantitative Value of Diffs ignoring \pm signs	974	1622
d) Percentage Diff of SD (Survey Data) with PD (Pre Data)	10.49%	17.88%

Total number of classrooms and grade and division wise classrooms were observed by investigator from all sample schools. The difference was observed in some of the school from shift schools. Because those schools have primary and secondary sections they filled two MIS forms and shown same classrooms in the both forms. The difference was also occurring due to some schools had not shown available and minor / major repair classrooms in MIS. Therefore it is suggested to verify actual number of classrooms at BRC/ CRC level.

In condition of rooms investigator had counted all rooms but as per district data all rooms were not shown in some of the districts data. District Washim had not shown the condition of classrooms for all schools.

It difference was observed in case of pucca and partially pucca rooms, It was observed in some school have rooms are available of pucca wall with tin or tiles shaded, but those schools shown pucca instead of partially pucca. The instructions are not followed by those schools.

Additional rooms-

Table No. 15: Comparison of PD (Pre Data) with SD (Survey Data) on Availability Additional rooms

Additional Rooms in Schools				
DISTRICT	Sample size	PD	SD	Diff
Raigad	189	108	136	28

Gondia	85	106	213	107
Total	1096	2030	2557	567

- Quantitative Value of items as per SD (Survey Data)- 2257
- Quantitative Value of items as per PD (Pre Data)– 2030
- Quantitative Value of Diffs ignoring \pm signs - 567
- Percentage Diff of SD (Survey Data) with PD (Pre Data)– 25.12%

In number of additional room's difference was observed in 567 (25.12%) schools. Actually more additional rooms were available in school, but the school had not counted H.M. small room, store room and minor or major repair rooms. In secondary and higher secondary school there is necessity of science lab, office etc. It is suggested to add as a) physics lab b) chemistry lab c) biology lab d) computer lab e) separate H. M. Room f) office g) staff room h) library i) additional rooms in MIS form for secondary and higher secondary school. UDISE data will helpful to know the available facilities (additional room) to school. If there is elementary school education having additional classrooms, they got an idea to use the additional classroom for quality education. It was also suggested to add use of additional room along with additional room.

Land Available for Additional Rooms

Table No.16: Comparison of PD (Pre Data) with SD (Survey Data) on Land Available for Additional Classroom

Land available for additional classrooms in Schools							
DISTRICT	Sample size	Yes			No		
		PD	SD	Diff	PD	SD	Diff
Raigad	189	52	62	10	137	127	10
Sindhudurg	90	22	26	4	68	64	4

Nanded	171	113	114	1	58	57	1
Beed	167	112	115	3	55	52	3
Washim	65	39	42	3	26	23	3
Gondia	85	69	66	3	16	19	3
Total	1096	587	630	59	509	466	59

- a) Quantitative Value of items as per SD (Survey Data)– 1096
- b) Quantitative Value of items as per PD (Pre Data) - 1096
- c) Quantitative Value of Diffs ignoring \pm signs - 59
- d) Percentage Diff of SD (Survey Data) with PD (Pre Data) – 5.39%

The investigator had collected information. Reported by head teacher/principal regarding land available for construction of additional room. For some schools land was available but there was not necessary to construct new additional room, these schools had not shown in the MIS from. It is suggested to add an item necessity the number of additional classrooms.

Head Teacher/ Principal Room in Schools

Table No.17: Comparison of PD (Pre Data) with SD (Survey Data) on Availability Head Teacher/ Principal Room in Schools

Availability of Head Teacher/Principal Room							
DISTRICT	Sample size	Yes			No		
		PD	SD	Diff	PD	SD	Diff
Raigad	189	75	75	0	114	114	0
Sindhudurg	90	51	57	6	39	33	6

- a) Quantitative Value of items as per SD (Survey Data) –294314
- b) Quantitative Value of items as per PD (Pre Data) - 287702
- c) Quantitative Value of Diffs ignoring \pm signs - 12974
- d) Percentage Diff of SD (Survey Data) with PD (Pre Data)– 4.41%

In 314 (28.65%) schools had not properly given enrollment so the difference was observed. Due to some schools had fill the data as on the day of filling the format; in some schools children from unaided classes/ unrecognized classes were not included in the format. Investigators had observed the muster roll of student for 30th Sept 2012 at the time of school visit. So the difference was found. It is suggested to gave clear guideline in this regard and verify the actual enrollment.

Chapter: 3

Post Enumeration Survey Results

The investigators appointed by institute visited to the selected sample schools and data was collected. The Planners, Policy and Decision Makers to identify appropriate measures and action on how to improve the quality of education and make it more accessible and available to the people. Accordingly, the analyzed data was presented in the following manner:

