

Skyview High School

Video Production Program & Photography Class

Your student is requesting to check out video production or photography equipment for use overnight or during the weekend from the Skyview High School for Video Production or Photography class assignments only. Your prior approval for the year is required before equipment may be checked out to your student for after-school use. Your student will be given plenty of class time to finish their assignment. Borrowing equipment for use outside of class time is purely optional and voluntary – it will not be a requirement for the class.

If your student chooses to record outside the regular class time, your daughter/son and YOU assume full responsibility for replacement or repair to the equipment should it be damaged, lost or stolen. Equipment will not be checked out overnight or for weekends without parent/guardian approval on this form. Minimum equipment repair bills are \$100. Replacement of equipment, depending on piece(s) checked out, ranges from \$100 - \$7000.

Equipment being checked out after school **MUST** be returned before school the next day or the first school day following a weekend. If a student is ill on the day equipment is due for return, that equipment **MUST BE RETURNED**. This privilege will be revoked for infractions of these rules.

Thank you,
Nancy Wistrand
Video Production & Photography Instructor
