

ECHE Advisement Interviews

Spring 2013

Preparing for Your Advisement Interview

1. Complete the Professional Development Plan form and be prepared to discuss your answers.
2. Review the Advisement Packet to familiarize yourself with opportunities for academic program enhancement (concentrations, minors, BS/Masters) and beyond-the-classroom experiences (co-op, research, study abroad).
3. Print copies of your transcript and current résumé, and bring them to your Advisement Interview.
4. Print and mark up a copy of the Undergraduate Curriculum Flowchart, indicating courses completed, in progress, and planned for at least the next two semesters; bring it to your Advisement Interview.

Purpose

The advisement interview is an ongoing student/advisor discussion that will help you:

- re-assess your personal aspirations and career interests;
- set long-term professional development goals; and
- develop a “Professional Development Plan” outlining coursework and beyond-the-classroom experiences that will help you achieve your career goals.

A Professional Development Plan, developed with our advice, will help you achieve one of the following milestones:

- Advance professionally in the chemical process industries or in their chosen career field.
- Earn advanced degrees in chemical engineering (or a related technical discipline), medicine, law, or business.
- Attain leadership positions in today’s rapidly changing, increasingly technological, global society.

If you are able to achieve one or more of these milestones within six years of graduation, then the B.S.E. degree program in Chemical Engineering will have fulfilled its Program Educational Objective as required for ABET accreditation.

Advisement Interview Questions

Your advisor will ask you the following questions during your advisement interview. You should be prepared to discuss these questions by answering them, in writing, on the Professional Development Plan form.

- What are your professional or career goals after graduation?
- Are you doing anything (in addition to coursework) to help you prepare for the next step in your career? Have you considered opportunities for academic program enhancement (concentrations, minors, BS/Masters) and beyond-the-classroom experiences (co-op, research, study abroad) that can help you achieve your career goals?
- What are the next steps in your “Professional Development Plan”? How can we help you take these next steps? What are your action items?
- What courses have you completed, and in what courses are you currently enrolled? What courses will you take the next two semesters? When do you plan to graduate?

Advisement Follow-up

If you have an interest in any academic program enhancements (concentrations, minors, BS with Distinction, etc.) or beyond-the-classroom experiences (co-op, internships, research experiences, study abroad), please tell your advisor so that we may contact you again for follow-up action.

ECHE Advisement Information

Spring 2013

Contents

1. Professional Development Plan (PDP) Form (also sent as a separate attachment)
2. ECHE Curriculum Flowsheet (students admitted prior to Fall 2012)
3. ECHE Curriculum Course Table
4. Liberal Arts and Fine Arts Requirements (students admitted prior to Fall 2012)
5. ECHE Elective Course Lists (Engineering, Technical, and Chemistry Electives)
6. Syllabus for ECHE 202: Preparation for the Chemical Engineering Workplace
7. Optional Concentrations within the ECHE Curriculum
8. B.S.E. with Distinction
9. Co-op Options: ECHE Curriculum Course Tables
10. Chemical Engineering Undergraduate Student Options
 - a. Beyond-the-Classroom Experiences: web links for more information on co-op employment, internship employment, REU and research opportunities, and study abroad programs
 - b. Academic Program Enhancement: web links to Undergraduate Bulletin pages for the Co-op for Credit course, ECHE program concentrations, minors in related fields, B.S.E with Distinction, Accelerated BS/Masters, and Senior Privilege

Professional Development Plan

Instructions: think about your aspirations, career interests, and post-graduation professional goals, and then answer the questions below. If your plans are uncertain or undecided, then answer accordingly. Bring the completed form to your advisement interview appointment.

Name: _____ Advisor: _____ Date: _____

Anticipated Graduation Date (month, year): _____

1. What are your professional or career goals after graduation?

2. What past or current professional development activities* are helping you prepare for the next step in your career? (attach copy of current résumé)