A. Distribution of Sample

Table No. 34

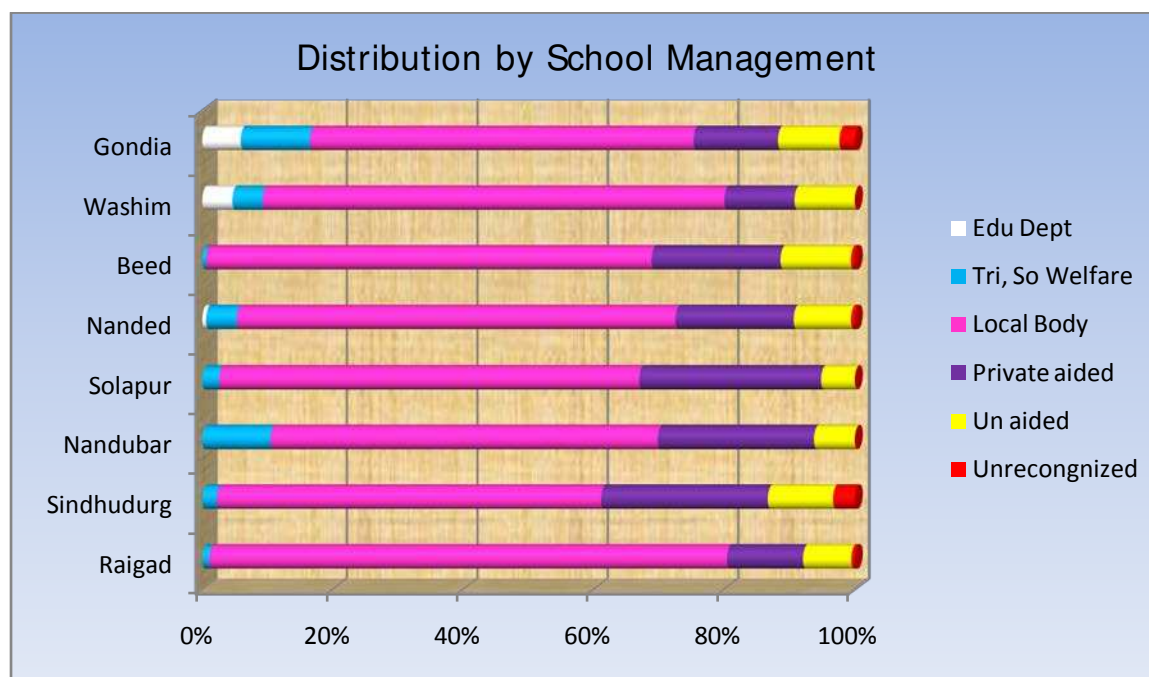

District	Sample Size	Category of Schools									
		PS	PS with PS UPS	PS,UPS, & Sec, HSC	Only UPS	UPS with Sec & HSC	PS, UPS. Sec	UPS& Sec	Only Sec	Sec & HSC	HSC
		1	2	3	4	5	6	7	8	10	11
Raigad	189	111	49	0	0	7	5	7	10	0	0
Sindhudurg	90	27	36	0	0	10	4	4	6	0	3
Nandurbar	96	32	32	4	2	12	1	11	1	0	1
Solapur	233	85	84	0	0	27	3	20	10	4	0
Nanded	171	51	76	4	0	6	11	10	9	0	4
Beed	167	53	51	0	1	9	18	15	12	2	6
Washim	65	27	29	0	1	4	1	1	2	0	0
Gondia	85	20	38	0	1	7	2	6	2	3	6
Total	1096	406	395	8	5	82	45	74	52	9	20

The above Table No.2 /34 gives a clear view of district-wise and school category wise distribution of the sample. Out of total 1096 sample schools, 406 (37.04%) schools were selected from Primary schools, 395 (36.04%) schools from Primary with Upper Primary, 8 (0.72%) from primary with secondary and higher secondary sections, 5 (0.45%) from Upper primary only, 82 (7.48%) from Upper primary with secondary and Higher secondary sections, 45 (4.11%) from primary and Upper primary with secondary, 74 (6.75%) from Upper primary with secondary, 52 (4.74%) from only secondary, 9 (0.82%) from secondary with Higher secondary and 20 (1.82%) from only higher secondary respectively.

C. Distribution by School Management

Table No. 35

Distribution by School Management							
District	Managed by Education Department	Tribal / Social Welfare Department	Local body	Private Aided	Other / Unrecognized	Unaided / Private Unaided	Total no. of Schools
Raigad	0	2	150	22	1	14	189
Sindhudurg	0	2	53	23	3	9	90
Nandurbar	0	10	57	23	0	6	96
Solapur	0	6	150	65	0	12	233
Nanded	1	8	115	31	1	15	171
Beed	0	1	114	33	1	18	167
Washim	3	3	46	7	0	6	65
Gondia	5	9	50	11	2	8	85
Total	9	41	735	215	8	88	1096

