# **Notes to Consolidated Financial Statements**

# Note 1

# **Description of Business and Summary of Significant Accounting Policies**

# **Description of Business**

Verizon Communications Inc. (Verizon or the Company) is a holding company that, acting through its subsidiaries, is one of the world's leading providers of communications, information and entertainment products and services to consumers, businesses and governmental agencies with a presence around the world. We have two reportable segments, Wireless and Wireline. For further information concerning our business segments, see Note 13.

The Wireless segment provides wireless communications products and services across one of the most extensive and reliable wireless networks in the United States (U.S.) and has the largest fourth-generation (4G) Long-Term Evolution (LTE) technology and third-generation (3G) networks of any U.S. wireless service provider.

The Wireline segment provides voice, data and video communications products and enhanced services, including broadband video and data, corporate networking solutions, data center and cloud services, security and managed network services and local and long distance voice services. We provide these products and services to consumers in the United States, as well as to carriers, businesses and government customers both in the United States and around the world.

# Consolidation

The method of accounting applied to investments, whether consolidated, equity or cost, involves an evaluation of all significant terms of the investments that explicitly grant or suggest evidence of control or influence over the operations of the investee. The consolidated financial statements include our controlled subsidiaries, as well as variable interest entities (VIE) where we are deemed to be the primary beneficiary. For controlled subsidiaries that are not wholly-owned, the noncontrolling interests are included in Net income and Total equity. Investments in businesses which we do not control, but have the ability to exercise significant influence over operating and financial policies, are accounted for using the equity method. Investments in which we do not have the ability to exercise significant influence over operating and financial policies are accounted for under the cost method. Equity and cost method investments are included in Investments in unconsolidated businesses in our consolidated balance sheets. All significant intercompany accounts and transactions have been eliminated.

#### **Basis of Presentation**

We have reclassified certain prior year amounts to conform to the current year presentation.

#### **Use of Estimates**

We prepare our financial statements using U.S. generally accepted accounting principles (GAAP), which require management to make estimates and assumptions that affect reported amounts and disclosures. Actual results could differ from those estimates.

Examples of significant estimates include: the allowance for doubtful accounts, the recoverability of plant, property and equipment, the recoverability of intangible assets and other long-lived assets, fair values of financial instruments, unrecognized tax benefits, valuation allowances on tax assets, accrued expenses, pension and postre-tirement benefit assumptions, contingencies and the identification of assets acquired and liabilities assumed in connection with business combinations.

# **Revenue Recognition**

# Multiple Deliverable Arrangements

We offer products and services to our wireless and wireline customers through bundled arrangements. These arrangements involve multiple deliverables which may include products, services, or a combination of products and services.

### Wireless

Our Wireless segment earns revenue primarily by providing access to and usage of its network as well as the sale of equipment. In general, access revenue is billed one month in advance and recognized when earned. Usage revenue is generally billed in arrears and recognized when service is rendered. Equipment sales revenue associated with the sale of wireless devices and accessories is generally recognized when the products are delivered to and accepted by the customer, as this is considered to be a separate earnings process from providing wireless services. For agreements involving the resale of third-party services in which we are considered the primary obligor in the arrangements, we record the revenue gross at the time of the sale.

Under the Verizon device payment program (formerly known as Verizon Edge), our eligible wireless customers purchase phones or tablets at unsubsidized prices on an installment basis (a device installment plan). Certain devices are subject to promotions that allow customers to upgrade to a new device after paying down the minimum percentage of the device installment plan and trading in their device. When a customer has the right to upgrade to a new device by paying down the minimum percentage of the device, we account for this trade-in right as a guarantee obligation. The full amount of the trade-in right's fair value (not an allocated value) is recognized as a guarantee liability and the remaining allocable consideration is allocated to the device. The value of the guarantee liability effectively results in a reduction to the revenue recognized for the sale of the device.

In multiple element arrangements that bundle devices and monthly wireless service, revenue is allocated to each unit of accounting using a relative selling price method. At the inception of the arrangement, the amount allocable to the delivered units of accounting is limited to the amount that is not contingent upon the delivery of the monthly wireless service (the noncontingent amount). We effectively recognize revenue on the delivered device at the lesser of the amount allocated based on the relative selling price of the device or the noncontingent amount owed when the device is sold.

#### Wireline

Our Wireline segment earns revenue based upon usage of its network and facilities and contract fees. In general, fixed monthly fees for voice, video, data and certain other services are billed one month in advance and recognized when earned. Revenue from services that are not fixed in amount and are based on usage is generally billed in arrears and recognized when service is rendered.

We sell each of the services offered in bundled arrangements (i.e., voice, video and data), as well as separately; therefore each product or service has a standalone selling price. For these arrangements, revenue is allocated to each deliverable using a relative selling price method. Under this method, arrangement consideration is allocated to each separate deliverable based on our standalone selling price for each product or service. These services include Fios services, individually or in bundles, and High Speed Internet.

Notes to Consolidated Financial Statements continued

When we bundle equipment with maintenance and monitoring services, we recognize equipment revenue when the equipment is installed in accordance with contractual specifications and ready for the customer's use. The maintenance and monitoring services are recognized monthly over the term of the contract as we provide the services.

Installation-related fees, along with the associated costs up to but not exceeding these fees, are deferred and amortized over the estimated customer relationship period.

#### Other

Advertising revenues are generated through display advertising and search advertising. Display advertising revenue is generated by the display of graphical advertisements and other performance-based advertising. Search advertising revenue is generated when a consumer clicks on a text-based advertisement on their screen. Agreements for advertising typically take the forms of impression-based contracts, time-based contracts or performance-based contracts. Advertising revenues derived from impression-based contracts, in which we provide impressions in exchange for a fixed fee, are generally recognized as the impressions are delivered. Advertising revenues derived from time-based contracts, in which we provide promotions over a specified time period for a fixed fee, are recognized on a straight-line basis over the term of the contract, provided that we meet and will continue to meet our obligations under the contract. Advertising revenues derived from contracts where we are compensated based on certain performance criteria are recognized as we complete the contractually specified performance.

We report taxes imposed by governmental authorities on revenueproducing transactions between us and our customers on a net basis.

#### **Maintenance and Repairs**

We charge the cost of maintenance and repairs, including the cost of replacing minor items not constituting substantial betterments, principally to Cost of services as these costs are incurred.

## **Advertising Costs**

Costs for advertising products and services as well as other promotional and sponsorship costs are charged to Selling, general and administrative expense in the periods in which they are incurred (see Note 15).

## **Earnings Per Common Share**

Basic earnings per common share are based on the weighted-average number of shares outstanding during the period. Where appropriate, diluted earnings per common share include the dilutive effect of shares issuable under our stock-based compensation plans.

There were a total of approximately 8 million, 7 million and 8 million outstanding dilutive securities, primarily consisting of restricted stock units, included in the computation of diluted earnings per common share for the years ended December 31, 2015, 2014 and 2013, respectively. For the year ended December 31, 2015, there were no outstanding options to purchase shares that would have been anti-dilutive. Outstanding options to purchase shares that were not included in the computation of diluted earnings per common share, because to do so would have been anti-dilutive for the period, were not significant for the years ended December 31, 2014 and 2013, respectively.

On January 28, 2014, at a special meeting of our shareholders, we received shareholder approval to increase our authorized shares of common stock by 2 billion shares to an aggregate of 6.25 billion authorized shares of common stock. On February 4, 2014, this authorization became effective. On February 21, 2014, we issued approximately 1.27 billion shares of common stock upon completing the acquisition of Vodafone Group Plc's indirect 45% interest in Cellco Partnership d/b/a Verizon Wireless. See Note 2 for additional information.

#### **Cash and Cash Equivalents**

We consider all highly liquid investments with a maturity of 90 days or less when purchased to be cash equivalents. Cash equivalents are stated at cost, which approximates quoted market value and include amounts held in money market funds.

#### **Marketable Securities**

We have investments in marketable securities, which are considered "available-for-sale" under the provisions of the accounting standard for certain debt and equity securities, and are included in the accompanying consolidated balance sheets in Short-term investments or Other assets. We continually evaluate our investments in marketable securities for impairment due to declines in market value considered to be other-than-temporary. That evaluation includes, in addition to persistent, declining stock prices, general economic and company-specific evaluations. In the event of a determination that a decline in market value is other-than-temporary, a charge to earnings is recorded for the loss, and a new cost basis in the investment is established.

# **Allowance for Doubtful Accounts**

Accounts receivable are recorded in the consolidated financial statements at cost net of an allowance for credit losses. We maintain allowances for uncollectible accounts receivable, including our device installment plan receivables, for estimated losses resulting from the failure or inability of our customers to make required payments. Similar to traditional service revenue accounting treatment, we record device installment plan bad debt expense based on an estimate of the percentage of equipment revenue that will not be collected. This estimate is based on a number of factors including historical write-off experience, credit quality of the customer base and other factors such as macroeconomic conditions. Due to the device installment plan being incorporated in the standard Verizon Wireless bill, the collection and risk strategies continue to follow historical practices. We monitor the aging of our accounts with device installment plan receivables and write off account balances if collection efforts are unsuccessful and future collection is unlikely.

#### Inventories

Inventory consists of wireless and wireline equipment held for sale, which is carried at the lower of cost (determined principally on either an average cost or first-in, first-out basis) or market.

#### **Plant and Depreciation**

We record plant, property and equipment at cost. Plant, property and equipment are generally depreciated on a straight-line basis.

Leasehold improvements are amortized over the shorter of the estimated life of the improvement or the remaining term of the related lease, calculated from the time the asset was placed in service.

When depreciable assets are retired or otherwise disposed of, the related cost and accumulated depreciation are deducted from the plant accounts, and any gains or losses on disposition are recognized in income.

We capitalize and depreciate network software purchased or developed along with related plant assets. We also capitalize interest associated with the acquisition or construction of network-related assets. Capitalized interest is reported as a reduction in interest expense and depreciated as part of the cost of the network-related assets.

In connection with our ongoing review of the estimated remaining average useful lives of plant, property and equipment, we determined that changes were necessary to the remaining estimated useful lives of certain assets as a result of technology upgrades, enhancements, and planned retirements. These changes resulted in an increase in depreciation expense of \$0.4 billion and \$0.6 billion in 2015 and 2014, respectively. While the timing and extent of current deployment plans are subject to ongoing analysis and modification, we believe the current estimates of useful lives are reasonable.

#### **Computer Software Costs**

We capitalize the cost of internal-use network and non-network software that has a useful life in excess of one year. Subsequent additions, modifications or upgrades to internal-use network and non-network software are capitalized only to the extent that they allow the software to perform a task it previously did not perform. Planning, software maintenance and training costs are expensed in the period in which they are incurred. Also, we capitalize interest associated with the development of internal-use network and non-network software. Capitalized non-network internal-use software costs are amortized using the straight-line method over a period of 3 to 8 years and are included in Other intangible assets, net in our consolidated balance sheets. For a discussion of our impairment policy for capitalized software costs, see "Goodwill and Other Intangible Assets" below. Also, see Note 3 for additional detail of internal-use non-network software reflected in our consolidated balance sheets.

#### Goodwill and Other Intangible Assets Goodwill

Goodwill is the excess of the acquisition cost of businesses over the fair value of the identifiable net assets acquired. Impairment testing for goodwill is performed annually in the fourth fiscal quarter or more frequently if impairment indicators are present. To determine if goodwill is potentially impaired, we have the option to perform a gualitative assessment. However, we may elect to bypass the qualitative assessment and perform an impairment test even if no indications of a potential impairment exist. The impairment test for goodwill uses a two-step approach, which is performed at the reporting unit level. Step one, performed to identify potential impairment, compares the fair value of the reporting unit (calculated using a market approach and/ or a discounted cash flow method) to its carrying value. If the carrying value exceeds the fair value, there is a potential impairment and step two must be performed to measure the amount of the impairment charge. Step two compares the carrying value of the reporting unit's goodwill to its implied fair value (i.e., fair value of reporting unit less the fair value of the unit's assets and liabilities, including identifiable intangible assets). If the implied fair value of goodwill is less than the carrying amount of goodwill, an impairment charge is recognized.

### Intangible Assets Not Subject to Amortization

A significant portion of our intangible assets are wireless licenses that provide our wireless operations with the exclusive right to utilize designated radio frequency spectrum to provide wireless communication services. While licenses are issued for only a fixed time, generally ten years, such licenses are subject to renewal by the Federal Communications Commission (FCC). License renewals have occurred routinely and at nominal cost. Moreover, we have determined that there are currently no legal, regulatory, contractual, competitive, economic or other factors that limit the useful life of our wireless licenses. As a result, we treat the wireless licenses as an indefinite-lived intangible asset. We reevaluate the useful life determination for wireless licenses each year to determine whether events and circumstances continue to support an indefinite useful life.

We test our wireless licenses for potential impairment annually or more frequently if impairment indicators are present. We have the option to first perform a qualitative assessment to determine whether it is necessary to perform a quantitative impairment test. However, we may elect to bypass the qualitative assessment in any period and proceed directly to performing the quantitative impairment test. The most recent quantitative assessment of our wireless licenses occurred in 2015. Our quantitative assessment consisted of comparing the estimated fair value of our aggregate wireless licenses to the aggregated carrying amount as of the test date. Using a quantitative assessment, we estimated the fair value of our aggregate wireless licenses using the Greenfield approach. The Greenfield approach is an income based valuation approach that values the wireless licenses by calculating the cash flow generating potential of a hypothetical start-up company that goes into business with no assets except the wireless licenses to be valued. A discounted cash flow analysis is used to estimate what a marketplace participant would be willing to pay to purchase the aggregated wireless licenses as of the valuation date. If the estimated fair value of the aggregated wireless licenses is less than the aggregated carrying amount of the wireless licenses then an impairment charge is recognized. In 2014 and 2013, we performed a gualitative assessment to determine whether it is more likely than not that the fair value of our wireless licenses was less than the carrying amount. As part of our assessment, we considered several qualitative factors including the business enterprise value of our Wireless segment, macroeconomic conditions (including changes in interest rates and discount rates), industry and market considerations (including industry revenue and EBITDA (Earnings before interest, taxes, depreciation and amortization) margin projections), the projected financial performance of our Wireless segment, as well as other factors.

Interest expense incurred while qualifying activities are performed to ready wireless licenses for their intended use is capitalized as part of wireless licenses. The capitalization period ends when the development is discontinued or substantially complete and the license is ready for its intended use.

#### Intangible Assets Subject to Amortization and Long-Lived Assets

Our intangible assets that do not have indefinite lives (primarily customer lists and non-network internal-use software) are amortized over their estimated useful lives. All of our intangible assets subject to amortization and long-lived assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the asset may not be recoverable. If any indications were present, we would test for recoverability by comparing the carrying amount of the asset group to the net undiscounted cash flows expected to be generated from the asset group. If those net undiscounted cash flows do not exceed the carrying amount, we would perform the next step, which is to determine the fair value of the asset and record an impairment, if any. We reevaluate the useful life determinations for these intangible assets each year to determine whether events and circumstances warrant a revision to their remaining useful lives.

Notes to Consolidated Financial Statements continued

For information related to the carrying amount of goodwill, wireless licenses and other intangible assets, as well as the major components and average useful lives of our other acquired intangible assets, see Note 3.

#### **Fair Value Measurements**

Fair value of financial and non-financial assets and liabilities is defined as an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. The three-tier hierarchy for inputs used in measuring fair value, which prioritizes the inputs used in the methodologies of measuring fair value for assets and liabilities, is as follows:

- Level 1— Quoted prices in active markets for identical assets or liabilities
- Level 2 Observable inputs other than quoted prices in active markets for identical assets and liabilities
- Level 3 No observable pricing inputs in the market

Financial assets and financial liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurements. Our assessment of the significance of a particular input to the fair value measurements requires judgment, and may affect the valuation of the assets and liabilities being measured and their categorization within the fair value hierarchy.

#### **Income Taxes**

Our effective tax rate is based on pre-tax income, statutory tax rates, tax laws and regulations and tax planning strategies available to us in the various jurisdictions in which we operate.

Deferred income taxes are provided for temporary differences in the bases between financial statement and income tax assets and liabilities. Deferred income taxes are recalculated annually at tax rates then in effect. We record valuation allowances to reduce our deferred tax assets to the amount that is more likely than not to be realized.

