## PACKAGING AND MARKING

	<u>Regulatory Cite</u>	<u>Title</u>	<u>Date</u>
1	52.211-4517 (TACOM)	PACKAGING REQUIREMENTS (COMMERCIAL)	DEC/2007

(a) The preservation, packing, and marking requirements for this contract/order shall be accomplished in accordance with the performance requirements defined herein. The following Packaging requirements shall apply:

LEVEL OF PRESERVATION: Commercial

LEVEL OF PACKING: Commercial

QUANTITY PER UNIT PACKAGE: TBD

(1) Packaging: Preservation, packaging, packing, unitization and marking furnished by the supplier shall provide protection for a minimum of one year and meet or exceed the following requirements. It also provides for multiple handling, redistribution and shipment by any mode.

(2) Cleanliness: Items shall be free of dirt and other contaminants which would contribute to the deterioration of the item or which would require cleaning by the customer prior to use. Coatings and preservatives applied to the item for protection are not considered contaminants.

(3) Preservation: Items susceptible to corrosion or deterioration shall be provided protection by means of preservative coatings, volatile corrosion inhibitors, desiccants, waterproof and/or watervaporproof barriers.

(4) Cushioning: Items requiring protection from physical and mechanical damage (e.g. fragile, sensitive, material critical) or which could cause physical damage to other items, shall be protected by wrapping, cushioning, pack compartmentalization, or other means to mitigate shock and vibration to prevent damage during handling and shipment.

(b) Unit Package: A unit package shall be so designed and constructed that it will contain the contents with no damage to the item(s), and with minimal damage to the unit pack during shipment and storage in the shipping container, and will allow subsequent handling. The outermost component of a unit package shall be a container such as a sealed bag, carton or box. Unit packs shall be designed to conserve weight and cube while retaining the protection required and enhancing standardization.

(c) Unit Package Quantity: Unless otherwise specified, the unit package quantity shall be one each part, set, assembly, kit, etc.

(d) Intermediate Package: Intermediate packaging is required whenever one or more of the following conditions exists:

- (1) The quantity is over one (1) gross of the same national stock number,
- (2) Use enhances handling and inventorying,
- (3) The exterior surfaces of the unit pack is a bag of any type, regardless of size,
- (4) The unit pack is less than 64 cubic inches,
- (5) The weight of the unit pack is under five (5) pounds and no dimension is over twelve (12) inches.

Intermediate containers shall be limited to a maximum of 100 unit packs, a net load of 40 pounds, or a maximum volume of 1.5 cubic feet, whichever occurs first.

(e) Packing:

(1) Unit packages and intermediate packages not meeting the requirements for a shipping container shall be packed in shipping containers. All shipping containers shall be the most cost effective and shall be of minimum cube to contain and protect the items.

(2) Shipping Containers: The shipping container (including any necessary blocking, bracing, cushioning, or waterproofing) shall comply with the regulations of the carrier used and shall provide safe delivery to the destination at the lowest tariff cost. The shipping container shall be capable of multiple handling, stacking at least ten feet high, and storage under favorable conditions (such as enclosed facilities) for a minimum of one year.

(f) Unitization: Shipments of identical items going to the same destination shall be palletized if they have a total cubic displacement of 50 cubic feet or more unless skids or other forklift handling features are included on the containers. Pallet loads must be stable, and to the greatest extent possible, provide a level top for ease of stacking. A palletized load shall be of a size to allow for placement of two loads high and wide in a conveyance. The weight capacity of the pallet must be adequate for the load. The preferred pallet is a 40 x 48 inch, 4-way entry pallet although variations may be permitted as dictated by the characteristics of the items being unitized. The load shall be contained in a manner that will permit safe handling during shipment and storage.

**Name of Offeror or Contractor:**

(g) Marking:

(1) All unit packages, intermediate packs, exterior shipping containers, and, as applicable, unitized loads shall be marked in accordance with MIL-STD-129, Revision P, Change Notice 4, dated 19 Sep 2007, including bar coding and Military Shipment Label (MSL). The contractor is responsible for application of special markings as discussed in the Military Standard regardless of whether specified in the contract/order or not. Special markings include, but are not limited to, Shelf-life markings, structural markings, and transportation special handling markings. The marking of pilferable and sensitive materiel will not identify the nature of the materiel. Passive RFID tagging is required in all contracts that contain DFARS clause 252.211-7006. Contractors must check the solicitation and/or contract for this clause. For details and most recent information, see <http://www.acq.osd.mil/log/rfid/index.htm> for the current DoD Suppliers Passive RFID Information Guide and Supplier Implementation Plan. If the item has Unique Item Identifier (UII) markings then the concatenated UII needs to be 2D bar coded and applied on the unit package, intermediate and exterior containers, and the palletized unit load.