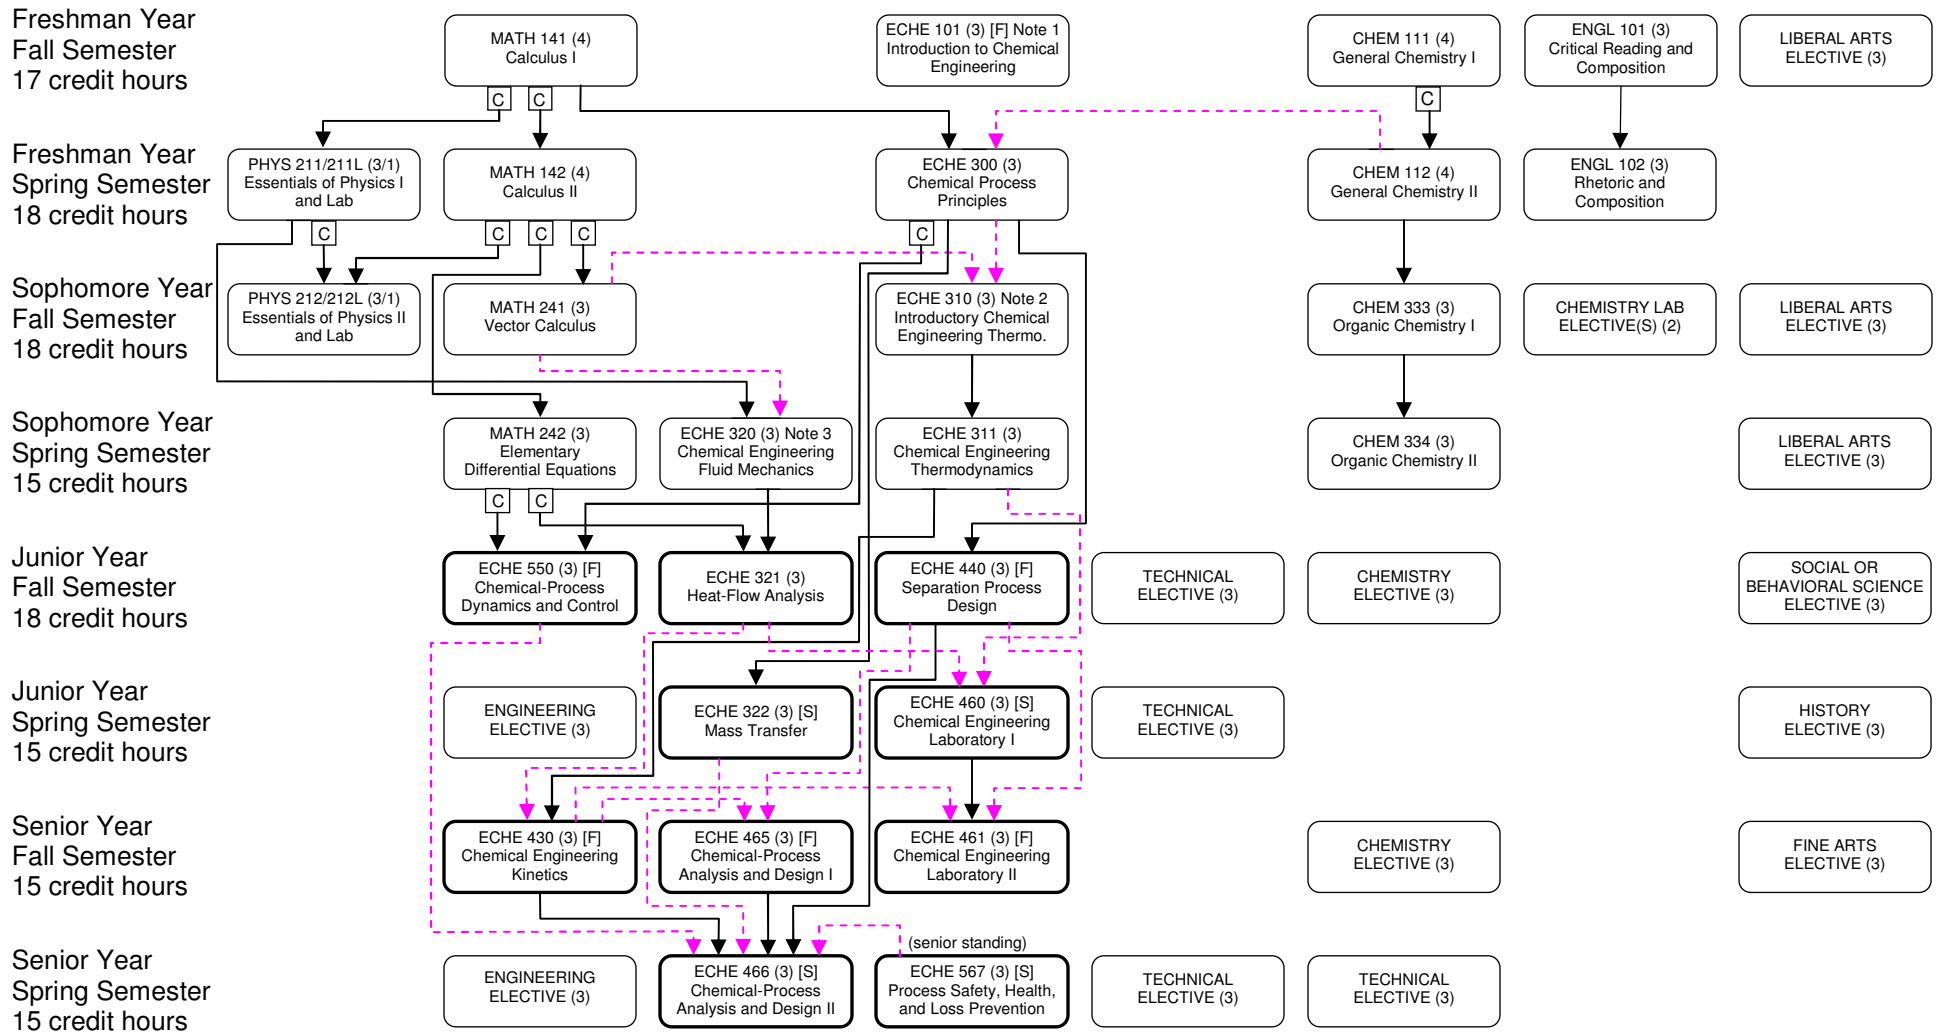

3. What are the next steps in your “Professional Development Plan”? Are you interested in pursuing professional development opportunities* that can help you achieve your career goals? How can we help you take these next steps? What are your action items?

4. What courses have you completed, and in what courses are you currently enrolled? What courses will you take the next two semesters? (attach marked copy of curriculum flowchart or course listing)

* Academic Program Enhancements (concentrations, minors, BS with Distinction, Accelerated BS/Masters), Beyond-the-Classroom Experiences (co-op or internship employment, research, study abroad), Leadership Experiences (student organizations, service-learning activities)

Department of Chemical Engineering

Bachelor of Science in Engineering Curriculum & Flowchart of Prerequisites

Total:
131 credit hours

Note 1. ECHE 101 or ENCP 101 or UNIV 101 for engineers
 Note 2. ECHE 310 or ENCP 290
 Note 3. ECHE 320 or ENCP 360

Footnotes: ¹ or ENCP 101 or UNIV 101E; ² or ENCP 290; ³ or ENCP 360.

Engineering Electives (6 hours): ENCP 200 (or ECIV 200 or EMCH 200), 210 (or ECIV 210 or EMCH 310), 260 (or ECIV 220 or EMCH 260), 330 (or EMCH 330), 540; ECHE 389, 456, 499, 520, 571, 572, 589; ELCT 220, 221, 222, 321, 331, 361, 362, 371, 551; ECIV 320, 325, 327, 350, 362, 426, 520, 551, 555, 560, 562, 563; EMCH 201, 371, 501, 529, 544, 552, 553, 554, 560, 584, 592, 594.

Chemistry Electives (6 hours): CHEM 321, 511, 533, 541, 542, 550, 555, 556, 621, 622, 623, 624, 633, 644.