We use a two-step approach for recognizing and measuring tax benefits taken or expected to be taken in a tax return. The first step is recognition: we determine whether it is more likely than not that a tax position will be sustained upon examination, including resolution of any related appeals or litigation processes, based on the technical merits of the position. In evaluating whether a tax position has met the more-likely-than-not recognition threshold, we presume that the position will be examined by the appropriate taxing authority that has full knowledge of all relevant information. The second step is measurement: a tax position that meets the more-likely-than-not recognition threshold is measured to determine the amount of benefit to recognize in the financial statements. The tax position is measured at the largest amount of benefit that is greater than 50 percent likely of being realized upon ultimate settlement. Differences between tax positions taken in a tax return and amounts recognized in the financial statements will generally result in one or more of the following: an increase in a liability for income taxes payable, a reduction of an income tax refund receivable, a reduction in a deferred tax asset, or an increase in a deferred tax liability.

The accounting standard relating to income taxes generated by leveraged lease transactions requires that changes in the projected timing of income tax cash flows generated by a leveraged lease transaction be recognized as a gain or loss in the year in which the change occurs.

Significant management judgment is required in evaluating our tax positions and in determining our effective tax rate.

### **Stock-Based Compensation**

We measure and recognize compensation expense for all stock-based compensation awards made to employees and directors based on estimated fair values. See Note 10 for further details.

### **Foreign Currency Translation**

The functional currency of our foreign operations is generally the local currency. For these foreign entities, we translate income statement amounts at average exchange rates for the period, and we translate assets and liabilities at end-of-period exchange rates. We record these translation adjustments in Accumulated other comprehensive income, a separate component of Equity, in our consolidated balance sheets. We report exchange gains and losses on intercompany foreign currency transactions of a long-term nature in Accumulated other comprehensive income. Other exchange gains and losses are reported in income.

#### **Employee Benefit Plans**

Pension and postretirement health care and life insurance benefits earned during the year as well as interest on projected benefit obligations are accrued currently. Prior service costs and credits resulting from changes in plan benefits are generally amortized over the average remaining service period of the employees expected to receive benefits. Expected return on plan assets is determined by applying the return on assets assumption to the actual fair value of plan assets. Actuarial gains and losses are recognized in operating results in the year in which they occur. These gains and losses are measured annually as of December 31 or upon a remeasurement event. Verizon management employees no longer earn pension benefits or earn service towards the company retiree medical subsidy (see Note 11).

We recognize a pension or a postretirement plan's funded status as either an asset or liability on the consolidated balance sheets. Also, we measure any unrecognized prior service costs and credits that arise during the period as a component of Accumulated other comprehensive income, net of applicable income tax.

## **Derivative Instruments**

We enter into derivative transactions primarily to manage our exposure to fluctuations in foreign currency exchange rates, interest rates, equity and commodity prices. We employ risk management strategies, which may include the use of a variety of derivatives including cross currency swaps, foreign currency and prepaid forwards and collars, interest rate swap agreements, commodity swap and forward agreements and interest rate locks. We do not hold derivatives for trading purposes.

We measure all derivatives, including derivatives embedded in other financial instruments, at fair value and recognize them as either assets or liabilities on our consolidated balance sheets. Our derivative instruments are valued primarily using models based on readily observable market parameters for all substantial terms of our derivative contracts and thus are classified as Level 2. Changes in the fair values of derivative instruments not qualifying as hedges or any ineffective portion of hedges are recognized in earnings in the current period. Changes in the fair values of derivative instruments used effectively as fair value hedges are recognized in earnings, along with changes in the fair value of the hedged item. Changes in the fair value of the effective portions of cash flow hedges are reported in Other comprehensive income (loss) and recognized in earnings when the hedged item is recognized in earnings. Changes in the fair value of the effective portion of net investment hedges of certain of our foreign operations are reported in Other comprehensive income (loss) as part of the cumulative translation adjustment and partially offset the impact of foreign currency changes on the value of our net investment.

#### **Variable Interest Entities**

VIEs are entities which lack sufficient equity to permit the entity to finance its activities without additional subordinated financial support from other parties, have equity investors which do not have the ability to make significant decisions relating to the entity's operations through voting rights, do not have the obligation to absorb the expected losses, or do not have the right to receive the residual returns of the entity. We consolidate the assets and liabilities of VIEs when we are deemed to be the primary beneficiary. The primary beneficiary is the party which has the power to make the decisions that most significantly affect the economic performance of the VIE and has the obligation to absorb losses or the right to receive benefits that could potentially be significant to the VIE.

#### **Recently Adopted Accounting Standards**

During the first quarter of 2015, we adopted the accounting standard update related to the reporting of discontinued operations and disclosures of disposals of components of an entity, which changes the criteria for reporting discontinued operations. As a result of this standard update, a disposal of a component of an entity or a group of components of an entity is required to be reported in discontinued operations if the disposal represents a strategic shift that has, or will have, a major effect on an entity's operations and financial results. The prospective adoption of this standard update did not have an impact on our consolidated financial statements.

During the fourth quarter of 2015, we early adopted the accounting standard update related to the balance sheet classification of deferred taxes. The standard update requires that deferred tax liabilities and assets be classified as noncurrent in the statement of financial position. We applied the amendments in this accounting standard update retrospectively to all periods presented. The adoption of this standard update did not have a significant impact on our consolidated financial statements.

#### **Recently Issued Accounting Standards**

In September 2015, the accounting standard update related to the simplification of the accounting for measurement-period adjustments in business combinations was issued. This standard update requires an acquirer to recognize measurement-period adjustments in the reporting period in which the adjustments are determined and to record the effects on earnings of any changes resulting from the change in provisional amounts, calculated as if the accounting had been completed at the acquisition date. We will adopt this standard update during the first quarter of 2016. The adoption of this standard update is not expected to have a significant impact on our consolidated financial statements.

In May 2015, the accounting standard update related to disclosures for investments in certain entities that calculate net asset value per share was issued. This standard update removes the requirement to categorize within the fair value hierarchy all investments for which fair value is measured using the net asset value per share practical expedient. The standard update also removes the requirement to make certain disclosures for all investments that are eligible to be measured at fair value using the net asset value per share practical expedient. We will adopt this standard update during the first quarter of 2016 and apply it retrospectively to all periods presented. The adoption of this standard update is not expected to have a significant impact on our consolidated financial statements. In April 2015, the accounting standard update related to the simplification of the presentation of debt issuance costs was issued. This standard update requires that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability. In August 2015, the accounting standard update related to the presentation and subsequent measurement of debt issuance costs associated with line-of-credit arrangements was issued. This standard adds Securities and Exchange Commission (SEC) paragraphs pursuant to an SEC Staff Announcement that the SEC staff would not object to an entity deferring and presenting debt issuance costs associated with a lineof-credit arrangement as an asset and subsequently amortizing the costs ratably over the term of the arrangement. We will adopt these standard updates during the first quarter of 2016. The adoption of these standard updates is not expected to have a significant impact on our consolidated financial statements.

In June 2014, an accounting standard update was issued related to the accounting for share-based payments when the terms of an award provide that a performance target could be achieved after the requisite service period. The standard update requires that a performance target that affects vesting and that could be achieved after the requisite service period be treated as a performance condition. We will adopt this standard update during the first quarter of 2016. The adoption of this standard update is not expected to have a significant impact on our consolidated financial statements.

In May 2014, the accounting standard update related to the recognition of revenue from contracts with customers was issued. This standard update clarifies the principles for recognizing revenue and develops a common revenue standard for U.S. GAAP and International Financial Reporting Standards. The standard update intends to provide a more robust framework for addressing revenue issues; improve comparability of revenue recognition practices across entities, industries, jurisdictions, and capital markets; and provide more useful information to users of financial statements through improved disclosure requirements. Upon adoption of this standard update, we expect that the allocation and timing of revenue recognition will be impacted. In August 2015, an accounting standard update was issued that delays the effective date of this standard until the first quarter of 2018. Companies are permitted to early adopt the standard in the first quarter of 2017.

There are two adoption methods available for implementation of the standard update related to the recognition of revenue from contracts with customers. Under one method, the guidance is applied retrospectively to contracts for each reporting period presented, subject to allowable practical expedients. Under the other method, the guidance is applied only to the most current period presented, recognizing the cumulative effect of the change as an adjustment to the beginning balance of retained earnings, and also requires additional disclosures comparing the results to the previous guidance. We are currently evaluating these adoption methods and the impact that this standard update will have on our consolidated financial statements.

Notes to Consolidated Financial Statements continued

# Note 2

**Acquisitions and Divestitures** 

# Wireless

## Wireless Transaction

On September 2, 2013, Verizon entered into a stock purchase agreement (the Stock Purchase Agreement) with Vodafone Group Plc (Vodafone) and Vodafone 4 Limited (Seller), pursuant to which Verizon agreed to acquire Vodafone's indirect 45% interest in Cellco Partnership d/b/a Verizon Wireless (the Partnership, and such interest, the Vodafone Interest) for aggregate consideration of approximately \$130 billion.

On February 21, 2014, pursuant to the terms and subject to the conditions set forth in the Stock Purchase Agreement, Verizon acquired (the Wireless Transaction) from Seller all of the issued and outstanding capital stock (the Transferred Shares) of Vodafone Americas Finance 1 Inc., a subsidiary of Seller (VF1 Inc.), which indirectly through certain subsidiaries (together with VF1 Inc., the Purchased Entities) owned the Vodafone Interest. In consideration for the Transferred Shares, upon completion of the Wireless Transaction, Verizon (i) paid approximately \$58.89 billion in cash, (ii) issued approximately 1.27 billion shares of Verizon's common stock, par value \$0.10 per share (the Stock Consideration), which was valued at approximately \$61.3 billion at the closing of the Wireless Transaction, (iii) issued senior unsecured Verizon notes in an aggregate principal amount of \$5.0 billion (the Verizon Notes), (iv) sold Verizon's indirectly owned 23.1% interest in Vodafone Omnitel N.V. (Omnitel, and such interest, the Omnitel Interest), valued at \$3.5 billion and (v) provided other consideration, which included the assumption of preferred stock valued at approximately \$1.7 billion. The total cash paid to Vodafone and the other costs of the Wireless Transaction, including financing, legal and bank fees, were financed through the incurrence of third-party indebtedness. See Note 7 for additional information.

In accordance with the accounting standard on consolidation, a change in a parent's ownership interest while the parent retains a controlling financial interest in its subsidiary is accounted for as an equity transaction and remeasurement of assets and liabilities of previously controlled and consolidated subsidiaries is not permitted. As a result, we accounted for the Wireless Transaction by adjusting the carrying amount of the noncontrolling interest to reflect the change in Verizon's ownership interest in the Partnership. Any difference between the fair value of the consideration paid and the amount by which the noncontrolling interest is adjusted has been recognized in equity attributable to Verizon.

## **Omnitel Transaction**

On February 21, 2014, Verizon and Vodafone also consummated the sale of the Omnitel Interest (the Omnitel Transaction) by a subsidiary of Verizon to a subsidiary of Vodafone in connection with the Wireless Transaction pursuant to a separate share purchase agreement. As a result, during 2014, we recognized a pre-tax gain of \$1.9 billion on the disposal of the Omnitel interest in Equity in (losses) earnings of unconsolidated businesses on our consolidated statement of income.

#### Verizon Notes (Non-Cash Transaction)

The Verizon Notes were issued pursuant to Verizon's existing indenture. The Verizon Notes were issued in two separate series, with \$2.5 billion due February 21, 2022 (the eight-year Verizon Notes) and \$2.5 billion due February 21, 2025 (the eleven-year Verizon Notes). The Verizon Notes bear interest at a floating rate, which will be reset quarterly, with interest payable quarterly in arrears, beginning May 21, 2014. The eight-year Verizon notes bear interest at a floating rate equal to three-month London Interbank Offered Rate (LIBOR), plus 1.222%, and the eleven-year Verizon notes bear interest at a floating rate equal to three-month LIBOR, plus 1.372%. The indenture that governs the Verizon Notes contains certain negative covenants, including a negative pledge covenant and a merger or similar transaction covenant, affirmative covenants and events of default that are customary for companies maintaining an investment grade credit rating. An event of default for either series of the Verizon Notes may result in acceleration of the entire principal amount of all debt securities of that series. Beginning two years after the closing of the Wireless Transaction, Verizon may redeem all or any portion of the outstanding Verizon Notes held by Vodafone or any of its affiliates for a redemption price of 100% of the principal amount plus accrued and unpaid interest. The Verizon Notes may only be transferred by Vodafone to third parties in specified amounts during specified periods, commencing January 1, 2017. Any Verizon Notes held by third parties will not be redeemable by Verizon prior to their maturity dates. Verizon has agreed to file a registration statement with respect to the Verizon Notes at least three months prior to the Verizon Notes becoming transferable.

#### Other Consideration (Non-Cash Transaction)

Included in the other consideration provided to Vodafone is the indirect assumption of long-term obligations with respect to 5.143% Class D and Class E cumulative preferred stock (Preferred Stock) issued by one of the Purchased Entities. Both the Class D shares (825,000 shares outstanding) and Class E shares (825,000 shares outstanding) are mandatorily redeemable in April 2020 at \$1,000 per share plus any accrued and unpaid dividends. Dividends accrue at 5.143% per annum and will be treated as interest expense. Both the Class D and Class E shares have been classified as liability instruments and were recorded at fair value as determined at the closing of the Wireless Transaction.

#### Deferred Tax Liabilities

Certain deferred taxes directly attributable to the Wireless Transaction have been calculated based on an analysis of taxes attributable to the difference between the tax basis of the investment in the noncontrolling interest that is assumed compared to Verizon's book basis. As a result, Verizon recorded a deferred tax liability of approximately \$13.5 billion.

### Spectrum License Transactions

Since 2013, we have entered into several strategic spectrum transactions including:

- During the first quarter of 2013, we completed license exchange transactions with T-Mobile License LLC and Cricket License Company, LLC, a subsidiary of Leap Wireless, to exchange certain Advanced Wireless Services (AWS) licenses. These non-cash exchanges included a number of intra-market swaps that we expect will enable Verizon Wireless to make more efficient use of the AWS band. As a result of these exchanges, we received an aggregate \$0.5 billion of AWS licenses at fair value and recorded an immaterial gain.
- During the third quarter of 2013, after receiving the required regulatory approvals, Verizon Wireless sold 39 lower 700 MHz B block spectrum licenses to AT&T Inc. (AT&T) in exchange for a payment of \$1.9 billion and the transfer by AT&T to Verizon Wireless of AWS (10 MHz) licenses in certain markets in the western United States. Verizon Wireless also sold certain lower 700 MHz B block spectrum licenses to an investment firm for a payment of \$0.2 billion. As a result, we received \$0.5 billion of AWS licenses at fair value and we recorded a pre-tax gain of approximately \$0.3 billion in Selling, general and administrative expense on our consolidated statement of income for the year ended December 31, 2013.
- During the second quarter of 2014, we completed license exchange transactions with T-Mobile USA, Inc. (T-Mobile USA) to exchange certain AWS and Personal Communication Services (PCS) licenses. The exchange included a number of swaps that we expect will result in more efficient use of the AWS and PCS bands. As a result of these exchanges, we received \$0.9 billion of AWS and PCS spectrum licenses at fair value and we recorded an immaterial gain.
- During the second quarter of 2014, we completed transactions pursuant to two additional agreements with T-Mobile USA with respect to our remaining 700 MHz A block spectrum licenses. Under one agreement, we sold certain of these licenses to T-Mobile USA in exchange for cash consideration of approximately \$2.4 billion, and under the second agreement we exchanged the remainder of our 700 MHz A block spectrum licenses as well as AWS and PCS spectrum licenses for AWS and PCS spectrum licenses. As a result, we received \$1.6 billion of AWS and PCS spectrum licenses at fair value and we recorded a pre-tax gain of approximately \$0.7 billion in Selling, general and administrative expense on our consolidated statement of income for the year ended December 31, 2014.
- During the third quarter of 2014, we entered into a license exchange agreement with affiliates of AT&T to exchange certain AWS and PCS spectrum licenses. This non-cash exchange was completed in January 2015 at which time we recorded an immaterial gain.
- On January 29, 2015, the FCC completed an auction of 65 MHz of spectrum, which it identified as the AWS-3 band. Verizon participated in that auction and was the high bidder on 181 spectrum licenses, for which we paid cash of approximately \$10.4 billion. During the fourth quarter of 2014, we made a deposit of \$0.9 billion related to our participation in this auction which is classified within Other, net investing activities on our consolidated statement of cash flows for the year ended December 31, 2014. During the first quarter of 2015, we submitted an application to the FCC and paid \$9.5 billion to the FCC to complete payment for these licenses. The cash payment of \$9.5 billion is classified within Acquisitions of wireless licenses on our consolidated statement of cash flows for the year ended December 31, 2015, the FCC granted us these spectrum licenses.

