ACE Agreements

Paperbound/Digital

ACE Agreements are industry-standard documents for the appointment of consultancy and engineering professionals, which offer up-to-date flexible agreements for both clients and consultants.

ACE Agreements and Schedules of Services are sold individually. The separate services documents mean that both client and consultant can tailor the services to match the requirements of a project. A complete suite including the ACE Short Form Agreement, is available for use in Scotland.

Features

- Both client and consultant can tailor the services to match the requirements of a project
- Agreements can accommodate any size of consultancy commission
- Agreements are multi-functional and can accommodate the presence of a project manager and/or a lead consultant in the team
- Both client and consultant are able to introduce personnel with delegated powers to run a project whilst ensuring overall responsibility at senior managerial level
- Incorporation of payment and adjudication provisions which comply with current legislation
- The schedule of fees accommodates:
 - Time charges
 - Lump sums
 - Percentage fees
 - Fees for additional work
 - Fees for arranging work to be undertaken by others
 - Payment of expenses
 - Payment for collateral warranties

Digital is the convenient way to manage all your contract needs

Why digital:

- Agreements and Schedules of Services are available for easy and convenient access
- Available immediately. No waiting for delivery; you can purchase your Digital Agreement and start completing your Agreement ready for sending to your client
- Access your documents online anywhere, anytime from any Internet connection
- Hosted on a secure platform with maximum encryption and data protection and partnered with Rackspace, the world's leading hosting and dedicated server provider
- Agreement licences give you the right to edit and print your Agreement for a unlimited number of times within a six month period from the purchase date
- Support teams are available between 9am – 5pm Monday to Friday to assist you with your queries and advice

All prices subject to VAT at the current rate.

ACE members receive 50% discount across the ACE Agreements suite.

ACE Short Form Agreement 2015

For use where there is a clear and concise description/brief of the Services the Consultant is required to deliver. The Schedule to the Agreement enables the Consultant to set out the basis on which fees and expenses are to be paid. The Schedule also provides for any limit of liability or exclusions to be stated as well as the amounts of public liability and professional indemnity insurance. The Agreement can be used in relation to BIM projects. Suitable for use in Scotland.

ACE Agreements (Complete set)

Agreements 1 – 8 + Short Form 2015

2009 Editions
978-1-907660-32-0

Paperbound copy
List price: £264

ACE Agreement 1: Design

For the appointment of a Consultant to design permanent Works where the Client appointing the Consultant intends to employ a Contractor to construct or install such permanent Works.

2009 Edition, Second Revision
978-1-907660-54-2
978-1-907660-79-5 (Digital Edition)

Paperbound copy **Digital copy**
List price: £36 List price: £34

Licences available on request

ACE Agreement 2: Advisory, Investigatory and other Services

For the appointment of a Consultant to undertake any type of services in the built and natural environments except where the Client appointing the Consultant intends to employ a Contractor to construct or install permanent Works designed by the Consultant as part of the services.

2009 Edition, Second Revision
978-1-907660-55-9
978-1-907660-80-1 (Digital Edition)

Paperbound copy **Digital copy**
List price: £36 List price: £34

Licences available on request

ACE Agreement 3: Design and Construct

For the appointment of a Consultant by a Contractor in circumstances where the Contractor is to construct permanent Works designed by the Consultant.

2009 Edition, Second Revision
978-1-907660-56-6
978-1-907660-81-8 (Digital Edition)

Paperbound copy **Digital copy**
List price: £36 List price: £34

Licences available on request

ACE Agreement 4: Sub-Consultancy

For the appointment of a Sub-Consultant by a Consultant in circumstances where the Consultant is appointed on the terms of an ACE Agreement by its Client.

2009 Edition, Second Revision
978-1-907660-57-3
978-1-907660-82-5 (Digital Edition)

Paperbound copy **Digital copy**

Infrastructure Conditions of Contract (ICC)

A standard suite of conditions of contract for infrastructure projects jointly sponsored by the Association of Consultancy and Engineering (ACE) and the Civil Engineering Contractors Association (CECA).

The contracts were published in August 2011 to replace the ICE Conditions of Contract and have a similar structure and approach to the contractual process. Separate versions of the ICC cater for a variety of types of contract and Guidance Notes explain their use in practical terms. The suite also includes a Partnering Addendum.

Features

- Suitable for public and private infrastructure projects
- Separate Versions to cater for a range of contractual approaches
- Suitable for partnering arrangements
- Compliant with payment legislation
- Range of processes to assist in avoiding, mitigating or resolving in a non confrontational manner any differences or disputes that may arise
- Applicable to works situated in Scotland and Northern Ireland.

