(Note: Sat navs use PR26 6LZ)  
Event includes site visit to Chisnall Hall trial site

**When: 18<sup>th</sup> September 2012**

12.00 **Registration - Tea/coffee/sandwiches**

12.30 **Welcome & Introduction**

Using digestate in landscape and regeneration applications **WRAP 2012.**

An overview of current WRAP funded field trials looking at the use of digestate in landscape applications.

*Dr. Helen Rawlinson – Mint Green Environment*

12.50 **Site visit – Chisnall Hall former colliery/restoration scheme**

Global Renewables, WRAP and industry experts have now teamed up to deliver a research project investigating the use of digestate with organic growing media (OGM) to grow several tree species and energy crops, at a former colliery site, in Chorley. Phil and Mark will present the case study including the site characteristics, experimental design, organic amendments and species selection.

*Dr. Phil Putwain – Director, Ecological Restoration Consultants  
Mark Gordon – Woodlands Manager*

14.45 Coffee break

15.00 **Global Renewables Facility tour**

Paul will present an introduction to Global Renewables' organic products (production and uses) and provide a tour of the waste facility, in Leyland, Lancashire.

*Paul Whyatt – Organics Manager, Global Renewables Lancashire*

16.30 **Close**

Working together for  
a world without waste
