Creating Secure Environments

Ingersoll Rand Security Technologies delivers innovative access and security solutions. Protecting people, property and assets is an ongoing, ever changing and vital responsibility.

Opening the way

We are a leading global provider of products and services that make environments safe and secure without inhibiting access or working capability. Our product portfolio includes electronic and biometric access control systems, time and attendance and personnel scheduling systems, mechanical locks and portable security together with door closers and exit devices, steel doorsets, automated openings and architectural hardware.

Our industry wide capabilities and expertise mean we are well placed to tailor integrated solutions for any project, from doors and hardware to full access control and the software for people management.

We also help you meet the requirements of the UK Disability Discrimination Act (DDA) so that people can enjoy ease of access to and within your premises without compromising on security.

Maximising the Benefits of an Integrated Solution

Providing a total package of products and services we embrace the whole procurement, construction and building management chain.

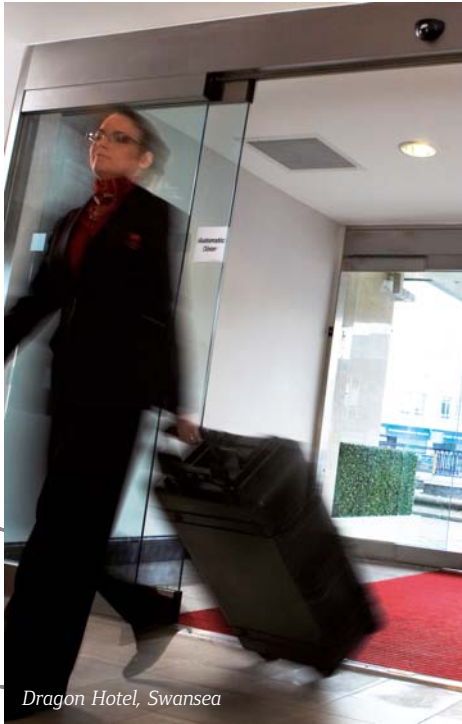

This means:

- A wide range of products and services from a single source
- Complete control of the process from design to installation
- Professional project management coupled with stress-free ownership and operation
- Assurance that all hardware and software systems are fully integrated and compatible
- Life-time support with 'round the clock' breakdown and service programmes
- Expertise in providing access and security solutions to companies worldwide
- Financial services

On the following pages we outline the wide range of products and services we offer. These include Automated Openings, Performance Doorsets, Electronic Access Solutions, Hotel Locking Systems, Architectural Hardware, Service and Maintenance, Installation and Project Management.

Automated Openings

Dragon Hotel, Swansea

Our automated openings, under the Dor-O-Matic brand name, comprise the widest available selection of automatic doors and operator systems and are installed on many UK high street stores. The full design, manufacture and installation service is available to suit every application. This is an exceptional service totally committed to fulfilling your requirements and solving your problems.

Our portfolio includes slide, swing, balance, fold, telescopic door systems and a series of low energy operators. These are available in a wide range of finishes including powder coated colour, anodised aluminium, stainless steel and brass. In addition, we have a stylish all-glass design for fold, slide, balance and swing products.

Performance Doorsets

Performance steel doorsets, marketed under the Martin Roberts brand name, are custom-made to suit individual requirements and supplied in a wide range of colours and finishes, including advanced TimberTec wood effect finishes.

Doors can be designed to provide solutions for fire, acoustic, security and cleanroom use. They can also incorporate special features such as vision panels, louvres and security protection.

Steel doors offer long life performance and improved life cycle costs. Which is one of the reasons why Ingersoll Rand doors are specified as an alternative to timber doors and increasingly used in offices, hotels and other commercial environments, where there is a need for a secure, robust yet aesthetic solution.

Belgrave Hotel, London

Electronic Access Solutions

As a world leader in access control, time and attendance and personal identification, we are uniquely positioned to supply a complete security package from cutting-edge biometric solutions, through networked and stand-alone electronic access control systems to mechanical locks.

Under the Interflex brand name, bespoke software and hardware designs provide flexible solutions for time management, personnel scheduling, data capture, visitor management and access control applications.

