**Quick  
Set-up  
Guide**

Welcome Kapamilya,

We at ABS-CBN are honored to have you in the family. We strive to make a difference in the lives of our kababayans wherever they may be by entertaining them with the best Filipino programs, keeping them updated on the latest news and providing other services that bring them closer to home.

Now you can enjoy the latest innovation from ABS-CBN Global that allows you to view your favourite TV programs using the same technology that delivers your internet service at home.

With TFC on IPTV, TV viewing just got much better with its Video-On-Demand (VOD) feature. It's like putting TV programming in your hands.

	FEATURES and BENEFITS
✓	Select and watch a movie, TV show or music video in the comfort of your home, when you want to.
✓	Watch the latest movie and sports events on Pay-Per-View.
✓	Relax with its simple remote control access, menu-driven and on-screen navigation.
✓	Choose from hundreds of VOD programs that are available 24 hours a day, seven days a week.
✓	Have full control while watching with its Play, Pause, Stop, Fast Forward & Rewind functionality.
✓	Say goodbye to the hassles of DVR. No more missed shows because shows are archived from the latest to the very first episode! Enjoy marathon viewing.

We have provided you with a Quick Set-Up Guide to help you get started with TFC on IPTV. We hope that you will find this informative and easy to use.

Thank you and we wish you a rewarding experience with TFC.

Olivia de Jesus  
Managing Director  
ABS-CBN International

## Your Set Top Box Set-Up

### ► STEP

**1** Plug the composite breakout cable to the Video/Audio output port behind your set top box.

### ► STEP

**2** Connect the other end of the composite cable to your TV's "AUDIO/VIDEO LINE IN." Please make sure that you match white and red cable colors to the same colored outlets on Audio Line In. Connect the yellow video cable to your TV's Video Line IN yellow outlet.

Note: Some TV models may have their Audio/Video Line In outlets in front or at the back of the TV set. Also, some models may just have one Audio Line In. You may use either the white or red cable.

# Your Internet Set-Up

## IMPORTANT!

To receive TFC (TFC on Demand), your set-top box must connect to the internet using your existing broadband connection (DSL and cable modem).

- **STEP 3** Connect one end of the network cable into the DSL/cable modem's Ethernet/LAN port. Then turn ON your DSL/cable modem box.

**NOTE:** If your internet set-up includes a router, connect one end of the network cable into the router's LAN/Ethernet port. Then, turn ON your router.

- **STEP 4** Connect the other end of the Network or Ethernet cable to the WAN Ethernet port (ETHERNET) behind your set-top box.

- **STEP 5** Connect the power cable to the power port behind the set-top box. Then plug the set-top box's power adapter into a power outlet 100-240V.

- **STEP 6** Check the power light indicator on the front of the box. The STB is ON when you see the Green LED and is on STANBY mode when you see the Red LED.

# Your TV Screen

- **STEP 7** Turn ON your TV set. Depending on your TV model, press the VIDEO or INPUT or LINE button of your TV set remote control to switch to the appropriate video channel.

- **STEP 8** The TFC Logo will appear. Please wait.

- **STEP 9** In case there will be system upgrades, you will be prompted to upgrade to a newer version of firmware manually. Simply follow the on-screen instructions and make sure that the power is always ON when performing the software upgrade.

- **STEP 10** As soon as the upgrade process is complete, you will see the Activation Screen. Call the Technical Support hotline number indicated on the screen to complete your activation process.

- **STEP 11** Once the box is activated, this will be the first menu screen that will be shown. Select TFC to start watching your TFC programs.

Enjoy your favorite KAPAMILYA Shows!