(h) Hazardous Materials (As applicable):

(1) Hazardous Materials is defined as a substance or waste which has been determined by the Secretary of Transportation to be capable of posing an unreasonable risk to health, safety, and property when transported in commerce and which has been so designated. (This includes all items listed as hazardous in Titles 29, 40 and 49 CFR and other applicable modal regulations effective at the time of shipment.)

(2) Packaging and marking for hazardous material shall comply with the requirements herein for the mode of transport and the applicable performance packaging contained in the following documents:

All WPM shall be constructed from heat treated (treated to 56 degrees Celsius -core temperature- for 30 minutes) lumber and certified by an accredited agency accredited by the ALSC in accordance with Wood Packaging Material Policy and Wood Packaging Material Enforcement Regulations (see URL: <http://www.alsc.org>). The box/pallet manufacturer and the manufacturer of wood used as inner packaging shall ensure traceability to the original source of heat treatment. Marking: Each box/pallet shall be marked to show the conformance to the International Plant Protection Convention Standard. The quality mark shall be placed on both ends of the outer packaging, between the end cleats or end battens. All dunnage used in configuring and/or securing the load shall also comply with ISPM-15 and be marked with an ALSC approved dunnage stamp, marked at two foot intervals (in the case of dunnage shorter than 2 feet, each piece must still have the mark present). Foreign manufacturers shall have the heat treatment and marking of non-manufactured wood products verified in accordance with their National Plant Protection Organizations compliance program.

(j) Quality Assurance: The contractor is responsible for establishing a quality system. Full consideration to examinations, inspections, and tests will be given to ensure the acceptability of the commercial package.

(k) SUPPLEMENTAL INSTRUCTIONS: 1.1. Complete pack shall be comprised of all components and accessories described in DFP. The unit package containing the tool box(s) and tool load shall conform to ASTM-D5118, V3c, RSC. Items within storage cabinets/organizers may not require packaging if placed in a dedicated position within the tool box, where there is no potential for corrosion or physical damage and can be identified by a layout plan.

When the weight of a tool box is greater than 100 pounds, the tool box shall be provided with skids. Skids shall be designed to accommodate multiple forklift moves from the front and rear of container. Skid planks will not protrude past the footprint of the load for shipment and the load shall not extend past the edges of skid. The weight of the items contained within each tool box shall be evenly distributed such that the center of balance remains in the middle of the tool box.

When the set contains multiple tool boxes, and or multiple unit containers, the tool boxes and multiple unit containers shall be consolidated and banded together with strapping that is compliant with the combined load to contain all components to one set and

The weight of the consolidated load of one complete set shall be evenly distributed on the skid or pallet and shall be capable of stacking up to 10 feet high. The exterior unit pack shall be marked for handling to indicate the number of units that may be safely stacked on top of each other and to indicate that the load must be shipped and stored in the upright position only. The markings shall be STACK NO MORE THAN X HIGH, X being the calculated number of containers not to exceed for stacking, and THIS SIDE UP with an arrow indicating the correct direction. (VCI) Volatile Corrosive Inhibitor shall not be exposed to desiccants, optical systems, or any assemblies containing precision moving parts.

Overall, packaging shall successfully pass test levels of ASTM D 4169, Distribution Cycle 18, Assurance Level (I for level A pack, or II for level B pack), Acceptance Criterion 3. Testing shall be witnessed by the Government Quality Assurance Representative. Packaged gross weight and size shall be included on the test report as well as a detailed description of the packaging. The Contractor is exempted from testing if previous data for same or similar items can be provided (see Para. 5.6 of MIL-STD-2073-1D) and is acceptable to the Government. Contractor shall furnish the Contracting Office with shipping size and weight prior to shipment of first article. For Packaging assistance, Contractor may notify Contracting Office with request to speak to a Packaging Specialist.