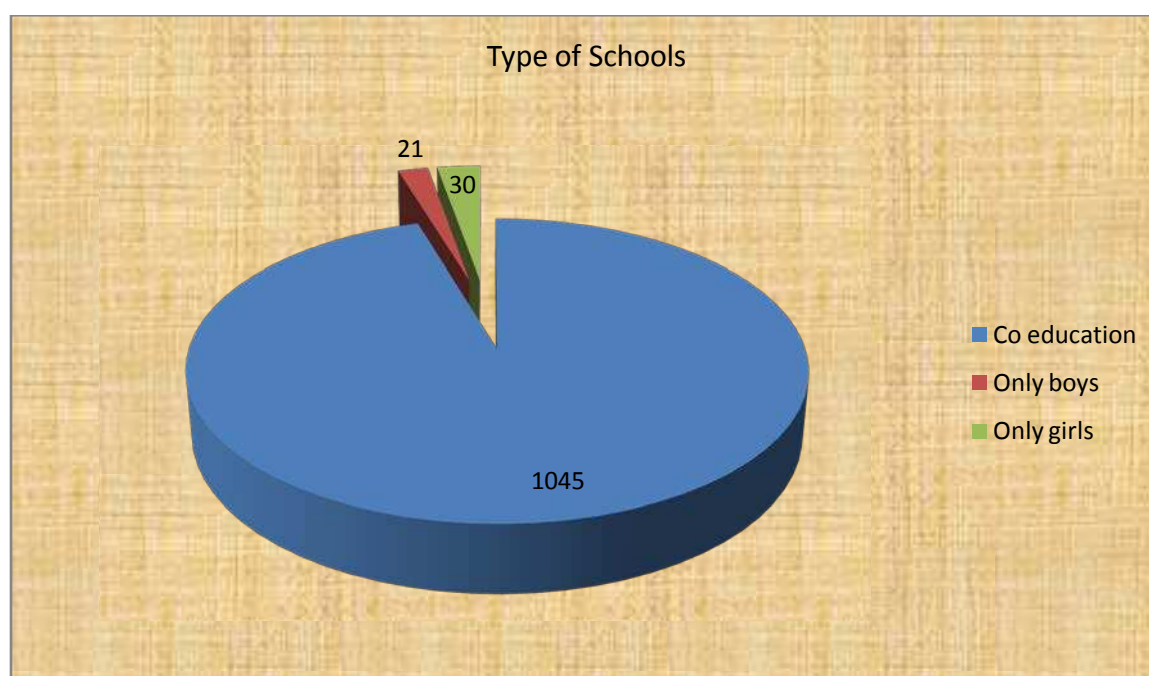

As per the details presented in Table 35, it reveals that out of total 1096 schools, managed by education department, 9 (0.82%) schools, 41 (3.74%) schools from Social/Tribal welfare Department, 735 (67.06%) are run under Local Body, 215 (67.06%) from private aided, 88 (8.03%) are Private unaided and the remaining 8 (0.73%) are from unrecognized schools.

D. Distribution of Sample by Location

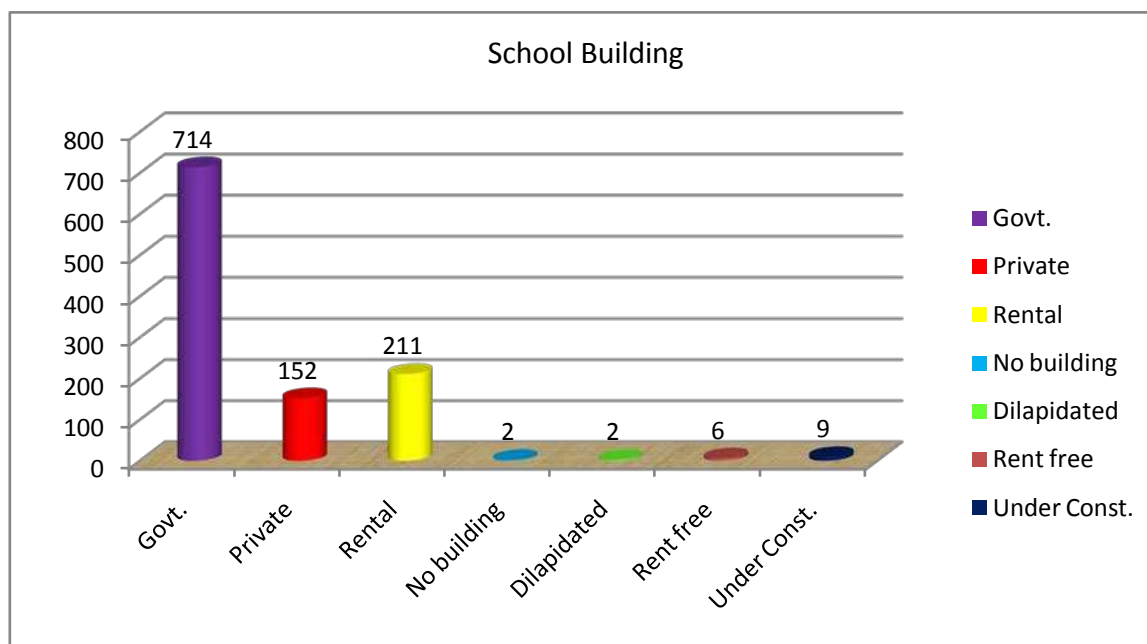

It is observed from the graph 924(84.30%) schools were located in rural areas while 172 (15.70%) schools were located in urban areas. Within rural area schools, majority of schools were Primary schools and primary with upper primary schools.

E. Distribution by Type of Schools

It is evident from the Graph that out of 1096 schools, 1045 (95.35%) schools adopted co-education type schools and then followed by 30 (2.73%) exclusively girls only and 21 (1.92%) for boy's only, out of these schools majority are Primary schools.

F. Distribution by School Building

It is evident from the above graph that the majority of the schools i.e. 714 (65.15%) were being run in Government school building, 152 (13.86%) private and followed by 211 (19.25%) schools in rented buildings. Whereas it is found that 2 (0.18%) schools were have no building, 2 (0.18%) schools in dilapidated condition, rent free buildings 6 (0.54%) schools and under construction 9 (0.82%) schools.

