Behavioral Demand Letter Experiment

Findings from a Randomized Controlled Trial

Tammy Chang
August 12, 2014

Background

- Federal agencies refer delinquent debts to Treasury at 180 days past delinquency (batch/daily/etc referrals)
- Treasury issues initial “demand letters” to debtors
 - Notice of Referral
 - Debt information
 - Repayment options
- Debts serviced internally for 30 days

Analytics Objectives

- Design and run a rigorous and statistically sound experiment
 - Implement a Randomized Controlled Trial (RCT)
- Develop and test an alternative letter
 - Can a letter incorporating insights from behavioral science change debtor behavior?

Behavioral Science Concepts

- Social norm
- Limited attention
- Information overload
- Personalization
- Hassle factors
- Primacy

Collaboration and Context

- US Social and Behavioral Sciences Team
 - Identify opportunities for behavioral insights to increase efficiency and efficacy of federal agency programs
- Evidence and Innovation Agenda (OMB M-13-17)
 - Promote evidence-based policy
 - Using data to inform and improve agency results
 - Rigorous, low-cost experiments
- 2014 Economic Report of the President

Outcome Measures of Interest

- Collections
 - Likelihood of collection
- Debtor contact
 - Likelihood of inbound calls
- Payment method
 - Likelihood of self-initiated Pay.gov payment

- Odds ratio of 1.5: treatment group odds 1.5 times higher than control group odds of having Pay.gov payment

- Difference statistically ***significant***

Discussion/Recommendations

- Findings on likelihood of collection depart from previous research
- No effect on payment or contact likelihood
 - What does this tell us?
- Ability to influence payment method decision
 - Change other Pay.gov references

- Successful RCT!
