

Stars

Aries

March 21 - April 20

You will change your mind on some important issues. Mostly the issues involve your home or things to do with the home but somewhere in there is a worry about some relative. Maybe a relative is acting strangely.

Relationships: There is little to recommend your love stars this week. If you move forward you will move backward at almost the same rate so your rate of progress will be poor. Older people will be attracted to you.

Money: Looking good.
Health: A temperature.

Cancer

June 23 - July 23

Family matters cause concern during this period and there is nothing you can do about them so just be yourself and things will come back to normal in their own sweet time. A "mistake" turns into a triumph for you.

Relationships: There are good stars for marriage and intimacy. You might not fly to the moon under these stars but you will have some delicious moments, times when you will be glad you are you. A very intense week.

Money: Some coming.
Health: The feet.

Libra

September 24 - October 23

Everything will be quiet and you will be lulled into a false sense of security. I don't see this doing you any harm but it might cause embarrassment if it means you are caught unawares. Good vibes for travel plans.

Relationships: There will be sudden changes of attitude by some people. Normally this wouldn't be a bother but this week you will tend to get flustered and, later, wonder why you let silly little things get to you.

Money: A shortage.
Health: The eyes.

Capricorn

December 22 - January 20

You will manage to put right a situation you have long known is totally wrong. This is no time to be judgmental, this is the time to be supportive and show you know what it's all about because you've been there.

Relationships: At least there are excellent stars for love and romance. I wouldn't expect to learn you made love like tigers until dawn each day but there will be some intimate moments, times when love rules.

Money: Looking good.
Health: Feeling fit.

Taurus

April 21 - May 21

Your mind is on money and material possessions, especially the items to which you are attached. Material things break and go out of your life so it's foolish to get attached to them. Time to expand your horizons.

Relationships: Mars in your angle of love and romance has to bring action. It won't bring much in the way of tenderness but with the stars you have right now, action looks pretty good. Organise times and places.

Money: Some gains.
Health: The skin.

Leo

July 24 - August 23

Family members, especially the older ones will take up a good deal of your time. Your main problem is you won't have the time needed to give these matters your undivided attention. Someone shows their appreciation.

Relationships: There is little happening in this part of your horoscope although Neptune will bring fantasies and dreams of teaming up with a good-looking celebrity. The key to success this week is staying grounded.

Money: More outlay.
Health: The throat.

Scorpio

October 24 - November 22

Usually when you insist on going it alone it's because there are complicated things to be done and you don't want people to see you are not quite as efficient as they think. This week brings the work you like most.

Relationships: You have the power to create magic in this part of your life but first you need to believe in magic. Then, when the time is right you use that special Scorpio charm which has never let you down yet.

Money: Small gains.
Health: Pretty fit.

Aquarius

January 21 - February 19

One of those weeks when things seem to come more easily than usual. This doesn't mean you will manage to do the impossible but it means you do the usual things easily and quickly and the right people notice.

Relationships: You have lots of good planets in your angle of love and romance. This won't lead to wild nights of passion but it will bring happy times with good vibes coming from special people. An intriguing week.

Money: More bills.
Health: The back.

Gemini

May 22 - June 22

This seems to be a week of new beginnings. These will affect your private life and your business or working life. Nothing serious here but you will have to make some adjustments. Odd benefits from past conditions.

Relationships: Your relationships with older people look good, they look better than most other relationships but this is temporary so don't make any commitments you might tend to regret later. Keen but that's all.

Money: Tuck some away.
Health: Pretty good.

Virgo

August 24 - September 23

You need to do some long and short-term financial planning. You need to know you can retire rich but most of all, you need to cover your current and upcoming costs. Someone gives you something you appreciate.

Relationships: With Neptune in your angle of marriage and intimacy and Pluto in your angle of love and romance, there are good vibes for love and passion. Set the scene romantic and let these vibes carry you aloft.

Money: A shortage.
Health: The chest.

Sagittarius

November 23 - December 21

Your stars this week promise much but as happens so often with you lately, deliver very little. This will leave you floundering around for a while but you soon sort things out and get everything back up and running.

Relationships: There are good stars for being with friends and associates. For some archers there are even good stars for turning a friend into a lover. This road is fraught with danger so think carefully first.

Money: Some coming.
Health: Watch weight.

Pisces

February 20 - March 20

Neptune, your ruler active in your sign brings a chance for you to do some of the day-dreaming you enjoy. At the same time you will manage to turn some of those day-dreams into reality. Some major domestic changes.

Relationships: Mars active in your angle of marriage and intimacy has to bring action. This is pretty much what you want even though Pisces is not noted for concentrating on the physical side of close relationships.

Money: Small wins.
Health: The legs.