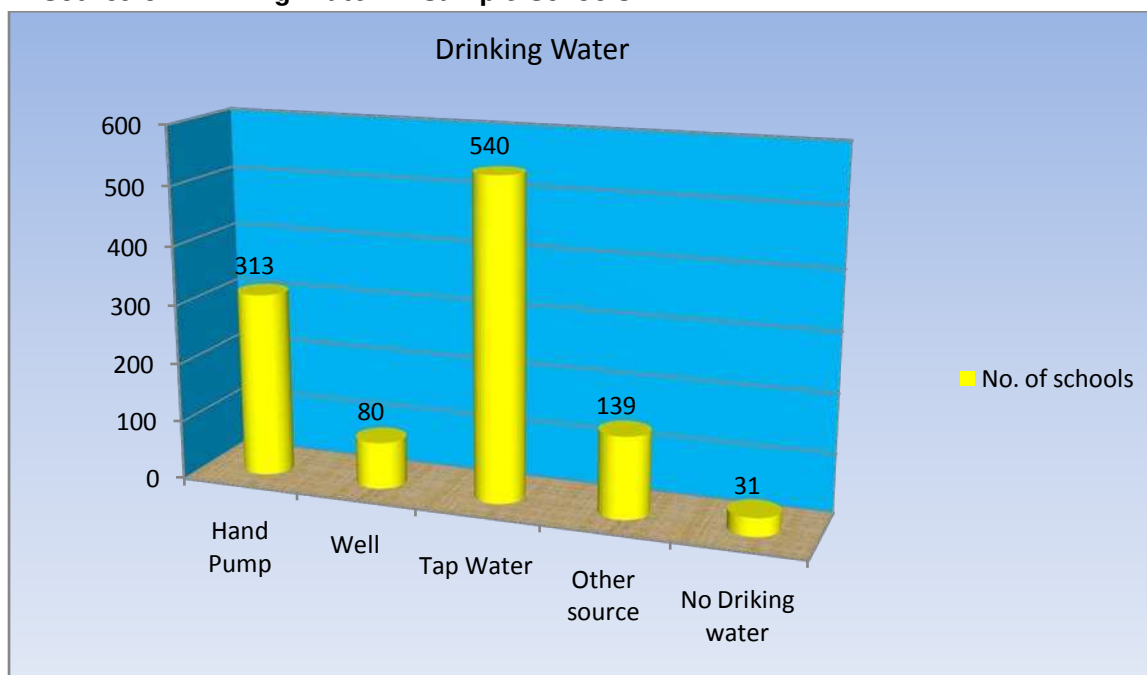

G. Distribution of Boundary Wall

The above figure indicates of boundary wall in the sample schools. Out of 1096 schools followed by 398 (36.31%) schools having Pucca boundary wall, whereas 36 (3.28%) schools having pucca but broken boundary wall. Besides this, in 97 (8.85%) schools compounds were barbed with fencing ,28

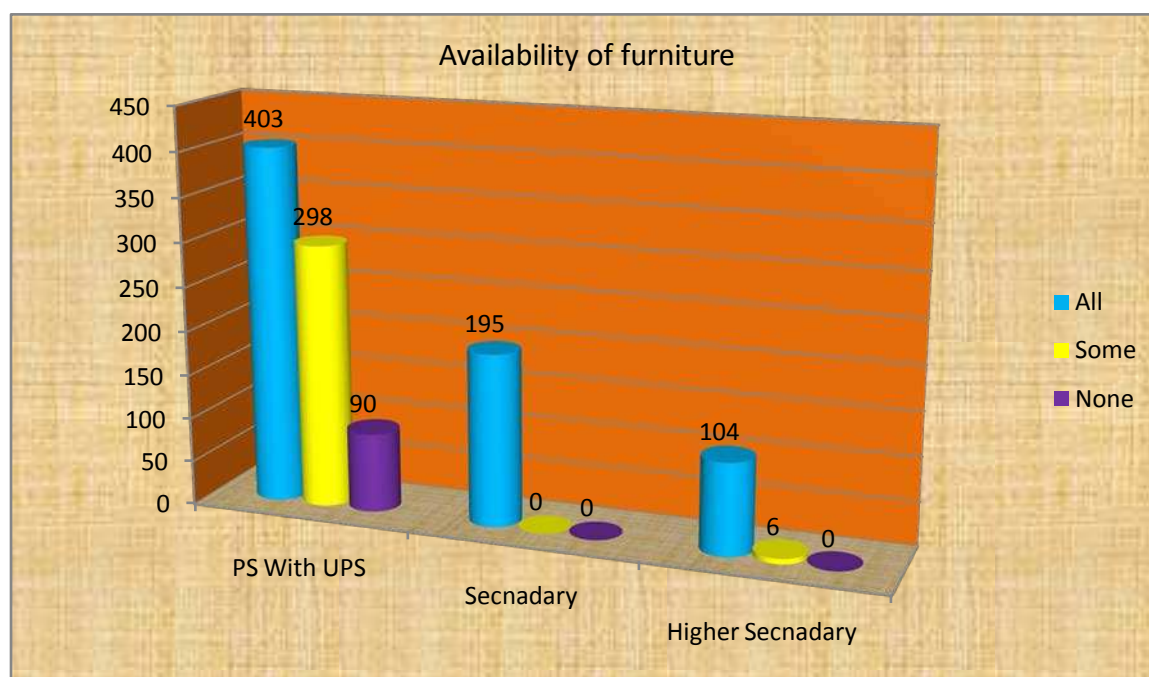

(2.55%) schools with Hedges, 369 (33.66%) schools were not having the boundary wall and 46 (4.20%) school have partially build compound wall.

H. Source of Drinking Water in Sample Schools

It is evident from the above graph majority of the schools 541 (49.36%) were having Tap water as source of drinking water. However, considerable number of 31 (2.82%) schools was not at all having drinking water facility. Hand pump as drinking water facility is found only in 310 (28.28%) schools and Well Water in 73 (6.66%) schools and the remaining 141 (12.86%) schools depend on other sources for drinking water. There was found 7 Schools have additional source of drinking water.

I. Availability of furniture in Schools

The graph on seating arrangements for children in the schools reveals that out of 1096 schools, 403 primaries and primary with Upper primary school, 195 secondary and 104 higher secondary schools are having full furniture for all the students. Whereas in 298 primary and primary with upper primary and in 6 higher secondary schools there is No furniture for children to sit, they are sitting on the cloth strip and this includes majority of primary and upper primary schools.

J. Number of Teacher Posts Sanctioned and in Position

Number of teacher posts sanctioned and in position shows that a total of 9557 teacher posts were sanctioned in 1096 sample schools and out of this 9100 were in position.