Chemistry Lab Electives (2 hours): CHEM 321L, 331L (or 333L), 332L (or 334L), 541L, 542L, 550L, 591, 592, 621L.

Technical Electives (12 hours): Includes all courses listed as Engineering Electives, Chemistry Electives, and Chemistry Lab Electives as well as MATH 520, 521, 524, 526 (or 544), 527, 531, 532, 533, 546, 547, 550, 551, 552; STAT 506, 509, 511, 512, 516, 517, 518, 519, 525; BIOL 101, 101L, 102, 102L, 301, 301L, 302, 302L, 303, 415, 460, 570; GEOL 510, 560, 570, 571, 575; MSCI 390, 521, 537, 582; PHYS 307, 501 and above; CSCE 145, 146, 207, 211.

Liberal Arts (18 hours): See reverse side.

Revised Fall 2008 (10/24/08)

Liberal Arts and Fine Arts Requirements

In conformance with University general education requirements and with ABET accreditation criteria, the liberal arts and fine arts requirements for the chemical engineering curricula shall be as follows:

ENGL 101 and 102 are required and must be completed with a grade of "C" or better.

One course in history, one course in fine arts, and one course in a social or behavioral science are required. Courses which will satisfy these requirements are marked with an "h", an "f", or a "b" in the list of permissible courses below.

Three elective courses must be chosen so that the total liberal arts and fine arts program does not include more than **five** fields of study and so that one field includes at least three courses with at least one of those courses at the 300 level or above. The exception is English, for which courses at the 280 level or above count as courses at the 300 level or above. Also for English, ENGL 101 does not count as one of these three courses, but ENGL 102 does.

