## General Building Project Requirements Certain requirements may not apply to specific project types

- 1. All weeds & vegetation need to be removed before any fill is placed in the foundation area.
- 2. Setback inspection must be requested when strings are set.
- 3. A minimum of 18" finish floor elevation is required above curb or crown of the street.
- 4. Two (2) paved off-street parking spaces connected to a street are required for all buildings.
- 5. A 5 ft wide ADA/TAS sidewalk 1 ft from property line along all lot boundaries adjacent to Public Street.
- 6. One portable rest-room facility per housing construction site.
- 7. Any changes of deviations from plans are required to be submitted for approval.
- 8. Front yards shall be completely landscaped.
- 9. Have an active agreement with City of Alton for solid waste service to dispense all construction debris and litter containment.
- 10. Subcontractors for electrical, mechanical (A/C), and plumbing must be licensed and bonded with current City of Alton registration and permit.
- 11. All properties must be cleared of construction debris and trash before final inspection.

| Common Inspections List          |  |  |  |  |  |
|----------------------------------|--|--|--|--|--|
| Electrical temporary pole        | Request any time after building permit has been applied for.   |  |  |  |  |
| Plumbing underground:            | Verify setbacks,property lines must be strung up for inspection5 PSI air test allowed during wet weather only.   |  |  |  |  |
| Foundation/Steel                 | Check for vapor barrier, steel grading, spacing, and supports.   |  |  |  |  |
| Framing                          | For residential permits, the inspector conducts the rough-in of all trades, electrical, plumbing, mechanical, etc. and general framing including windstorm (bracing, hurricane ties, etc.) and energy code (leakage, glazing, u-factors, a/c duct, r-values, etc.)For commercial and residential remodels, trade inspections may be requested independently.   |  |  |  |  |
| Insulation                       | Check insulation coverage, and verify that R-values meet with the energy compliance report.  |  |  |  |  |
| Ceiling                          | For commercial permits, check all trades (plumbing, electrical, and mechanical). Trade inspections may be requested independently, or all together.  |  |  |  |  |
| Infiltration                     | To check for seal of all perimeter walls, and ceiling gypsum/drywall penetrations (plumbing, electrical, etc.) as defined in the energy code.  |  |  |  |  |
| Sewer line connection            | May be requested at any point after/during plumbing rough-in inspection.   |  |  |  |  |
| Driveway and Sidewalks\<br>Ramps | May be requested at any point after sewer line connection. Sidewalks Min. 4" thick and Driveways Min. 6" concrete reinforced with no. 6 gage wire mesh or No. 3 bars @ 12" O.C or No. 4 bars @ 18" O.C. Bar-lift Plastic Chairs, or approved equal, shall be used to secure steel at center of concrete thickness.   |  |  |  |  |
| Final                            | All applicable departments inspect for compliance with codes and conditions.  * Landscaping Ordinance for Residential and Commercial Sites- Please Contact Planning Dept. If further information is needed.  * Electrical working clearance- Requires an electrical working clearance permit, and is for equipment testing, and construction completion, not for occupancy. For commercial projects, a deposit will be required based on the percent of construction remaining. * Temporary occupancy (T/O)- Only applies to commercial permits, and requires approval by all applicable |  |  |  |  |

departments. A deposit may be required; the deposit is determined by items pending to complete the project.
