SB 1242

Emissions issues in regard to transferring license plates.

SB 1242 changed the wording of GS 20-183.4C(8) stating: “A new or used vehicle acquired from a retailer or a private sale in this State and registered with the Division with a new registration or a transferred registration must be inspected in accordance with this Part when the current registration expires unless it has received a passing inspection within the previous 12 months.

SB 1242 Continued...

What this is saying is: When a customer buys a vehicle the first thing the DMV does when the work comes in before issuing or transferring a plate is to check to ensure the vehicle being titled had a current passing inspection within the last 12 months. If the vehicle has a passing inspection then the customer can purchase a plate or transfer a plate.

With SB 1242, when a customer transfers their plate to their new vehicle, the system will also:

- look at the expiration date of the plate
- determine if at the time of renewal that the vehicle would have had a passing inspection within the last 12 months.

If the vehicle still has a current inspection (i.e. the inspection of the vehicle falls within 12 months of that plate's expiration) at the time of the plate's expiration then that customer will be given a year extension on the vehicle. The next inspection will be 1 year from the plate's expiration.

If the inspection at the time of plate's expiration is over 12 months old then the customer will be required to have the vehicle inspected within the 90 days prior to renewal of plate.

The key components to this one year extension are transfer of plate with ownership change.