- During the fourth quarter of 2015, we completed a license exchange transaction with an affiliate of T-Mobile USA to exchange certain AWS and PCS spectrum licenses. As a result we received \$0.4 billion of AWS and PCS spectrum licenses at fair value and recorded a pre-tax gain of approximately \$0.3 billion in Selling, general and administrative expense on our consolidated statement of income for the year ended December 31, 2015.
- During the fourth quarter of 2015, we entered into a license exchange agreement with affiliates of AT&T to exchange certain AWS and PCS spectrum licenses. This non-cash exchange is expected to be completed during the first quarter of 2016 and we expect to record an immaterial gain.
- During the first quarter of 2016, we entered into a license exchange agreement with affiliates of Sprint Corporation, which provides for the exchange of certain AWS and PCS spectrum licenses. This non-cash exchange is expected to be completed in the second quarter of 2016 and we expect to record an immaterial gain.

#### **Tower Monetization Transaction**

During March 2015, we completed a transaction with American Tower Corporation (American Tower) pursuant to which American Tower acquired the exclusive rights to lease and operate approximately 11,300 of our wireless towers for an upfront payment of \$5.0 billion. Under the terms of the leases, American Tower has exclusive rights to lease and operate the towers over an average term of approximately 28 years. As the leases expire, American Tower has fixed-price purchase options to acquire these towers based on their anticipated fair market values at the end of the lease terms. As part of this transaction, we also sold 162 towers for \$0.1 billion. We have subleased capacity on the towers from American Tower for a minimum of 10 years at current market rates, with options to renew. The upfront payment, including the towers sold, which is primarily included within Other liabilities on our consolidated balance sheet, is accounted for as deferred rent and as a financing obligation. The \$2.4 billion accounted for as deferred rent, which is presented within Other, net cash flows provided by operating activities, relates to the portion of the towers for which the right-of-use has passed to the tower operator. The \$2.7 billion accounted for as a financing obligation, which is presented within Other, net cash flows used in financing activities, relates to the portion of the towers that we continue to occupy and use for network operations.

## Other

During 2015, 2014 and 2013, we acquired various other wireless licenses and markets for cash consideration that was not significant. Additionally, during 2013, we obtained control of previously unconsolidated wireless partnerships, which were previously accounted for under the equity method and are now consolidated, which resulted in an immaterial gain. In 2013, we recorded \$0.2 billion of goodwill as a result of these transactions.

Notes to Consolidated Financial Statements continued

#### Wireline

#### Access Line Sale

On February 5, 2015, we announced that we have entered into a definitive agreement with Frontier Communications Corporation (Frontier) pursuant to which Verizon will sell its local exchange business and related landline activities in California, Florida and Texas, including Fios Internet and video customers, switched and special access lines and high-speed Internet service and long distance voice accounts in these three states for approximately \$10.5 billion (approximately \$7.5 billion net of income taxes), subject to certain adjustments and including the assumption of \$0.6 billion of indebtedness from Verizon by Frontier. The transaction, which includes the acquisition by Frontier of the equity interests of Verizon's incumbent local exchange carriers (ILECs) in California, Florida and Texas, does not involve any assets or liabilities of Verizon Wireless. The assets and liabilities that will be sold are currently included in Verizon's continuing operations and classified as assets held for sale and liabilities related to assets held for sale on our consolidated balance sheet as of December 31, 2015. For the years ended December 31, 2015 and 2014, these businesses generated approximately \$5.4 billion of revenues, excluding revenues with affiliates, for each respective year and operating income of approximately \$0.8 billion and an immaterial loss, respectively, based on the stand-alone financial results of the businesses. These amounts include direct expenses incurred of approximately \$2.7 billion in each of the years ended December 31, 2015 and 2014 and (credits) charges related to pension and benefit actuarial valuation adjustments for these ILEC employees of \$(0.2) billion and \$0.6 billion for the years ended December 31, 2015 and 2014, respectively. The amounts also include indirect overhead expenses, which are a significant component of our cost structure. These stand-alone financial results also include approximately \$1.0 billion of depreciation and amortization for the years ended December 31, 2015 and 2014, respectively. In our consolidated results, the depreciation and amortization of these ILEC assets ceased at the beginning of 2015 in accordance with the accounting model for assets held for sale. The transaction is subject to the satisfaction of certain closing conditions including, among others, receipt of federal approvals from the FCC and the antitrust authorities and state regulatory approvals. All federal and state regulatory approvals have been obtained. We expect this transaction to close at the end of the first guarter of 2016.

Based on the number of voice connections and Fios Internet and video subscribers, respectively, as of December 31, 2015, the transaction would result in Frontier acquiring approximately 3.4 million voice connections, 1.6 million Fios Internet subscribers, 1.2 million Fios video subscribers and the related ILEC businesses from Verizon. The operating results of these businesses, collectively, are included within our Wireline segment for all periods presented. The following table summarizes the major classes of assets and liabilities of our local exchange and related landline activities in California, Florida and Texas which are classified as held for sale on our consolidated balance sheet as of December 31, 2015:

	(dollars i	n millions)
Assets held for sale:		
Accounts receivable	\$	435
Prepaid expense and other		58
Total current assets held for sale		493
Plant, property and equipment, net		8,884
Goodwill (Note 3)		1,328
Other assets		55
Total non-current assets held for sale		10,267
Total assets held for sale	\$	10,760
Liabilities related to assets held for sale:		
Accounts payable and accrued liabilities	\$	256
Other current liabilities		207
Total current liabilities related to assets held for sale		463
Long-term debt		594
Employee benefit obligations		289
Other liabilities		76
Total non-current liabilities related to assets held for sale		959
Total liabilities related to assets held for sale	\$	1,422

#### Other

On July 1, 2014, we sold a non-strategic Wireline business that provides communications solutions to a variety of government agencies for net cash proceeds of \$0.1 billion and recorded an immaterial gain.

During the fourth quarter of 2015, Verizon completed a sale of real estate for which we received total gross proceeds of \$0.2 billion and recognized an immaterial deferred gain. The proceeds received as a result of this transaction have been classified within Cash flows used in investing activities on our consolidated statement of cash flows for the year ended December 31, 2015.

## Other

#### Acquisition of AOL Inc.

On May 12, 2015, we entered into an Agreement and Plan of Merger (the Merger Agreement) with AOL Inc. (AOL) pursuant to which we commenced a tender offer to acquire all of the outstanding shares of common stock of AOL at a price of \$50.00 per share, net to the seller in cash, without interest and less any applicable withholding taxes.

On June 23, 2015, we completed the tender offer and merger, and AOL became a wholly-owned subsidiary of Verizon. The aggregate cash consideration paid by Verizon at the closing of these transactions was approximately \$3.8 billion. Holders of approximately 6.6 million shares exercised appraisal rights under Delaware law. If they had not exercised these rights, Verizon would have paid an additional \$330 million for such shares at the closing. AOL is a leader in the digital content and advertising platform space. Verizon has been investing in emerging technology that taps into the market shift to digital content and advertising. AOL's business model aligns with this approach, and we believe that its combination of owned and operated content properties plus a digital advertising platform enhances our ability to further develop future revenue streams.

The acquisition of AOL has been accounted for as a business combination. The identification of the assets acquired and liabilities assumed are finalized and we are in the process of finalizing our valuations for deferred taxes. These adjustments are not expected to have a material impact on our consolidated financial statements. The valuations will be finalized within 12 months following the close of the acquisition.

The fair values of the assets acquired and liabilities assumed were determined using the income, cost and market approaches. The fair value measurements were primarily based on significant inputs that are not observable in the market and thus represent a Level 3 measurement as defined in Accounting Standards Codification (ASC) 820, other than long-term debt assumed in the acquisition. The income approach was primarily used to value the intangible assets, consisting primarily of acquired technology and customer relationships. The income approach indicates value for an asset based on the present value of cash flow projected to be generated by the asset. Projected cash flow is discounted at a required rate of return that reflects the relative risk of achieving the cash flow and the time value of money. The cost approach, which estimates value by determining the current cost of replacing an asset with another of equivalent economic utility, was used, as appropriate, for plant, property and equipment. The cost to replace a given asset reflects the estimated reproduction or replacement cost for the property, less an allowance for loss in value due to depreciation.

The following table summarizes the consideration to AOL's shareholders and the identification of the assets acquired, including cash acquired of \$0.5 billion, and liabilities assumed as of the close of the acquisition, as well as the fair value at the acquisition date of AOL's noncontrolling interests:

(dollars in millions)	As of June 2	3, 2015
Cash payment to AOL's equity holders	\$	3,764
Estimated liabilities to be paid		377
Total consideration	\$	4,141
Assets acquired:		
Goodwill	\$	1,903
Intangible assets subject to amortization		2,504
Other		1,551
Total assets acquired		5,958
Liabilities assumed:		
Total liabilities assumed		1,816
Net assets acquired:		4,142
Noncontrolling interest		(1)
Total consideration	\$	4,141

Goodwill is calculated as the difference between the acquisition date fair value of the consideration transferred and the fair value of the net assets acquired. The goodwill recorded as a result of the AOL transaction represents future economic benefits we expect to achieve as a result of combining the operations of AOL and Verizon as well as assets acquired that could not be individually identified and separately recognized. The preliminary goodwill related to this acquisition is included within Corporate and other (see Note 3 for additional details).

#### Pro Forma Information

If the acquisition of AOL had been completed as of January 1, 2014, our results of operations, including Operating revenues and Net income attributable to Verizon, would not have been materially different from our previously reported results of operations.

#### **Real Estate Transaction**

On May 19, 2015, Verizon consummated a sale-leaseback transaction with a financial services firm for the buildings and real estate at our Basking Ridge, New Jersey location. We received total gross proceeds of \$0.7 billion resulting in a deferred gain of \$0.4 billion, which will be amortized over the initial leaseback term of twenty years. The leaseback of the buildings and real estate is accounted for as an operating lease. The proceeds received as a result of this transaction have been classified within Cash flows used in investing activities on our consolidated statement of cash flows for the year ended December 31, 2015.

#### Other

On September 3, 2015, AOL announced an agreement to acquire an advertising technology business for cash consideration that was not significant. The transaction was completed in October 2015.

On October 7, 2014, Redbox Instant by Verizon, a venture between Verizon and Redbox Automated Retail, LLC (Redbox), a wholly-owned subsidiary of Outerwall Inc., ceased providing service to its customers. In accordance with an agreement between the parties, Redbox withdrew from the venture on October 20, 2014 and Verizon wound down and dissolved the venture during the fourth quarter of 2014. As a result of the termination of the venture, we recorded a pre-tax loss of \$0.1 billion in the fourth quarter of 2014.

During February 2014, Verizon acquired a business dedicated to the development of Internet Protocol (IP) television for cash consideration that was not significant.

During the fourth quarter of 2013, Verizon acquired an industry leader in content delivery networks for \$0.4 billion. Upon closing, we recorded \$0.3 billion of goodwill. Additionally, we acquired a technology company for cash consideration that was not significant. The consolidated financial statements include the results of the operations of each of these acquisitions from the date each acquisition closed.

On February 20, 2016, Verizon entered into a purchase agreement to acquire XO Holdings' wireline business which owns and operates one of the largest fiber-based IP and Ethernet networks outside of Verizon's footprint for approximately \$1.8 billion, subject to adjustment. The transaction is subject to customary regulatory approvals and is expected to close in the first half of 2017. Separately, Verizon entered into an agreement to lease certain wireless spectrum from XO Holdings and has an option to buy XO Holdings' entity that owns its wireless spectrum exercisable under certain circumstances.

Notes to Consolidated Financial Statements continued

# Note 3

# Wireless Licenses, Goodwill and Other Intangible Assets

# **Wireless Licenses**

Changes in the carrying amount of Wireless licenses are as follows:

	(dollars in millions)
Balance at January 1, 2014	\$ 75,747
Acquisitions (Note 2)	444
Dispositions (Note 2)	(1,978)
Capitalized interest on wireless licenses	167
Reclassifications, adjustments and other	961
Balance at December 31, 2014	\$ 75,341
Acquisitions (Note 2)	10,474
Capitalized interest on wireless licenses	389
Reclassifications, adjustments and other	371
Balance at December 31, 2015	\$ 86,575

Reclassifications, adjustments and other includes the exchanges of wireless licenses in 2015 and 2014 as well as \$0.3 billion of Wireless licenses that are classified as Assets held for sale on our consolidated balance sheets at December 31, 2015 and 2014, respectively. See Note 2 for additional details.

At December 31, 2015 and 2014, approximately \$10.4 billion and \$0.4 billion, respectively, of wireless licenses were under development for commercial service for which we were capitalizing interest costs. The increase is primarily due to licenses acquired in the AWS-3 auction.

The average remaining renewal period of our wireless license portfolio was 5.6 years as of December 31, 2015. See Note 1 for additional details.

## Goodwill

Changes in the carrying amount of Goodwill are as follows:

			(dollars in millions)
Wireless	Wireline	Other	Total
\$ 18,376	\$ 6,258	\$ –	\$ 24,634
15	40	-	55
_	(38)	-	(38)
(1)	(11)	-	(12)
\$ 18,390	\$ 6,249	\$ -	\$ 24,639
3	-	2,035	2,038
-	(1,918)	572	(1,346)

	\$ 18,376 15 - (1) \$ 18,390 <b>3</b> -	\$ 18,376 \$ 6,258 15 40 - (38) (1) (11) \$ 18,390 \$ 6,249 3 - - (1,918)	\$ 18,376 \$ 6,258 \$ - 15 40 - - (38) - (1) (11) - \$ 18,390 \$ 6,249 \$ - 3 - 2,035 - (1,918) 572

(dellara in millio

As a result of the acquisition of AOL in the second quarter of 2015, we recognized preliminary Goodwill of \$1.9 billion, which is included within Other (see Note 2 for additional details). We also allocated \$0.6 billion of goodwill on a relative fair value basis from Wireline to Other as a result of an internal reorganization. This increase was partially offset by a decrease in Goodwill in Wireline primarily due to the reclassification of \$1.3 billion of Goodwill to Non-current assets held for sale on our consolidated balance sheet at December 31, 2015 as a result of our agreement to sell our local exchange business and related landline activities in California, Florida and Texas to Frontier (see Note 2 for additional details). The amount of Goodwill reclassified was based on a relative fair value basis.

#### **Other Intangible Assets**

The following table displays the composition of Other intangible assets, net:

	0.00		, -,						(dollars i	n millions)
					2015					2014
	Gross	Accu	mulated		Net	Gross	Accu	imulated		Net
At December 31,	 Amount	Amor	tization	4	Amount	Amount	Amc	ortization		Amount
Customer lists (5 to 14 years)	\$ 4,139	\$	(2,365)	\$	1,774	\$ 3,618	\$	(2,924)	\$	694
Non-network internal-use software (3 to 8 years)	14,542		(9,620)		4,922	12,791		(8,428)		4,363
Other (5 to 25 years)	2,220		(578)		1,642	1,073		(402)		671
Total	\$ 20,901	\$	(12,563)	\$	8,338	\$ 17,482	\$	(11,754)	\$	5,728

The amortization expense for Other intangible assets was as follows:

Years	(dollars in millions)
2015	\$ 1,694
2014	1,567
2013	1,587

Estimated annual amortization expense for Other intangible assets is as follows:

# Note 5

#### **Investments in Unconsolidated Businesses**

#### Equity Method Investments Vodafone Omnitel

Vodafone Omnitel N.V. (Vodafone Omnitel) is one of the largest wireless communications companies in Italy. Prior to the completion of the Wireless Transaction on February 21, 2014, Verizon held a 23.1% ownership interest in Vodafone Omnitel. As part of the consideration of the Wireless Transaction, a subsidiary of Verizon sold its entire ownership interest in Vodafone Omnitel to a subsidiary of Vodafone on February 21, 2014. See Note 2 for additional information.

#### **Other Equity and Cost Investees**

The remaining investments include wireless partnerships in the U.S., limited partnership investments in entities that invest in affordable housing projects and other smaller domestic and international investments.

### **Summarized Financial Information**

The financial information for our equity method investees in 2015 and 2014, including Vodafone Omnitel through the closing of the Wireless Transaction in February 2014, was not significant and therefore is not reflected in the table below.