7 252.211-7006 PASSIVE RADIO FREQUENCY IDENTIFICATION

SEP/2011

(a) Definitions. As used in this clause--

"Advance shipment notice" means an electronic notification used to list the contents of a shipment of goods as well as additional information relating to the shipment, such as passive radio frequency identification (RFID) or item unique identification (IUID) information, order information, product description, physical characteristics, type of packaging, marking, carrier information, and configuration of goods within the transportation equipment.

"Bulk commodities" means the following commodities, when shipped in rail tank cars, tanker trucks, trailers, other bulk wheeled conveyances, or pipelines:

- (1) Sand.
- (2) Gravel.
- (3) Bulk liquids (water, chemicals, or petroleum products).
- (4) Ready-mix concrete or similar construction materials.
- (5) Coal or combustibles such as firewood.
- (6) Agricultural products such as seeds, grains, or animal feed.

"Case" means either a MIL-STD-129 defined exterior container within a palletized unit load or a MIL-STD-129 defined individual shipping container.

"Electronic Product Code\TM\ (EPC)" means an identification scheme for universally identifying physical objects via RFID tags and other means. The standardized EPC\TM\ data consists of an EPC\TM\ (or EPC\TM\ identifier) that uniquely identifies an individual object, as well as an optional filter value when judged to be necessary to enable effective and efficient reading of the EPC\TM\ tags. In addition to this standardized data, certain classes of EPC\TM\ tags will allow user-defined data. The EPC\TM\ Tag Data Standards will define the length and position of this data, without defining its content.

"EPCglobal" means a subscriber-driven organization comprised of industry leaders and organizations focused on creating global standards for the adoption of passive RFID technology.

**Name of Offeror or Contractor:**

"Exterior container" means a MIL-STD-129 defined container, bundle, or assembly that is sufficient by reason of material, design, and construction to protect unit packs and intermediate containers and their contents during shipment and storage. It can be a unit pack or a container with a combination of unit packs or intermediate containers. An exterior container may or may not be used as a shipping container.

"Palletized unit load" means a MIL-STD-129 defined quantity of items, packed or unpacked, arranged on a pallet in a specified manner and secured, strapped, or fastened on the pallet so that the whole palletized load is handled as a single unit. A palletized or skidded load is not considered to be a shipping container. A loaded 463L System pallet is not considered to be a palletized unit load. Refer to the Defense Transportation Regulation, DoD 4500.9-R, Part II, Chapter 203, for marking of 463L System pallets.

"Passive RFID tag" means a tag that reflects energy from the reader/interrogator or that receives and temporarily stores a small amount of energy from the reader/interrogator signal in order to generate the tag response. The only acceptable tags are EPC Class 1 passive RFID tags that meet the EPCglobal\TM\ Class 1 Generation 2 standard.

"Radio frequency identification (RFID)" means an automatic identification and data capture technology comprising one or more reader/interrogators and one or more radio frequency transponders in which data transfer is achieved by means of suitably modulated inductive or radiating electromagnetic carriers.

"Shipping container" means a MIL-STD-129 defined exterior container that meets carrier regulations and is of sufficient strength, by reason of material, design, and construction, to be shipped safely without further packing (e.g., wooden boxes or crates, fiber and metal drums, and corrugated and solid fiberboard boxes).

(b) (1) Except as provided in paragraph (b) (2) of this clause, the Contractor shall affix passive RFID tags, at the case- and palletized-unit-load packaging levels, for shipments of items that--

(i) Are in any of the following classes of supply, as defined in DoD 4140.1-R, DoD Supply Chain Materiel Management Regulation, APl.1.11:

(A) Subclass of Class I--Packaged operational rations.

(B) Class II--Clothing, individual equipment, tentage, organizational tool kits, hand tools, and administrative and housekeeping supplies and equipment.

(C) Class III--Packaged petroleum, lubricants, oils, preservatives, chemicals, and additives.

(D) Class IV--Construction and barrier materials.

(E) Class VI--Personal demand items (non-military sales items).

(F) Subclass of Class VIII--Medical materials (excluding pharmaceuticals, biologicals, and reagents--suppliers should limit the mixing of excluded and non-excluded materials).

