- 2. A proxy form is enclosed with this Annual Report. To be effective the form must reach the registered office of the company, no less than 48 hours before the time for holding the meeting.

#### CHAIRMAN'S REPORT

Dear Shareholders,

The year under review was characterized by sluggishness in the FMCG sector (Fast Moving Consumer Goods), which was echoed in your company's sales. Though the Fijian economy is in a buoyant state on the back of structural reforms and a successful general election, growth in the country is heavily skewed towards hard goods such as automotive, consumer durables, housing and construction. This growth has been largely fuelled by a sharp increase in retail lending by banks and financial institutions. So as we enter the third consecutive year of increased borrowings for hard goods, we are also starting to see a lot of monies going towards repayment of such loans. This re-channeling of disposable income by consumers has meant reducing spend on FMCG products, especially in the indulgence categories.

Group sales grew very marginally by 3.1% from \$ 211.82 m in 2013-14 to \$ 218.38 m in 2014-15. While the group's rice, noodles and packaging businesses recorded good growth, its other units had only moderate increases, with flour sales being the most flat amongst the lot. This was also because of a substantial reduction in average sale price of flour, consistent with the general decline in global wheat prices. On biscuit exports, the Australian market continued to decline owing to the general state of its economy and accentuated by aggressive price-cutting by its most dominant player. Your company however continued to make strong inroads into Pacific Islands Countries where the focus is on our own brands rather than private label manufacture which is our main market in Australia.

Notwithstanding the sluggish sales growth, your Company did well on the operating results. Tight operations helped the company beat inflationary cost increases and deliver a 9% higher Net Profit of \$17.46 m against \$ 16.00 m last year.

Dividend payout from the holding company has been retained at \$1.8 m. Shareholder equity has again increased substantially from \$84.40 m to \$99.56 m, an 18% growth. A prudent policy has been adopted with regards to dividend, keeping in mind the large capital outlay that is required in 2015-16 for the new biscuit factory being set up by your Company's 100% subsidiary, Bakery Company (Fiji) Ltd. This factory located on the outskirts of Suva will manufacture biscuits primarily targeted at the Melanesian market.

All silo works that were part of last year's capital projects have been duly completed, now giving your Company the capacity to procure different varieties of wheat to produce a wider range of flour, tailormade for customers in the industrial sector. This is intended to make the company more competitive in the future, especially in export markets. Atlantic & Pacific Packaging Company Limited, a subsidiary of your company has completed its first phase of diversification and has commenced commercial production of PP Bags and Injection Moulded products used for packaging. The Company has committed to a second-phase expansion of these lines. I reiterate my firm belief that reinvestment of profits into the upgrade and renewal of your Company's facilities, products and brands will better insulate it against future risks and keep it prepared for growth opportunities. As I had mentioned in my report last year, considerable effort is being put into building the human capital of your Company; and as part of this endeavour significant changes were made to the salary and wage structure during 2014-15 to bring about better parity with the Fijian employment market. This was based on the annual remuneration survey that your Company participates in. The structure is designed to attract, deploy and retain scarce talent and is already showing results, judging from the quality of people that we are now able to attract into the group. This is further complemented by a robust performance management system designed to measure and deliver the desired results for the Company.

December 2014 saw the untimely passing of our CFO & Company Secretary Mr Kumar Shankar. Mr Kumar was a long-serving executive of the Company and has contributed immensely to its progress. His services will be missed. His role has been taken over by an equally capable professional, Mr Sandeep Kumar who is also a qualified Chartered Accountant and Company Secretary.

# Outlook

While we did experience a general softening of commodity prices in 2014-15, this trend is expected to reverse in 2015-16 as scientists have confirmed the setting of the El Nino phenomenon which they predict to be of similar severity to the one experienced in 1997-98. This will most likely see an increase in prices of all agricultural commodities. The only bearish forecast comes from the petroleum sector and would be a welcome relief. Your Company will continue to focus on high operational efficiencies driven by a strong performance culture in its people. It will continue to focus on its own brands as opposed to contract packaging and also keep a close watch for opportunities to tap into a larger share of wallet in the foods sector.