Use

Those who have previously used the ICE Conditions will find the contracts familiar and little change should be required to the administrative process. Generally clients, consultants and contractors have a wide choice of contracts which can provide for their required contract strategy with clear allocation of risk depending on their chosen Version. Provision within the contracts for the inclusion of "Special Conditions" ensures that any special contractual arrangements can both be accommodated and made clear to the parties to the contract.

Archaeological Investigation Version

Intended as a standard form and "industry norm" for archaeological work in both the building and civil engineering industry the contract has been prepared in association with the Institute for Archaeology. The contract provides for the traditional pattern of an investigation commissioned by an Employer, designed or approved by a Consultant who administers the contract which is carried out by a specialist contractor and regulates the business relationship between the Employer and the Contractor. The Appendix to the contract provides a choice of valuation and payment methods.

August 2011 Edition
978-1-907660-38-2
978-1-910865-13-2 (Digital Edition)

Price £25 + VAT

Archaeological Investigation Version Guidance Notes

These Guidance Notes highlight the importance of archaeology, the social and environmental need for both the preservation and recording of archaeological remains and the need for a standard form of contract for archaeological work. They explain the business relationship between the parties and their roles, together with those of the Consultant and the Curator, and have been prepared specifically to assist users of the ICC-Archaeological Version in the preparation of contract documents and the carrying out of the investigation.

The Guidance Notes provide an informative explanation of the purpose and nature of an archaeological investigation and its components and the place that the contract has within the process. They highlight the other contract documentation which would normally be expected to be included within the contract and focus on key contract clauses including payment and the requirements of current payment legislation. Appendices include a flow chart illustrating the archaeological process, explain the pricing and valuation of archaeological work and the expected contents of a specification and describe the contents of a project design or a written scheme of investigation.

The Guidance Notes do not, however, form part of the Conditions of Contract nor purport to provide a legal interpretation but do represent the view of what constitutes good practice in the conduct of archaeological investigations.

August 2011 Edition
978-1-907660-39-9

Paperbound copy
Price £20

Infrastructure Conditions of Contract (ICC)

Design and Construct Version

Intended for works where the Contractor is responsible for all aspects of design and construction to meet the Employer's Requirements, including any design originally provided by or on behalf of the Employer. The Form of Tender included within the contract provides for payment on a lump sum basis although other methods of payment or combinations of methods may be used.

August 2011 Edition
978-1-907660-40-5

Paperbound copy
Price £30

Design and Construct Version - Guidance Notes

These Guidance Notes explain the basis of the contract and have been prepared to assist users in the preparation of contract documents and understand the manner in which the contract is intended to be administered. They are not intended to provide legal interpretation and do not form part of the contract.

The Guidance Notes outline the matters that a client should consider before choosing to use the Design and Construct Version. They highlight the key contract documents, the purpose of the Employer's Requirements and the role of the Employer's Representative. The tendering procedure and required information for tenderers is outlined. The Guidance Notes focus on key contract clauses, including those which cover payment provisions and current legal requirements and the avoidance and settlement of disputes. Comment is also provided on the Form of Bond and the provisions for Contract Price Fluctuation.

August 2011 Edition
978-1-907660-41-2

Paperbound copy
Price £20

Ground Investigation Version

Intended for use where the Employer wishes to develop a site and has geological specialists who will carry out an initial desk study, identify the geotechnical and geoenvironmental requirements of the project and design a ground investigation to suit those requirements. The contract is intended for an Employer to contract with a contractor to carry out an Investigation but not design the investigation itself nor interpret the results. It is expected there will always be some site operations as well as possibly ancillary works, laboratory testing and reporting requirements.

August 2011 Edition
978-1-907660-43-6
978-1-910865-14-9 (Digital version)

Paperbound copy
Price £30

Digital copy

Ground Investigation Version- Guidance Notes

These Guidance Notes have been prepared to assist users of the Ground Investigation Version in the preparation of contract documents and the carrying out of an Investigation prior to the development of a site. They are not intended to provide a legal interpretation and do not form part of the contract.

The Guidance Notes explain the overall concept of the Ground Investigation Version, what an Investigation may include and the extent of the requirements. The tendering process, matters to be decided during the preparation of the tender documents and an overview of the operation of the contract are also included. There are also notes on key contract clauses including payment and the requirements of current payment legislation as well as the avoidance and settlement of disputes. Comment is also provided on the Form of Bond and the provisions for Contract Price Fluctuation.

August 2011 Edition
978-1-907660-42-9

Price £20

Infrastructure Conditions of Contract (ICC)

Measurement Version

Intended for Engineer/Consultant designed contractor-built works with valuation by admeasurement or "measure and value". Design work, preparation of drawings and other contract documents should be complete before tender information is sent out.

August 2011 Edition
978-1-907660-45-0

Paperbound copy
Price £30

Measurement Version - Guidance Notes

These Guidance Notes explain the basis of the contract and have been prepared to assist users in the preparation of contract documents and understand the manner in which the contract is intended to be administered. They are not intended to provide legal interpretation and do not form part of the contract.

The Guidance Notes highlight matters for the Employer to decide during the preparation of the tender documents and focus on key contract clauses including those which cover payment provisions and current legal requirements and the avoidance and settlement of disputes. Comment is also provided on the Form of Bond and the provisions for Contract Price Fluctuation.

August 2011 Edition
978-1-907660-44-3

Paperbound copy
Price £20

Measurement Version (with payment amendments October 2011) Incorporating NR8 Track Amendments

This Measurement Version has been drafted in conjunction with Network Rail to ensure there is a clear standard contract designed for use on Network Rail's new Plain Line contracts and to support their overall contract strategy for Track. The opportunity has been taken to refine and update the NR8 amendments that have been incorporated to ensure a contract designed to deliver efficiencies in resource and expenditure.

Measurement Version Guidance Notes August 2011 are not fully compatible with the NR8 Track Version.

September 2014 Edition
978-1-907660-73-3

Paperbound copy
Price £30

Minor Works Version (including Guidance Notes)

Intended for use where the works are simple and straightforward and the potential risks for both Employer and Contractor are considered to be small, the Employer being responsible for providing the Contractor with all information in his possession relevant to carrying out the works. The Appendix to the contract provides a choice of basis upon which payment will be ascertained.

Guidance Notes are included in the contract but do not form a part of the Conditions of Contract.

August 2011 Edition
978-1-907660-46-7

Paperbound copy
Price £30

Infrastructure Conditions of Contract (ICC)

Partnering Addendum

The Partnering Addendum is intended to deliver an effective and flexible mechanism for multi-party partnering using the ICC, ACE Agreements and CECA sub contracts. Suitably drafted incorporation clauses could enable the Partnering Addendum to be used with other forms of contract, including supplier agreements. The single Partnering Addendum is used as an addendum to each Bi-Party contract of those intended to be part of the project partnering team and does not create a multi-party contract. The partnering arrangement is sufficiently flexible to accommodate additional partners as the project progresses, all phases of the project development and a party entering into more than Bi-Party contract. Guidance Notes are included in the Partnering Addendum.

August 2011 Edition
978-1-907660-53-5

Paperbound copy
Price £15

Target Cost Version

Intended for use where the Contractor is encouraged to be involved more closely in aspects of design, including any design originally provided by or on behalf of the Employer. The Form of Tender included in the contract provides for payment to the Contractor on a cost reimbursable basis with a fee percentage based on the Target Cost of the project and an incentive share arrangement if the costs differ from the target. Use of the Target Cost Version allows for and encourages active Employer/ Contractor collaboration to reduce costs by sharing expertise and jointly managing risk thereby promoting a closer working relationship.

August 2011 Edition
978-1-907660-49-8

Paperbound copy
Price £30

Target Cost Version - Guidance Notes

These Guidance Notes have been prepared to assist users of the Target Cost Version in the preparation of contract documents and the carrying out of the project. They are not intended to provide legal interpretation and do not form part of the contract. They do represent a view on what constitutes good practice.

The Guidance Notes explain the overall concept of the Target Cost Version, intended to allow and incentivise collaboration to reduce costs. They describe the fundamental principles of the contract, the mutual benefits that can result from its use and the differences of approach in administration from other forms of Infrastructure Contract. The tendering process and selection considerations are included as well as matters for the Employer's decision during the preparation of tender documents. There are notes on key contract clauses including payment and the requirements of current payment legislation. A detailed worked example of a payment mechanism for a target cost contract features in an Appendix to the Guidance Notes. There is comment on the provisions for the avoidance and settlement of disputes, the Form of Bond and the concept of retention in such a contract.

August 2011 Edition
978-1-907660-48-1

Paperbound copy
Price £20

Term Version

Intended for planned and reactive maintenance or refurbishment work as well as new work and emergency works where a contractor may be on call within a set geographical area. The contract is based on Engineer/Consultant designed and contractor built works. Each package of work to be carried out is identified in a Works Order and payments are normally valued by measurement using rates set down in the Term Contract but specially agreed prices or a cost plus arrangement can also be used.