Hotel Locking Systems

CISA is a name synonymous with the design and manufacture of a complete range of hotel and electronic locking systems. Approved and specified by major international and national hotel chain groups as well as individual hoteliers, all systems are supplied, installed and supported by a team of professional engineers.

Ideal for hotels, hostels and student accommodation, solutions can incorporate magnetic swipe cards, smart card and proximity systems.

A new modular approach also gives unparalleled flexibility to fulfil both a hotel's design and cost parameters.

Belgrave Hotel, London

Architectural Hardware

Briton[®]

Briton is the leading UK brand for door closers and exit devices. The range also incorporates door furniture, cylinders and lockcases. Our product portfolio also includes: the Legge collection of lever locks and latches; the Randi range of leading design door furniture and accessories; plus the versatile Normbau range of nylon door and bathroom fittings.

When hardware is incorporated as part of a doorset solution with one of our Martin Roberts performance doors, products can be pre-assembled and integrated to minimise on-site time and reduce costs.

Service and Maintenance

At Ingersoll Rand Security Technologies, we are renowned for designing solution based products which offer reliability and longevity, even for the most demanding of applications. However, the fewer the replacements, the less resource expended, the least cost incurred. We recognise that proper servicing and maintenance is a key consideration for the sustainability of buildings over their entire life cycle and as we offer a combination of proactive and responsive services, we are able to provide life-time peace of mind.

Planned preventative maintenance programmes keep breakdowns to a minimum. Fully qualified engineers, directly employed by Ingersoll Rand, provide a 24/7, 365 days a year UK repair service to help keep your premises operating with minimum disruption. Our service engineers are able to service both automatic and manual doors, as well as electromechanical and mechanical hardware and security systems.

Installation and Project Management

We provide a comprehensive service for every type of project, large or small, simple or complex.

We can manage the complete project from conception to completion. We have the proven skills to get the job done to specification, on time and on budget.

Our commitment to providing quality products and services results in unequalled levels of support, including a full project management service from design to manufacturing through to installation and on-going maintenance.

We are proud of our association with many leading architects and designers, contractors and construction professionals. Our project portfolio is extensive, ranging from small standalone sites to partnering on large multi-site developments.

We pride ourselves on embracing robust working practices across our entire global organisation. This includes controlled activity monitoring and independent auditing against strict Sarbanes-Oxley criteria (SOX404) for financial, commercial, ethical and environmental matters. Naturally, the company has ISO9001 and ISO14001 accreditation.

We are both a RIBA manufacturers' network member and accredited RIBA core curriculum CPD provider. This underpins our dedication to providing a holistic, best practice approach to meet the demands of modern construction.

A World Class Company

The Ingersoll Rand Corporation is a \$11 billion global innovation and solutions provider. We employ 40000 people worldwide and run 90 manufacturing facilities. We understand construction. We understand buildings. We understand needs.

The resources of this global enterprise support our security and access solutions. As a leading, diversified industrial company, we provide products, services and integrated solutions to every type of organisation and industry, from transportation and manufacturing to food retailing, from construction to agriculture.

Our Security Technologies sector is a global provider of products engineered to make buildings safe and secure. Our market-leading brands include:

Ingersoll Rand Sectors

Our strong corporate network includes businesses with powerful brands, solid reputations and market-leading positions. Apart from Security Technologies there are four other global growth sectors.

Construction Technologies

The focus of this sector is equipment enabling the construction, renovation and repair of public works and private projects. Products include compact excavators, telescopic tool carriers, rough terrain material handling equipment, portable air compressors, portable generators, light towers, hydraulic breakers and a wide range of other attachments.

Climate Control Technologies

Providing equipment and services to manage controlled-temperature environments for food and other perishables, this sector encompasses both transport and retail refrigeration solutions.

Compact Vehicle Technologies

Ingersoll Rand is a world leader in the field of compact vehicles and equipment. Our widely known Bobcat brand includes an extensive line of powerful and nimble compact construction equipment and attachments together with state-of-the-art engineering capabilities and stylish designs which are reflected in our world famous Club Car vehicles.

Industrial Technologies

This sector provides products and solutions to enhance industrial efficiency and engineered systems. Products include tools and material handling equipment, fluid products, micro-turbines for electricity generation and cogeneration, air compressors and compressed air systems.
