

MEMORANDUM

TO:	Physicians/Allied Health Providers
FROM:	PowerChart Team
SUBJECT:	Emergency Department Safety/Violence Risk Assessment in PowerChart
DATE:	11/10/2011

Safety/Violence Risk Assessment

The Safety Violence Risk Assessment is currently a paper-based form used in the Emergency Department (ED) to chart and document behaviors and interventions, and assigns a risk score to patients that pose a threat to themselves and/or others. Starting Thursday, November 10, Munson ED will chart the Safety Violence Risk Assessment PowerForm electronically.

The information will view on the ER Flowsheet and with other Precautions type data on the Default Flowsheet.