Thus, you can choose only **one other area in addition to english, history, your choice of fine arts, and your choice of social or behavioral science.**

List of Allowed Courses

AERO	401, 402, (POC Cadets only)
AFRO	201, 202, 335
ANTH	101 (b), 102 (b), 205 (b), * (b) except 399, 501 (b)
ARMY	406 (h), 407 (h), (Army Cadets only)
ARTE	101 (f)
ARTH	105 (f), 106 (f), * (f)
CPLT	Any course
DANC	101(f)
ECON	221 (b) & 222 (or 224) (b), * (b) except 399, 421, 499, 524, 595
ENGL	Any course above 102, except 460 through 467
Foreign languages	121, *, except intensive reading courses or courses about teaching
GEOG	103 (b), 121 (b), 200 (b), * except 399, 595
HIST	Any course (h)
LASP	301, 311, 312, 315, 322, 325, 331, 351, 398+, 425, 451, 454, 455 (all (b))
LING	300, 340, 405+, 442, 505+, 540, 541, 542, 543, 545, 567, 600 (all (b))
MUSC	110 (f), 140 (f), 145 (f), any MUSC history course above 300 (f)
NAVY	303 (h) (midshipmen only)
PHIL	102, * but not 110 or 111
PSYC	101 (b), 103 (b), any course above 300 (b), except 570 to 599
POLI	Any course (b), except 379, 399
RELG	Any course
SOCY	101 (b), any course above 300 (b), except 399
THEA	200 (f), 561 (f), 562 (f)
WOST	112, 210, 300, 301, 304, 305, 307, 308, 310, 351, 352, 358, 430+, 454, 525, 554, 555 (all (b))

* All advanced courses in the field are acceptable, provided the student meets prerequisites.

In addition to the above liberal arts and fine arts requirements, the University requires that the student demonstrate proficiency in a foreign language--either by scoring a "2" or higher on the Foreign Language Placement Test or by completing 2 semesters of the **same** foreign language for example: FREN 109 and FREN 110.

† Pending content.

Revised Fall 2008 (10/24/08)

CHEMICAL ENGINEERING: UNDERGRADUATE ELECTIVES LISTS

Engineering Elective (6 hours)

ENGR 200 (or ECIV 200 or EMCH 200) Statics (3)
ENGR 210 (or ECIV 210 or EMCH 310) Dynamics (3)
ENGR 260 (or ECIV 220 or EMCH 260) Introduction to the Mechanics of Solids (3)
ENGR 330 (or EMCH 330) Introduction to Vibrations (3)
ENGR 540 Environmentally Conscious Manufacturing (3)
ECHE 389 Special Topics in Chemical Engineering (3)
ECHE 456 Computational Methods for Engineering Applications (3)
ECHE 499 Special Problems (3)
ECHE 520 Chemical Engineering Fluid Mechanics (3)
ECHE 571 Corrosion Engineering (3)
ECHE 572 Polymer Processing (3)
ECHE 589 Special Advanced Topics in Chemical Engineering (3)
ELCT 221 Circuits I (3)
ELCT 222 Signals and Systems (3)
ELCT 321 Digital Signal Processing (3)
ELCT 331 Control Systems (3)
ELCT 361 Electromagnetics I (3)
ELCT 362 Electromagnetics II (3)
ELCT 371 Electronics (3)
ELCT 551 Power Systems Design and Analysis (3)

ECIV 325 Structural Steel Design (3)
ECIV 327 Reinforced Concrete Design (3)
ECIV 350 Introduction to Environmental Engineering (3)
ECIV 360 Introduction to Water Resources Engineering (3)
ECIV 426 Structural Design (3)
ECIV 520 Structural Analysis II (3)
ECIV 551 Elements of Water and Wastewater Treatment (3)
ECIV 555 Principles of Municipal Solid Waste Engineering (3)
ECIV 560 Open Channel Hydraulics (3)
ECIV 562 Engineering Hydrology (3)
ECIV 563 Subsurface Hydrology (3)
EMCH 201 Introduction to Applied Numerical Methods (3)
EMCH 371 Engineering Materials (4)
EMCH 501 Engineering Analysis I (3)
EMCH 529 Sustainable Design and Development (3)
EMCH 544 Compressible Fluid Flow (3)
EMCH 552 Introduction to Nuclear Engineering (3)
EMCH 553 The Nuclear Fuel Cycle (3)
EMCH 554 Intermediate Heat Transfer (3)
EMCH 560 Intermediate Fluid Mechanics (3)
EMCH 584 Advanced Mechanics of Materials (3)
EMCH 592 Introduction to Combustion (3)
EMCH 594 Solar Heating (3)

