C. User Registration Tips

A new user can only be created by the Corporate Administrator.

1. When creating a new user, the Last Name, First Name and email address must be the same in WBSCM and e-Authentication.

2. When adding a new user in WBSCM, the "Save" button should be selected after the roles have been added to the new user. If the "Save" button is selected prior to selecting the roles, the User Administrator can select that new user from the top and select the "Modify" button to add the roles to the new user.

3. A User Administrator can re-send the WBSCM registration email by selecting the user on the Manage Users screen, going to the last tab (Admin Data tab), and selecting the Re-send Registration Email button.

The most common issues with registration are:

- a. New user selects the wrong link in the WBSCM registration email.
- b. New user does not select the "Accept" radio button within the notification from e-Authentication. This must be done within 7 days of the creation of the e-Authentication account.
- c. User enters a different last name/first name/email address in e-Authentication than what is in WBSCM.

D. Bid response training:
