

In BirthPlace at Hardin Memorial Hospital, we want the birth of your baby to be one of the most memorable and joyful experiences of your life for you, your partner and family. We want to give you the tools needed for you to take some time thinking through the details of your hopes and desires for this special event in your life. Writing a birth plan will give you a chance to think about and discuss with your partner and your caregiver how you would like your birth handled.

A birth plan is a simple clear statement of your preferences for the birth of your child. It is best not to wait until the last minute to put your plan together because there are many aspects of childbirth to consider. It is important to be reasonably flexible in your desires, because you cannot control how every aspect of your labor and delivery will go. Keep in mind that our goal above all is for you to have a safe birth for you and your little bundle of joy. You will want to talk over these preferences with your physician, because it is important to make sure you are both on the same page.

This Birth plan gives you the opportunity to communicate your birth preferences with your physician and healthcare team. When you have completed your plan please print document and take it to your next appointment with your physician so that it can be reviewed together and then signed. Keep one copy for yourself to bring to the hospital with you and one copy will go into your prenatal record at your physician's office.

*When making your wishes known please choose as many as you like
And add anything else that is important to you.*