Chemistry Electives (6 hours)

CHEM 321 Quantitative Analysis (3)
CHEM 511 Inorganic Chemistry (3)
CHEM 533 Comprehensive Organic Chemistry III (3)
CHEM 541 Physical Chemistry (3)
CHEM 542 Physical Chemistry (3)
CHEM 550 Principles of Biochemistry (3)
CHEM 555 Biochemistry/Molecular Biology I (3)
CHEM 556 Biochemistry/Molecular Biology II (3)
CHEM 621 Instrumental Analysis (3)
CHEM 622 Forensic Analytical Chemistry (3)
CHEM 623 Introduction to Environmental Chemistry (3)
CHEM 624 Aquatic Chemistry (3)
CHEM 633 Introduction to Polymer Synthesis (3)
CHEM 644 Materials Chemistry (3)

Chemistry Lab Electives (2 hours)

CHEM 321L Quantitative Analysis Laboratory I (1)
CHEM 331L Essentials of Organic Chemistry Laboratory I (1)
CHEM 332L Essentials of Organic Chemistry Laboratory I (1)
CHEM 333L Comprehensive Organic Chemistry Laboratory I (2)
CHEM 334L Comprehensive Organic Chemistry Laboratory II (2)
CHEM 541L Physical Chemistry Laboratory (1)
CHEM 542L Physical Chemistry Laboratory (1)
CHEM 550L Principles of Biochemistry Laboratory (1)
CHEM 591 Advanced Experimental Chemistry I (2)
CHEM 592 Advanced Experimental Chemistry II (2)
CHEM 621L Instrumental Analysis (1)

Technical Electives (12 hours)

Includes all courses listed as Engineering Electives, Chemistry Electives, and Chemistry Lab Electives as well as

MATH 520 Ordinary Differential Equations (3)
MATH 521 Boundary Value Problems and Partial Differential Equations (3)
MATH 524 Nonlinear Optimization (3)
MATH 526 Numerical Linear Algebra (4) or MATH 544 Linear Algebra (3)
MATH 527 Numerical Analysis (3) (or EMCH 201)
MATH 531 Foundations of Geometry (3)
MATH 532 Modern Geometry (3)
MATH 533 Elementary Geometric Topology (3)
MATH 546 Algebraic Structures I (3)
MATH 547 Algebraic Structures II (3)
MATH 550 Vector Analysis (3)
MATH 551 Introduction to Differential Geometry (3)
MATH 552 Applied Complex Variables (3)
STAT 506 Introduction to Experimental Design (3)
STAT 509 Statistics for Engineers (3)
STAT 511 Probability (3)

Technical Electives (12 hours) (cont.)

STAT 512 Mathematical Statistics (3)
STAT 516 Statistical Methods II (3)
STAT 517 Computing in Statistics (3)
STAT 518 Nonparametric Statistical Methods (3)
STAT 519 Sampling (3)
STAT 525 Forecasting and Time Series (3)
BIOL 101 Biological Principles I (3)
BIOL 101L Biological Principles Laboratory I (1)
BIOL 102 Biological Principles II (3)
BIOL 102L Biological Principles Laboratory II (1)
BIOL 301 Ecology and Evolution (3)
BIOL 301L Ecology and Evolution Laboratory (1)
BIOL 302 Cell and Molecular Biology (3)
BIOL 302L Cell and Molecular Biology Laboratory (1)
BIOL 303 Fundamental Genetics (3)
BIOL 415 Comparative Vertebrate Anatomy (4)
BIOL 460 General Physiology (3)
BIOL 570 Principles of Ecology (3)
GEOL 510 Organic Sedimentation and Coal Genesis (3)
GEOL 560 Earth Resource Management (3)
GEOL 570 Environmental Hydrogeology (3)
GEOL 571 Soil Hydrology (4)
GEOL 575 Introduction to Groundwater Modeling (3)
MSCI 390 Science and Environmental Policy (3)
MSCI 521 Introduction to Geochemistry (3)
MSCI 537 Aquaculture (3)
MSCI 582 Marine Hydrodynamics (3)
PHYS 303 Intermediate Modern Physics (3)
PHYS 351 Introductory Biophysics (3)
PHYS 501 Modern Physics (3)
PHYS all courses above 501
CSCE 145 Algorithmic Design I (4)
CSCE 146 Algorithmic Design II (4)
CSCE 207 Programming and the Unix Environment (3)
CSCE 211 Digital Logic Design (3)
CSCE higher level courses consult with advisor

There may be some courses that are viable electives but are not on these lists. Please ask your advisor about the course you are interested in to find out if it can count as an Engineering, Chemistry, Chemistry Lab, or Technical Elective.