I would like to take this opportunity to thank our Managing Director Ram Bajekal and his team for the continued progress that FMF Foods Limited and its subsidiaries are making and for the promise they continue to show.

On behalf of the Board of Directors, I take this opportunity to thank our shareholders and all other stakeholders for your continued support in our journey towards fulfilling our vision of making FMF the 'Most Admired Company in the Region'.

Hari Punja Order of Fiji, OBE, Chairman

#### Directors' and Management's Responsibility for the Financial Statements

Directors and Management are responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards and with the requirements of the Fiji Companies Act, 1983, and for such internal control as the directors and management determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

#### Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation of financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by directors and management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

#### Opinion

In our opinion the financial statements give a true and fair view of the financial position of the Company and Group as at 30 June 2015, and of their financial performance and cash flows for the year then ended in accordance with International Financial Reporting Standards.

#### Report on other legal and regulatory requirements

In our opinion:

- a) proper books of account have been kept by the Company, so far as it appears from our examination of those books, and
- b) the accompanying financial statements are in agreement with the books of account and to the best of our information and according to the explanations given to us give the information required by the Fiji Companies Act, 1983 in the manner so required.

We have obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.

#### **Restriction on Distribution or Use**

This report is made solely to the Company's shareholders, as a body, in accordance with Section 165(1) of the Fiji Companies Act 1983. Our audit work has been undertaken so that we might state to the Company's shareholders those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's shareholders as a body, for our audit work, for this report, or for the opinions we have formed.

There are no IFRSs or IFRS IC interpretations that are effective for the first time for the financial year beginning on or after 1 July 2014 that have a material impact on the Company and the Group.

b) New standards, amendments and interpretations issued but not effective for the financial year beginning 1 July 2014 and not early adopted

A number of new standards and amendments to standards and interpretations are effective for annual periods beginning after 1 July 2014, and have not been applied in preparing these financial statements. None of these are expected to have a significant effect on the financial statements of the Company and the Group, except the following set out below:

| Торіс                                 | Key Requirements   | Effective Date   |
|---------------------------------------|--|--|
| IFRS 9,<br>'Financial<br>instruments' | This standard addresses the classification, measurement<br>and recognition of financial assets and financial liabilities.<br>It replaces the guidance in IAS 39 that relates to the<br>classification and measurement of financial instruments.<br>IFRS 9 retains but simplifies the mixed measurement<br>model and establishes three primary measurement<br>categories for financial assets: amortised cost, fair value<br>through OCI and fair value through P&L. The basis of<br>classification depends on the entity's business model and<br>the contractual cash flow characteristics of the financial<br>asset. Investments in equity instruments are required to<br>be measured at fair value through profit or loss with the<br>irrevocable option at inception to present changes in fair<br>value in OCI not recycling. There is now a new expected<br>credit losses model that replaces the incurred loss<br>impairment model used in IAS 39. | Annual periods<br>beginning on or<br>after 1 January<br>2018 |

### 2.1 Basis of preparation - continued

b) New standards, amendments and interpretations issued but not effective for the financial year beginning 1 July 2014 and not early adopted - continued

