February 2009

Matched Initial/Update Report

This report provides Initial and Update Interview information gathered through the online North Carolina Treatment Outcomes and Program Performance System (NC-TOPPS). The report is divided into three parts and provides information on the consumer and treatment received.

I	II	III
Age	Employment	Suicidal thoughts
Gender	Substance misuse	Aggressive behavior
Race/Ethnicity	Legal involvement	Self-destructive
DSM-IV diagnoses	Housing arrangement	Physical violence
Treatment participation	Academic performance	Sexual behaviors
Services needed & received	Barriers to treatment	Health care services

Information for Part I can be obtained by the clinician from the consumer record. The preferred method for completing Part II is a personal interview; however, a telephone interview, clinical records or notes can also be used to gather this information. Information contained in Part III can only be obtained during a personal interview. If a personal interview is not conducted questions in this section are not asked. Also, a minimum of 20 consumers must complete part III for these data to be reported.

Every data element or response category on the NC-TOPPS interview is not displayed in this report. In production of this report data are cleaned and apparent duplicates removed prior to preparing the tables and charts. Due to this and potential timeframe differences, charts and tables contained in this report may not match those obtained from online queries.

This feedback report is available to the NC Division of Mental Health, Developmental Disabilities and Substance Abuse Services (NC DMH/DD/SAS), Local Management Entities (LMEs), and providers. Additional information about NC-TOPPS and pdf copies of the online NC-TOPPS interviews are located at: <http://nctopps.ncdmh.net/>.

General Information on

- Types of Statistics A percentage is the number of clients with a characteristic or behavior divided by all the clients in the group of interest multiplied by 100. Percentages will be designated with a % sign next to the number.
- Missing Data Some of the NC-TOPPS forms entered in the system have a particular item or question left blank. In calculating the means, medians, and percentages in cells of questionnaire items, this missing data is excluded from the calculation. For example, program X may have submitted 50 interviews but in 2 of the interviews, gender was left blank. When the percent of males is calculated, the 25 males are shown as 52% (25/48*100).
- Denominator The denominator for nearly all percentages is the number of cases shown on the bottom left of the page minus item missing data. All exceptions to this general rule are **specifically noted** with appropriate text in the graphic or table. This text will state which group is included or excluded from the denominator, such as "of those in the labor force" or "of those with children."
- Multiple Response "Multiple response" indicates a "mark all that apply" type question in which more than one response to a question is allowed. Total responses may add to greater than 100%. Examples are health insurance or target population. This is in contrast to items such as gender where only a single response is allowed.
- Time periods of behaviors measured Behaviors are measured at several time periods including the past year, the past 6-months, the past 3-months, the past month, or since last interview. For Initial Interviews, the time periods can generally be construed to mean the time period before treatment begins. For Update Interviews the time is measured from the time at which the interview occurs back one month, 3-months, or since the last interview.
- Definitions of terms The Appendix at the end of the report gives definitions of acronyms, abbreviations, and other terms used in this report.
- Notes:** Mental Health consumers who are also being treated for substance abuse (co-occurring) are included in this report.

Statewide Adult Mental Health Consumers
Initial Interviews Matched to 3-Month Update Interviews
Initial Interviews Conducted July 1, 2007 through June 30, 2008

Initial Interviews column Shows the unduplicated number of Initial Interviews conducted July 1, 2007 through June 30, 2008.

Updates Matched column Shows the number of consumers who had an Initial Interview and who also had a 3-Month Update Interview done through December 31, 2008.

Percent Matched column The percent of Initial Interviews that also had a 3-Month Interview.

LME	Initial Interviews	Updates Matched	Percent Matched
Alamance-Caswell-Rockingham	473	162	34.2%

Wake	1162	384	33.0%
Western Highlands	2140	602	28.1%
Total	31,312	13,150	42.0%

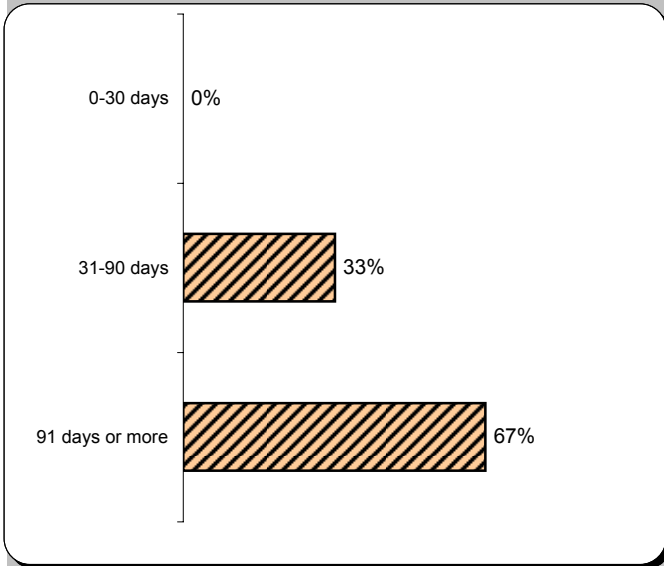

Notes:

- * Several LMEs that were doing business in SFY 07-08 have merged with others. Consumers associated with these discontinued LMEs are excluded from this report.
- * Only one Initial Interview per consumer is included in this report. Different totals of Initial Interviews may be shown in other reports.

