

EXAMPLE

PROJECT INSPECTION REPORT

Date _____ Project No. _____ Plot Size _____

Acres _____ Acres Surveyed _____ No. Plots Taken _____

<u>Plot No.</u>	<u>Desired No. of Leave Trees 1/</u>	<u>No. of Surplus Trees</u>	<u>No. of Cut Leave Trees</u>	<u>Other</u>	<u>Conditions on Plot 2/</u>

TOTAL _____

Basic work quality percentage. (If less than ____%, notify the Contractor in writing to improve quality in the area inspected.)⁽¹⁾

1. Set standard at each plot, i.e., if plot falls on a road, no trees will be indicated or if plot falls partially in an opening, adjust desirable tree number to reflect this condition.
2. Indicate conditions reflecting determination of desirable number of trees and cause of surplus or missing trees such as close spacing, excessive cutting, stumps with live limbs or hangups.

1. Percentage is determined for each project before work commences.