August 2011 Edition
978-1-907660-50-4

Paperbound copy
Price £30

Infrastructure Conditions of Contract (ICC)

Term Version - Guidance Notes

These Guidance Notes have been prepared to assist users of the ICC Term Version in the preparation of contract documents and the carrying out of the contract works. They are not intended to provide legal interpretation and do not form part of the contract.

The Guidance Notes explain the intended use for the Term Version and the overall concept for which the contract is suited. Operation of the contract and the use of Works Orders is explained. The tendering procedure and matters to be considered in the preparation of tender documents is outlined. There is focus on key contract clauses, potential payment arrangements including the requirements of current payment legislation and the avoidance and settlement of disputes. Comment is also provided on the Form of Bond and the provisions for Contract Price Fluctuation.

978-1-907660-51-1

Paperbound copy
Price £20

With Quantities Version

This addition to the ICC suite of contracts features a radical new approach to the drafting of these conditions of contract. It is shorter and more succinct than the Measurement Version and is intended for Engineer/Consultant designed Works whilst acknowledging and providing for an element of Contractor design if required. The Contract accommodates current construction best practice, encourages co-operation between the parties and includes an appropriate early warning provision. It is also intended to provide more certainty of out-turn cost for the Employer, encouraging a fully developed design prior to tender with no re-measurement except in identified circumstances. The clear and direct drafting also includes many of the provisions of the current Measurement Version in a more logical format with all risks being set out in a single clause. The ICC With Quantities will not feel unfamiliar to those who use the current suite of contracts and will find it a practical and useful document also suitable for international use.

With Quantities Version - Guidance Notes

These Guidance Notes explain the basis of the ICC With Quantities Contract and have been prepared to assist users in the preparation of contract documents and understand the manner in which the contract is intended to be administered. They are not intended to provide legal interpretation and do not form part of the contract.

The Guidance Notes explain and distinguish this form of contract from the Measurement Version, highlighting the substantial changes that have been made. They focus on the key contract clauses including the responsibilities of the parties, design, allocation of risk, valuation and payments and dispute resolution and provide a useful overview of this new contract.

PPC Suite of Contracts

PPC2000 was the first published standard form of Partnering Contract and can be used with any type of partnered project, being developed through prototypes tested on a variety of construction projects. A BIM protocol has been developed for use with PPC2000.

Similarly TPC2005 was developed for the procurement of Term Works and Services and provides a single multi-party contract for partnering in Term Contracts.

STP2005 is a specialist term agreement between a service provider and a specialist sub-contractor for Term Maintenance Partnering projects and works “back to back” with PPC2000.

Key features of PPC2000 include a team-based multi-party approach providing for early selection of a Project Partnering Team. This facilitates an integrated design, supply and construction process which is enhanced by the provision of a clear system of risk management and non-adversarial problem resolution.

Written in plain English the PPC suite has, since 2000, been used by both public and private sector clients and has delivered cost effective and successful projects through integrated team working and effective project management. With Government endorsement PPC2000 and TPC2005 also delivered three of the four Government Trial Projects, the beneficial outcome of which has been recently published.

There are both international and a Scottish supplement of the PPC suite of contracts and guides to the use of all documents are available.

PPC2000 – ACA/ACE Standard Form of Contract for Project Partnering

A multi-party contract relating to a single project whereby the client, constructor and the client's appointed advisers work together under the same terms and conditions. All or certain of the constructor's subcontractors can also sign PPC2000 as members of the partnering team. SPC2000 can be used in respect of specialist work undertaken by either those subcontractors who have entered into PPC2000 or those who haven't.

SPC2000 – ACA/ACE Standard Form of Specialist Contract for Project Partnering

The standard form of specialist contract, SPC2000, underpins the contribution that specialist sub-contractors can make by being appointed early and integrated into the project partnering team. It responds to industry calls for a contract, between the constructor and specialist, which works back-to-back with PPC2000. SPC International, published in October 2004 does the same for jurisdictions outside of the U.K. SPC2000 was amended in 2004 and in 2008 with loose leaf inserts for the HGCRA LDED and Construction Act 2009.

Introduction to Pricing Under TPC2005

Written by users and practitioners to help Clients, Service Providers and Consultants understand how to structure and implement pricing under the TPC2005 and STPC2005 forms of Contract. It clearly explains how to maximise the opportunities under TPC2005 to create clear pricing strategies and achieve value for money. Topics covered include fixed price to Open-Book and everything in between, an understanding of these pricing mechanisms allows users of the contract greater confidence in adapting the contract over a variety of projects.

Aimed at those responsible for the selection and appointment of TPC2005 service providers which includes Consultants, Client Officers, Procurement Managers and other advisers.
