

# Appendix B.

## Sample Inspection Report

The sample inspection report on the following pages was developed by the U.S. EPA to support compliance with the NPDES Construction General Permit (CGP), and to be used in conjunction with the implementation of the Stormwater Pollution Prevention Plan (SWPPP) required for that permit. This form should be a useful tool for any project that requires the application, inspection, and maintenance of erosion and sediment controls during construction.

Further information about the CGP, guidance in preparation of the SWPPP, and the sample inspection report may be found at the EPA's website: [www.epa.gov/npdes/swpppguide](http://www.epa.gov/npdes/swpppguide)

### *Using the Inspection Report*

This inspection report form is designed to be customized according to the BMPs and conditions at each specific site. Structural and non-structural erosion and sediment control practices used on the site should be indexed on the form, together with a brief description of each measure.

When conducting the inspection, the responsible person should observe general site conditions and the specific BMPs/ areas listed for inspection, using the form to note overall site issues, conditions at each BMP, corrective actions, and the date and party responsible for the correction in the Corrective Action Log.

## Site-specific BMPs

Number the structural and non-structural BMPs identified in your SWPPP on your site map and list them below (add as many BMPs as necessary). Carry a copy of the numbered site map with you during your inspections. This list will ensure that you are inspecting all required BMPs at your site.

Describe corrective actions initiated, date completed, and note the person that completed the work in the Corrective Action Log.
