

CONSTRUCTION CONTRACT BILLING: FULLY INTEGRATED SOLUTION FOR ENGINEERING AND CONSTRUCTION FIRMS

KEY BENEFITS

- Reduce contract billing labor by 80%
- Improve cash flow via faster payments
- Improve accuracy via integration with Oracle E-Business Suite Applications
- Virtually eliminate training time and costs
- Easy to audit system-driven contract billing process reduces validation requirements from auditors
- Scalable process allows existing staff to handle growth without increasing costs
- Free up Project Managers to focus on project performance
- Free up Project Accountants to focus on variance analysis

FEATURES

- Seamless Integration with Oracle
 Project Billing and Oracle Receivables,
 including Retentions
- Defined flow across entire AIA Billing process from Contract Billing Entry through Invoice Delivery
- Creates and prints G702 and G703 formatted invoices
- Intuitive interface to capture all necessary information for AIA Billing invoices
- Billing and contract amounts entered into one easy-to-use worksheet
- Automatically processes Oracle revenue financial plan updates
- Tracks and manages change order amounts by line item.
- Ability to enter percent complete or direct entry of amounts for each line item
- Complete access to your AIA historical invoicing within your workbench
- Optionally supports tracking of Construction Specifications Institute (CSI) codes by contract line item

Project Partners Construction Contract Billing[™] augments Oracle Project Billing to deliver an automated progress billing solution for the Engineering & Construction Industry.

Overview

Project Partners Construction Contract Billing[™] provides the project manager with a role-based Microsoft Excel[®] workbench, which leverages Oracle Projects and Oracle Receivables to:

- Easily and rapidly create new projects, enter change orders, collect progress, and bill clients
- Provide data relevant only to the progress billing function
- Perform multiple tasks in one Excel worksheet
- Minimize training time and costs
- Produce invoices in formats compliant with American Institute of Architects[®] (AIA) G702 and G703 standards

Project Partners Construction Contract Billing functionality includes:

- Contract billing setups including retention rules
- Revenue budget and agreement creation and updates
- Change order creation and processing
- Entry of monthly billing amounts
- Automated invoice generation
- Standard AIA G702 and 703 formatted invoices

Work with Oracle Data in Disconnected Mode

Connect to Oracle using Microsoft[®] Excel; download data, including lookups and lists of values, and work offline in your worksheets, completely independent of Oracle. Later, reconnect to Oracle and synchronize the updates made in Excel with the Oracle database.

Progress Billing Processing

Meeting AIA billing standards depends upon having the correct contract amounts available to produce timely and accurate invoices. Project Partners Construction Contract Billing provides a complete set of tools to track your contract billing requirements while automatically synchronizing with Oracle Applications.

Project Partners Construction Contract Billing delivers this capability via two integrated Microsoft Excel worksheets:

- Billing Schedule of Values worksheet
- Application for Payment worksheet

Billing Schedule of Values Worksheet

Billing SOV (Schedule of Values)

The Billing SOV worksheet provides project managers the tools necessary to enter and synchronize contract billing data into Oracle Projects.

Contract and Agreement data

Enter the contract header information used for billings and synchronize this data within Oracle Projects. Additionally, the billing agreement header and revenue budget versions can be seamlessly created and maintained from this spreadsheet directly into Oracle Projects.

Automatically Create Budgeting and Financial Billing Tasks

Contract line items are created directly in the worksheet. These SOV line items are linked directly into Oracle Projects - automatically creating financial tasks for budgeting and invoicing.

Quick and Easy Entry of SOV Contract Amounts

Line Item contract amounts can be quickly and easily entered using this spreadsheet functionality. When ready, these amounts can be automatically synchronized with the revenue budget and agreement funding lines for easy baselining within Oracle.

Fully Integrated with Oracle Projects Retention

Billing retention rules can be maintained and synchronized with Oracle Project Billing directly from the Billing SOV worksheet. Both percentage of billed amount and fixed amount retention rules are supported and maintained from the worksheet including date effectivity.

Full Audit Trail of Your Contract Modifications

Contract modifications are entered and synchronized using the Approved Revenue Budget financial plan versions. Historical tracking of all contract modifications is maintained within Oracle and is used for invoice generation and historical review.

Application for Payment Worksheet

Application for Payment

Construction Contract Billing generates invoices using the Application for Payment (AFP) worksheet. This worksheet integrates the latest baselined contract amounts, current billing data and generates an invoice in Oracle Projects.

Instant Access to Contract and Historical Data

Download the latest contract and historical invoice data into the spreadsheet for use in creating a current invoice.

Flexible Billing Data Entry and Automatic Value Calculations

Enter current billing data for the completed work in place amounts either by entering a completion percentage or dollar amount. Additionally, amounts for the billing value of stored materials can be entered and tracked separately by line item. These amounts are automatically calculated and summarized by the spreadsheet to give immediate feedback on the total billed amounts.

Oracle Draft Invoice Generation from within the AIA Workbench

Integrate the new billing amounts directly into Oracle Projects and generate a draft invoice in Oracle without the need to directly login to Oracle applications.

Complete the Full Approval and Release Invoices from within the AIA Workbench

Immediately approve and release a draft invoice from the worksheet. No need to login to Oracle applications to fully process an invoice.

Fully Formatted Standard AIA Invoices

View the actual G702 and G703 pro-forma invoice directly from the worksheet without need to print the invoice or login to Oracle applications. With a click of a button the invoice is displayed and is ready for review.

Convenient Access to Historical Applications for Payment

Review previous applications for payment within the AFP worksheet. The budget and billing values used to create the invoice will be displayed as originally generated and approved. Using filed, printed copies of the invoice are now obsolete with this online solution.

Standardized AIA G702 / 703 Formatted Invoice

Leveraging the proven technology of Project Partners Invoicing, Construction Contract Billing users can review and print the standard G702 and G703 invoice from with the Construction Contract Billing Application for Payment worksheet.

G702 Application for Payment

The G702 Application and Certification for Payment is a standardized form with which the contractor can apply for payment and the architect can certify payment is due.

The Project Partners G702 format complies with standards and shows the status of the contract sum to date, including the total dollar amount of the work completed and stored to date, the amount of retainage (if any), the total of previous payments, a summary of change orders and the amount of current payment requested. It serves as both the contractor's application and the architect's certification, and its use can expedite payment and reduce errors.