Summarized financial information for our equity investees in 2013 is as follows:

#### Income Statement

	(0011013111	minonaj
Years Ended December 31,		2013
Net revenue	\$	8,984
Operating income		1,632
Net income		925

Notes to Consolidated Financial Statements continued

# Note 6

**Leasing Arrangements** 

# As Lessor

We are the lessor in leveraged and direct financing lease agreements for commercial aircraft and power generating facilities, which comprise the majority of our leasing portfolio along with telecommunications equipment, commercial real estate property and other equipment. These leases have remaining terms of up to 23 years as of December 31, 2015. In addition, we lease space on certain of our cell towers to other wireless carriers. Minimum lease payments receivable represent unpaid rentals, less principal and interest on third-party nonrecourse debt relating to leveraged lease transactions. Since we have no general liability for this debt, which is secured by a senior security interest in the leased equipment and rentals, the related principal and interest have been offset against the minimum lease payments. All recourse debt is reflected in our consolidated balance sheets. At each reporting period, we monitor the credit quality of the various lessees in our portfolios. Regarding the leveraged lease portfolio, external credit reports are used where available and where not available we use internally developed indicators. These indicators or internal credit risk grades factor historic loss experience, the value of the underlying collateral, delinquency trends, and industry and general economic conditions. The credit quality of our lessees varies from A to CCC+. For each reporting period, the leveraged leases within the portfolio are reviewed for indicators of impairment where it is probable the rent due according to the contractual terms of the lease will not be collected. All significant accounts, individually or in the aggregate, are current and none are classified as impaired.

Finance lease receivables, which are included in Prepaid expenses and other and Other assets in our consolidated balance sheets, are comprised of the following:

									(dollars in millions)
At December 31,					2015				2014
			D	irect			[	Direct	
	Leve	raged	Fina	ance		Leveraged	Fin	ance	
	L	eases	Le	ases	Total	Leases	Le	ases	Total

2019		44		51
2020		72		23
Thereafter		430		12
Total	\$	785	\$	399

#### As Lessee

We lease certain facilities and equipment for use in our operations under both capital and operating leases. Total rent expense under operating leases amounted to \$3.2 billion in 2015, \$2.7 billion in 2014 and \$2.6 billion in 2013, respectively.

During March 2015, we completed a transaction with American Tower pursuant to which American Tower acquired the exclusive rights to lease and operate approximately 11,300 of our wireless towers for an upfront payment of \$5.0 billion. We have subleased capacity on the towers from American Tower for a minimum of 10 years at current market rates, with options to renew. Under this agreement, total rent payments amounted to \$0.2 billion for the year ended December 31, 2015. We expect to make minimum future lease payments of approximately \$2.6 billion. We continue to include the towers in Plant, property and equipment, net in our consolidated balance sheets and depreciate them accordingly. At December 31, 2015, \$0.5 billion of towers were included in Plant, property and equipment, net. See Note 2 for additional information. Amortization of capital leases is included in Depreciation and amortization expense in the consolidated statements of income. Capital lease amounts included in Plant, property and equipment are as follows:

	(dollars in millions)
At December 31,	<b>2015</b> 2014
Capital leases	<b>\$ 421</b> \$ 319
Less accumulated amortization	<b>(221)</b> (171)
Total	<b>\$ 200 \$</b> 148

The aggregate minimum rental commitments under noncancelable leases for the periods shown at December 31, 2015, are as follows:

	(dollars in millions)			
		Capital	С	perating
Years		Leases		Leases
2016	\$	302	\$	2,744
2017		278		2,486

Balance at December 31, 2015	\$ 6,4	39	\$ 103,705	\$ 110	0,194

(dollars in millions)

Debt maturing within one year is as follows:

		(dollars in millions)
At December 31,	2015	2014
Long-term debt maturing within one year	\$ 6,325	\$ 2,397
Short-term notes payable	158	319
Commercial paper and other	6	19
Total debt maturing within one year	\$ 6,489	\$ 2,735

The weighted-average interest rate for our commercial paper outstanding was 1.0% and 0.4% at December 31, 2015 and 2014, respectively.

## **Credit Facility**

As of December 31, 2015, the unused borrowing capacity under our \$8.0 billion four-year credit facility was approximately \$7.9 billion. The credit facility does not require us to comply with financial covenants or maintain specified credit ratings, and it permits us to borrow even if our business has incurred a material adverse change. We use the credit facility for the issuance of letters of credit and for general corporate purposes.

## Long-Term Debt

Outstanding long-term debt obligations are as follows:

				(dollars	in millions)
At December 31,	Interest Rates %	Maturities	2015		2014

#### 2015

# February Exchange Offers

On February 11, 2015, we announced the commencement of seven separate private offers to exchange (the February Exchange Offers) specified series of outstanding notes and debentures issued by Verizon and GTE Corporation (collectively, the Old Notes) for new Notes to be issued by Verizon (the New Notes) and, in the case of the 6.94% debentures due 2028 of GTE Corporation, cash. The February Exchange Offers have been accounted for as a modification of debt. On March 13, 2015, Verizon issued \$2.9 billion aggregate principal amount of 4.272% Notes due 2036 (the 2036 New Notes), \$5.0 billion aggregate principal amount of 4.522% Notes due 2048 (the 2048 New Notes) and \$5.5 billion aggregate principal amount of 4.672% Notes due 2055 (the 2055 New Notes) in satisfaction of the exchange offer consideration on tendered Old Notes (not including accrued and unpaid interest on the Old Notes). The following tables list the series of Old Notes included in the February Exchange Offers and the principal amount of each such series accepted by Verizon for exchange.

The table below lists the series of Old Notes included in the February Exchange Offers for the 2036 New Notes:

				Principal Amount
	Interest		Principal Amount	Accepted For
(dollars in millions)	Rate	Maturity	Outstanding	Exchange
Verizon Communications Inc.	5.15%	2023	\$ 11,000	\$ 2,483

The table below lists the series of Old Notes included in the February Exchange Offers for the 2048 New Notes:

(dollars in millions)	Interest Rate	Maturity	Principal Amount Outstanding	Principal Amount Accepted For Exchange
Verizon Communications Inc.	6.90%	2038	\$ 1,250	\$ 773
	6.40%	2038	1,750	884
	6.40%	2033	4,355	2,159
	6.25%	2037	750	-
GTE Corporation	6.94%	2028	800	_
				\$ 3,816

The table below lists the series of Old Notes included in the February Exchange Offers for the 2055 New Notes:

				Principal Amount
	Interest		Principal Amount	Accepted For
(dollars in millions)	Rate	Maturity	Outstanding	Exchange
Verizon Communications Inc.	6.55%	2043	\$ 10,670	\$ 4,084

#### Term Loan Agreement

During the first quarter of 2015, we entered into a term loan agreement with a major financial institution, pursuant to which we borrowed \$6.5 billion for general corporate purposes, including the acquisition of spectrum licenses. Borrowings under the term loan agreement were to mature in March 2016, with a \$4.0 billion mandatory prepayment required in June 2015. The term loan agreement contained certain negative covenants, including a negative pledge covenant, a merger or similar transaction covenant and an accounting changes covenant, affirmative covenants and events of default that are customary for companies maintaining an investment grade credit rating. In addition, the term loan agreement required us to maintain a leverage ratio (as defined in the term loan agreement) not in excess of 3.50:1.00, until our credit ratings were equal to or higher than A3 and A- at Moody's Investors Service and Standard & Poor's Ratings Services, respectively.

During March 2015, we prepaid approximately \$5.0 billion of the term loan agreement, which satisfied the mandatory prepayment. During the third and fourth quarters of 2015, respectively, we made repayments of approximately \$1.0 billion and \$0.5 billion. As of December 31, 2015, no amounts remained outstanding under the term loan agreement.

#### Other

During June 2015, as part of the Merger Agreement with AOL, we assumed approximately \$0.6 billion of debt and capital lease obligations. As of December 31, 2015, approximately \$0.4 billion of the assumed debt and capital lease obligations were repaid.

During October 2015, we executed a \$0.2 billion, 1.5% loan due 2018. Also, during March 2015, \$0.5 billion of floating rate Verizon Communications Notes matured and were repaid. During November 2015, \$1.0 billion of 0.7% Verizon Communications Notes matured and were repaid.

#### 2014

During February 2014, we issued €1.75 billion aggregate principal amount of 2.375% Notes due 2022, €1.25 billion aggregate principal amount of 3.25% Notes due 2026 and £0.85 billion aggregate principal amount of 4.75% Notes due 2034. The issuance of these Notes resulted in cash proceeds of approximately \$5.4 billion, net of discounts and issuance costs. The net proceeds were used, in part, to finance the Wireless Transaction. Net proceeds not used to finance the Wireless Transaction were used for general corporate purposes. Also, during February 2014, we issued \$0.5 billion aggregate principal amount of 5.90% Notes due 2054 resulting in cash proceeds of approximately \$0.5 billion, net of discounts and issuance costs. The net proceeds were used for general corporate purposes.

Notes to Consolidated Financial Statements continued

During March 2014, we issued \$4.5 billion aggregate principal amount of fixed and floating rate notes resulting in cash proceeds of approximately \$4.5 billion, net of discounts and issuance costs. The issuances consisted of the following: \$0.5 billion aggregate principal amount Floating Rate Notes due 2019 that bear interest at a rate equal to three-month LIBOR plus 0.77% which rate will be reset quarterly, \$0.5 billion aggregate principal amount of 2.55% Notes due 2019, \$1.0 billion aggregate principal amount of 3.45% Notes due 2021, \$1.25 billion aggregate principal amount of 4.15% Notes due 2034. During March 2014, the net proceeds were used to purchase notes in the Tender Offer described below.

Also, during March 2014, \$1.0 billion of LIBOR plus 0.61% Verizon Communications Notes and \$1.5 billion of 1.95% Verizon Communications Notes matured and were repaid.

During September 2014, we issued \$0.9 billion aggregate principal amount of 4.8% Notes due 2044. The issuance of these Notes resulted in cash proceeds of approximately \$0.9 billion, net of discounts and issuance costs. The net proceeds were used for general corporate purposes. Also, during September 2014, we redeemed \$0.8 billion aggregate principal amount of Verizon 1.25% Notes due November 2014 and recorded an immaterial amount of early debt redemption costs.

During October 2014, we issued \$6.5 billion aggregate principal amount of fixed rate notes. The issuance of these notes resulted in cash proceeds of approximately \$6.4 billion, net of discounts and issuance costs and after reimbursement of certain expenses. The issuance consisted of the following: \$1.5 billion aggregate principal amount of 3.00% Notes due 2021, \$2.5 billion aggregate principal amount of 3.50% Notes due 2024, and \$2.5 billion aggregate principal amount of 4.40% Notes due 2034. The net proceeds from the issuance was used to redeem (i) in whole the following series of outstanding notes which were called for early redemption in November 2014 (collectively, November Early Debt Redemption): \$0.5 billion aggregate principal amount of Verizon Communications 4.90% Notes due 2015 at 103.7% of the principal amount of such notes, \$0.6 billion aggregate principal amount of Verizon Communications 5.55% Notes due 2016 at 106.3% of the principal amount of such notes, \$1.3 billion aggregate principal amount of Verizon Communications 3.00% Notes due 2016 at 103.4% of the principal amount of such notes, \$0.4 billion aggregate principal amount of Verizon Communications 5.50% Notes due 2017 at 110.5% of the principal amount of such notes, \$0.7 billion aggregate principal amount of Verizon Communications 8.75% Notes due 2018 at 125.2% of the principal amount of such notes, \$0.1 billion aggregate principal amount of Alltel Corporation 7.00% Debentures due 2016 at 108.7% of the principal amount of such notes and \$0.4 billion aggregate principal amount of Cellco Partnership and Verizon Wireless Capital LLC 8.50% Notes due 2018 at 124.5% of the principal amount of such notes; and (ii) \$1.0 billion aggregate principal amount of Verizon Communications 2.50% Notes due 2016 at 103.0% of the principal amount of such notes. Proceeds not used for the redemption of these notes were used for general corporate purposes. Any accrued and unpaid interest was paid to the date of redemption (see "Early Debt Redemption and Other Costs").

During December 2014, we issued €1.4 billion aggregate principal amount of 1.625% Notes due 2024 and €1.0 billion aggregate principal amount of 2.625% Notes due 2031. The issuance of these Notes resulted in cash proceeds of approximately \$3.0 billion, net of discounts and issuance costs and after reimbursement of certain expenses. The net proceeds were used for general corporate purposes.

#### Verizon Notes (Non-Cash Transaction)

During February 2014, in connection with the Wireless Transaction, we issued \$5.0 billion aggregate principal amount of floating rate notes. The Verizon Notes were issued in two separate series, with \$2.5 billion due February 21, 2022 and \$2.5 billion due February 21, 2025. The Verizon Notes bear interest at a floating rate, which will be reset quarterly, with interest payable quarterly in arrears, beginning May 21, 2014 (see Note 2). The eight-year Verizon notes bear interest at a floating rate equal to three-month LIBOR, plus 1.222%, and the eleven-year Verizon notes bear interest at a floating rate equal to three-month LIBOR, plus 1.372%.

#### Preferred Stock (Non-Cash Transaction)

As a result of the Wireless Transaction, we assumed long-term obligations with respect to 5.143% Class D and Class E cumulative Preferred Stock issued by one of the Purchased Entities. Both the Class D shares (825,000 shares outstanding) and Class E shares (825,000 shares outstanding) are mandatorily redeemable in April 2020 at \$1,000 per share plus any accrued and unpaid dividends. Dividends accrue at 5.143% per annum and will be treated as interest expense. Both the Class D and Class E shares have been classified as liability instruments and were recorded at fair value as determined at the closing of the Wireless Transaction.

#### Term Loan Agreement

During February 2014, we drew \$6.6 billion pursuant to a term loan agreement, which was entered into during October 2013, with a group of major financial institutions to finance, in part, the Wireless Transaction. \$3.3 billion of the loans under the term loan agreement had a maturity of three years (the 3-Year Loans) and \$3.3 billion of the loans under the term loan agreement had a maturity of five years (the 5-Year Loans). The 5-Year Loans provide for the partial amortization of principal during the last two years that they are outstanding. Loans under the term loan agreement bear interest at floating rates. The term loan agreement contains certain negative covenants, including a negative pledge covenant, a merger or similar transaction covenant and an accounting changes covenant, affirmative covenants and events of default that are customary for companies maintaining an investment grade credit rating. In addition, the term loan agreement requires us to maintain a leverage ratio (as defined in the term loan agreement) not in excess of 3.50:1.00, until our credit ratings are equal to or higher than A3 and A- at Moody's Investors Service and Standard & Poor's Ratings Services, respectively.

During June 2014, we issued \$3.3 billion aggregate principal amount of fixed and floating rate notes resulting in cash proceeds of approximately \$3.3 billion, net of discounts and issuance costs. The issuances consisted of the following: \$1.3 billion aggregate principal amount of Floating Rate Notes due 2017 that will bear interest at a rate equal to three-month LIBOR plus 0.40% which will be reset quarterly and \$2.0 billion aggregate principal amount of 1.35% Notes due 2017. We used the net proceeds from the offering of these notes to repay the 3-Year Loans on June 12, 2014.

During July 2014, we amended the term loan agreement, settled the outstanding \$3.3 billion of 5-Year Loans and borrowed \$3.3 billion of new loans. The new loans mature in July 2019, bear interest at a lower interest rate and require lower amortization payments in 2017 and 2018. In connection with the transaction, which primarily settled on a net basis, we recorded approximately \$0.5 billion of proceeds from long-term borrowings and of repayments of long-term borrowings, respectively.

#### Tender Offer

On March 10, 2014, we announced the commencement of a tender offer (the Tender Offer) to purchase for cash any and all of the series of notes listed in the following table:

	Interest		Principal Amount	Purchase	Principal Amount
(dollars in millions, except for Purchase Price)	Rate	Maturity	Outstanding	Price <sup>(1)</sup>	Purchased
Verizon Communications	6.10%	2018	\$ 1,500	\$ 1,170.07	\$ 748
	5.50%	2018	1,500	1,146.91	763
	8.75%	2018	1,300	1,288.35	564
	5.55%	2016	1,250	1,093.62	652
	5.50%	2017	750	1,133.22	353
Cellco Partnership and Verizon Wireless Capital LLC	8.50%	2018	1,000	1,279.63	619
Alltel Corporation	7.00%	2016	300	1,125.26	157
GTE Corporation	6.84%	2018	600	1,196.85	266
					\$ 4,122

#### (1) Per \$1,000 principal amount of notes

The Tender Offer for each series of notes was subject to a financing condition, which was either satisfied or waived with respect to all series. The Tender Offer expired on March 17, 2014 and settled on March 19, 2014. In addition to the purchase price, any accrued and unpaid interest on the purchased notes was paid to the date of purchase. During March 2014, we recorded early debt redemption costs in connection with the Tender Offer (see "Early Debt Redemption and Other Costs").