K. Number of classroom along with other rooms and Condition of Rooms

Detailed information of number of class room along with additional room is 9564 and on physical condition of classrooms in sample schools is presented total 1096 schools, majority class rooms were in Good condition 7624 In reference to remaining schools, 836 class rooms need minor repairs and 610 need major repair.

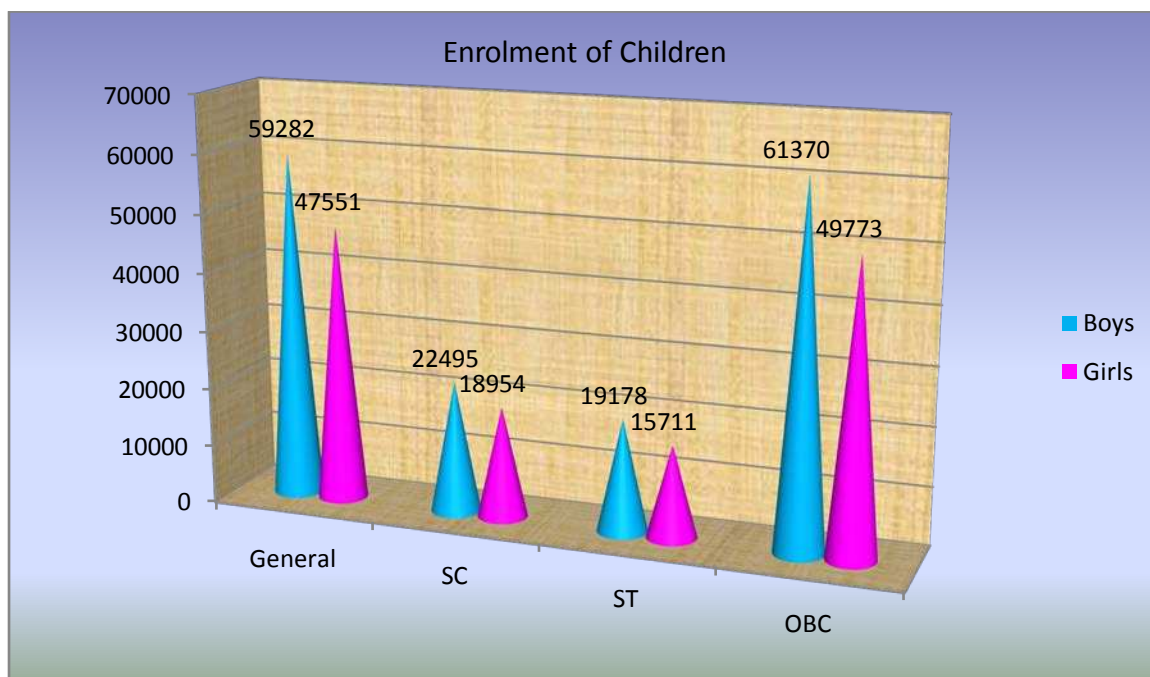

L. Availability of Computers in Schools

Observed 1096 sample schools have 4213 computers were available. Out of this 3518 were functional in total 1096 schools.

M. Facilities in Schools

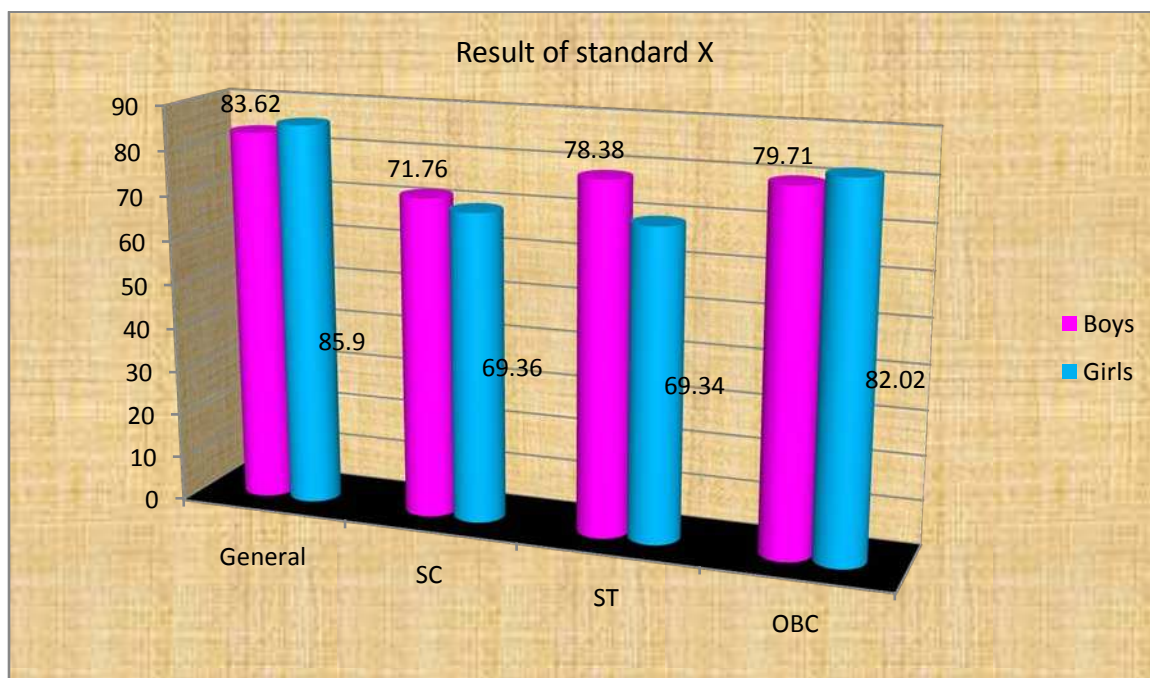

Out of total 1096 sample schools as many as only in 128 (11.68%) schools there was a shift system, residential 48 (4.38%). However, in only 880 (80.29%) schools Electricity facility was available. As far as toilet facilities were concerned 1960 toilets for boys and 2174 for girls. Most of the schools have the toilet facility. Only 805 (73.45%) schools have a playground facility for children. Thus in reference to facilities for school children, it is quite significant to observe.

