Preface

The best way to protect against the potentially harmful effects of both manmade incidents and natural disasters is to ensure that all building occupants know how to respond in an emergency. This level of protection involves pre-planning, training, and rehearsal.

Pre-planning includes establishing the Occupant Emergency Organization (OEO) comprised of employees designated to undertake certain responsibilities to ensure that personnel are moved quickly to safety, that damage to property is minimized, and that proper authorities are notified in the event of a localized emergency, as outlined in this Occupant Emergency Plan (OEP).¹ Training is conducted to ensure that all tenants understand the contents of the OEP and their individual responsibilities. Rehearsals, or drills, provide an opportunity to practice emergency procedures to ensure efficient response in the event of a real emergency.

Participation in OEP activities includes all tenants regardless of employment status (e.g., managers, supervisors, OEP team members, volunteers, contracting officers, and hosts of visitors). Each individual must assume the responsibility for his or her own planning and safety in an emergency, as well as for working effectively with emergency planning officials.

Scope

This OEP applies to all employees, support contractors, and visitors occupying [insert facility name] and assumes a localized emergency in which the facility is impacted in part or in whole.

The facility is a [insert brief description of number of stories and type of complex] located at [insert address].

Effective Date

The effective date of this OEP is [insert effective date]. This document supersedes all previously recognized OEPs for [insert facility name]. This OEP will be reviewed and updated on an annual basis.

¹ Federal Management Regulations (FMR), Subpart 102-74.230A requires Federal agencies that occupy Federal property to develop Occupant Emergency Plans with technical assistance provided by GSA for establishing and maintaining them.