| Торіс   | Key Requirements   | Effective Date   |
|---|--|--|
| IFRS 9,<br>'Financial<br>instruments' -<br>continued      | For financial liabilities there were no changes to<br>classification and measurement except for the recognition<br>of changes in own credit risk in other comprehensive<br>income, for liabilities designated at fair value through<br>profit or loss. IFRS 9 relaxes the requirements for hedge<br>effectiveness by replacing the bright line hedge<br>effectiveness tests. It requires an economic relationship<br>between the hedged item and hedging instrument and for<br>the 'hedged ratio' to be the same as the one<br>management actually use for risk management purposes.<br>Contemporaneous documentation is still required but is<br>different to that currently prepared under IAS 39. |  |
| IFRS 15,<br>'Revenue from<br>contracts with<br>customers' | This standard deals with revenue recognition and<br>establishes principles for reporting useful information to<br>users of financial statements about the nature, amount,<br>timing and uncertainty of revenue and cash flows arising<br>from an entity's contracts with customers. Revenue is<br>recognised when a customer obtains control of a good or<br>service and thus has the ability to direct the use and<br>obtain the benefits from the good or service. The<br>standard replaces IAS 18 'Revenue' and IAS 11<br>'Construction contracts' and related interpretations.   | Annual periods<br>beginning on or<br>after 1 January<br>2017 |

The Company and the Group are yet to assess the impact of the above standards and intend to adopt the standards no later than the accounting period in which it becomes effective.

# 2.2 Principles of consolidation

#### Subsidiaries

Subsidiaries are all entities (including structured entities) over which the Group has control. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are deconsolidated from the date that control ceases.

The Group applies the acquisition method to account for business combinations. The consideration transferred for the acquisition of a subsidiary is the fair values of the assets transferred, the liabilities incurred to the former owners of the acquiree and the equity interests issued by the Group. The consideration transferred includes the fair value of any asset or liability resulting from a contingent consideration arrangement. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition-by-acquisition basis, either at fair value or at the non-controlling interest's proportionate share of the recognised amounts of acquiree's identifiable net assets. Acquisition-related costs are expensed as incurred.

#### 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - continued

#### 2.2 <u>Principles of consolidation</u> - continued

Inter-company transactions, balances, income and expenses on transactions between group companies are eliminated. Profits and losses resulting from intercompany transactions that are recognised in assets are also eliminated. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

The Group financial statements are prepared as consolidated financial statements as described in IFRS 10 while Holding Company financial statements are prepared as separate financial statements as described in IAS 27.

#### 2.3 <u>Segment reporting</u>

The Board of Directors is the Group's chief operating decision-maker. Management has determined the operating segments based on the information reviewed by the Board of Directors for the purposes of allocating resources and assessing performance.

An operating segment is a group of assets and operations engaged in providing products or services that are subject to risks and returns that are different from those of other operating segments. A geographical segment is engaged in providing products or services within a particular economic environment that are subject to risks and return that are different from those segments operating in other economic environments. The Group operates predominantly within one geographical segment, that is, Fiji. For reporting purposes, the Group considers itself to be operating in three business segments, that is, food, packaging and properties.

#### 2.4 Foreign currency translation

#### i) Functional and presentation currency

Items included in the financial statements are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The financial statements are presented in Fijian Dollars, which is the Group's presentation currency.

#### *ii) Transactions and balances*

Foreign currency transactions are translated into the Fijian currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in profit or loss.

#### 2.5 Property, plant and equipment

Property, plant and equipment are stated at historical cost less depreciation. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the Group and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to profit or loss during the financial period in which they are incurred.

#### FMF FOODS LIMITED AND SUBSIDIARIES

#### 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - continued

#### 2.5 <u>Property, plant and equipment</u> - continued

Depreciation / amortisation is calculated using the straight-line method to allocate their cost to their residual values over their estimated useful lives, as follows:

| Premium on leasehold land               | - | term of lease |
|---|---|---------------|
| Buildings                               | - | 2% - 10%      |
| Plant and machinery                     | - | 4% - 33%      |
| Motor vehicles                          | - | 25%           |
| Furniture, fittings and office machines | - | 6.7% - 25%    |
| Computers                               | - | 33%           |

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at each balance sheet date.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Gains and losses on disposals are determined by comparing the proceeds with the carrying amount and are recognised in profit or loss.

#### 2.6 Investment properties

Investment properties, principally comprising leasehold land and buildings, are held for long-term rental yields. Investment properties are stated at historical cost less any accumulated depreciation and any accumulated impairment losses. Cost includes expenditure that is directly attributable to the acquisition of the items. Depreciation / amortisation rates are as noted in Note 2.5.