Enrolment of Children in sample schools – 2012-13

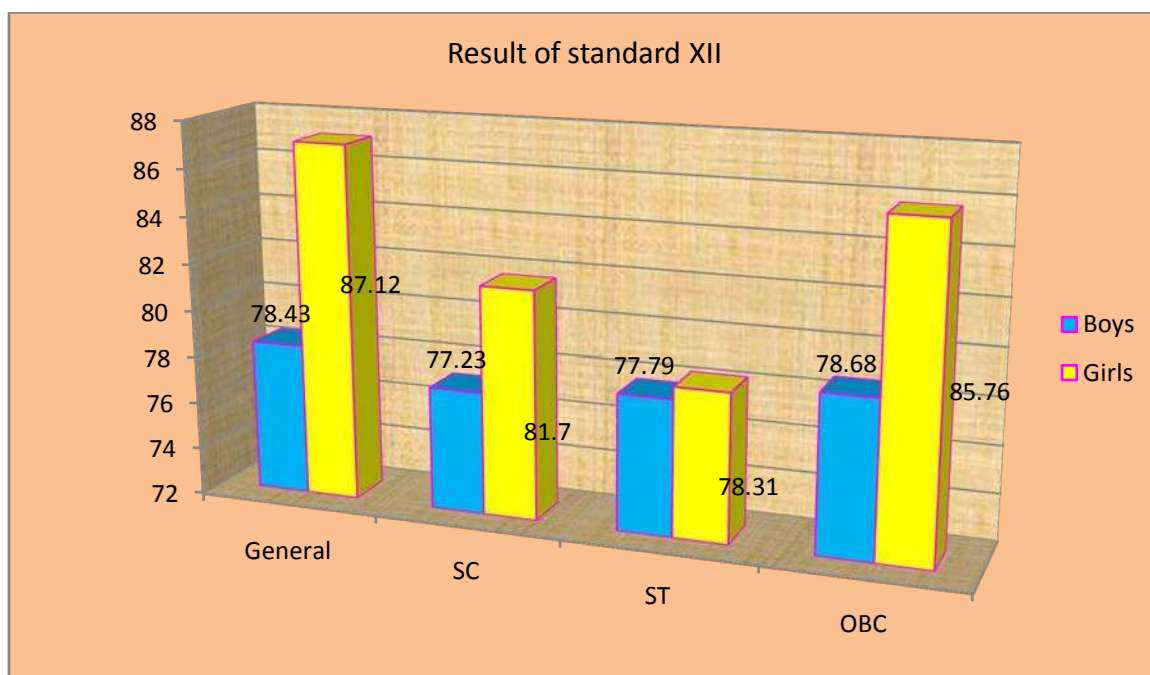

The detail of enrolment for the academic year 2012-13 was 162325 (55.15%) boys, 131989 (44.85) girls, total 294314. It indicates that enrolment ratio between boys and girls were quite Normal with the Boys enrolment is high in 1096 sample schools. With reference to enrollment of SC, ST, OBC community children Boys enrollment is higher than the Girls.

O. Result of standard X

Detailed information on result profile of X standard students is presented in the graph. The passing percentage in overall Boys was 80.12%, where as in girls 80.88 %. Passing percentage is higher than boys. In SC Boys 71.76% in SC Girls is 69.36% quite lesser than boys. Whereas among the ST Boys the percentage of passing is 78.38% in girls the passing percentage is 69.34 % which is quite lesser than the boys.

P. Result of standard XII

Detailed information on result profile of XII standard students was presented in the graph. The passing percentage in overall Boys was 78.46%, where as in girls 84.49% which is higher than boys. Passing percentage in SC Boys, 77.23% in SC Girls was 81.7% quite higher than boys. Whereas among the ST Boys the percentage of passing was 77.79% in girls the passing percentage is 78.31% which is quite higher than the boys. Passing percentage of open category boys was 78.43% and girls passing percentage was 87.12% is quite higher than boys.

Chapter: 4

Investigators Feedback on School Visit

A. Functioning of Schools on the Day of Visit:

Detailed information on functioning of schools selected for the sample can be seen in Table no 1 to 10 from chapter 4. The graph reveals that all visited 1096 of schools were found opened on the first visit in connection In Nanded district 6 schools were not open up to the day of visit, because not opening of school order by DPO. These schools were changed with the help of BRC/DPO officials. In Beed 1 school. Sindhudurg 2 schools, Solapur 2 schools, Total 11 schools were changed due to these schools were closed on first and second day of visit or too much difficult to reach the school.

B. Different variables regarding with H.M./ Principal:

Table A: Initial reactions of the Principal/ H.M.

Attributes pertaining to the Principal /Head Teacher towards the investigation-Initial reaction of the Principal/Head Teacher						
Name of the District	Very Good	Good	Average	Poor	Very Poor	Total
Raigad	51	127	10	1	0	189
Sindhudurg	31	55	4	0	0	90
Nandurbar	27	55	12	2	0	96
Solapur	81	131	20	0	1	233
Nanded	32	110	24	5	0	171
Beed	35	99	32	1	0	167
Washim	14	35	13	3	0	65
Gondia	22	43	19	1	0	85
Total	293	655	134	13	1	1096

Detailed information in this regard is presented in Table shown above. In reference to initial reaction of principal/ Head teacher good 59.76%, very good in 26.73% and poor in 1.19 schools.