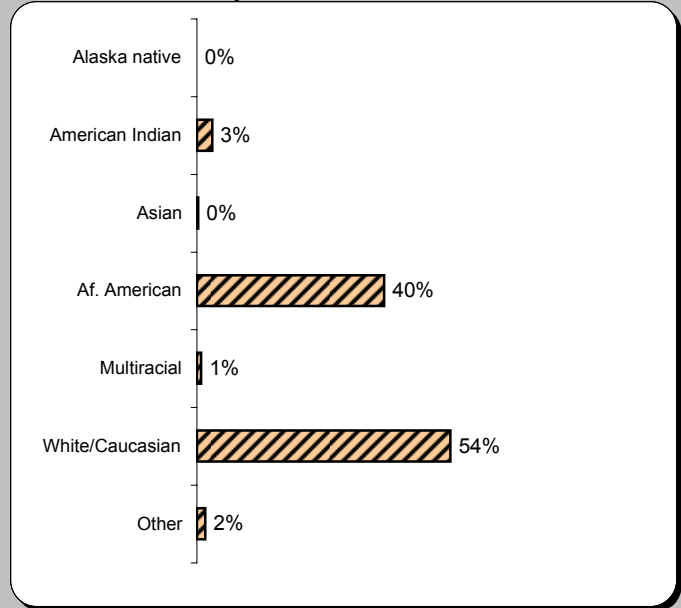

Part I

This report is based on the 13,150 consumers who had both an Initial interview and a 3-month Update Interview. The following section describes characteristics of these consumers and their treatment.

1-1: Days Between Initial and Update Interview

1-3: Race/Ethnicity

1-4: Hispanic

2% of Statewide consumers are Hispanic.

1-5: Age Group

1-2: Gender

2-1: Gender and Age

2-2: Gender and Ethnicity

2-3: Co-Occurring Status at Update

Services/Supports Area	%
Mental health only	81%
Mental health and substance abuse (co-occurring)	19%

2-4: Co-Occurring Consumers, Type of Treatment Professionals Providing Services/Supports

Type of Qualified Professional (QP)	Number
QP in mental health	789
QP in substance abuse	178
QP in both	1544
Total Co-Occurring Consumers	2511

2-5: DSM-IV Diagnoses at Update

Diagnostic Category	%
Major depression	45%
Bipolar disorder	23%
Schizophrenia	24%
Anxiety disorder	16%
PTSD	11%
Personality disorder	7%
Alcohol abuse	6%
Alcohol dependence	9%
Drug abuse	7%
Drug dependence	13%

Only most common diagnoses shown. Multiple response

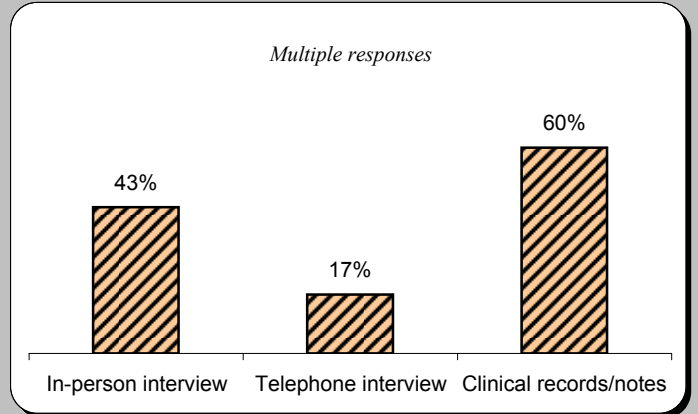

2-6: Attendance at Scheduled Treatment Sessions, During Treatment Since Last Interview