ECHE-202: Preparation for the Chemical Engineering Workplace

Required Text

Myers-Briggs Type Indicator (MBTI) - (\$15.00)

Required Readings (TBA)

Readings will be provided during class or posted on Blackboard. Students will be provided with electronic and/or copies of relevant readings.

Course Description: (1 credit: 1, 75 minute lecture per week for 10 weeks)

This course will help students identify their interests and actively explore careers in chemical engineering. Students will identify why experiential education and skill development are critical components of career preparation. This course will provide practical tools for workplace preparation and performance.

Course Learning Outcomes

I. Develop students self awareness

As a result of this course, students will:

- a. be able to identify their work related interests
- b. be able to identify their work related values
- c. be able to identify their personality preferences

II. Educate students about the world of work and current workplace trends

As a result of this course, students will:

- a. be able to identify significant events in the history of work;
- b. be able to identify current trends shaping the global marketplace;
- c. develop a greater understanding of select occupations;
- d. be able to identify the competencies necessary to be competitive in today's workplace; and
- e. be able to research and report on specific chemical industries.

III. Educate students about experiential education

As a result of this course, students will:

- a. be able to define experiential education;
- b. be able to articulate and reflect on the value of experiential education;
- c. be able to identify experiential education opportunities; and
- d. educate their peers on the diversity of experiential education opportunities available.

IV. Develop tools and competencies relevant to the world of work

As a result of this course, students will:

- a. participate in networking activities with employers;
- b. develop oral presentation skills;
- c. develop appropriate writing skills related to job searching activities;
- d. develop skills in teamwork and leadership through group projects; and
- e. recognize competencies necessary in today's workplace.

Topics

1. Student self awareness towards interests, values and personality preferences. (2 week)
2. History, current trends, and opportunities in the chemical industries. (2 weeks)
3. Value and opportunities in experiential education. (3 weeks)
4. Tools and competencies relevant to the world of work. (3 weeks)

Academic Integrity & Responsibility

The University of South Carolina expects high standards in all areas from its students. The University, as well as faculty, staff, alumni, and students, believe strongly in the Honor Code. This Code requires acceptance of certain responsibilities and agreement by all students to abide by the spirit of the Honor Code upon entering the University of South Carolina. In order that you may better understand the required responsibilities, the general University community codes are outlined below.

1. It shall be the responsibility of every faculty member, student, administrator and staff member of the University community to uphold and maintain the academic standards and integrity of the University of South Carolina.
2. Any member of the University community, who has reasonable grounds to believe that an infraction of the code of Student Academic Responsibility has occurred, has an obligation to report the alleged violation.

Violation of any of the following standards subjects the student to disciplinary action: bribery, cheating, lying and plagiarism.

Your enrollment in this class signified your willingness to accept these responsibilities and uphold the Honor Code of the University of South Carolina. For further explanation of the Code of Academic Student Responsibility, please refer to the Carolina Community Student Policy Manual

Attendance Policy

This class is treated like a work situation. Just as attendance is required for employment, it is required for class. *The University attendance policy* specifies that students may only 1 class meetings (10% of class time) without penalty. The 2nd absence will result in a grade penalty of one letter grade. The 3rd absence will result in a deduction of 2 letter grades. Quizzes, homework, and participation points cannot be made up except in the case of extreme illness or loss.

Late arrival to class interrupts both your instructor and fellow students. Deductions will be made in your class attendance if you are persistently or excessively tardy to class (more than several minutes). Attendance will be taken each day; **remember that you are expected to contact your instructor in advance any time you will miss class.**

General Expectations

1. Attendance & Timeliness
2. Participation & Engagement
3. Academic Integrity
4. Respect for instructors and fellow students
5. Regular use of Blackboard
6. Complete all assignments, group work, activities and readings with respect to due date(s)
7. All electronic devices should be turned OFF during class
8. Bring required reading material to each class meeting

Syllabus Clause and Contract

This syllabus may be revised and adapted throughout the semester to better serve the needs of the class. The instructor may assign additional reading and/or assignments as needed. Additionally, the decision to remain in this class upon receipt of the syllabus serves as the students' acceptance of this syllabus as a binding contract, meaning they agree with the terms set forth and the expectations of them as members of this class.

