Section C - Descriptions and Specifications

Cooling Tower Water Treatment**Specification for Bldg 77H and Bldg 87**

1. Furnish the services of a qualified water treatment specialist who shall be responsible for the testing, analysis and treatment of the cooling tower water. The contractor shall provide the following services:
 - a. The contractor shall perform a water analysis and furnish a report. Water analysis shall be a minimum of once per month. The analysis shall include test methods, calculations, frequency of dosage and recommended control ranges for the proper chemical control of the following:
 - Hardness
 - pH
 - Chlorides
 - Alkalinity
 - Phosphonate
 - Inhibitor
 - Total Dissolved Solids (Conductivity)
 - Organic Growth
 - b. The formulation used for treatment of the cooling tower water shall be a highly concentrated liquid blend of scale and corrosion inhibitors and sequestering agents, and should contain polymers properly formulated for dispersion of inert particles that may be found in cooling water. It shall successfully inhibit scale formation in the cooling tower system at concentrations of 4 - 6 cycles. Corrosion inhibition shall be provided for both ferrous and non-ferrous metals.
 - c. Two different biocides, applied alternately, shall be used to effectively prevent the growth of algae, fungi, slime or other undesirable forms of bacterial growth. Application shall be as needed in concentration and frequency to maintain system cleanliness, to maintain proper heat transfer and to avoid corrosion caused by biological fouling.
 - d. The effectiveness of the treatment program shall be measured by the absence of fouling of fill or scale buildup, corrosion monitoring and low microbiological counts.
 - e. All chemical products used shall meet local, state and federal regulations for discharge into a sewer or river. Chemical products currently in use have been

approved by the state Department of Environmental Protection via the NPDES permit. Changes and/or additions to those currently authorized must be pre-approved by NSWCCD-SSES Code 363. All chemicals provided must have MSDS sheets, with a copy to be placed at the site near the automatic chemical injection equipment.

- f. Complete service visits, in addition to the water analysis, shall include cleaning of probes, sensors and strainers, check feed pump operation, make adjustments (as required) to chemical and biocide controllers, calibrate all control equipment, check chemical storage tanks and maintain tank inventory to ensure adequate chemicals are on hand.
- g. Provide a written service report, with field analysis of cooling tower water samples, at least monthly to the shop supervisor. The service report shall also include any problem areas or concerns, changes in feed rates, blow down requirements and maintenance of chemical treatment equipment required to maintain recommended parameters in the water system.
- h. Provide training or orientation to supervisors or mechanics that may be required on the water treatment program.
- i. Furnish all recommended chemical treatment products required to maintain the cooling tower system. The contractor must provide all equipment and manpower necessary to deliver, transport and install chemical treatment drums. Dispose of used chemical treatment containers promptly.
- j. Sufficient chemical supplies shall be maintained on site to prevent treatment interruption due to exhausting the supplies. Chemical drums shall be stored on the spill pallets provided.
- k. Provide analytical services, as needed, for analysis of unusual cooling water samples, scale, sludge or other corrosion products and microbiological studies, as needed, to ensure the minimizing of these problems.
- l. Testing for Legionella Pneumophila shall be conducted at least semi-annually.
- m. The treatment program shall adhere to all NSWC Safety and Environmental requirements. These include: no environmental permit violations, no safety incidents associated with water treatment personnel of chemical feed equipment and no spills of hazardous material.
- n. Provide corrosion coupon studies and determine corrosion, in mills per year, for copper and mild steel. Provide written report along with any recommendations.

(Applies if the contract amount exceeds the micro-purchase threshold and will be performed in the United States or its outlying areas)

(a) Definitions. As used in this clause--

Long-term contract means a contract of more than five years in duration, including options. However, the term does not include contracts that exceed five years in duration because the period of performance has been extended for a cumulative period not to exceed six months under the clause at 52.217-8, Option to Extend Services, or other appropriate authority.

Small business concern means a concern, including its affiliates, that is independently owned and operated, not dominant in the field of operation in which it is bidding on Government contracts, and qualified as a small business under the criteria in 13 CFR part 121 and the size standard in paragraph (c) of this clause. Such a concern is "not dominant in its field of operation" when it does not exercise a controlling or major influence on a national basis in a kind of business activity in which a number of business concerns are primarily engaged. In determining whether dominance exists, consideration shall be given to all appropriate factors, including volume of business, number of employees, financial resources, competitive status or position, ownership or control of materials, processes, patents, license agreements, facilities, sales territory, and nature of business activity.

(b) If the Contractor represented that it was a small business concern prior to award of this contract, the Contractor shall rerepresent its size status according to paragraph (e) of this clause or, if applicable, paragraph (g) of this clause, upon the occurrence of any of the following:

- (1) Within 30 days after execution of a novation agreement or within 30 days after modification of the contract to include this clause, if the novation agreement was executed prior to inclusion of this clause in the contract.
- (2) Within 30 days after a merger or acquisition that does not require a novation or within 30 days after modification of the contract to include this clause, if the merger or acquisition occurred prior to inclusion of this clause in the contract.
- (3) For long-term contracts—
 - (i) Within 60 to 120 days prior to the end of the fifth year of the contract; and
 - (ii) Within 60 to 120 days prior to the date specified in the contract for exercising any option thereafter.

(c) The Contractor shall rerepresent its size status in accordance with the size standard in effect at the time of this rerepresentation that corresponds to the North American Industry Classification System (NAICS) code assigned to this contract. The small business size standard corresponding to this NAICS code can be found at <http://www.sba.gov/services/contractingopportunities/sizestandardsttopics/>.

(d) The small business size standard for a Contractor providing a product which it does not manufacture itself, for a contract other than a construction or service contract, is 500 employees.

(e) Except as provided in paragraph (g) of this clause, the Contractor shall make the rerepresentation required by paragraph (b) of this clause by validating or updating all its representations in the Online Representations and Certifications Application and its data in the Central Contractor Registration, as necessary, to ensure they reflect the Contractor's current status. The Contractor shall notify the contracting officer in writing within the timeframes specified in paragraph (b) of this clause that the data have been validated or updated, and provide the date of the validation or update.

(f) If the Contractor represented that it was other than a small business concern prior to award of this contract, the Contractor may, but is not required to, take the actions required by paragraphs (e) or (g) of this clause.

(g) If the Contractor does not have representations and certifications in ORCA, or does not have a representation in ORCA for the NAICS code applicable to this contract, the Contractor is required to complete the following rerepresentation and submit it to the contracting office, along with the contract number and the date on which the rerepresentation was completed:

The Contractor represents that it [] is, [] is not a small business concern under NAICS Code _____ assigned to contract number _____. [Contractor to sign and date and insert authorized signer's name and title].
