<b>Skill analysis Open-closed (Pacing) continuum</b>  <i>CV: SCHOLARSHIP</i>	Accurately classifies skill and identifies $\geq 6$ factors that influence skill performance for both situation activities	Slight error in classification rating, scores does not match support for continuum or identifies 4-5 constraints that influence skill performance	Moderate error in classification rating, scores does not match support continuum or identifies 2-3 constraints that influence skill performance	Major errors in classification rating, score is grossly different than support or identifies $\geq$ constraints that influence skill performance

### 7a3 Stage of the Learner Project (50 points) -- 315

- 1) Select two skills to observe and analyze a learners' stage of learning.
- 2) For each skill, perform a task analysis and make a preparation sheet (write specific skill behaviors or each of the generic characteristics in Graham's learning stages model.
- 3) For each skill, watch an entire session in which individuals' skills are being taught/practiced (i.e., sport related skill, not fundamental motor skill). Please note: you may watch an individual in a practice or a game, however, be aware that in a game situation you may not have the opportunity to see enough trials to determine stage. Classes in which only games (i.e., tag, parachute, dodgeball etc.) are being played do not qualify.
- 4) Select one individual to observe performing for each skill. Do not watch an advanced learner.
- 5) Clearly describe the skill and the situation the skill is being performed in. This includes descriptions of the skill and the individual, task and environmental constraints. In the paper, you should describe the interaction of these constraints.
- 6) *Analyze the stage of learning* of your subject according to Graham's model (i.e., observable characteristics of the generic levels of skill proficiency).
  - a. List your subject's 'observable characteristics' as a function of the activity (task and environment) in which he or she is performing the skill
  - b. Match the 'observable characteristics' to Graham's generic characteristics. Determine whether subject is solidly in a stage or in transition between two stages (fluctuation/characteristics of two stages) and describe why. Do you see signs of transition; Is there fluctuation from trial to trial, and is there consistency from trial to trial? A learner should not be at different stages for different parts of the observation.
- 7) **In your paper, describe the skill and practice situation, and analyze the stage of learning. Specifically link and justify the 'specific skill observable characteristics' to as many of the generic characteristics in the model.**
  - i. Do not evaluate the subject's performance as good or bad. Objectively determine the stage that the subject is demonstrating. Stay away from using subjective language such as they did bad, poor, well, deficient, etc. Use objective language (e.g., the subject demonstrated), displayed, was unable to, had difficulty performing, etc..) and then support your statement by describing the actions/movements/behaviors you observed. Use

statements, such as the performer demonstrated fluidity of the wrist and arm joints 8 out of 10 times.

- 8) Final reminders
  - a. Include an introduction and conclusion in your paper. You should have a thesis statement in your introduction.
  - b. Support your statements by describing what you observed. Describe as many possible clarification factors as possible.
  - c. Attach a grading rubric, double space, pages number, stapled, rubric attached, left justified, no spaces between paragraphs, single return after period
  - d. Turn in a hard copy and submit a final copy of your assignment by uploading it to moodle in Microsoft word format. If it is not in Microsoft Word, I will not be able to open it. In that case, go to the library, convert your file to Word, and upload it to Moodle.
  - e. The paper should be written in your “own words”.

## **7a4 PED 375 Social Issues**

### **CV: SOCIAL JUSTICE**

#### **Purpose:**

Physical ability is usually a very important force in the social life of the high school, and in the status hierarchy of adolescent cliques. This assignment is designed to help you understand the forces shaping the behavior of athletes in high school and help you think of how to make the behavior and values that underlie this behavior more positive.

Instructions: Use the following in answering the questions (1, 2, 3, etc.):

- 1) Draw a schematic diagram of the cliques of your high school, or one where you teach or coach (example attached) ranking the cliques in prestige, and giving descriptive characteristics of each clique.
- 2) How important was physical activity in this status hierarchy and why? In what ways (if any) did physical activity/sport help to bring unity to the student body? Did male jock cliques “rule” in your school? Give examples of athlete leadership and athlete intimidation from your school.
- 3) Long on to the website Badjocks.com. A. What is the point of the web site? B. Can it help PE teachers/coaches teach to the Standards? If so, how? C. Is it undermining the message of PE teachers/coaches who are trying to teach/coach to the Standards? If so, how?
- 4) Click on the Columbine article in Moodle. What are the main points of the article, how much do you agree with them and why? (Give title and author of article).
- 5) Refer back to your answers in #1 and #2. Could a columbine-type incident happen in your school, why or why not? Can physical education and/or sport help create an atmosphere to reduce jock bullying? For example, how could the issue of respect for physical ability differences be promoted using: A. Siedentop’s sport education model, or B. Hellison’s responsibility model? (about 300 words for each model).

#### **Rubric:**

D – Students opinions based on personal experience and present a one sided view of the issue.

