

Trauma Nurse Core Course

May 13th & 14th 2015

Citizen's Medical Center, Colby, Kansas

ENA developed the Trauma Nursing Core Course to establish a standardized body of trauma nursing knowledge and to improve the care of all trauma patients. This seventh edition course combines interactive learning with scenario-based assessments to give nurses a comprehensive learning experience.

The 2 day intensive course includes:

A Systematic Approach of Initial Assessment

Nurses learn A-I mnemonic and the Trauma Nursing Assessment.

Evidence-based Content Written by Trauma Experts

24 chapter comprehensive manual with dedicated chapters for special populations.

Hands-on Skill Stations

Nurses practice the systematic approach in real life situations with skilled instructors.

5 Online Modules

Complete case studies taking nurses through an entire sequence of care.

Verification and Contact Hours

RN candidates with successful completion will receive the ENA TNCC 4 year provider verification card. All attendees will be awarded a contact hour certificate with appropriate contact hours. 17.65 contact hours will be awarded for course completion.

Anyone can audit the course, and is encouraged in rural areas. If you have any questions please do not hesitate to contact course director.

Payment Information (Prepayment required)

I have enclosed: Check made payable to Citizen's Medical Center

If your check is returned for any reason, there is a \$30 charge.

Confirmation materials will be sent upon receipt of registration.

Registration Deadline: Three Weeks Prior to Course

Date

Registration Fee: \$150

Pre-registration is required.

Program fee due at time of registration.

Mail Registration to: Email is preferred- emergencynp1@yahoo.com or snail mail to 310 East College Drive, Colby Kansas, 67701-3716, Attn: Brandon Bailey

Trauma Nurse Core Course

May 13th & 14th 2015

Citizen's Medical Center, Colby, Kansas

Overview of the Program

TNCC consists of lectures, hands-on psychomotor skill stations and interactive online learning. TNCC is based on the nursing process, which is emphasized through the components of the course. Although many of the trauma care principles are basic in theory, rationale for standard concepts is presented, and underlying critical thinking is included. The chapter content is organized in a consistent format for ease of learning. Lectures highlight critical concepts presented in the chapters to reinforce learning of these concepts and the nursing process.

The psychomotor skill stations integrate cognitive knowledge with skill practice in simulated patient situations. Each teaching station scenario highlights a selected patient population experiencing different mechanisms of injury. This illustrates and emphasizes chapter content for the demonstration of assessment skills and applicable injury management.

Evaluation Methods

Successful completion of the course includes scoring a minimum of 80% on the 50-item multiple choice examination and demonstrating all critical steps and 70% of the total points in the evaluated skill stations. Participants have the ability to repeat the written examination or a psychomotor skill station one time if needed.