Table B: Response of the Principal/ H.M. to provide information

Attributes pertaining to the Principal /Head Teacher towards the investigation-Initial reaction of the Principal/Head Teacher						
Name of the District	Very Good	Good	Average	Poor	Very Poor	Total
Raigad	48	122	17	1	1	189
Sindhudurg	23	63	4	0	0	90
Nandurbar	25	59	11	1	0	96
Solapur	79	127	25	1	1	233
Nanded	29	106	33	3	0	171
Beed	28	90	48	1	0	167
Washim	10	37	14	4	0	65
Gondia	19	41	24	1	0	85
Total	261	645	176	12	2	1096

Detailed information in this regard is presented in Table shown above regarding provide information. In reference to provide information by principal/ Head teacher good 58.85%, very good in 23.81% and poor in 1.28% schools.

Table C: Response of Availability of records:

Attributes pertaining to the Principal /Head Teacher towards the investigation-Availability of Records						
Name of the District	Very Good	Good	Average	Poor	Very Poor	Total
Raigad	43	128	17	1	0	189
Sindhudurg	23	61	5	1	0	90
Nandurbar	18	59	16	3	0	96
Solapur	71	135	22	4	1	233
Nanded	26	103	138	4	0	271
Beed	17	94	51	4	1	167
Washim	10	36	14	3	2	65
Gondia	15	40	28	2	0	85
Total	223	656	291	22	4	1096

Detailed information in this regard is presented in Table no. 3 shown above regarding Response of Availability of records. In reference to Response of Availability of records with principal/ Head teacher good 59.85%, very good in 20.35% and poor in 2.37% schools.

Table D: Investigators Feedback on different items regarding with H.M./ Principal:

Investigators Feedback on different items								
Name of District	Principal / Head Teacher able to provide the information of enrolment and details of pass percentage easily.		Principal able to give the enrolment and other details from a single Register		Teachers in the school fill-up the attendance register properly		Principal have the summery details of Children for all grades available with him	
	Yes	No	Yes	No	Yes	No	Yes	No
Raigad	183	6	159	30	188	1	184	5
Sindhudurg	89	1	74	16	90	0	89	1
Nandurbar	79	17	62	34	94	2	83	13
Solapur	204	29	164	69	226	7	205	28
Nanded	143	28	93	78	165	6	140	31
Beed	124	43	77	90	156	11	102	65
Washim	58	7	35	30	62	3	56	9
Gondia	50	35	40	45	79	6	52	33
Total	930	166	704	392	1060	36	911	185

Detailed information in this regard is presented in Table shown above. H.M were able to provide the **i)** Information pertaining to enrollment and passing percentage from 84.95% schools **ii)** To give information from single register from 64.23% schools. **iii)** Teacher fill-up the attendance register properly from 96.71% schools. **iv)** H.M. has summery for all children from 83.12% schools.

Table E: Availability of Records:

Investigators Feedback on availability of record								
Name of the District	School Report Card available in the School.		Attendance registers properly maintained and kept in the cupboard.		Teachers in the school come on time.		Was the School having a photo copy of filled in U-DISE DCF?	
	Yes	No	Yes	No	Yes	No	Yes	No
Raigad	172	17	187	2	187	2	170	19
Sindhudurg	71	19	89	1	90	0	78	12
Nandurbar	83	13	94	2	92	4	88	8
Solapur	206	27	231	2	228	5	215	18
Nanded	121	50	166	5	167	4	152	19
Beed	56	111	154	13	166	1	151	16
Washim	52	13	63	2	65	0	61	4
Gondia	61	24	75	10	82	3	78	7
Total	822	274	1059	37	1077	19	993	103

In reference to availability of records as school report card in 822 (75%) schools, attendance registers in 1059 (96.62%) schools and available photo copy of UDISE in 993 (90.60%) schools, teachers come in time from 98.27% schools.

Table F: Display board in school:

Display board in school			
Name of the District	Total Visited Schools	Yes	No

Washim	0	52	0	0	2	11	65
Gondia	1	47	15	0	3	19	85
Total	2	751	75	2	127	139	1096

In regard with the quality of mid day meal was as very good in only 2 (0.18%) schools, good in 751 (68.52%) schools, average in 75 (6.84%) schools, and poor in 2 (0.18%) schools. Mid day meal was Not provided on the day of visit in 127 (11.59%) and Not applicable in 139(12.68%) schools.

Table J: Seating arrangement in the school

Seating arrangement in the school				
Name of the District	Boys Girls Separates Rows	Mixed Rows	Groups	Total
Raigad	187	2	0	189
Sindhudurg	78	7	5	90
Nandurbar	92	4	0	96
Solapur	222	11	0	233
Nanded	167	2	2	171
Beed	152	15	0	167
Washim	59	5	1	65
Gondia	80	5	0	85
Total	1037	51	8	1096

Seating arrangement in the school was found as separate row of boys /girls in 1037(94.62%) schools, mix boys and girls in 51(4.65%) schools and group formation in only 8(0.73%) schools. Mix and group formation was observed in 59 (5.38%) and these are mostly in primary schools.

Chapter: 5

Conclusions and Recommendations

The scrutiny of U-DISE data reveals that some of the Schools have not provided the proper information. It reflects that Head teachers and concern teachers do not have proper understanding on items of the U-DISE Format. Further the teachers are not taking the UDISE as serious activity. In 5% of sample checking of school survey in 1096 schools and was considered for comparison.

