

2005 MARKHURD AERIAL PHOTOGRAPHY DVDs

PRESENT A DRAMATIC VISUAL OF THE TWIN CITIES METROPOLITAN AREA

DVDs of current aerial photography of the entire seven-county Twin Cities Metropolitan Area are now available to MetroGIS participants from the Metropolitan Council's Regional Data Center. The aerial photos, which were taken in April 2005, serve as an excellent source for inventorying a site's surrounding land uses and assessing recent development activity. They also serve as an excellent marketing tool by providing an aerial view of a site and its environment. The aerial photos are intended to be used with a GIS software package which allows users to view or print the image at varying scales and overlay other geographic information, such as roads. *Use of this data is subject to the terms and conditions of the license agreement with the Metropolitan Council available at <http://gis.metc.state.mn.us/data.asp>.*