#### May Exchange Offer

On May 29, 2014, we announced the commencement of a private exchange offer (the May Exchange Offer) to exchange up to all Cellco Partnership and Verizon Wireless Capital LLC's £0.6 billion outstanding aggregate principal amount of 8.875% Notes due 2018 (the 2018 Old Notes) for Verizon's new sterling-denominated Notes due 2024 (the New Notes) and an amount of cash. This exchange offer has been accounted for as a modification of debt. In connection with the May Exchange Offer, which expired on June 25, 2014, we issued £0.7 billion aggregate principal of New Notes and made a cash payment of £22 million in exchange for £0.6 billion aggregate principal amount of tendered 2018 Old Notes. The New Notes bear interest at a rate of 4.073% per annum. Concurrent with the issuance of the New Notes, we entered into cross currency swaps to fix our future interest and principal payments in U.S. dollars (see Note 9).

#### July Exchange Offers

On July 23, 2014, we announced the commencement of eleven separate private offers to exchange (the July Exchange Offers) specified series of outstanding Notes issued by Verizon and Alltel Corporation (collectively, the Old Notes) for new Notes to be issued by Verizon. The July Exchange Offers have been accounted for as a modification of debt. On August 21, 2014, Verizon issued \$3.3 billion aggregate principal amount of 2.625% Notes due 2020 (the 2020 New Notes), \$4.5 billion aggregate principal amount of 4.862% Notes due 2046 (the 2046 New Notes) and \$5.5 billion aggregate principal amount of 5.012% Notes due 2054 (the 2054 New Notes) in satisfaction of the exchange offer consideration on tendered Old Notes (not including accrued and unpaid interest on the Old Notes). The following tables list the series of Old Notes included in the July Exchange Offers and the principal amount of each such series accepted by Verizon for exchange.

The table below lists the series of Old Notes included in the July Exchange Offers for the 2020 New Notes:

	Interest		Principal Amount	Principal Amount Accepted For
(dollars in millions)	Rate	Maturity	Outstanding	Exchange
Verizon Communications	3.65%	2018	\$ 4,750	\$ 2,052
	2.50%	2016	4,250	1,068
				\$ 3,120

The table below lists the series of Old Notes included in the July Exchange Offers for the 2046 New Notes:

	Interest		Principal Amount	Principal Amount Accepted For
(dollars in millions)	Rate	Maturity	Outstanding	Exchange
Verizon Communications	6.40%	2033	\$ 6,000	\$ 1,645
	7.75%	2030	2,000	794
	7.35%	2039	1,000	520
	7.75%	2032	400	149
Alltel Corporation	7.875%	2032	700	248
	6.80%	2029	300	65
				\$ 3,421

Notes to Consolidated Financial Statements continued

The table below lists the series of Old Notes included in the July Exchange Offers for the 2054 New Notes:

(dollars in millions)	Interest Rate	Maturity	Principal Amount Outstanding	Principal Amount Accepted For Exchange
Verizon Communications	6.55%	2043	\$ 15,000	\$ 4,330
	6.40%	2038	1,750	-
	6.90%	2038	1,250	-
				\$ 4,330

## Verizon Wireless - Notes Payable and Other

Verizon Wireless Capital LLC, a wholly-owned subsidiary of Verizon Wireless, is a limited liability company formed under the laws of Delaware on December 7, 2001 as a special purpose finance subsidiary to facilitate the offering of debt securities of Verizon Wireless by acting as co-issuer. Other than the financing activities as a co-issuer of Verizon Wireless indebtedness, Verizon Wireless Capital LLC has no material assets, operations or revenues. Verizon Wireless is jointly and severally liable with Verizon Wireless Capital LLC for co-issued notes.

# 2015

During December 2015, we repaid \$0.6 billion upon maturity for €0.5 billion aggregate principal amount of Cellco Partnership and Verizon Wireless Capital LLC 8.750% Notes due 2015, and the related cross currency swap was settled.

# 2014

In addition to the retirements of debt securities in connection with the Tender Offer, the May Exchange Offer, the July Exchange Offers and the November Early Debt Redemption, as noted above, during March 2014, Verizon Wireless redeemed \$1.25 billion aggregate principal amount of the Cellco Partnership and Verizon Wireless Capital LLC 8.50% Notes due 2018 at 127.135% of the principal amount of such notes, plus accrued and unpaid interest (see "Early Debt Redemption and Other Costs").

# Telephone and Other Subsidiary Debt 2014

During 2014, a series of notes held by GTE Corporation was included in the Tender Offer described above.

# **Early Debt Redemption and Other Costs**

During March 2014, we recorded net debt redemption costs of \$0.9 billion in connection with the early redemption of \$1.25 billion aggregate principal amount of Cellco Partnership and Verizon Wireless Capital LLC 8.50% Notes due 2018, and the purchase of the following notes pursuant to the Tender Offer: \$0.7 billion of the then outstanding \$1.5 billion aggregate principal amount of Verizon 6.10% Notes due 2018, \$0.8 billion of the then outstanding \$1.5 billion aggregate principal amount of Verizon 5.50% Notes due 2018, \$0.6 billion of the then outstanding \$1.3 billion aggregate principal amount of Verizon 8.75% Notes due 2018, \$0.7 billion of the then outstanding \$1.25 billion aggregate principal amount of Verizon 5.55% Notes due 2016, \$0.4 billion of the then outstanding \$0.75 billion aggregate principal amount of Verizon 5.50% Notes due 2017, \$0.6 billion of the then outstanding \$1.0 billion aggregate principal amount of Cellco Partnership and Verizon Wireless Capital LLC 8.50% Notes due 2018, \$0.2 billion of the then outstanding \$0.3 billion aggregate principal amount of Alltel Corporation 7.00% Debentures due 2016 and \$0.3 billion of the then outstanding \$0.6 billion aggregate principal amount of GTE Corporation 6.84% Debentures due 2018.

During the fourth quarter of 2014, we recorded net debt redemption costs of \$0.5 billion in connection with the early redemption of \$0.5 billion aggregate principal amount of Verizon 4.90% Notes due 2015, \$0.6 billion aggregate principal amount of Verizon 5.55% Notes due 2016, \$1.3 billion aggregate principal amount of Verizon 3.00% Notes due 2016, \$0.4 billion aggregate principal amount of Verizon 5.50% Notes due 2017, \$0.7 billion aggregate principal amount of Verizon 8.75% Notes due 2018, \$1.0 billion of the then outstanding \$3.2 billion aggregate principal amount of Verizon 2.50% Notes due 2016, \$0.1 billion aggregate principal amount Alltel Corporation 7.00% Debentures due 2016 and \$0.4 billion aggregate principal amount of Cellco Partnership and Verizon Wireless Capital LLC 8.50% Notes due 2018, as well as \$0.3 billion of other costs.

We recognize early debt redemption costs in Other income and (expense), net on our consolidated statements of income.

# Additional Financing Activities (Non-Cash Transaction)

We financed, primarily through vendor financing arrangements, the purchase of approximately \$0.7 billion of long-lived assets during 2015 and 2014, consisting primarily of network equipment. At December 31, 2015, \$0.9 billion of vendor financing arrangements remained outstanding. These purchases are non-cash financing activities and therefore not reflected within Capital expenditures on our consolidated statements of cash flows.

# Guarantees

We guarantee the debentures and first mortgage bonds of our operating telephone company subsidiaries. As of December 31, 2015, \$3.1 billion aggregate principal amount of these obligations remained outstanding. Each guarantee will remain in place for the life of the obligation unless terminated pursuant to its terms, including the operating telephone company no longer being a wholly-owned subsidiary of Verizon.

We also guarantee the debt obligations of GTE Corporation that were issued and outstanding prior to July 1, 2003. As of December 31, 2015, \$1.4 billion aggregate principal amount of these obligations remain outstanding.

## **Debt Covenants**

We and our consolidated subsidiaries are in compliance with all of our financial and restrictive covenants.

# **Maturities of Long-Term Debt**

Maturities of long-term debt outstanding at December 31, 2015 are as follows:

Years	(dollars in millions)
2016	\$ 6,325
2017	4,195
2018	7,072
2019	5,645
2020	8,860
Thereafter	77,933

# Note 8

#### **Wireless Device Installment Plans**

Under the Verizon device payment program, our eligible wireless customers purchase phones or tablets at unsubsidized prices on an installment basis (a device installment plan). Customers that activate service on devices purchased under the device payment program pay lower service fees as compared to those under our fixed-term service plans, and their installment charge is included in their standard wireless monthly bill. As of December 31, 2015 and 2014, respectively, the total portfolio of device installment plan receivables we are servicing was \$11.9 billion and \$3.8 billion. During 2015, we entered into programs to sell certain device installment receivables. The outstanding portfolio of device installment plan receivables derecognized from our consolidated balance sheets but which we continue to service was \$8.2 billion at December 31, 2015.

### **Wireless Device Installment Plan Receivables**

The following table displays device installment plan receivables, net, that continue to be recognized in our consolidated balance sheets:

		(dollars in	millions)
At December 31,	2015		2014
Device installment plan receivables, gross	\$ 3,720	\$	3,833
Unamortized imputed interest	(142)		(155)
Device installment plan receivables, net of			
unamortized imputed interest	3,578		3,678
Allowance for credit losses	(444)		(76)
Device installment plan receivables, net	\$ 3,134	\$	3,602
Classified on our consolidated balance sheets:			
Accounts receivable, net	\$ 1,979	\$	2,470
Other assets	1.155		1.132

Device installment plan receivables, net

At the time of sale, we impute risk adjusted interest on the device installment plan receivables. We record the imputed interest as a reduction to the related accounts receivable. Interest income, which is included within Service revenues and other on our consolidated statements of income, is recognized over the financed installment term.

\$ 3,134

\$ 3,602

We assess the collectability of our device installment plan receivables based upon a variety of factors, including the credit quality of the customer base, payment trends and other qualitative factors. We use custom, empirical, risk models to measure the credit quality of a customer and determine eligibility for the device payment program. Based upon the risk assessed by the models, a customer may be required to provide a down payment to enter into the program and may be subject to lower limits on the total amount financed. The down payment will vary in accordance with the risk assessed. We update our risk assessments monthly based on payment trends and other qualitative factors in order to monitor the overall quality of our receivables. The credit quality of our customers is consistent throughout the periods presented.

Activity in the allowance for credit losses for the device installment plan receivables was as follows:

(dollars in millions)	
Balance at January 1, 2015	\$ 76
Bad debt expenses	662
Write-offs	(203)
Allowance related to receivables sold	(101)
Other	 10
Balance at December 31, 2015	\$ 444

Customers entering into device installment agreements prior to May 31, 2015 have the right to upgrade their device, subject to certain conditions, including making a stated portion of the required device payments and trading in their device. Generally, customers entering into device installment agreements on or after June 1, 2015 are required to repay all amounts due under their device installment agreement before being eligible to upgrade their device. However, certain devices are subject to promotions that allow customers to upgrade to a new device after paying down the minimum percentage of their device installment plan and trading in their device. When a customer is eligible to upgrade to a new device, we record a guarantee liability in accordance with our accounting policy. The gross guarantee liability related to the upgrade program, which was approximately \$0.2 billion at December 31, 2015 and \$0.7 billion at December 31, 2014, was primarily included in Other current liabilities on our consolidated balance sheets.

#### Sales of Wireless Device Installment Plan Receivables Wireless Device Installment Plan Receivables Purchase Agreement

During the first quarter of 2015, we established a program (Receivables Purchase Agreement, or RPA) to sell from time to time, on an uncommitted basis, eligible device installment plan receivables to a group of primarily relationship banks (Purchasers). Under the program, we transfer the eligible receivables to wholly-owned subsidiaries that are bankruptcy remote special purpose entities (Sellers or SPEs). The Sellers then sell the receivables to the Purchasers for upfront cash proceeds and additional consideration upon settlement of the receivables (the deferred purchase price). The receivables sold under the program are no longer considered assets of Verizon. We continue to bill and collect on the receivables in exchange for a monthly servicing fee, which is not material. Eligible receivables under the RPA exclude device installment plans where a customer was required to provide a down payment.

## Revolving Sale of Wireless Device Installment Plan Receivables

During the fourth quarter of 2015, we entered into a one-year uncommitted facility to sell eligible device installment plan receivables on a revolving basis (Revolving Program), subject to a maximum funding limit, to the Purchasers. Sales of eligible receivables by the Sellers, once initiated, generally occur and are settled on a monthly basis. The receivables sold under the Revolving Program are no longer considered assets of Verizon. We continue to bill and collect on the receivables in exchange for a monthly servicing fee, which is not material. Customer installment payments will be available to purchase eligible installment plan receivables originated over the facility's term. Eligible receivables under the Revolving Program exclude device installment plans where a customer was required to provide a down payment.

The sales of receivables under the RPA and Revolving Program did not have a material impact on our consolidated statements of income. The cash proceeds received from the Purchasers are recorded within Cash flows provided by operating activities on our consolidated statement of cash flows.

The following table provides a summary of device installment receivables sold under the RPA and the Revolving Program during the year ended December 31, 2015:

		Revolving	
(dollars in millions)	RPA	Program	Total
Device installment plan receivables			
sold, net <sup>(1)</sup>	\$ 6,093	\$ 3,270	\$ 9,363
Cash proceeds received <sup>(2)</sup>	4,502	2,738	7,240
Deferred purchase price recorded	1,690	532	2,222

 Device installment plan receivables net of allowances, imputed interest and the device trade-in right.

(2) As of December 31, 2015, cash proceeds received, net of remittances, were \$5.9 billion.

Notes to Consolidated Financial Statements continued

#### Variable Interest Entities

Under both the RPA and the Revolving Program, the SPE's sole business consists of the acquisition of the receivables from Verizon and the resale of the receivables to the Purchasers. The assets of the SPEs are not available to be used to satisfy obligations of any Verizon entities other than the Sellers. We determined that the SPEs are VIEs as they lack sufficient equity to finance their activities. Given that we have the power to direct the activities of the SPEs that most significantly impact the SPE's economic performance, we are deemed to be the primary beneficiary of the SPEs. As a result, we consolidate the assets and liabilities of the SPEs into our consolidated financial statements.

#### **Deferred Purchase Price**

Under both the RPA and the Revolving Program, the deferred purchase price was initially recorded at fair value, based on the remaining installment amounts expected to be collected, adjusted, as applicable, for the time value of money and by the timing and estimated value of the device trade-in. The estimated value of the device trade-in considers prices expected to be offered to us by independent third parties. This estimate contemplates changes in value after the launch of a device. The fair value measurements are considered to be Level 3 measurements within the fair value hierarchy. The collection of the deferred purchase price is contingent on collections from customers. At December 31, 2015, our deferred purchase price receivable was \$2.2 billion, which is held by the SPEs and is included within Other assets on our consolidated balance sheet.

#### **Continuing Involvement**

Verizon has continuing involvement with the sold receivables as it services the receivables. We continue to service the customer and their related receivables, including facilitating customer payment collection, in exchange for a monthly servicing fee. While servicing the receivables, the same policies and procedures are applied to the sold receivables that apply to owned receivables, and we continue to maintain normal relationships with our customers. The credit quality of the customers we continue to service is consistent throughout the periods presented. During the year ended December 31, 2015, we have collected and remitted approximately \$1.3 billion, net of fees, of which an immaterial amount was returned as deferred purchase price. During the year ended December 31, 2015, credit losses on receivables sold were an immaterial amount.

In addition, we have continuing involvement related to the sold receivables as we may be responsible for absorbing additional credit losses pursuant to the agreements. The Company's maximum exposure to loss related to the involvement with the SPEs is limited to the amount of the deferred purchase price, which was \$2.2 billion as of December 31, 2015. The maximum exposure to loss represents an estimated loss that would be incurred under severe, hypothetical circumstances whereby the Company would not receive the portion of the proceeds withheld by the Purchasers. As we believe the probability of these circumstances occurring is remote, the maximum exposure to loss is not an indication of the Company's expected loss.