Conclusions

- 2012-13 of this year compare to DISE 2011-12. With the help of NIRD report for last year (2011-12).

After studying overall difference was observed in pre data (data feed from MIS format through BRC/DPO) and 5% sample survey data items 7.28% and thereby giving an accuracy level of 92.72%. The maximum difference in data is noticed in management of school, additional rooms, in position of teachers, condition of boundary wall, number of toilets, source of drinking water and School building. It may be happened because of the respondents inability to interpret the item or it may be wrongly reported figures in UDISE data / format. In the available comparable data, some schools did not provide the information about some of the items.

- It was found less difference than average, in comparison between pre data and sample survey data. In school category (2.73%), lowest/highest class, type of school(0.36%), shift school(3.19%), residential school (0.36%), electricity facility in school (5.93%), availability of playground (4.01%),availability of kitchen shed in (1.64%) school.
- The items like name of the school, establishment year/recognition year, name of H.M. number of blackboards in schools have not been reported properly. Hence, it was felt difficult to calculate the difference on such variables.
- Because of the full co operation of DPO /BRC officers/ official's we haven't faced problems for collecting the data from schools. But some schools were not opened within the stipulated date. Because of this situation were changed, for collecting data with help of BRC/ DPO officials.
- It is found that among the sample schools most of the school teachers come in time to school.
- More than 85% Head Masters/ concerned teacher were able to provide required information pertaining to school though records. Initial reaction of principal/head teacher was also good in most of the schools. The school record was available in most of the schools, the concerned authority was unable to provide perfect information from single register. 75% schools have school report card, 90.60% schools have photo copy of UDISE, 79.29% schools have display board but in most of the schools have not used it properly.

The result of passing percentage of girls is higher than the boys in SSC and HSC result. Passing percentage of open category is higher than SC/ST.

Recommendations

Based on the results of the sample survey some of the recommendations were arrived at for improving MIS, and these are as follows:

- Management of school – school having aided + unaided classes+ unrecognized classes,
- Medium of school – school having more than one medium,
- School category – school having more than one section as English medium primary /secondary/ higher secondary + Marathi medium Primary /secondary/ higher secondary etc.
- Definition of room - Small room for office purpose H.M were using but they were not counted by school in MIS
- Anganwadi - All anganwadies were not in the premises ,are situated in village there fore it is suggested to define premises of anganwadi.
- Number of enrollment of children - specific date for enrollment counting of children, as 30 September.
- The clear instruction should be given to the head masters/ teachers for supplying the perfect information about the UDISE data of the school. They should suppose to know that the same is mandatory and part of their job.
- The 5% sample checking of UDISE data should be done by thy hierarchy of Education Dept. i.e. done by Extension Officer, B.E.O. , E.O. , Dy. D.E. Etc.
- The training for UDISE should be in detailed along with importance of data. MPSP had given clear and best guidelines but proper follow up was not taken by school. There should be physical verification of 5 to 10 % of data at each stage.
- All the teachers must be given proper orientation and awareness regarding importance of the UDISE data and its utility.
- The school has to mandatorily conduct community reading UDISE draft and its data before submitting the final copy to the block.
- MIS coordinators should visit and collected the data from some schools and he / she should verify the data from most of the schools

Investigator Feedback Schedule

1. Name of the Person conducting the survey: -----

2. U-DISE School Code:

--	--	--	--	--	--	--	--	--	--	--

3. Date of visit of the School:/...../.....

4. Was the School open on the first day of the visit: (Yes = 1/ No = 2) ☐

5. If no when was the School visited second time (Date) :/...../.....

6. Was the school open on the second visit: (Yes = 1/ No = 2) : ☐

7. Number of visits made to the school to get information: ☐

(In case the school was closed on both the days, contact the BRC/CRC Coordinators for replacement of the school to be surveyed. Replacement should be resorted only in exceptional cases.)

Attributes pertaining to the Principal /Head Teacher towards the investigation:

Attribute	Category of Response from the school				
	Very Good	Good	Average	Poor	Very Poor
Initial reaction of the Principal/Head Teacher					
Response of the Principal/Head Teacher to provide information					
Availability of Records					

1. Was the Principal /Head Teacher able to provide information pertaining to enrolment and details of pass percentage easily? (Yes = 1/ No = 2): ☐

2. Was the Principal able to give the enrolment and other details from a single Register?
(Yes = 1/ No = 2): ☐

3. Do the teachers in the school fill-up the attendance register properly?
(Yes = 1/ No = 2): ☐

4. Does the principal have the yearend summery details of Children for all grades available with him?
(Yes = 1/ No = 2): ☐

5. Was the School Report Card available in the School?
(Yes = 1/ No = 2): ☐

6. Are the attendance registers properly maintained and kept in the Almirahs?
(Yes = 1/ No = 2): ☐

7. Do the Teachers in the school come on time?

(Yes = 1/ No = 2): ☐

8. Was the School having a photo copy of filled in U-DISE DCF?

(Yes = 1/ No = 2): ☐

9. Did the investigator face any problem in getting the required information from the School?

(Yes = 1/ No = 2): ☐

If yes, briefly mention the kind of problem faced by the investigator in eliciting the information from the school (Please use a separate paper if the space provided is not sufficient)

10. Does the school have a Display Board? [*Yes = 1/ No = 1*] ☐

11. Is there a provision of Mid-day meal in the School? [*Yes = 1/ No = 1*): ☐

12) How is the quality of food being served to the children in the Mid-Day Meal Scheme? ☐
(Please write your comments below)

13. How is the seating arrangement made for children in the school?
(Please write your comments below)