Class Format and Grading

Classes will be a combination of lecture, discussion, and activities. Homework (75%) and project (25%) will be assigned and completed outside of class. These will make up the final grade. No exams will be given.

Grading Scale

- A = 90-100
- B+ = 85-89
- B = 80-84
- C+ = 75-79
- C = 70-74
- D+ = 65-69
- D = 60-64
- F < 60

Optional Concentrations

The chemical engineering curriculum provides a thorough grounding in the basic sciences of chemistry and physics. It also provides the engineering application of these basic sciences to the design, analysis, and control of chemical and physical processes, including the hazards associated with these processes. This is accomplished through a series of required courses and a variety of technical, engineering and chemistry electives. These program electives allow the student to obtain concentrated knowledge in a specialty area of chemical engineering.

Students may opt to pursue any of the following concentrations.

Concentration in Biomolecular Engineering

Students may choose to select program electives to satisfy the requirements for an optional concentration in Biomolecular Engineering. A student must complete both BIOL 102 and BMEN 392. A student must complete a six hour cell and molecular biology sequence (CHEM 555 and CHEM 556) or (CHEM 550 and BIOL 302). The student must complete two courses (6 credit hours) from the following list of electives: BMEN 546, BMEN 572, BMEN 271, BMEN 389, BMEN 589.

Concentration in Interdisciplinary Engineering

Students may choose to select program electives to satisfy the requirements for an optional concentration in Interdisciplinary Engineering. A student must complete five courses (15 credit hours) from the following list of electives: EMCH 200 (or ECIV 200 or ENCP 200), EMCH 260, EMCH 310, MATH 526, STAT 509, CSCE 206 or ECHE 456, ELCT 220 or ELCT 221, ECHE 372 or EMCH 371, CHEM 621.

Concentration in Materials

Students may choose to select program electives to satisfy the requirements for an optional concentration in Materials. A student must complete five courses (15 credit hours) with two courses (6 credit hours) from ECHE 571, ECHE 572, or ECHE 372. The student must also complete three courses (9 credit hours) from one of three options: (EMCH 200, EMCH 260, and EMCH 310) or (ELCT 220 or ELCT 221, ELCT 363, and ELCT 563 or ELCT 581) or (CHEM 511, CHEM 633, and CHEM 644).

Concentration in Energy

Students may choose to select program electives to satisfy the requirements for an optional concentration in Energy. A student must complete five courses (15 credits), which must include ECHE 573 and ECHE 372, ECHE 571 or ECHE 572. The student must also complete three courses (9 credit hours) from the following list of electives: ECHE 574, ELCT 510, ELCT 563, EMCH 551, EMCH 552, EMCH 553, EMCH 576, EMCH 592, EMCH 594.

B.S.E. with Distinction

The B.S.E. with Distinction is available to students majoring in chemical engineering who wish to participate in significant research and/or design activities in chemical engineering with a faculty mentor.

Prerequisite

A minimum GPA of 3.50 in major courses, 3.50 in all engineering courses, and 3.50 overall at the time the student applies to enter the departmental undergraduate research track.

Requirements

The student should apply to enter the departmental undergraduate research track and choose the members of the thesis committee as early as possible but in all cases at least one year before submitting and defending the thesis. The thesis committee will consist of a thesis advisor, who must be a tenure-track faculty member in chemical engineering, and two other tenure-track or research faculty members in chemical engineering or in any other department.

By the end of the semester in which the student is admitted into the research track, a short description of the research must be agreed upon by the thesis committee and the student, and filed in the college office. Projects involving research and/or design are acceptable. The design projects or research projects for ECHE 465, 466, 567, or other courses are not acceptable as the thesis. The student must also choose three credit hours of engineering or technical elective courses related to the thesis topic. The course(s) must be approved by the thesis committee and completed by the student at least one semester before the thesis is submitted and defended.

Before submitting and defending the thesis, the student must have completed three credit hours of ECHE 499 Special Problems under the thesis advisor, preferably one credit hour per semester. During the semester in which the thesis is submitted and defended the student must also complete three credit hours of ECHE 497 Thesis Preparation, one credit hour under each of the three members of the thesis committee. At least two months before submitting and defending the thesis, the student must present a progress report to the thesis committee orally and in writing.

By the end of his/her last semester, the student must have presented the research at a national meeting of a professional society (such as AIChE, ACS, ECS, etc.), at Discovery Day at USC, or at a comparable venue. The student must also submit a written thesis describing the research and defend it orally before the thesis committee. The defense must be announced at least one week in advance and be open to the general public.