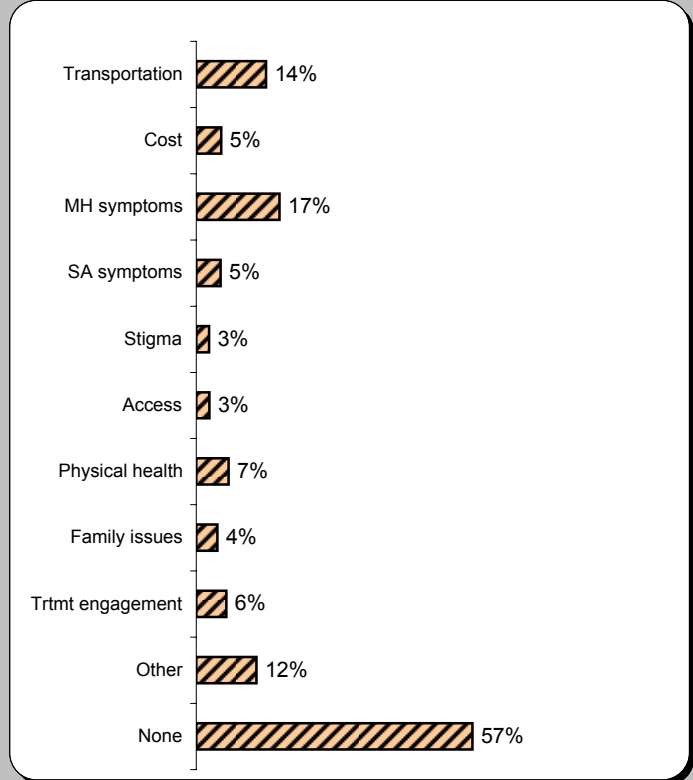

3-1: Services Deemed "Very Important" at Intake and Received During Treatment

3-2 Update Interview Data Collection Method

3-3 Barriers to Treatment

Part II

Some graphs and tables compare information collected at the Initial Interview with information collected in the Update Interview. Initial Interview information is designed to be collected by means of a personal interview with the consumer. The preferred method for completing the Update items in this section is a personal interview; however, a telephone interview, or clinical records or notes are also used.

3-4: Employment

	3-Months before tx	Month during tx
% In labor force	47%	47%
Of those in the labor force...		
Employed full-time	16%	17%
Employed part-time	20%	23%
Unemployed (seeking work)	64%	60%

**4-1: Consumer Participation in Positive Activities
 (more than a few times)**

4-2: How Often Problems Interfere with Work, School, or Other Daily Activities

4-3 Homeless Consumers

	3-Months before tx	During tx past 3 months
In Shelters	356	242
Not in Shelters	202	112
Total Homeless	558	354

4-4: Severity of Mental Health Symptoms

4-5: Psychotropic Medications at Update

81% of Statewide consumers have a current prescription for psychotropic medications. Of those, 84% take their medication as prescribed all or most of the time.

4-6: Justice System Involvement

8% of Statewide consumers were under correctional supervision at the time of their Update Interview.

4-7: Arrests

	Month before tx	Month during tx
Any arrest	4%	2%

5-1: Substance Use

Part III

Questions contained in Part III must be answered by the consumer. If the consumer is not available, these items are skipped and left blank. Therefore, these items often represent the responses of fewer consumers. Also, a minimum of 20 consumers must complete this section for these data to be analyzed.

*** 6871 of the 13,150 (52%) of Statewide Update Interviews included a personal interview with the consumer.**

5-2: Recent Births or Pregnancy Status

There were 4220 females responding to Part III of the Update Interview. Birth and pregnancy among these women is shown below.

	Number
Given birth in past year	159
Currently pregnant	82
Uncertain about pregnancy status	28
In first trimester	18
In second trimester	27
In third trimester	33

5-3: Behavior Problems and Symptoms

	3 Months before tx	During tx, since last interview
Suicidal thoughts	36%	22%
Tried to hurt or cause self pain	11%	5%

5-5: Violence Against Others

	3 Months before tx	During tx past 3 months
Hit/physically hurt another person	10%	7%

5-6: Experienced Violence

	3 Months before tx	During tx past 3 months
Physical violence	9%	7%
Sexual violence	1%	2%

**6-1: Consumer Ratings on Quality of Life
(rated "fair" or "poor")**

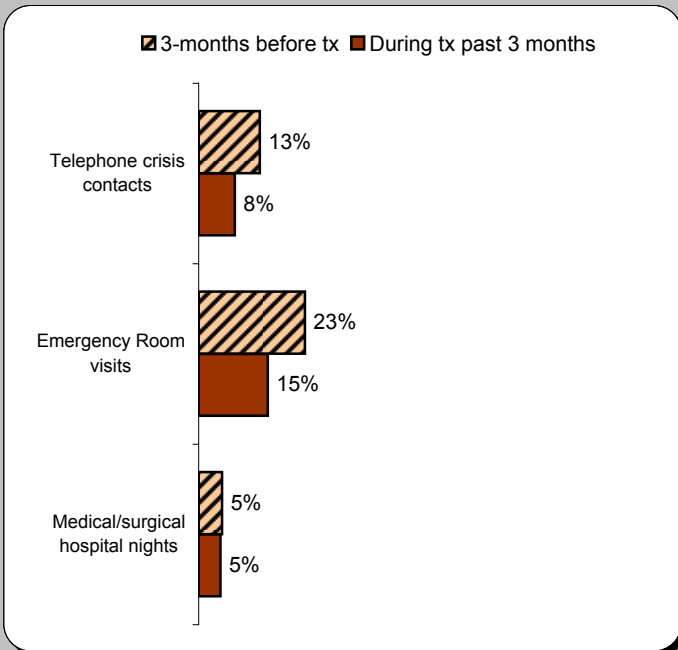

**6-3: Helpfulness of Program Services
(of those for whom the service is applicable)**

Note: Zero percent may indicate not applicable for all consumers.

6-2: Health Care Received
