

# Bride & Joy

## DIY PHOTO BOOTH

### This DIY Photo booth Kit contains:

#### 1. Two 'Photo booth This Way' Signs

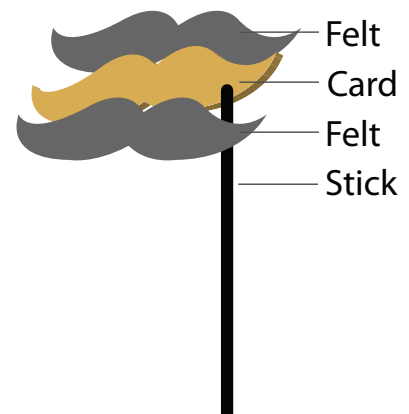

**2. Speechbubble Template** - Print and cut out. Match up pages at dashed line and tack together. Use as a template to cut out shape from a whiteboard, or out of some plywood which you can then paint with blackboard paint. Leave with chalk or white board markers so your guests can express their true feelings.

**3. Photo booth Tickets** - print and cut out. Distribute amongst the guests and watch them flock to your photo booth.

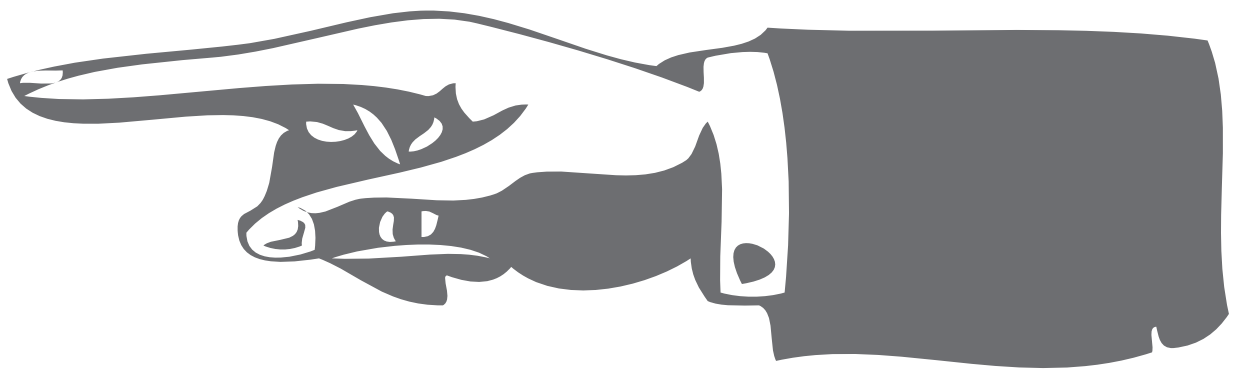

**4. Photo Booth Instructions** - so your guests are clued up on what to do. Print out and put in a frame in a prominent position. You might also like to have photos printed of a trial run with the photo booth, so people get the idea visually.

**5. Photo Booth Banner** - Print out each page separately and punch two holes at the top. Thread through some twine and hang above your photo booth area.

**6. Moustache Templates** - print out and use as templates to cut out black or brown felt. You can reinforce them by gluing cardboard between two layers of felt as shown. Attach to a thin wooden stick such as a skewer with the sharp end cut off.