Students who successfully fulfill all of these requirements with a GPA of at least 3.50 in the three hours of ECHE 497, 3.50 in all major courses, 3.50 in all engineering courses, and 3.50 overall, will be awarded their degree with "Distinction in Chemical Engineering" upon graduation.

Chemical Engineering Undergraduate Student Options

Beyond the Classroom Experience - Many valuable experiences are possible outside of the traditional academic classroom. USC has developed [USC Connect](#) to encourage students to develop outside the traditional classroom. Some typical possibilities for chemical engineering students include:

Industrial Co-Op - Students gain valuable industrial experience while working full-time in industry. Placement rates and initial salaries are typically higher for co-op students. [Contact CEC Career Center.](#)

Undergraduate Research - Students can work with world-class researchers during the school year. Students can perform research for elective credit (up to 3 hours) or sometimes for payment. [Contact ChE Faculty.](#)

Summer Internships - Some companies offer internships, providing experience and funding. [Contact CEC Career Center.](#)

Summer REU - The National Science Foundation supports [Research Experience for Undergraduates \(REU\)](#) programs at numerous universities where students spend 8-10 weeks in the summer working in a research lab. [Google search for chemical engineering reu.](#)

Study Abroad - Students have various international opportunities, ranging from Maymester to summer classes to full semester / year abroad. [Contact USC Study Abroad Office.](#)

Professional Societies - Participation in professional societies offer various educational and leadership opportunities. Meetings may be a guest speaker from industry, a discussion of [SET job fair](#), or preparation for competitions at [national and regional conferences](#). Most chemical engineering students join the [American Institute of Chemical Engineers \(AIChE\)](#) but there are a variety of [student groups](#) in the [College of Engineering and Computing](#) that students can also participate in, as well as the hundreds of [USC student organizations](#).

Co-Op for Credit - To encourage participation in the industrial co-op program, a student can elect to take three engineering elective credit hours related to industrial preparation. The student would complete one hour of professional preparation [ECHE 202](#) before their first co-op experience and one hour of [ECHE 499](#) after each co-op rotation.

Concentrations - A concentration requires fewer than 19 credit hours. Concentrations appear on the official transcript. Chemical Engineering students can select elective courses to complete one or more of the following concentrations:

[Concentration in Biomolecular Engineering](#)

[Concentration in Energy](#)

[Concentration in Interdisciplinary Engineering](#)

[Concentration in Materials](#)

Minors - A minor typically requires more than 18 credit hours of coursework in a given major. Students can select electives in support of a

coursework in a given major. Students can select electives in support of a minor but they may need to take additional courses beyond those required for a Chemical Engineering degree. Students should check the programs for updated information. There are [many minors \(scroll down past undergraduate majors\)](#) to consider. Some possible minors include:

[Minor in Biology](#)

[Minor in Chemistry](#)

[Minor in Computer Science](#)

[Minor in Geological Sciences](#)

[Minor in Physics](#)

[Minor in Mathematics](#)

[Minor in Nuclear Engineering](#)

Degree With Distinction - Chemical Engineering undergraduates interested in cutting-edge research may apply to the Degree with Distinction program. The student must have a 3.5 GPA and must take an elective course related to their research topic as approved by their thesis committee. The student must ultimately defend an original research thesis in front of a committee of three faculty members. [Program details.](#)

Honors Thesis - Chemical Engineering undergraduates in the USC Honors College are encouraged to perform laboratory research in support of their Senior Thesis. The capstone senior design project is group work for a required class and will not be acceptable as a USC Honors Thesis without significant individual modification or expansion. Alternatively, the Honors Thesis may be completed in another academic discipline. Note that Honors College students may simultaneously complete a Degree With Distinction. [Program details.](#)

Accelerated BS / MS Program - A student in this program can count graduate level courses toward both an undergraduate and graduate degree. The student must first enroll in the program and then take 700 level courses or take 500 level courses for graduate credit. [Program details.](#)

Senior Privilege - A student can take up to six hours of 700 level graduate coursework if not enrolled in the accelerated BS / MS program. These courses will not count toward an undergraduate degree and the course/s may only be taken in the final semester before graduation. The student should gain experience that could be beneficial in graduate school or industry. [Program details.](#)

Note, the [official USC bulletin](#) contains the ultimate description of all requirements for degrees, minors, and concentrations. Some links on this page are to other sources of information that may not be updated as frequently.