# Note 9

**Fair Value Measurements and Financial Instruments** 

#### **Recurring Fair Value Measurements**

The following table presents the balances of assets and liabilities measured at fair value on a recurring basis as of December 31, 2015:

						(dollar	s in	millions)
	Le	evel 1 <sup>(1)</sup>	L	evel 2(2)	Le	vel 3 <sup>(3)</sup>		Total
Assets:								
Short-term investments:								
Equity securities	\$	265	\$	-	\$	-	\$	265
Fixed income securities		-		85		-		85
Other current assets:								
Fixed income securities		250		-		-		250
Other assets:								
Fixed income securities		-		928		-		928
Interest rate swaps		-		128		-		128
Net investment hedges		-		13		-		13
Cross currency swaps		-		1		-		1
Total	\$	515	\$	1,155	\$	-	\$	1,670
Liabilities:								
Other liabilities:								
Interest rate swaps	\$	_	\$	19	\$	_	\$	19
Cross currency swaps		_		1,638		_		1,638
Forward interest rate swaps		_		24		_		24
Total	\$	-	\$	1,681	\$	-	\$	1,681

(1) quoted prices in active markets for identical assets or liabilities

(2) observable inputs other than quoted prices in active markets for identical assets and liabilities

(3) no observable pricing inputs in the market

Equity securities consist of investments in common stock of domestic and international corporations measured using quoted prices in active markets.

Fixed income securities consist primarily of investments in municipal bonds as well as U.S. Treasury securities. We use quoted prices in active markets for our U.S. Treasury securities, therefore these securities are classified as Level 1. For all other fixed income securities that do not have quoted prices in active markets, we use alternative matrix pricing resulting in these debt securities being classified as Level 2.

Derivative contracts are valued using models based on readily observable market parameters for all substantial terms of our derivative contracts and thus are classified within Level 2. We use mid-market pricing for fair value measurements of our derivative instruments. Our derivative instruments are recorded on a gross basis.

We recognize transfers between levels of the fair value hierarchy as of the end of the reporting period. There were no transfers within the fair value hierarchy during 2015.

#### Fair Value of Short-term and Long-term Debt

The fair value of our debt is determined using various methods, including quoted prices for identical terms and maturities, which is a Level 1 measurement, as well as quoted prices for similar terms and maturities in inactive markets and future cash flows discounted at current rates, which are Level 2 measurements. The fair value of our short-term and long-term debt, excluding capital leases, was as follows:

				(dollars in millions)
At December 31,		2015		2014
	Carrying	Fair	Carrying	Fair
	Amount	Value	Amount	Value
Short- and long-term debt, excluding capital leases	\$ 109,237	\$ 118,216	\$ 112,755	\$ 126,549

# **Derivative Instruments**

# Interest Rate Swaps

We enter into domestic interest rate swaps to achieve a targeted mix of fixed and variable rate debt. We principally receive fixed rates and pay variable rates based on LIBOR, resulting in a net increase or decrease to Interest expense. These swaps are designated as fair value hedges and hedge against changes in the fair value of our debt portfolio. We record the interest rate swaps at fair value on our consolidated balance sheets as assets and liabilities.

During the third quarter of 2015, we entered into interest rate swaps with a total notional value of \$3.2 billion. During the fourth quarter of 2015, we entered into interest rate swaps with a total notional value of \$2.6 billion. At December 31, 2015 and 2014, the total notional amount of the interest rate swaps was \$7.6 billion and \$1.8 billion, respectively. The fair value of these contracts was \$0.1 billion at December 31, 2015 and was not material at December 31, 2014. The ineffective portion of these interest rate swaps was not material at December 31, 2015 and 2014.

#### Forward Interest Rate Swaps

In order to manage our exposure to future interest rate changes, we have entered into forward interest rate swaps. We designated these contracts as cash flow hedges. At December 31, 2014, these swaps had a notional value of \$2.0 billion. The fair value of these contracts was \$0.2 billion at December 31, 2014, which was included within Other liabilities on our consolidated balance sheet. During the third quarter of 2015, we settled these forward interest rate swaps and the pre-tax loss was not material. During the third quarter of 2015, we entered into forward interest rate swaps with a total notional value of \$0.8 billion. The fair value of these contracts was not material at December 31, 2015.

## **Cross Currency Swaps**

Verizon Wireless previously entered into cross currency swaps designated as cash flow hedges to exchange approximately \$1.6 billion of British Pound Sterling and Euro-denominated debt into U.S. dollars and to fix our future interest and principal payments in U.S. dollars, as well as to mitigate the impact of foreign currency transaction gains or losses. In June 2014, we settled \$0.8 billion of these cross currency swaps and the gains with respect to these swaps were not material. In December 2015, we settled \$0.6 billion of these cross currency swaps on maturity.

During the first quarter of 2014, we entered into cross currency swaps designated as cash flow hedges to exchange approximately \$5.4 billion of Euro and British Pound Sterling denominated debt into U.S. dollars. During the second quarter of 2014, we entered into cross currency swaps designated as cash flow hedges to exchange approximately \$1.2 billion of British Pound Sterling denominated debt into U.S. dollars. During the fourth quarter of 2014, we entered into cross currency swaps designated as cash flow hedges to exchange approximately \$3.0 billion of Euro denominated debt into U.S. dollars and to fix our future interest and principal payments in U.S. dollars. Each of these cross currency swaps was entered into in order to mitigate the impact of foreign currency transaction gains or losses. A portion of the gains and losses recognized in Other comprehensive income was reclassified to Other income and (expense), net to offset the related pre-tax foreign currency transaction gain or loss on the underlying debt obligations. The fair value of the outstanding swaps was \$1.6 billion and \$0.6 billion, which was primarily included within Other liabilities on our consolidated balance sheets at December 31, 2015 and 2014, respectively. At December 31, 2015, the total notional amount of the cross currency swaps was \$9.7 billion. During 2015 and 2014, a pre-tax loss of \$1.2 billion and a pre-tax loss of \$0.1 billion, respectively, was recognized in Other comprehensive income with respect to these swaps.

#### Net Investment Hedges

We entered into foreign currency forward contracts that are designated as net investment hedges to mitigate foreign exchange exposure related to non-U.S. dollar net investments in certain foreign subsidiaries against changes in foreign exchange rates. During the third quarter of 2015, we entered into net investment hedges with a total notional value of \$0.9 billion with the contract tenor maturing in 2018. The fair value of these contracts was not material at December 31, 2015.

#### **Concentrations of Credit Risk**

Financial instruments that subject us to concentrations of credit risk consist primarily of temporary cash investments, short-term and long-term investments, trade receivables, certain notes receivable, including lease receivables, and derivative contracts. Our policy is to deposit our temporary cash investments with major financial institutions. Counterparties to our derivative contracts are also major financial institutions with whom we have negotiated derivatives agreements (ISDA master agreement) and credit support annex agreements which provide rules for collateral exchange. We generally apply collateralized arrangements with our counterparties for uncleared derivatives to mitigate credit risk. At December 31, 2015 and 2014, we posted collateral of approximately \$0.1 billion and \$0.6 billion, respectively, related to derivative contracts under collateral exchange arrangements, which were recorded as Prepaid expenses and other in our consolidated balance sheets. During the first and second quarters of 2015, we paid an immaterial amount of cash to enter into amendments to certain collateral exchange arrangements. These amendments suspend cash collateral posting for a specified period of time by both counterparties. We may enter into swaps on an uncollateralized basis in certain circumstances. While we may be exposed to credit losses due to the nonperformance of our counterparties, we consider the risk remote and do not expect the settlement of these transactions to have a material effect on our results of operations or financial condition.

#### **Nonrecurring Fair Value Measurements**

The Company measures certain assets and liabilities at fair value on a nonrecurring basis. During the fourth quarter of 2014, certain long-lived assets met the criteria to be classified as held for sale. At that time, the fair value of these long-lived assets was measured, resulting in expected disposal losses of \$0.1 billion. The fair value of these assets held for sale was measured with the assistance of thirdparty appraisals and other estimates of fair value, which used market

Notes to Consolidated Financial Statements continued

approach techniques as part of the analysis. The fair value measurement was categorized as Level 3, as significant unobservable inputs were used in the valuation. The expected disposal losses, which represented the difference between the fair value less cost to sell and the carrying amount of the assets held for sale, were included in Selling, general and administrative expenses.

# Note 10

**Stock-Based Compensation** 

# Verizon Communications Long-Term Incentive Plan

The Verizon Communications Inc. Long-Term Incentive Plan (the Plan) permits the granting of stock options, stock appreciation rights, restricted stock, restricted stock units, performance shares, performance stock units and other awards. The maximum number of shares available for awards from the Plan is 119.6 million shares.

## **Restricted Stock Units**

The Plan provides for grants of Restricted Stock Units (RSUs) that generally vest at the end of the third year after the grant. The RSUs are classified as equity awards because the RSUs will be paid in Verizon common stock upon vesting. The RSU equity awards are measured using the grant date fair value of Verizon common stock and are not remeasured at the end of each reporting period. Dividend equivalent units are also paid to participants at the time the RSU award is paid, and in the same proportion as the RSU award.

#### **Performance Stock Units**

The Plan also provides for grants of Performance Stock Units (PSUs) that generally vest at the end of the third year after the grant. As defined by the Plan, the Human Resources Committee of the Board of Directors determines the number of PSUs a participant earns based on the extent to which the corresponding performance goals have been achieved over the three-year performance cycle. The PSUs are classified as liability awards because the PSU awards are paid in cash upon vesting. The PSU award liability is measured at its fair value at the end of each reporting period and, therefore, will fluctuate based on the price of Verizon common stock as well as performance relative to the targets. Dividend equivalent units are also paid to participants at the time that the PSU award is determined and paid, and in the same proportion as the PSU award. The granted and cancelled activity for the PSU award includes adjustments for the performance goals achieved.

The following table summarizes Verizon's Restricted Stock Unit and Performance Stock Unit activity:

(shares in thousands)	Restricted Stock Units	Performance Stock Units
Outstanding January 1, 2013	18,669	39,463
Granted	4,950	7,470
Payments	(7,246)	(22,703)
Cancelled/Forfeited	(180)	(506)
Outstanding December 31, 2013	16,193	23,724
Granted	5,278	7,359
Payments	(6,202)	(9,153)
Cancelled/Forfeited	(262)	(1,964)
Outstanding December 31, 2014	15,007	19,966
Granted	4,958	7,044
Payments	(5,911)	(6,732)
Cancelled/Forfeited	(151)	(3,075)
Outstanding December 31, 2015	13,903	17,203

As of December 31, 2015, unrecognized compensation expense related to the unvested portion of Verizon's RSUs and PSUs was

approximately \$0.3 billion and is expected to be recognized over approximately two years.

The RSUs granted in 2015 and 2014 have weighted-average grant date fair values of \$48.15 and \$47.23 per unit, respectively. During 2015, 2014 and 2013, we paid \$0.4 billion, \$0.6 billion and \$1.1 billion, respectively, to settle RSUs and PSUs classified as liability awards.

#### Verizon Wireless' Long-Term Incentive Plan

The Verizon Wireless Long-Term Incentive Plan (the Wireless Plan) provided compensation opportunities to eligible employees of Verizon Wireless (the Partnership). Under the Wireless Plan, Value Appreciation Rights (VARs) were granted to eligible employees. We have not granted new VARs since 2004. As of December 31, 2015, there are no VARs that remain outstanding.

#### **Stock-Based Compensation Expense**

After-tax compensation expense for stock-based compensation related to RSUs, PSUs and VARs described above included in Net income attributable to Verizon was \$0.3 billion, \$0.3 billion and \$0.4 billion for 2015, 2014 and 2013, respectively.

#### **Stock Options**

The Plan provides for grants of stock options to participants at an option price per share of no less than 100% of the fair market value of Verizon common stock on the date of grant. Each grant has a 10-year life, vesting equally over a three-year period, starting at the date of the grant. We have not granted new stock options since 2004. As of December 31, 2015, there are no stock options that remain outstanding.

# Note 11 Employee Benefits

We maintain non-contributory defined benefit pension plans for many of our employees. In addition, we maintain postretirement health care and life insurance plans for our retirees and their dependents, which are both contributory and non-contributory, and include a limit on our share of the cost for certain recent and future retirees. In accordance with our accounting policy for pension and other postretirement benefits, operating expenses include pension and benefit related credits and/or charges based on actuarial assumptions, including projected discount rates and an estimated return on plan assets. These estimates are updated in the fourth quarter to reflect actual return on plan assets and updated actuarial assumptions. The adjustment is recognized in the income statement during the fourth quarter or upon a remeasurement event pursuant to our accounting policy for the recognition of actuarial gains and losses.

#### **Pension and Other Postretirement Benefits**

Pension and other postretirement benefits for many of our employees are subject to collective bargaining agreements. Modifications in benefits have been bargained from time to time, and we may also periodically amend the benefits in the management plans. The following tables summarize benefit costs, as well as the benefit obligations, plan assets, funded status and rate assumptions associated with pension and postretirement health care and life insurance benefit plans.

## **Obligations and Funded Status**

				(dollars in millions)
		Pension	Healt	h Care and Life
At December 31,	2015	2014	2015	2014
Change in Benefit Obligations				
Beginning of year	\$ 25,320	\$ 23,032	\$ 27,097	\$ 23,042
Service cost	374	327	324	258
Interest cost	969	1,035	1,117	1,107
Plan amendments	-	(89)	(45)	(412)
Actuarial (gain) loss, net	(1,361)	2,977	(2,733)	4,645
Benefits paid	(971)	(1,566)	(1,370)	(1,543)
Curtailment and termination benefits	-	11	-	-
Settlements paid	(2,315)	(407)	-	-
Reclassifications (Note 2)	_	_	(167)	-
End of year	\$ 22,016	\$ 25,320	\$ 24,223	\$ 27,097
Change in Plan Assets				
Beginning of year	\$ 18,548	\$ 17,111	\$ 2,435	\$ 3,053
Actual return on plan assets	118	1.778	28	193
Company contributions	744	1,632	667	732
Benefits paid	(971)	(1,566)	(1,370)	(1,543)
Settlements paid	(2,315)	(407)	-	(1,010)
End of year	\$ 16,124	\$ 18,548	\$ 1,760	\$ 2,435
Funded Status				
End of year	\$ (5,892)	\$ (6,772)	\$ (22,463)	\$ (24,662)

We reclassified \$0.2 billion to Non-current liabilities related to assets held for sale as a result of our agreement to sell our local exchange business and related landline activities in California, Florida and Texas to Frontier (see Note 2 for additional details).

							(dollars	in millions)
			F	Pension		Heal	Ith Care	and Life
At December 31,		2015		2014		2015		2014
Amounts recognized on the balance sheet								
Noncurrent assets	\$	349	\$	337	\$	-	\$	-
Current liabilities		(93)		(122)		(695)		(528)
Noncurrent liabilities		(6,148)		(6,987)		(21,768)		(24,134)
Total	\$	(5,892)	\$	(6,772)	\$	(22,463)	\$	(24,662)
Amounts recognized in Accumulated Other Comprehensive Income (Pre-tax)	•		<b>•</b>	(50)	•	(0,000)	¢	(0,000)
Prior Service Benefit (Cost)	\$	(51)	\$	(56)	\$	(2,038)	\$	(2,280)
Total	\$	(51)	\$	(56)	\$	(2,038)	\$	(2,280)

The accumulated benefit obligation for all defined benefit pension plans was \$22.0 billion and \$25.3 billion at December 31, 2015 and 2014, respectively.

Information for pension plans with an accumulated benefit obligation in excess of plan assets follows:

		(dollars in millions)
At December 31,	2015	2014
Projected benefit obligation	\$ 21,694	\$ 24,919
Accumulated benefit obligation	21,636	24,851
Fair value of plan assets	15,452	17,810

Notes to Consolidated Financial Statements continued

#### **Net Periodic Cost**

The following table summarizes the benefit (income) cost related to our pension and postretirement health care and life insurance plans:

							(dollars ir	n millions)
			Pe	ension		Healt	h Care a	nd Life
Years Ended December 31,	2015	2014		2013	2015	2014		2013
Service cost	\$ 374	\$ 327	\$	395	\$ 324	\$ 258	\$	318
Amortization of prior service cost (credit)	(5)	(8)		6	(287)	(253)		(247)
Expected return on plan assets	(1,270)	(1,181)		(1,245)	(101)	(161)		(143)
Interest cost	969	1,035		1,002	1,117	1,107		1,095
Remeasurement (gain) loss, net	 (209)	2,380		(2,470)	(2,659)	4,615		(3,989)
Net periodic benefit (income) cost	(141)	2,553		(2,312)	(1,606)	5,566		(2,966)
Curtailment and termination benefits	 -	11		4	-	_		-
Total	\$ (141)	\$ 2,564	\$	(2,308)	\$ (1,606)	\$ 5,566	\$	(2,966)

Other pre-tax changes in plan assets and benefit obligations recognized in other comprehensive (income) loss are as follows:

				(	dollars in i	millions)
		Per	nsion	Health	n Care and Li	
At December 31,	 2015		2014	2015		2014
Prior service cost	\$ -	\$	(89)	\$ (45)	\$	(413)
Reversal of amortization items						
Prior service cost	5		8	287		253
Total recognized in other comprehensive (income) loss (pre-tax)	\$ 5	\$	(81)	\$ 242	\$	(160)

The estimated prior service cost for the defined benefit pension plans that will be amortized from Accumulated other comprehensive income (loss) into net periodic benefit (income) cost over the next fiscal year is not significant. The estimated prior service cost for the defined benefit postretirement plans that will be amortized from Accumulated other comprehensive income into net periodic benefit (income) cost over the next fiscal year is \$0.3 billion.

