## Sizing

We find most riders who wear a standard size in any one of our competitors' breeches will fit similarly in our sizing. We do offer the additional benefit of in-between
waist sizes in several instances, so for example if you find a 26 inch waist too tight, but a 28 inch waist a bit loose, we do offer a 27 inch waist size for a near perfect
fit!

## TALL BOOTS MEASUREMENT GUIDE

- Sit in a straight chair with your knees bent at 90 degrees to the floor.
- Wear the breeches and socks that you would most likely wear with your tall boots.
- Have someone else measure your calves, if possible:
A. Measure foot for shoe size.
B. To determine calf width: Measure the calf width at the widest part of the calf.
C. To determine calf height: Measure leg height from the floor to the bend behind the knee.
- Add approximately $1 / 2^{2}-3 / 4^{"}$ to allow for drop.
- Approximate drop allowance is built into the chart height measurements so make sure you add drop to your leg measurement. Non-zip styles will drop more than zip styles.

Size specifications are based on body sizing measurements. Please refer to the chart below as a general guideline for sizing.
PLEASE NOTE: We recommend the use of sizing samples in order to ensure the most accurate sizing for our styles.
CHEST: Measure just under the arms and across shoulder blades holding tape firm and level.
HIP: In Standing position, measure around the fullest point of your hip.
SLEEVE LENGTH: With arm relaxed at side and slightly bent measure from center back neck, over the shoulder, down to the outer wrist.
INSEAM: In Standing position, measure from the crotch inseam to the ankle bone.