#### 2.7 Financial assets

The Company and the Group classifies its financial assets in the following categories: loans and receivables and held- to-maturity financial assets. Management determines the classification of its financial assets at initial recognition. The classification depends on the purpose for which the financial assets were acquired.

#### 2.7.1 Classification

#### (a) Loans and receivables

The Company and the Group's loans and receivables comprise 'trade and other receivables' and 'cash and cash equivalents' that are included in current assets in the balance sheet.

#### (b) Held-to-maturity financial assets

Held-to-maturity financial assets are non-derivative financial assets with fixed or determinable payments and fixed maturities that the Group's management has the positive intention and ability to hold to maturity. For the Company and the Group, these comprise term deposit investments.

#### 2.7.2 Recognition and measurement

Regular purchases and sales of financial assets are recognised on trade-date – the date on which the Company and the Group commits to purchase or sell the asset. Investments are initially recognised at fair value plus transaction costs that are directly attributable to their acquisition.

Loans and receivables and held-to-maturity investments are subsequently carried at amortised cost using the effective interest method.

#### 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - continued

#### 2.7 <u>Financial assets</u> - continued

#### 2.7.2 Recognition and measurement – continued

Financial assets are derecognised when the rights to receive cash flows from them have expired or where they have been transferred and the Company and the Group has also transferred substantially all risks and rewards of ownership.

Interest income on held-to-maturity investments are included in profit or loss and are reported under finance income as interest income. In the case of impairment, it is reported as a deduction from the carrying value of the investment and recognised in profit or loss as impairment on investment.

#### 2.8 Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the balance sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

#### 2.9 Impairment of financial assets

The Company and the Group assesses at each balance sheet date whether there is objective evidence that a financial asset or group of financial assets is impaired. A financial asset or group of financial assets is impaired and impairment losses are incurred only if there is objective evidence of impairment as a result of one or more events that have occurred after the initial recognition of the asset (a 'loss event') and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated.

For loans and receivables and held-to-maturity categories, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced and the amount of the loss is recognised in profit or loss.

#### 2.10 Impairment of non-financial assets

Assets that have an indefinite useful life, are not subject to amortisation and are tested annually for impairment and whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. Assets that are subject to amortisation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and the value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units).

### 2.11 Inventories

Inventories are stated at the lower of cost and net realisable value. Cost is determined using the weighted average cost (WAC) method. The cost of finished goods and work in progress comprises design costs, raw materials, direct labour, other direct costs and related production overheads (based on normal operating capacity). It excludes borrowing costs. Net realisable value is the estimated selling price in the ordinary course of business, less applicable variable selling expenses.

#### FMF FOODS LIMITED AND SUBSIDIARIES

#### 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - continued

#### 2.12 <u>Trade receivables</u>

Trade receivables are recognised at invoice amount. A provision for impairment of trade receivables is established when there is objective evidence that the company will not be able to collect all amounts due according to the original terms of the receivables. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganisation, and default or delinquency in payments are considered indicators that the trade receivable is impaired.

The carrying amount of the asset is reduced through the use of an allowance account, and the amount of the loss is recognised in profit or loss within other operating expenses.

When a trade receivable is uncollectible, it is written off against the allowance account for trade receivables. Subsequent recoveries of amounts previously written off are credited to other operating income in profit or loss.

# 2.13 Cash and cash equivalents

In the statement of cash flows, cash and cash equivalents includes cash in hand, deposits held at call with banks and bank overdraft. In the balance sheet, bank overdraft is shown in current liabilities.

#### 2.14 Share capital

Ordinary shares are classified as equity.

#### 2.15 <u>Trade payables</u>

Trade payables are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. Trade payables are classified as current liabilities if payment is due within one year or less (or in the normal operating cycle of the business if longer). If not, they are presented as non-current liabilities. Trade payables are recognised at amortised cost.

