

**Texas Department of Public Safety**  
**Certified Mopeds**  
**(Revised September 25, 2013)**

Information contained herein supersedes information contained in all Certified Moped lists, whether published as special announcements, attachments to special announcements, or supplements to special announcements.

The attached list of mopeds has been certified by the Department of Public Safety as meeting the Texas legal definition of a moped according to TRC §541.201(8). That is, it cannot attain a speed more than 30 miles per hour, has a piston displacement of 50 cubic centimeters or less and does not require the operator to shift gears.

This is not a complete list of all mopeds, rather a list of mopeds brought to our attention for classification review. In instances where a motorized cycle is not on the list yet meets the above requirements, an affidavit must be completed by either the local dealer or manufacturer to verify requirements; dealer or manufacturer websites can be not used to verify information. The "Affidavit to Verify Requirements for Moped Classification" can be found on our website. Any two-wheeled vehicles that do not meet these requirements must be registered as a motorcycle.

Please note the revision date on this list and keep this list until superseded by a new list with a later revision date.