#### Assumptions

The weighted-average assumptions used in determining benefit obligations follow:

		Pension	Health Care	e and Life
At December 31,	2015	2014	2015	2014
Discount Rate	4.60%	4.20%	4.60%	4.20%
Rate of compensation increases	3.00	3.00	N/A	N/A

The weighted-average assumptions used in determining net periodic cost follow:

		Pension							
At December 31,	2015	2014	2013	2015	2014	2013			
Discount Rate	4.20%	5.00%	4.20%	4.20%	5.00%	4.20%			
Expected return on plan assets	7.25	7.25	7.50	4.80	5.50	5.60			
Rate of compensation increases	3.00	3.00	3.00	N/A	N/A	N/A			

Effective January 1, 2016, we changed the method we use to estimate the interest component of net periodic benefit cost for pension and other postretirement benefits. Historically, we estimated the interest cost component utilizing a single weighted-average discount rate derived from the yield curve used to measure the benefit obligation at the beginning of the period. We have elected to utilize a full yield curve approach in the estimation of interest cost by applying the specific spot rates along the yield curve used in the determination of the benefit obligation to the relevant projected cash flows. We have made this change to provide a more precise measurement of interest cost by improving the correlation between projected benefit cash flows to the corresponding spot yield curve rates. We will account for this change as a change in accounting estimate and accordingly will account for it prospectively. We estimate the impact of this change on our consolidated GAAP results for the first quarter of 2016 will be a reduction of the interest cost component of net periodic benefit cost and an increase to Net income by approximately \$0.1 billion. However, at this time the estimated impact of this change on the remaining 2016 interim periods and for annual 2016 results cannot be reasonably estimated because it is possible that in the future there may be changes to underlying assumptions, including an interim remeasurement of our benefit obligations, which could result in different estimates. The use of the full yield curve approach does not impact how we measure our total benefit obligations at year end or our annual net periodic benefit cost as any change in the interest cost component is completely offset by the actuarial gain or loss measured at year end which is immediately recognized in the income statement. Accordingly, this change in estimate will not impact our income from continuing operations, net income or earnings per share as measured on an annual basis.

In order to project the long-term target investment return for the total portfolio, estimates are prepared for the total return of each major asset class over the subsequent 10-year period. Those estimates are based on a combination of factors including the current market interest rates and valuation levels, consensus earnings expectations and historical long-term risk premiums. To determine the aggregate return for the pension trust, the projected return of each individual asset class is then weighted according to the allocation to that investment area in the trust's long-term asset allocation policy.

The assumed health care cost trend rates follow:

	Health Care and Life							
At December 31,	2015	2014	2013					
Healthcare cost trend rate assumed for next year	6.00%	6.50%	6.50%					
Rate to which cost trend rate gradually declines	4.50	4.75	4.75					
Year the rate reaches the level it is assumed to remain thereafter	2024	2022	2020					

A one-percentage point change in the assumed health care cost trend rate would have the following effects:

	(dollars in millions)								
One-Percentage Point	Inc	rease	Dec	crease					
Effect on 2015 service and interest cost	\$	249	\$	(194)					
Effect on postretirement benefit obligation as of									
December 31, 2015		3,074		(2,516)					

#### **Plan Assets**

The company's overall investment strategy is to achieve a mix of assets which allows us to meet projected benefit payments while taking into consideration risk and return. While target allocation percentages will vary over time, the current target allocation for plan assets is designed so that 65% of the assets have the objective of achieving a return in excess of the growth in liabilities (comprised of public equities, private equities, real estate, hedge funds and emerging debt) and 35% of the assets are invested as liability hedging assets (where cash flows from investments better match projected benefit payments, typically longer duration fixed income). This allocation will shift as funded status improves to a higher allocation of liability hedging assets. Target policies will be revisited periodically to ensure they are in line with fund objectives. Both active and passive

management approaches are used depending on perceived market efficiencies and various other factors. Due to our diversification and risk control processes, there are no significant concentrations of risk, in terms of sector, industry, geography or company names.

Pension and healthcare and life plans assets do not include significant amounts of Verizon common stock.

#### **Pension Plans**

The fair values for the pension plans by asset category at December 31, 2015 are as follows:

	(dollars in millions)							
Asset Category	Total		_evel 1		Level 2	L	_evel 3	
Cash and cash equivalents	\$ 1,459	\$	1,375	\$	84	\$	-

# Health Care and Life Plans

The fair values for the other postretirement benefit plans by asset category at December 31, 2015 are as follows:

			(dollars in millions)						
Asset Category	Total	L	evel 1	Le	evel 2	Le	vel 3		
Cash and cash equivalents	\$ 162	\$	8	\$	154	\$	-		
Equity securities	974		752		222		-		
Fixed income securities									
U.S. Treasuries and agencies	21		18		3		-		
Corporate bonds	524		133		391		-		
International bonds	79		19		60		-		
Other	 -		-		-		-		
Total	\$ 1,760	\$	930	\$	830	\$	-		

The fair values for the other postretirement benefit plans by asset category at December 31, 2014 are as follows:

					(dollar	s in m	iiiiions)
Asset Category	Total	L	evel 1	Le	evel 2	Le	evel 3
Cash and cash equivalents	\$ 208	\$	6	\$	202	\$	-
Equity securities	1,434		1,172		262		_
Fixed income securities							
U.S. Treasuries and agencies	105		98		7		_
Corporate bonds	461		119		296		46
International bonds	111		14		97		_
Other	 116		_		116		_
Total	\$ 2,435	\$	1,409	\$	980	\$	46

The following is a reconciliation of the beginning and ending balance of the other postretirement benefit plans assets that are measured at fair value using significant unobservable inputs:

	(dolla	ars in millions)
	Corporate	
	Bonds	Total
Balance at December 31, 2013	\$ -	\$ -
Actual gain on plan assets	1	1
Purchases and sales	45	45
Balance at December 31, 2014	\$ 46	\$ 46
Transfers in (out)	(46)	(46)
Balance at December 31, 2015	\$ -	\$ -

The following are general descriptions of asset categories, as well as the valuation methodologies and inputs used to determine the fair value of each major category of assets.

Cash and cash equivalents include short-term investment funds, primarily in diversified portfolios of investment grade money market instruments and are valued using quoted market prices or other valuation methods, and thus are classified within Level 1 or Level 2.

Equity securities are investments in common stock of domestic and international corporations in a variety of industry sectors, and are valued primarily using quoted market prices at the end of the reporting period or other valuation methods based on observable inputs, and thus are classified as Level 1 or Level 2. Investments not traded on a national securities exchange use other valuation methods such as pricing models or quoted prices of securities with similar characteristics depending upon market activity and availability of quoted market prices, and thus are classified as Level 3.

Fixed income securities include U.S. Treasuries and agencies, debt obligations of foreign governments and domestic and foreign corporations. Fixed income also includes investments in collateralized mortgage obligations, mortgage backed securities and interest rate swaps. The fair value of fixed income securities is based on observable prices for identical or comparable assets, adjusted using benchmark curves, sector grouping, matrix pricing, broker/dealer quotes and issuer spreads, and thus are classified within Level 1 or Level 2.

Real estate investments include those in limited partnerships that invest in various commercial and residential real estate projects both domestically and internationally. The fair values of real estate assets are typically determined by using income and/or cost approaches or a comparable sales approach, taking into consideration discount and capitalization rates, financial conditions, local market conditions and the status of the capital markets, and thus are classified within Level 3.

Commingled funds, included within the Cash and cash equivalents, Equity securities, Fixed income securities and Real estate investment asset categories, are typically valued at net asset value (NAV) provided by the fund administrator. NAV is the redemption value of the units held at year end. As a practical expedient, management has determined that NAV approximates fair value. These assets are categorized as Level 2 or Level 3 depending upon liquidity.

Private equity investments include those in limited partnerships that invest in operating companies that are not publicly traded on a stock exchange. Investment strategies in private equity include leveraged buyouts, venture capital, distressed investments and investments in natural resources. These investments are valued using inputs such as trading multiples of comparable public securities, merger and acquisition activity and pricing data from the most recent equity financing taking into consideration illiquidity, and thus are classified within Level 3.

Hedge fund investments include those seeking to maximize absolute returns using a broad range of strategies to enhance returns and provide additional diversification. The fair values of hedge funds are estimated using the NAV of the investments as a practical expedient. Investments of this type for which Verizon has the ability to fully redeem at NAV within the near term are classified within Level 2. Investments that cannot be redeemed in the near term are classified within Level 3.

## **Employer Contributions**

In 2015, we contributed \$0.7 billion to our qualified pension plans, \$0.1 billion to our nonqualified pension plans and \$0.9 billion to our other postretirement benefit plans. We anticipate a minimum contribution of \$0.6 billion to our qualified pension plans in 2016. Nonqualified pension plans contributions are estimated to be \$0.1 billion and contributions to our other postretirement benefit plans are estimated to be \$0.9 billion in 2016.

#### **Estimated Future Benefit Payments**

The benefit payments to retirees are expected to be paid as follows:

		(dollars in millions)
Year	Pension Benefits	Health Care and Life
2016	\$ 1,906	\$ 1,390
2017	1,757	1,390
2018	1,441	1,384
2019	1,391	1,354
2020	1,371	1,349
2021–2025	6,699	6,889

#### **Savings Plan and Employee Stock Ownership Plans**

We maintain four leveraged employee stock ownership plans (ESOP). We match a certain percentage of eligible employee contributions to the savings plans with shares of our common stock from this ESOP. At December 31, 2015, the number of allocated shares of common stock in this ESOP was 57 million. There were no unallocated shares of common stock in this ESOP at December 31, 2015. All leveraged ESOP shares are included in earnings per share computations.

Total savings plan costs were \$0.9 billion in 2015, \$0.9 billion in 2014 and \$1.0 billion in 2013.

#### **Severance Benefits**

The following table provides an analysis of our actuarially determined severance liability recorded in accordance with the accounting standard regarding employers' accounting for postemployment benefits:

				(dolla	ars in millions)
	Beginning	Charged to			End
Year	of Year	Expense	Payments	Other	of Year
2013	\$ 1,010	\$ 134	\$ (381)	\$ (6)	\$ 757
2014	757	531	(406)	(7)	875
2015	875	551	(619)	(7)	800

#### Severance, Pension and Benefit (Credits) Charges

During 2015, we recorded net pre-tax severance, pension and benefit credits of approximately \$2.3 billion primarily for our pension and postretirement plans in accordance with our accounting policy to recognize actuarial gains and losses in the year in which they occur. The credits were primarily driven by an increase in our discount rate assumption used to determine the current year liabilities from a weighted-average of 4.2% at December 31, 2014 to a weighted-average of 4.6% at December 31, 2015 (\$2.5 billion), the execution of a new prescription drug contract during 2015 (\$1.0 billion) and a change in mortality assumptions primarily driven by the use of updated actuarial tables (MP-2015) issued by the Society of Actuaries (\$0.9 billion), partially offset by the difference between our estimated return on assets of 7.25% at December 31, 2014 and our actual return on assets of 0.7% at December 31, 2015 (\$1.2 billion), severance costs recorded under our existing separation plans (\$0.6 billion) and other assumption adjustments (\$0.3 billion).

During 2014, we recorded net pre-tax severance, pension and benefit charges of approximately \$7.5 billion primarily for our pension and postretirement plans in accordance with our accounting policy to recognize actuarial gains and losses in the year in which they occur. The charges were primarily driven by a decrease in our discount rate assumption used to determine the current year liabilities from a weighted-average of 5.0% at December 31, 2013 to a weighted-average of 4.2% at December 31, 2014 (\$5.2 billion), a change in mortality assumptions primarily driven by the use of updated actuarial tables (RP-2014 and MP-2014) issued by the Society of Actuaries in October 2014 (\$1.8 billion) and revisions to the retirement assumptions for participants and other assumption adjustments, partially offset by the difference between our estimated return on assets of 7.25% and our actual return on assets of 10.5% (\$0.6 billion). As part of this charge, we recorded severance costs of \$0.5 billion under our existing separation plans.

During 2013, we recorded net pre-tax severance, pension and benefit credits of approximately \$6.2 billion primarily for our pension and post-retirement plans in accordance with our accounting policy to recognize actuarial gains and losses in the year in which they occur. The credits were primarily driven by an increase in our discount rate assumption used to determine the current year liabilities from a weighted-average of 4.2% at December 31, 2012 to a weighted-average of 5.0% at December 31, 2013 (\$4.3 billion), lower than assumed retiree medical costs and other assumption adjustments (\$1.4 billion) and the difference between our estimated return on assets of 7.5% at December 31, 2013 (\$0.5 billion).

# Note 12

### Taxes

The components of income before provision for income taxes are as follows:

	(dol	lars in millions)
2015	2014	2013
\$ 27,639	\$ 12,992	\$ 28,833
601	2,278	444
\$ 28,240	\$ 15,270	\$ 29,277
	\$ 27,639 601	2015 2014 \$ 27,639 \$ 12,992 601 2,278

The components of the provision for income taxes are as follows:

		(doll	ars in millions)
Years Ended December 31,	2015	2014	2013
Current			
Federal	\$ 5,476	\$ 2,657	\$ (197)
Foreign	70	81	(59)
State and Local	803	668	201
Total	6,349	3,406	(55)
Deferred			
Federal	3,377	(51)	5,060
Foreign	9	(9)	8
State and Local	130	(32)	717
Total	3,516	(92)	5,785
Total income tax provision	\$ 9,865	\$ 3,314	\$ 5,730

The following table shows the principal reasons for the difference between the effective income tax rate and the statutory federal income tax rate:

Years Ended December 31,	2015	2014	2013
Statutory federal income tax rate	35.0 %	35.0 %	35.0 %
State and local income tax rate,			
net of federal tax benefits	2.1	2.7	2.1
Affordable housing credit	(0.5)	(1.0)	(0.6)
Employee benefits including			
ESOP dividend	(0.4)	(0.7)	(0.4)
Disposition of Omnitel Interest	-	(5.9)	-
Noncontrolling interests	(0.5)	(5.0)	(14.3)
Other, net	(0.8)	(3.4)	(2.2)
Effective income tax rate	34.9 %	21.7 %	19.6 %

The effective income tax rate for 2015 was 34.9% compared to 21.7% for 2014. The increase in the effective income tax rate and provision for income taxes was primarily due to the impact of higher income before income taxes due to severance, pension and benefit credits recorded in 2015 compared to severance, pension and benefit charges recorded in 2014, as well as tax benefits associated with the utilization of certain tax credits in connection with the Omnitel Transaction in 2014.

Notes to Consolidated Financial Statements continued

The effective income tax rate for 2014 was 21.7% compared to 19.6% for 2013. The increase in the effective income tax rate was primarily due to additional income taxes on the incremental income from the Wireless Transaction completed on February 21, 2014 and was partially offset by the utilization of certain tax credits in connection with the Omnitel Transaction in 2014 and the effective income tax rate impact of lower income before income taxes due to severance, pension and benefit charges recorded in 2014. The decrease in the provision for income taxes was primarily due to lower income taxes was primarily due to lower income taxes due to severance, pension and benefit credits recorded in 2013. The decrease in the provision for income taxes was primarily due to lower income before income taxes due to severance, pension and benefit charges recorded in 2014.