# 2.16 Borrowings

General and specific borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale. Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation. All other borrowing costs are recognised in profit or loss in the period in which they are incurred.

#### 2.17 Current and deferred income tax

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulations is subject to interpretation and establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

#### FMF FOODS LIMITED AND SUBSIDIARIES

#### 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - continued

#### 2.17 <u>Current and deferred income tax</u> – continued

Deferred income tax is recognised using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. However, the deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred income tax assets are recognised to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

#### 2.18 Provisions

Provisions are recognised when the Company and the Group have a present legal or constructive obligation as a result of past events; it is probable that an outflow of resources will be required to settle the obligation; and the amount has been reliably estimated. Provisions are not recognised for future operating losses. Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognised even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

#### 2.19 <u>Revenue recognition</u>

Revenue comprises the consideration received or receivable for the sale of goods or services in the ordinary course of the Company and of the Group's activities. Revenue is shown net of value-added tax, returns, rebates and discounts. Sale is recognised when goods are dispatched from the factory.

Other income sources for the Company and Group include:

- (a) <u>Dividend income</u> Dividend income is recognised when the right to receive dividend is established.
- (b) <u>Interest income</u> Interest income is recognised on an accrual basis.

# 2.20 Leases

Leases in which a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments made under operating leases (net of any incentives received from the lessor) are charged to profit or loss on a straight-line basis over the period of the lease.

Leases of property, plant and equipment where the Company and the Group have substantially all the risks and rewards of ownership are classified as finance leases. Finance leases are capitalised at the lease's inception at the lower of the fair value of the leased property and the present value of the minimum lease payments. The corresponding rent obligations, net of finance charges, are included in other long term payables. Each lease payment is allocated between the liability and finance charges so as to achieve a constant rate on the finance balance outstanding. The interest element of the finance cost is charged to profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period. The property, plant and equipment acquired under finance leases are depreciated over the shorter of the asset's useful life and the lease term.

#### 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - continued

#### 2.21 Employee benefits

Liabilities for employees' entitlements to wages and salaries, annual leave and other current employee entitlements (that are expected to be paid within twelve months) are accrued at undiscounted amounts, calculated at amounts expected to be paid as at reporting date.

#### 2.22 Dividend distribution

Dividend distribution to the Company's shareholders is recognised as a liability in the Company's financial statements in the period in which the dividends are declared by the Company's directors.

Dividends are subject to the provisions of the Fiji Income Tax Act (1974) and Income Tax (Dividend) Regulations 2001.

### 2.23 Earnings per share

#### Basic earnings per share

Basic earnings per share (EPS) is determined by dividing profit after income tax attributable to shareholders by the number of ordinary shares as at balance sheet date.

#### Diluted earnings per share

Diluted EPS is the same as the basic EPS as there are no potential ordinary shares which are considered dilutive.

#### 2.24 Comparative figures

Where necessary, amounts relating to prior years have been reclassified to facilitate comparison and achieve consistency in disclosure with current year amounts.

#### 3 CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS

The preparation of the financial statements requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected.

Except for the depreciation of property, plant and equipment (Note 2.5), the Company and the Group do not have any significant areas of estimation, uncertainty and critical judgments in applying accounting policies that have a significant effect on the amounts recognised in the financial statements.

#### 4 FINANCIAL RISK MANAGEMENT

The Company and the Group's activities expose it to a variety of financial risks: market risk (including currency risk), credit risk and liquidity risk. The Company and the Group's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Company and the Group's financial performance.

Risk management is carried out by the Executive Management. The Executive Management under the directions of the Audit and Finance Committee identifies and evaluates financial and operational risks. The board provides overall direction in risk management.

