

DVT/PE Outcome Details (Form 126)

File Name outc_dvt_pe_dbgap_rel2.dat

Population

Collected WHI, Ext1 1 row per Outcome Form **#Rows** 740

This file has one row for every form 126 recording outcome(s). A participant may have more than one of these forms and one form may record several different types of outcomes. Only the first occurrence of each outcome is counted, e.g. Limiting the file to rows where DVT=1 will find a single row for each participant with a DVT outcome.

*SUBJID	WHI	dbGaP Subject ID				Col# 1
