

STRUCTURAL ENGINEER - PROJECT DIRECTOR (LOS ANGELES)

Englekirk is in search of a Project Director to join the team.

Englekirk Structural Engineers is a 45+ year old firm with a 100+ member structural engineering team seeking creative and self-motivated design engineers to be a part of our iconic landmark projects. Our firm offers an opportunity to work on a diverse range of projects, in a learning environment centered around the exchange of information and ideas about innovative structural design solutions. Ability to learn from in-house technical programs and experienced senior staff members. Employees encouraged to develop their personal interests. Become a part of the design team involved in such landmarks as Hollywood & Highland and Getty Center with additional projects on the UC and CSU campuses, 25 million square feet of office buildings, 55-story highrise residential, parking structures, stadiums, education facilities, seismic rehabilitation of existing structures, and regional retail developments.

Successful candidates should have 7-10 years of structural design and have a current California SE license. Salary is competitive and benefits are excellent. The position is located in downtown Los Angeles.

REQUIRED SKILLS

- 7-10 years structural engineering experience.
- California SE license
- Minimum MS Degree
- Experience with structural steel, concrete, masonry, and wood for commercial, office, residential, retail and institutional projects.
- Project management experience with projects in excess of \$50M construction budget
- Extensive earthquake engineering experience in new and existing construction
- Must be knowledgeable and experienced in executing 3-D non-linear dynamic analysis of building structures
- Familiar with building codes for new and existing structures
- Efficiently able to manage time and staff to meet deadlines and project budgets
- Project field experience
- Strong verbal and written communication skills
- History of working in a "team" based work environment
- Leadership, planning, decision making, judgment and problem solving
- Computer systems expertise to effectively manage projects
- Ability to develop project fee proposals
- Ability to foster and maintain client accounts
- Strong personal client network
