Transforming HF communications for today's demanding digital battlefield

WIDEBAND HF/VHF TACTICAL RADIO SYSTEM

RF-7800H-MP

FEATURES

> **Smallest, lightest, fastest wideband HF manpack radio**

> **Wideband data up to 120 kbps**

> **Fully interoperable with Falcon II® HF radio and accessories**

The Falcon III® RF-7800H-MP is the evolution of HF technology providing crucial capabilities such as breakthrough wideband data performance and interoperability with fielded Falcon II HF radios allowing for information superiority in today's battlefield.

The RF-7800H provides continuous coverage from 1.5 to 60 MHz in a small and compact package. The radio operates from a single battery, reducing the weight while providing 20 watts HF and 10 watts VHF. The RF-7800H incorporates the latest development in high speed wideband HF waveform technology. This advanced waveform allows data transmission in bandwidths from 3 to 24 kHz achieving data rates of up to 120 kbps.

The RF-7800H-MP features a Software Communications Architecture (SCA) based operating environment providing an optimal platform for hosting future capabilities. Embedded Citadel® and AES encryption provides military grade security for all voice and data transmissions.

The RF-7800H-MP manpack radio interoperates with Falcon II HF radios through an enhanced secure voice and data performance and networking. The combined robust digital voice and serial tone data modem operate over degraded communication channels. The RF-7800H-MP includes a last ditch voice mode and SMS messaging that transmit digitally, using ultra robust 3G waveforms for operation in channels where legacy waveforms do not work.

A serial-tone ECCM Hopping waveform with DSP-based excision filtering combined with robust vocoder provide reliable, secure HF communications in the presence of jamming. Embedded third generation link automation (ALE) per STANAG 4538 provides high-performance link establishment and data link protocols to deliver faster and more reliable linking together with error-free data transfer under the most challenging channel conditions.

An enhanced internal Global Positioning System (GPS) receiver provides local position information and Automatic Position Reporting (APR). This feature allows the radio to be used in situational awareness systems without PCs attached to the outstation radios.

Integrated telephony capability allows the radio operator to place and receive telephone calls using the radio keypad when used with the Tactical Network Access Hub. With a significant increase in processing power, the RF-7800H-MP represents state of the art radio technology to ensure software upgradeability well into the future.

The RF-7800H-MP is the next generation wideband tactical HF manpack enabling today's war-fighter to take on tomorrow's mission.
