MAULANA AZAD
NATIONAL INSTITUTE OF TECHNOLOGY
BHOPAL (M. P.) – 462 051

ABOUT THE INSTITUTE

Maulana Azad National Institute of Technology (MANIT), an Institute of National Importance, was founded in 1960 as a Regional Engineering College (REC) and named after the great scholar and first Education Minister of India, Maulana Abul Kalam Azad. Right from its inception, the institute has been successful in attracting bright young engineering students from all nooks and corners of the country and has succeeded in churning out highly skilled and competent manpower that has made significant contribution to the growth and development of the country. With faculty strength of almost 300, nearly 5000 students, 13 UG and 20 PG courses, and a variety of applied and theoretical research programs; the institute is one of the most prominent institutes in Central India.

ABOUT BHOPAL

Bhopal, the capital of Madhya Pradesh, is a truly beautiful city famous for its lakes and hills. It is a centrally located place which is well connected to all parts of the country by road, rail and air. MANIT is about 10 km from the main railway station of Bhopal and almost 5 km from Habibganj railway station.

INTRODUCTION

Knowledge, as we all understand, is the most important attribute of human beings and a

fundamental requirement. From time immemorial, human beings have continuously strived to acquire knowledge about their surroundings and utilized the knowledge thus obtained for making their existence comfortable by innovating new technologies, products, and sustainable models of habitation.

Knowledge, as an idea, has never been static, and the same holds good with regard to the means of learning and spreading knowledge. With the inception of Internet, things have changed radically. Most youngsters haven't seen a world without emails, social networking sites, search engines and the online resources including databases, eBooks, etc.. This makes it imperative for libraries, academic institutions and educators to adopt the modern modes and means of instruction, and communicate with the modern day student community in a language they are conversant and comfortable with.

AIM OF THE COURSE

With conventional books fast becoming a thing of the past (though they will never become redundant or collector's items as some enthusiasts would like us to believe!), the eBooks and other online resources are here to stay and we just can't ignore their strong impact on how knowledge is acquired and disseminated. This is amply demonstrated by a number of technology schools embracing technology in a major way, the

publishing industry investing so much in developing technology, and most premier publications settling for 'Print on Demand' concept rather than maintaining and incurring costs on inventory.

The aim of this workshop is to identify focus areas and connect to technological changes as we look forward to a teaching-learning era dominated by technology, eBooks and online resources, and also to serve as an awareness building exercise aimed at students, research scholars and faculty so that we, as a community, do not lag behind in a world which seems to be heading in the direction of acknowledging only those nations that are knowledge driven and are receptive to change which, in effect, is the only permanent thing.

ELIGIBILITY

Interested Faculty and Employees of AICTE / UGC recognized institutes, Students and Research Scholars (Preferably with a background in Library Science & Library Management), Librarians / Library Personnel, etc..

ORGANIZING GROUP

This STTP is organized by the Central Library of MANIT and an interdisciplinary core group comprising researchers and faculty members with diverse academic backgrounds that include engineering, science & management.