(G) Class IX--Repair parts and components including kits, assemblies and subassemblies, repairable and consumable items required for maintenance support of all equipment, excluding medical-peculiar repair parts; and

(ii) Are being shipped to one of the locations listed at <http://www.acq.osd.mil/log/rfid/> or to--

(A) A location outside the contiguous United States when the shipment has been assigned Transportation Priority 1, or to--

(B) The following location(s) deemed necessary by the requiring activity:

Contract line, subline, or exhibit line item number	Location name	City	State	DoDAAC
0001AA	Sierra Army Depot		CA	W56HZV
0001AA	New Cumberland		PA	W56HZV

(2) The following are excluded from the requirements of paragraph (b) (1) of this clause:

(i) Shipments of bulk commodities.

(ii) Shipments to locations other than Defense Distribution Depots when the contract includes the clause at FAR 52.213-1, Fast

**Name of Offeror or Contractor:**

Payment Procedures.

(c) The Contractor shall--

- (1) Ensure that the data encoded on each passive RFID tag are globally unique (i.e., the tag ID is never repeated across two or more RFID tags) and conforms to the requirements in paragraph (d) of this clause;
- (2) Use passive tags that are readable; and
- (3) Ensure that the passive tag is affixed at the appropriate location on the specific level of packaging, in accordance with MIL-STD-129 (Section 4.9.2) tag placement specifications.

(d) Data syntax and standards. The Contractor shall encode an approved RFID tag using the instructions provided in the EPC\TM\ Tag Data Standards in effect at the time of contract award. The EPC\TM\ Tag Data Standards are available at <http://www.epcglobalinc.org/standards/>.

(1) If the Contractor is an EPCglobal\TM\ subscriber and possesses a unique EPC\TM\ company prefix, the Contractor may use any of the identifiers and encoding instructions described in the most recent EPC\TM\ Tag Data Standards document to encode tags.

(2) If the Contractor chooses to employ the DoD identifier, the Contractor shall use its previously assigned Commercial and Government Entity (CAGE) code and shall encode the tags in accordance with the tag identifier details located at [http://www.acq.osd.mil/log/rfid/tag\\_data.htm](http://www.acq.osd.mil/log/rfid/tag_data.htm). If the Contractor uses a third-party packaging house to encode its tags, the CAGE code of the third-party packaging house is acceptable.

(3) Regardless of the selected encoding scheme, the Contractor with which the Department holds the contract is responsible for ensuring that the tag ID encoded on each passive RFID tag is globally unique, per the requirements in paragraph (c)(1) of this clause.

(e) Advance shipment notice. The Contractor shall use Wide Area WorkFlow (WAWF), as required by DFARS 252.232-7003, Electronic Submission of Payment Requests, to electronically submit advance shipment notice(s) with the RFID tag ID(s) (specified in paragraph (d) of this clause) in advance of the shipment in accordance with the procedures at <https://wawf.eb.mil/>.

The Department of Defense (DOD) and the U.S. Army are enhancing customer identification security as part of an overall program to provide a stronger and more secure authentication process for accessing DOD information systems. As of 1 September 2011, the TACOM LCMC CIO/G-6 will meet this DOD mandate by requiring the use of a digital certificate for industry partners requiring access to the PM SKOT Warranty and Replacement website. The External Certification Authority (ECA) program supports the issuance of DOD-approved certificates to industry partners and other external entities and organizations that conduct business with the DOD. The ECA program is designed to provide a mechanism for these entities to securely communicate with the DOD and authenticate to DOD Information Systems. Additional information can be found at: <http://iase.disa.mil/pki/eca/>. If you currently have a Common Access Card, you will be able to access the PM SKOT Warranty and Replacement website without purchasing a certificate through the ECA program.

its principals--

(1)  Are,  are not presently debarred, suspended, proposed for debarment, or declared ineligible for the award of contracts by any Federal agency;

(2)  Have,  have not, within a three-year period preceding this offer, been convicted of or had a civil judgment rendered against them for: commission of fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a Federal, state or local government contract or subcontract; violation of Federal or state antitrust statutes relating to the submission of offers; or commission of embezzlement, theft, forgery, bribery, falsification or destruction of records, making false statements, tax evasion, violating Federal criminal tax laws, or receiving stolen property;

(3)  Are,  are not presently indicted for, or otherwise criminally or civilly charged by a Government entity with, commission of any of these offenses enumerated in paragraph (h) (2) of this clause; and

(4)  Have,  have not, within a three-year period preceding this offer, been notified of any delinquent Federal taxes in an amount that exceeds \$3,000 for which the liability remains unsatisfied.

