

#### Dear Client,

The Authorities in the country of import require that the goods you are supplying be inspected by SGS prior to shipment. Depending upon the import requirements, the inspection may cover verification of quality, quantity, export market price, value for customs purposes, customs classification and import eligibility.

So that we may arrange for inspection, please complete or modify the attached form<sup>1</sup> and return it to us, preferably by email or by fax, and if possible, together with the required documents to issue the certificate:

- Final Invoice
- Detailed packing list, weight/measurement details
- Detailed product information/specification
- Manufacturer's test report
- Export price list and discount structure

Sellers are requested to give SGS a minimum of 3 working days' notice to schedule the inspection unless the import regulations stipulate a different period.

SGS Government and Institutions (SGS GIS) administrative offices are available to provide you further information about pre-shipment inspection procedures and supply copies of the following publications upon request (Alternatively, you may wish to visit our website at www.sgs.com to acquire copies of these publications):

- Guidelines for Exporters : provides a general overview of SGS Pre-shipment inspection procedures
- **Data Sheets for the Trade**: provides the specific import requirements for each country individually
- Independent Review Procedures: explain how exporters may refer disputes about preshipment inspection to an independent review in accordance with the WTO Agreement on Pre-shipment Inspection, Article 4.

<sup>&</sup>lt;sup>1</sup> As per the WTO Agreement on Pre-shipment Inspection (art. 2.9 to 2.13), SGS will treat all information received as business confidential. In case of need, please use additional blank paper and refer your answer to the relevant box title.