## **7a5 PED 375 TITLE IX ASSIGNMENT (Suggested length 1000-1500 words)**

This assignment allows you to consider the effect if “gender ideology” on opportunities for participation, coaching and administration in sports. It is designed to help you see the link

between theory and practice in the world of sport, and explore reasons why discrimination against women still exist in athletics in the post Title IX era.

1. What is “gender ideology”? How can it be seen as a “celebration of masculinity” in sports? How does it restrict female and male behavior in sports? (See chapter 8 text)

2 How is gender ideology reflected in the traditional practice of stereotyping certain sports as “male” and others as “female”? What are seen as the traditional characteristics of these types of sports? Give some examples of how stereotyping has influenced your involvement in sports, and/or involvement of family members and friends.

3. Long on to the Women’s Sports Foundation (WSF) web site, [www.womenssportsfoundation.org](http://www.womenssportsfoundation.org) and click on “Issues and Action” (top, left hand side). Click on the article Female Athletes In (and out of) Print. Download “The analysis of the coverage (and promotion) of females and males in ESPN The Magazine”. Read the article and answer the following questions:

- a. What percentage of written and photographic coverage of ESPN The Magazine is devoted to female athletes and what are the negative implications of this coverage for female athletes and sports?
- b. Explain what the authors mean by the symbiotic relationship between sports and the mass media.
- c. According to the authors, what is the hegemonic message sent by the media when they cover only intercollegiate and professional male sports?
- d. What are the demographics of the target audience for ESPN The Magazine, and why is this audience important for the future of women in sports?

4. How has gender stereotyping affected leadership opportunities (e.g., coaching and administration) for women in sports (see text p. 255-258, particularly the results on women coaching female college sports)? Develop: a. a functional and b. a critical theory argument to explain women’s “progress” in the area of women coaching female college sports. Which theory do you think provides the most realistic explanation and why? Specifically, how does each theory address the idea of social change reflected in opportunities for women’s leadership positions in college sports?

## **7a10 EDU 525 Curriculum Development and Instructional Strategies in Secondary PE Lesson Analysis**

### **CV= SCHOLARSHIP**

#### Purpose

The object of this experience is to provide each student with the opportunity to demonstrate their ability to plan and teach a lesson showing the ability to assess student learning, and to use assessment data for further planning. This represents a snapshot view of your basic teaching skills in an authentic, comprehensive performance task. Take time to do this well as it is used as a measure of your readiness for student teaching and beyond.

#### Directions for Planning and teaching the lesson

1. Discuss with your group a lesson you might teach. Decide what the main content for that lesson should be, and specifically what skills, game or concept you can teach and assess within a single class. Discuss ways of gathering assessment data from your students that will give you information about their progress on the skills,

strategy, knowledge for playing, personal and social skills. If possible use an assessment strategy students are familiar with or a very simple

assessment so that assessment can be managed in about 5 minutes of class time.

2. Carefully select, design or modify a formative assessment that matches the specific skill or concept objectives of the lesson. You may use self, peer or teacher assessment.
3. Plan an effective lesson. Pay attention to the usual time management issues for the content part of the lesson and for the assessment part of the lesson. Students in this lesson should spend most of their time in activity related to the content at an appropriate level of difficulty. They should spend a short period of time assessing.
4. Plan effective groupings, equipment distribution and an assessment recording method that allows you to get accurate assessment data for everyone in your class or group. You need to end up with assessment data for every student in that group or class.
5. Ask your teaching team to record MIAW and % success for the students in your class or group. In addition, remember to collect all assessments from the students.

### Analyzing the lesson

1. Review the teaching and student assessment data you collect. Using the form, calculate student time on Management, Instruction, Activity and Waiting/Off-task behavior. Also calculate percent success for at least two students. Use your data analysis to answer the following questions:
  - a. With respect to time management, what went well in this lesson? Name some specific decisions you made that affected this class.
  - b. With respect to time management, what should you change? Name some specific ideas you have for improvement.
2. Look at the content part of the lesson as planned and as it was taught.
  - a. Describe what game stages you presented in the tasks you asked students to do. How well did they do? Use % success data to justify your response. Was this activity at an appropriate level of difficulty for most students? Did you modify up? Or modify down? Explain your answer.
  - b. What changes might you suggest for the way the content part of the lesson was taught. Be specific about changes you might make next time in a similar lesson.

3. Look at the student assessment results you collected. Summarize the assessment results in a brief chart or paragraph. Attach the assessments or use examples showing the range of responses you received.
  - a. How did your students do on the assessment? Were you surprised by the results? Explain any surprises if you can.
  - b. Evaluate the assessment you used. Was it too hard or too easy? What might you change about the assessment if you were to do it again?

4. Planning based on assessment results: Write a lesson plan for the next lesson based on what you learned by doing the assessment. You do not have to teach this lesson.