(i) Taxes are considered delinquent if both of the following criteria apply:

(A) The tax liability is finally determined. The liability is finally determined if it has been assessed. A liability is not finally determined if there is a pending administrative or judicial challenge. In the case of a judicial challenge to the liability, the liability is not finally determined until all judicial appeal rights have been exhausted.

(B) The taxpayer is delinquent in making payment. A taxpayer is delinquent if the taxpayer has failed to pay the tax liability when full payment was due and required. A taxpayer is not delinquent in cases where enforced collection action is precluded.

(ii) Examples.

(A) The taxpayer has received a statutory notice of deficiency, under I.R.C. Sec. 6212, which entitles the taxpayer to seek Tax Court review of a proposed tax deficiency. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek Tax Court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

(B) The IRS has filed a notice of Federal tax lien with respect to an assessed tax liability, and the taxpayer has been issued a notice under I.R.C. Sec. 6320 entitling the taxpayer to request a hearing with the IRS Office of Appeals contesting the lien filing, and to further appeal to the Tax Court if the IRS determines to sustain the lien filing. In the course of the hearing, the taxpayer is entitled to contest the underlying tax liability because the taxpayer has had no prior opportunity to contest the liability. This is not a delinquent tax because it is not a final tax liability. Should the taxpayer seek tax court review, this will not be a final tax liability until the taxpayer has exercised all judicial appeal rights.

(C) The taxpayer has entered into an installment agreement pursuant to I.R.C. Sec. 6159. The taxpayer is making timely payments and is in full compliance with the agreement terms. The taxpayer is not delinquent because the taxpayer is not currently required to make full payment.

(D) The taxpayer has filed for bankruptcy protection. The taxpayer is not delinquent because enforced collection action is stayed under 11 U.S.C. 362 (the Bankruptcy Code).

(i) Certification Regarding Knowledge of Child Labor for Listed End Products (Executive Order 13126). [The Contracting Officer must list in paragraph (i) (1) any end products being acquired under this solicitation that are included in the List of Products Requiring Contractor Certification as to Forced or Indentured Child Labor, unless excluded at 22.1503(b).]

(2) Certification. [If the Contracting Officer has identified end products and countries of origin in paragraph (i) (1) of this provision, then the offeror must certify to either (i) (2) (i) or (i) (2) (ii) by checking the appropriate block.]

[ ] (i) The offeror will not supply any end product listed in paragraph (i) (1) of this provision that was mined, produced, or manufactured in the corresponding country as listed for that product.

[ ] (ii) The offeror may supply an end product listed in paragraph (i) (1) of this provision that was mined, produced, or manufactured in the corresponding country as listed for that product. (iv) The compensation (wage and fringe benefits) plan for all service employees performing work under the contract is the same as that used for these employees and equivalent employees servicing commercial customers.

(3) If paragraph (k) (1) or (k) (2) of this clause applies

(i) If the offeror does not certify to the conditions in paragraph (k) (1) or (k) (2) and the Contracting Officer did not attach a Service Contract Act wage determination to the solicitation, the offeror shall notify the Contracting Officer as soon as possible; and

(ii) The Contracting Officer may not make an award to the offeror if the offeror fails to execute the certification in paragraph (k) (1) or (k) (2) of this clause or to contact the Contracting Officer as required in paragraph (k) (3) (i) of this clause.

(l) Taxpayer Identification Number (TIN) (26 U.S.C. 6109, 31 U.S.C. 7701). (Not applicable if the offeror is required to provide this information to a central contractor registration database to be eligible for award.)

(d) Protest Decision Authority:

The AMC command counsel is designated as the HQAMC protest decision authority. In the absence of the command counsel, the deputy command counsel is designated as the HQAMC protest decision authority.

(e) Time for Filing a Protest:

## L.1.4 Berry Amendment Notice

Canvas products and tarpaulins are subject to the Berry Amendment and shall be produced in the United States. In addition, hand or measuring tools listed in Federal supply classifications 51 and 52 are subject to the Berry Amendment and shall be produced in the United States.

In accordance with DFARS PGI 225.7002-1(b), the term produced in the United States with respect to hand or measuring tools is defined as follows:

(1) The hand or measuring tool was assembled in the United States out of components, or otherwise made from raw materials into the finished product that is to be provided to the Government.

(2) If a hand or measuring tool was assembled in a country other than the United States, then disassembled and reassembled in the United States, the hand or measuring tool was not produced in the United States.