#### 4 FINANCIAL RISK MANAGEMENT – continued

#### (a) Market risk

#### Foreign exchange risk

The Company and the Group are exposed to foreign exchange risk arising from various currency exposures in respect to purchase of inventory, primarily with respect to the Australian and NZ dollar. Foreign exchange risk arises from future commercial transactions and liabilities.

Management has set up a policy to require the Company and the Group to manage their foreign exchange risk against their functional currency, in this case the Fijian dollar. Foreign exchange risk arises when future commercial transactions or recognised assets or liabilities are denominated in a currency other than the Fijian Dollar. For significant settlements, the Company and the Group are required to seek quotations from recognised banks and use the most favourable exchange rate for purposes of the settlement. A foreign currency account is also maintained which is used for settlement of foreign currency payments to overseas suppliers.

To determine the Company and the Group's sensitivity to foreign exchange risk, the Company and the Group calculate an implied volatility in exchange rates by calculating the maximum variation of daily spot rates from the average exchange rate for the year.

As at year end, assets and liabilities denominated in foreign currencies are minimal for the Company and hence changes in foreign currency exchange rate is expected to have minimal impact on the net profit and equity balances currently reflected in the Company's financial statements.

For the Group, at 30 June 2015, if the Fijian dollar had strengthened/weakened by an implied volatility of 5% against AUD with all other variables held constant, post tax profit for the year would have been about \$125,518 lower/higher (2014:\$43,700), mainly as a result of the foreign exchange differences on the translation of AUD denominated trade receivables and trade payables.

For the Group, at 30 June 2015, if the Fijian dollar had strengthened/weakened by an implied volatility of 5% against NZD with all other variables held constant, post tax profit for the year would have been about \$43,126 lower/higher (2014:\$ 34,500), mainly as a result of the foreign exchange differences on the translation of NZD denominated trade receivables and trade payables.

# (b) Credit risk

Credit risk is managed by management with board oversight. Credit risk arises from cash and cash equivalents, and deposits with banks and financial institutions, as well as credit exposures to wholesale and retail customers, including outstanding receivables. As part of its risk control procedures, an assessment of the credit quality of a new customer, taking into account its financial position, past experience and other factors is carried out. Individual credit risk limits are then set based on the assessments done. The utilisation of credit limits is regularly monitored. Sales to credit retail customers are settled in either cash or bank cheques.

# (c) Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash to meet its present obligations.

Management monitors rolling forecasts of the Company and the Group's liquidity reserve comprising cash and cash equivalents on the basis of expected cash flows.

#### 4 FINANCIAL RISK MANAGEMENT – continued

#### (c) Liquidity risk – continued

The Group and Company's financial liabilities are analysed below into relevant maturity groupings based on the remaining period at balance sheet date to the contractual maturity date.

# 5 CAPITAL RISK MANAGEMENT

The Group's objectives when managing capital is to safeguard the Group's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital.

In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt. The Group has a number of financial covenants to comply with as part of the terms of its borrowings. These financial covenants are managed as part of the Group's capital management. The Group has complied with all its externally imposed capital requirements.

# 5 CAPITAL RISK MANAGEMENT - continued

The Group monitors capital on the basis of the gearing ratio. This ratio is calculated as net debt divided by total capital. Net debt is calculated as total borrowings (including 'current and non-current borrowings' as shown in the balance sheet) less cash and cash equivalents. Total capital is calculated as 'equity' as shown in the balance sheet plus net debt.

The gearing ratios were as follows:

#### 21 BANK OVERDRAFT AND BORROWING SECURITIES

The ANZ secured loans and bank overdrafts of the Group are secured by a first registered mortgage debenture over all the assets of the Group including uncalled capital and unpaid premiums, cross guarantees by the subsidiaries, and a negative pledge by a subsidiary Atlantic & Pacific Packaging Company Limited not to lend or grant security to another party.

The BSP Life loan was secured by unlimited debt and interest guarantee by FMF Foods Limited. This was repaid during the year.

The overdraft facility with Bank of Baroda is secured by the various term deposits held with Bank of Baroda.
