Marketing Transit Toolkit

Welcome to the National RTAP Marketing Toolkit

This toolkit is designed as a comprehensive and practical guide for rural and tribal public transportation agencies to develop and implement successful marketing programs for their systems. Transit agencies in smaller communities rely on a relatively small staff to keep the wheels turning. Of necessity, transit managers are involved in virtually all aspects of their organization, supervising day-to-day operations, vehicle maintenance, customer service, financial reporting and more. Some even drive the buses.

The goal of this toolkit is to help transit managers when they need to step into the marketing role by supplying them with the information and tools they need in a straightforward way.

Section 1 — How-To Guide

The first section of the toolkit is a "How-To Guide" for transit marketing and provides directions for identifying and accomplishing marketing goals and objectives.

The How-To Guide begins with an overview of marketing in general, then takes a closer look at marketing's role in the transit environment. Transit marketing must pursue a variety of objectives and address diverse target markets. In addition, it needs to be ongoing — a part of the day-to-day operation of the service.

Toolkit Contents

- How-To Guide
 - Overview of marketing in the transit environment
 - How to develop an effective transit marketing plan
 - Marketing strategies for building awareness, image, support and ridership
- Marketing Plan Workbook
 - Worksheets to help you develop and implement a marketing plan
- Marketing Tools
 - To help you implement the strategies that you identify as right for your system
 - Designed for novice marketers and come with instructions

Transit Marketing Basics

What is Transit Marketing?

Transit marketing:

- Everything an agency does to communicate with its riders, potential riders, and other important stakeholders within the community.

Objectives:

- Build visibility for transit and its role in a community
- Build support among decision makers and tax payers
- Educate potential riders about what the system has to offer
- Generate ridership among those with transportation needs you can meet

Why Market Your System?

- Increase ridership
- Raise awareness of public transit in the community
- Dispel misconceptions – service not just for certain populations
- Develop community partners
- Satisfy funding requirement

Marketing cannot fix poor or inadequate service.

If service falls short — buses break down, schedules are unreliable — or it simply does not meet the needs of the target user, marketing will only make matters worse by offering a promise that the service cannot fulfill.

Identify Your Target Markets

Transit marketing requires an understanding of the needs and wants of your current and potential riders.

Types of transit need:

- Ongoing
 - Limited travel options - core target market
- Temporary
 - Tourists and visitors
 - Normally drive, but currently unable to
 - To avoid traffic or parking
- Discretionary
 - Save money
 - Convenience
 - Benefit the environment

People try a service because it meets their needs. Whose needs can you meet?

Identify Your Target Markets

Current riders

- Effective communication with is vital to retaining

Potential riders

- Match your services to the needs of potential riders
 - Fixed route, demand response, commuter and intercity

Non-riders

- Gatekeepers
 - Employers, social services, schools/colleges, COAs, healthcare
 - Provide access to potential riders
 - Important marketing partners
- Decision Makers
 - Elected officials, board members, staff at local jurisdictions

Crafting the Message

- Benefits of Transit
 - Personal benefits
 - Societal benefits
 - Sell the benefits relevant to your audience
- Barriers to ridership – what marketing can and can't do
 - Service doesn't meet needs
 - Knowledge Gap
 - Information on brochures and website
 - Travel training and other outreach
 - Perceptual Stigma

Transit Marketing Strategies

Distracted Driving

Issue One: What is a Distraction?

Distracted driving is any activity that could divert a person's attention away from the primary task of driving. The three types of distractions are manual (taking your hands off the wheel), visual (taking your eyes off the road), and cognitive (taking your mind off driving). All distractions endanger driver, passenger, and bystander safety.

Examples of distractions include:

- Texting
- Using a cell phone or smart phone
- Eating and drinking
- Talking to passengers
- Grooming
- Reading, including maps
- Using a navigation system
- Watching a video
- Adjusting a radio, CD player, or MP3 player

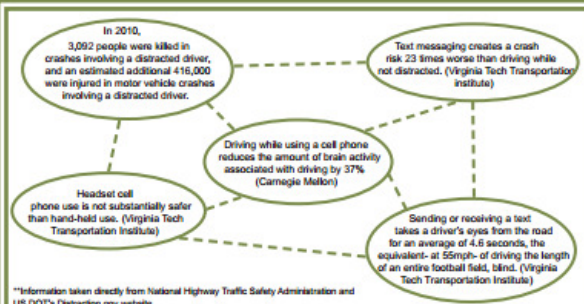

Make sure you are also aware of your company's policies regarding communication devices.
