Review and Update Form 1099

GAO prepares the initial set of 1099 forms for vendors doing business with Arizona. Each agency reviews reports of their own reportable payments and submits changes to GAO for entry in AFIS.

This Quick Reference Guide shows you how to review 1099 reports and submit corrections.

Background Setup for 1099 Processing

GAO manages several settings and processes within AFIS:

- 1099 Withholding Rate (percentage)
- Chart of Accounts (e.g., Object Codes) that are 1099 reportable
- Thresholds and 1099 Classifications for each Box of the 1099 forms
- Requirements for Vendor registration relating to 1099 setup
- Reporting State agencies' data as a single reportable entity as the "State of Arizona"
- Printing of forms and distribution to vendors
- Preparation of IRS file and distribution to IRS

ProcureAZ vendors manage their own 1099 information in ProcureAZ; GAO and Agencies manage other non-ProcureAZ Vendors in AFIS:

- Backup withholding requirement
- 1099 Indicator (Yes, No)
- 1099 Classification (e.g., Corporation, Individual, Trust, Not Reportable)
- Taxpayer ID Number and TIN Type (EIN or SSN)

As the calendar year is ending, GAO prepares 1099 reports:

- AFIS collects reportable payments for the calendar year (for 2015, July through December).
- AFIS runs the Offline 1099 Process in Testing Mode to generate 1099R records.
- AFIS loads 1099 records from interfacing agencies to generate 1099ER records.
- For 2015, Legacy AFIS data (January through June) is loaded to create M1099 documents that update 1099R records.

1099 Data Review

After the 1099 data from New AFIS has been generated and updated with 1099 data from Legacy AFIS, all Departments review their individual 1099 Reports in order to identify any changes needed.

After the interfacing agencies submit their 1099 data, these Departments review their *1099 External Report* in order to identify any changes needed.
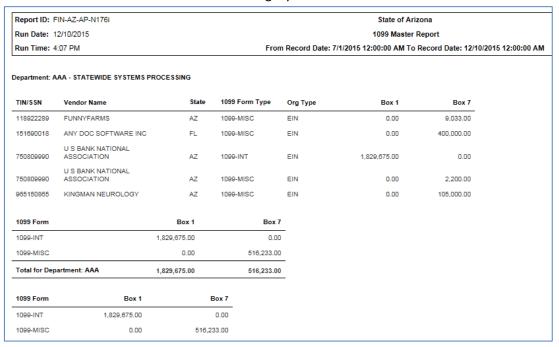

1099 Data Correction

After identifying changes needed, Departments submit Form GAO-94 to make changes.