The amounts of cash taxes paid are as follows:

		(do	llars in	millions)
Years Ended December 31,	2015	2014		2013
Income taxes, net of amounts refunded	\$ 5,293	\$ 4,093	\$	422
Employment taxes	1,284	1,290		1,282
Property and other taxes	1,868	1,797		2,082
Total	\$ 8,445	\$ 7,180	\$	3,786

Deferred taxes arise because of differences in the book and tax bases of certain assets and liabilities. Significant components of deferred tax assets and liabilities are as follows:

	(dol	lars in millions)
At December 31,	2015	2014
Employee benefits	\$ 12,220	\$ 13,350
Tax loss and credit carry forwards	4,099	2,255
Other – assets	2,504	2,247
	18,823	17,852
Valuation allowances	(3,414)	(1,841)
Deferred tax assets	15,409	16,011
Spectrum and other intangible amortization	29,945	28,283
Depreciation	24,725	23,423
Other – liabilities	6,125	5,754
Deferred tax liabilities	60,795	57,460
Net deferred tax liability	\$ 45,386	\$ 41,449

At December 31, 2015, undistributed earnings of our foreign subsidiaries indefinitely invested outside the United States amounted to approximately \$1.8 billion. The majority of Verizon's cash flow is generated from domestic operations and we are not dependent on foreign cash or earnings to meet our funding requirements, nor do we intend to repatriate these undistributed foreign earnings to fund U.S. operations. Furthermore, a portion of these undistributed earnings represent amounts that legally must be kept in reserve in accordance with certain foreign jurisdictional requirements and are unavailable for distribution or repatriation. As a result, we have not provided U.S. deferred taxes on these undistributed earnings because we intend that they will remain indefinitely reinvested outside of the United States and therefore unavailable for use in funding U.S. operations. Determination of the amount of unrecognized deferred taxes related to these undistributed earnings is not practicable.

At December 31, 2015, we had net after-tax loss and credit carry forwards for income tax purposes of approximately \$4.1 billion that primarily relate to state and foreign tax losses. Of these net after-tax loss and credit carry forwards, approximately \$2.5 billion will expire between 2016 and 2035 and approximately \$1.6 billion may be carried forward indefinitely.

During 2015, the valuation allowance increased approximately \$1.6 billion primarily as a result of the acquisition of AOL. The balance of the valuation allowance at December 31, 2015 and the 2015 activity is primarily related to state and foreign tax losses.

#### **Unrecognized Tax Benefits**

A reconciliation of the beginning and ending balance of unrecognized tax benefits is as follows:

		(doll	ars in millions)
	2015	2014	2013
Balance at January 1,	\$ 1,823	\$ 2,130	\$ 2,943
Additions based on tax positions			
related to the current year	194	80	116
Additions for tax positions of prior			
years	330	627	250
Reductions for tax positions of			
prior years	(412)	(278)	(801)
Settlements	(79)	(239)	(210)
Lapses of statutes of limitations	(221)	(497)	(168)
Balance at December 31,	\$ 1,635	\$ 1,823	\$ 2,130

Included in the total unrecognized tax benefits at December 31, 2015, 2014 and 2013 is \$1.2 billion, \$1.3 billion and \$1.4 billion, respectively, that if recognized, would favorably affect the effective income tax rate.

We recognized the following net after-tax benefits related to interest and penalties in the provision for income taxes:

Years Ended December 31,	(dollars in millions)				
2015	\$ 43				
2014	92				
2013	33				

The after-tax accruals for the payment of interest and penalties in the consolidated balance sheets are as follows:

At December 31,	(dollars in millions)
2015	\$125
2014	169

The decrease in unrecognized tax benefits was primarily due to an internal restructure that eliminated certain state unrecognized tax benefits and the expiration of the statute of limitations in various jurisdictions, partially offset by an increase in unrecognized tax benefits related to the acquisition of AOL.

Verizon and/or its subsidiaries file income tax returns in the U.S. federal jurisdiction, and various state, local and foreign jurisdictions. As a large taxpayer, we are under audit by the IRS and multiple state and foreign jurisdictions for various open tax years. The IRS is currently examining the Company's U.S. income tax returns for tax years 2010-2012, Cellco Partnership's U.S. income tax returns for tax years 2013-2014, and AOL's U.S. income tax returns for tax years 2011-2012. Tax controversies are ongoing for tax years as early as 2006. The amount of the liability for unrecognized tax benefits will change in the next twelve months due to the expiration of the statute of limitations in various jurisdictions and it is reasonably possible that various current tax examinations will conclude or require reevaluations of the Company's tax positions during this period. An estimate of the range of the possible change cannot be made until these tax matters are further developed or resolved.

# Note 13

**Segment Information** 

# **Reportable Segments**

We have two reportable segments, Wireless and Wireline, which we operate and manage as strategic business units and organize by products and services. We measure and evaluate our reportable segments based on segment operating income, consistent with the chief operating decision maker's assessment of segment performance.

Corporate and other includes the operations of AOL and related businesses, unallocated corporate expenses, the results of other businesses, such as our investments in unconsolidated businesses, pension and other employee benefit related costs and lease financing. Effective January 1, 2014, we have also reclassified the results of certain businesses, such as development stage businesses that support our strategic initiatives, from our Wireline segment to Corporate and other. The impact of this reclassification was not material to our consolidated financial statements or our segment results of operations. Corporate and other also includes the historical results of divested operations and other adjustments and gains and losses that are not allocated in assessing segment performance due to their non-operational nature. Although such transactions are excluded from the business segment results, they are included in reported consolidated earnings. Gains and losses that are not individually significant are included in all segment results as these items are included in the chief operating decision maker's assessment of segment performance.

On July 1, 2014, our Wireline segment sold a non-strategic business (see Note 2). Accordingly, the historical Wireline results for these operations have been reclassified to Corporate and other to reflect comparable segment operating results.

The reconciliation of segment operating revenues and expenses to consolidated operating revenues and expenses below also includes those items of a non-operational nature. We exclude from segment results the effects of certain items that management does not consider in assessing segment performance, primarily because of their non-operational nature.

We have adjusted prior period consolidated and segment information, where applicable, to conform to current year presentation.

Our segments and their principal activities consist of the following:

Segment	Description
Wireless	Wireless' communications products and services include wireless voice and data services and equipment sales, which are provided to consumer, business and government customers across the United States.
Wireline	Wireline's voice, data and video communications products and enhanced services include broadband video and data, corporate networking solutions, data center and cloud services, security and managed network services and local and long distance voice services. We provide these products and services to consumers in the United States, as well as to carriers, businesses and government customers both in the United States and around the world.

The following table provides operating financial information for our two reportable segments:

	to reportable segments:				(dollars	s in millions)

## **Reconciliation to Consolidated Financial Information**

A reconciliation of the reportable segment operating revenues to consolidated operating revenues is as follows:

	(dollars in millions)			
2015	2014	2013		
\$129,400	\$126,075	\$119,647		
3,444	1,888	1,514		
-	256	599		
(1,224)	(1,140)	(1,210)		
\$131,620	\$127,079	\$120,550		
	\$129,400 3,444 (1,224)	2015     2014       \$129,400     \$126,075       3,444     \$1,888       -     256       (1,224)     (1,140)		

Fios revenues are included within our Wireline segment and amounted to approximately \$13.8 billion, \$12.7 billion, and \$11.2 billion for the years ended December 31, 2015, 2014, and 2013, respectively.

A reconciliation of the total of the reportable segments' operating income to consolidated Income before provision for income taxes is as follows:

		(dollars in millions)			
Years Ended December 31,	2015	2014	2013		
Operating Income					
Total reportable segments	\$ 32,148	\$ 27,795	\$ 26,327		
Corporate and other	(1,598)	(1,074)	(912)		
Reconciling items:

# Note 14

# **Comprehensive Income**

Comprehensive income consists of net income and other gains and losses affecting equity that, under U.S. GAAP, are excluded from net income. Significant changes in the components of Other comprehensive income, net of provision for income taxes are described below.

#### **Accumulated Other Comprehensive Income**

The changes in the balances of Accumulated other comprehensive income by component are as follows:

(dollars in millions)	Foreign currency translation adjustments	Unrealized loss on cash flow hedges	Unrealized loss on marketable securities	Defined benefit pension and postretirement plans	Total
Balance at January 1, 2015	\$ (346)	\$ (84)	\$ 112	\$ 1,429	\$ 1,111
Other comprehensive loss	(208)	(1,063)	(5)	-	(1,276)
Amounts reclassified to net income	-	869	(6)	(148)	715
Net other comprehensive loss	(208)	(194)	(11)	(148)	(561)
Balance at December 31, 2015	\$ (554)	\$ (278)	\$ 101	\$ 1,281	\$ 550

The amounts presented above in net other comprehensive loss are net of taxes and noncontrolling interests, which are not significant. For the year ended December 31, 2015, the amounts reclassified to net income related to defined benefit pension and postretirement plans in the table above are included in Cost of services and Selling, general and administrative expense on our consolidated statement of income. For the year ended December 31, 2015, all other amounts reclassified to net income in the table above are included in Other income and (expense), net on our consolidated statement of income.

A reconciliation of the total of the reportable segments' assets to consolidated assets is as follows:

	(dollars in million			
At December 31,	2015	2014		
Assets				
Total reportable segments	\$ 263,722	\$ 236,973		
Corporate and other	205,930	191,686		
Eliminations	(225,012)	(196,043)		
Total consolidated	\$ 244,640	\$ 232,616		

We generally account for intersegment sales of products and services and asset transfers at arm's length prices. No single customer accounted for more than 10% of our total operating revenues during the years ended December 31, 2015, 2014 and 2013. International operating revenues and long-lived assets are not significant.

Notes to Consolidated Financial Statements continued

#### Foreign Currency Translation Adjustments

The change in Foreign currency translation adjustments during 2015 was related to our non-U.S. dollar net investments in foreign subsidiaries. The change in Foreign currency translation adjustments during 2014 was primarily a result of the completion of the Omnitel transaction. The change in Foreign currency translation adjustments during 2013 was primarily related to our investment in Vodafone Omnitel N.V. which was driven by the movements of the U.S. dollar against the Euro.

#### Net Unrealized Gains (Losses) on Cash Flow Hedges

During 2014 and 2013, Unrealized gains (losses) on cash flow hedges included in Other comprehensive income (loss) attributable to noncontrolling interests primarily reflect activity related to cross currency swaps. Reclassification adjustments on cash flow hedges primarily reflect the reclassification to Other income and (expense), net of a portion of the unrealized gains and losses on cross currency swaps to offset related pre-tax foreign currency transaction gain or loss on the underlying debt obligations (see Note 9).

## Net Unrealized Gains (Losses) on Marketable Securities

During 2015, 2014 and 2013, reclassification adjustments on marketable securities for gains (losses) realized in net income were not significant.

#### **Defined Benefit Pension and Postretirement Plans**

The change in Defined benefit pension and postretirement plans at December 31, 2015 and 2014, respectively, was not significant.

\$ 4,491

\$ 4,429

\$ 2,122

During the year ended December 31, 2015, Verizon repurchased approximately 2.8 million shares of the Company's common stock under our authorized share buyback program for approximately \$0.1 billion. At December 31, 2015, the maximum number of shares that could be purchased by or on behalf of Verizon under our share buyback program was 97.2 million.

In addition to the previously authorized three-year share buyback program, in February 2015, the Verizon Board of Directors authorized Verizon to enter into an accelerated share repurchase (ASR) agreement to repurchase \$5.0 billion of the Company's common stock. On February 10, 2015, in exchange for an up-front payment totaling \$5.0 billion, Verizon received an initial delivery of 86.2 million shares having a value of approximately \$4.25 billion. On June 5, 2015, Verizon received an additional 15.4 million shares as final settlement of the transaction under the ASR agreement. In total, 101.6 million shares were delivered under the ASR at an average repurchase price of \$49.21.

Common stock has been used from time to time to satisfy some of the funding requirements of employee and shareowner plans, including 22.6 million common shares issued from Treasury stock during the year ended December 31, 2015, which had an aggregate value of \$0.9 billion.

# Note 16

# **Commitments and Contingencies**

In the ordinary course of business Verizon is involved in various commercial litigation and regulatory proceedings at the state and federal level. Where it is determined, in consultation with counsel based on litigation and settlement risks, that a loss is probable and estimable in a given matter, the Company establishes an accrual. In none of the currently pending matters is the amount of accrual material. An estimate of the reasonably possible loss or range of loss in excess of the amounts already accrued cannot be made at this time due to various factors typical in contested proceedings, including (1) uncertain damage theories and demands; (2) a less than complete factual record; (3) uncertainty concerning legal theories and their resolution by courts or regulators; and (4) the unpredictable nature of the opposing party and its demands. We continuously monitor these proceedings as they develop and adjust any accrual or disclosure as needed. We do not expect that the ultimate resolution of any pending regulatory or legal matter in future periods, including the Hicksville matter described below, will have a material effect on our financial condition, but it could have a material effect on our results of operations for a given reporting period.

Reserves have been established to cover environmental matters relating to discontinued businesses and past telecommunications activities. These reserves include funds to address contamination at the site of a former Sylvania facility in Hicksville NY, which had processed nuclear fuel rods in the 1950s and 1960s. In September 2005, the Army Corps of Engineers (ACE) accepted the site into its Formerly Utilized Sites Remedial Action Program. As a result, the ACE has taken primary responsibility for addressing the contamination at the site. An adjustment to the reserves may be made after a cost allocation is conducted with respect to the past and future expenses of all of the parties. Adjustments to the environmental reserve may also be made based upon the actual conditions found at other sites requiring remediation.

Verizon is currently involved in approximately 60 federal district court actions alleging that Verizon is infringing various patents. Most of these cases are brought by non-practicing entities and effectively seek only monetary damages; a small number are brought by companies that

have sold products and seek injunctive relief as well. These cases have progressed to various stages and a small number may go to trial in the coming 12 months if they are not otherwise resolved.

In connection with the execution of agreements for the sales of businesses and investments, Verizon ordinarily provides representations and warranties to the purchasers pertaining to a variety of nonfinancial matters, such as ownership of the securities being sold, as well as indemnity from certain financial losses. From time to time, counterparties may make claims under these provisions, and Verizon will seek to defend against those claims and resolve them in the ordinary course of business.

Subsequent to the sale of Verizon Information Services Canada in 2004, we continue to provide a guarantee to publish directories, which was issued when the directory business was purchased in 2001 and had a 30-year term (before extensions). The preexisting guarantee continues, without modification, despite the subsequent sale of Verizon Information Services Canada and the spin-off of our domestic print and Internet yellow pages directories business. The possible financial impact of the guarantee, which is not expected to be adverse, cannot be reasonably estimated as a variety of the potential outcomes available under the guarantee result in costs and revenues or benefits that may offset each other. We do not believe performance under the guarantee is likely.

As of December 31, 2015, letters of credit totaling approximately \$0.1 billion, which were executed in the normal course of business and support several financing arrangements and payment obligations to third parties, were outstanding.

We have several commitments primarily to purchase programming and network services, equipment, software, handsets and peripherals, and marketing activities, which will be used or sold in the ordinary course of business, from a variety of suppliers totaling \$21.9 billion. Of this total amount, \$8.4 billion is attributable to 2016, \$9.2 billion is attributable to 2017 through 2018, \$2.3 billion is attributable to 2019 through 2020 and \$2.0 billion is attributable to years thereafter. These amounts do not represent our entire anticipated purchases in the future, but represent only those items that are the subject of contractual obligations. Our commitments are generally determined based on the noncancelable quantities or termination amounts. Purchases against our commitments for 2015 totaled approximately \$10.2 billion. Since the commitments to purchase programming services from television networks and broadcast stations have no minimum volume requirement, we estimated our obligation based on number of subscribers at December 31, 2015, and applicable rates stipulated in the contracts in effect at that time. We also purchase products and services as needed with no firm commitment.

(dollars in millions, except per share amounts)

· Results of operations for the third quarter of 2015 include after-tax charges attributable to Verizon of \$0.2 billion related to a pension remeasurement.

• Results of operations for the fourth quarter of 2015 include after-tax credits attributable to Verizon of \$1.6 billion related to severance, pension and benefit credits, as well as after-tax credits attributable to Verizon of \$0.2 billion related to a gain on spectrum license transactions.

• Results of operations for the first quarter of 2014 include after-tax-credits attributable to Verizon of \$1.9 billion related to the sale of its entire ownership interest in Vodafone Omnitel, as well as after-tax costs attributable to Verizon of \$0.6 billion related to early debt redemptions and \$0.3 billion related to the Wireless Transaction.

• Results of operations for the second quarter of 2014 include after-tax credits attributable to Verizon of \$0.4 billion related to a gain on spectrum license transactions.

• Results of operations for the fourth quarter of 2014 include after-tax charges attributable to Verizon of \$4.7 billion related to severance, pension and benefit charges, as well as after-tax costs attributable to Verizon of \$0.5 billion related to early debt redemption and other costs.

(1) Net income (loss) attributable to Verizon per common share is computed independently for each quarter and the sum of the quarters may not equal the annual amount.
