

Registration for the Grocon Supplier Database

The Grocon Supplier Database is a repository of Suppliers who have expressed interest in providing goods and services to the Grocon Group of Companies. Having accurate details stored in the Database will increase a Supplier's chances of being identified as a suitable provider, when a procurement manager has needs for a product or service.

If your organization would like to be included in our Supplier Database, please complete the attached form and click the submit button. Once your registration has been received and processed, an acknowledgement email will be sent to the contact person nominated in your form.

Processing your registration could take some time as we receive a large volume of enquiries. In addition, we may prioritize registrations based on our current and urgent requirements. As and when a need arises for which your company may be suitable, we will contact you to advance to the next round of qualifications.

Should your company information be updated, please submit a new form with the new details.

Thank you,

Procurement Department
Grocon Group