(3) The requirement to buy hand or measuring tools produced in the United States does not impose any restriction on the source of the components of the hand or measuring tools. This is unlike the Berry Amendment restriction on clothing (see 225.7002-1(a) (2)), which explicitly requires domestic source for the materials and components of clothing (other than unusual components such as sensors or electronics), as well as the additional separate restrictions on various types of fibers and fabrics that might be components of the clothing.

(4) Since the acquisition of the Asphalt Test Kit is also subject to the Buy American Act (see FAR 25.1), then in order to qualify as a domestic end product, the cost of the components mined, produced, or manufactured in the United States must exceed 50 percent of the cost of all the components of the Asphalt Test Kit.

	<u>Regulatory Cite</u>	<u>Title</u>	<u>Date</u>
1	52.216-4006 (TACOM)	METHOD OF PRICE EVALUATION	NOV/2007

Section Evaluation Factors for Award: EVALUATION CRITERIA

M.1 Basis of Award

52.212-2 Evaluation COMMERCIAL ITEMS (JAN 1999)

(a) The Government will award a contract resulting from this solicitation to the responsible offeror whose offer conforming to the solicitation will be most advantageous to the Government, price, and other factors considered. Award will be made to the lowest priced technically acceptable proposal.

M.1.1 Contractor Responsibility and Eligibility for Award

The Government will award a contract to the offeror that:

- (a) Represents the best value to the Government resulting from selection of the technically acceptable proposal with the lowest evaluated price,
- (b) Submits a proposal that meets all the material requirements of this solicitation, and
- (c) Meets all the responsibility criteria at FAR 9.104.

M.2 Technical Factor

The Technical Factor includes the following two (2) SubFactors:

- SubFactor 1: Tool Load
- SubFactor 2: Tool Layout

Proposals will be evaluated on an Acceptable/Unacceptable basis. Proposals will be evaluated as follows:

Acceptable: Proposal clearly meets the minimum requirements of the solicitation.

Unacceptable: Proposal does not clearly meet the minimum requirements of the solicitation.

This assessment will be performed using the information submitted in response to Section L.3 of the solicitation, as well as, other technical information supplied by the offeror to support conformance of the supplies to the requirements (e.g. catalog descriptions/marketing literature, technical literature, written manufacturer responses, etc.) listed in L.3.1.

M.2.1 To be rated Acceptable under the Technical Factor and Technical SubFactors, every individual requirement listed under each SubFactor must be assessed as Acceptable. The offerors proposal rated Unacceptable under any individual requirement listed under any of the SubFactors, regardless of an Acceptable rating of other requirements under that SubFactor, will be assessed as Unacceptable both under (a) that specific SubFactor and (b) the Technical Factor, as a whole. In order to be considered awardable, there must be an acceptable rating in every factor/subfactor. Proposals assessed as Unacceptable will not be eligible for award.

M.2.1.1 If the offeror fails to provide all the information specified in Section L.3 of the solicitation, it may render its proposal ineligible for award. The offeror will not be awarded extra credit for exceeding the technical requirements outlined in the DFP and Section L.3 of the solicitation.

**Name of Offeror or Contractor:**

## M.3 Price Factor

M.3.1 The Price Factor evaluation will consider the total evaluated price. The Price Factor will be assessed based upon total evaluated price to the Government to include an assessment of price reasonableness.

M.3.2 Reasonableness exists when the offered price does not exceed what would be incurred by a prudent person in the conduct of competitive business. The Government may reject a proposal which is not reasonable.

M.3.3 If the offeror fails to provide all the information specified in Section L.4 of the solicitation, it may render its proposal ineligible for award.

## M.3.4

a. The Government will evaluate offers based on the Total Evaluated Price. The Total Evaluated Price is the sum of the Total Evaluated CLIN price for CLIN 0001AA, plus Product Verification Test costs for CLIN 0002AA, Digital Photo costs for CLIN 0003AA, and Replacement Item costs for CLIN 0004AA. Transportation costs shall be incorporated in the proposed unit prices and are not a separately evaluated price related factor.

b. For CLIN 0001AA, the unit price for each year will be multiplied by the estimated annual requirement for the corresponding year, and the results of each year added together to produce the evaluated price for the total maximum quantity. See Attachment 0002, Price Evaluation Sheet.

c. If an offeror fails to submit unit prices for all Quantities, Ordering Years, and CLINS then its proposal may be considered unacceptable and the Government may reject the proposal.
