

Body Contouring Wrap Consent Form

Body contouring wrap increases flow of both the lymphatic and the circulatory systems, and also helps with cleansing of the tissues. The main use for the body contouring wraps is inch loss, diminishing of cellulite, and body wraps can be permanent and completely safe.

Benefits:

Lose up to ½ dress or pant size with each wrap, provides cellulite reduction through detoxifying body cleansing-addresses the real causes of cellulite in a holistic way. Benefits are immediate and the inch loss is permanent and real, not a water loss. Skin and body stay hydrated. The body wrap experience is warm, luxurious, pampering, comfortable and sanitary. Provides results with in-spa treatment as well as home care treatments to maximize benefits.

For Best Results:

A series of 3 to 6 body wraps is recommended. There should be at least 4 to 7 days between each wrap. If a client is overweight and on a weight loss program, a wrap is suggested for each 5 to 10 pounds lost. This is not a weight loss, but a permanent inch loss. The inches will only return if the client goes back to old habits. Eating the right types of food, proper exercise, and drinking 8 glasses of water per day are always recommended. For best results we recommended you follow up with the following products: Cell-U-Rid, Detox system, and Maintain Lotion.

Precautions:

Body contouring wraps are not recommended if you are pregnant, breast feeding, have a lymphatic disorder, acute illness or are currently being treated for cancer. Please let your skin care specialist know if you have or had an allergic reaction to any of the following: nutritional supplements, medications or foods. If you have an allergic reaction to any of the following please indicate:_____.
