BOMB THREAT PROTOCOL

PURPOSE:

To list the procedure to handle an incoming threat of a bomb on site.
 To provide form for listing of characteristics of bomb threat phone call.
 To prevent injury or loss of life in the event of an actual bomb.

POLICY:

The following procedure shall be implemented in the case of a bomb threat in any building on campus. The procedure includes elements to protect all persons, equipment, the institution, etc.

PROCEDURE:

What to do in case of a bomb threat:

If you receive a threat of violence against the institution or yourself, either verbally or written, contact the security officer on duty immediately. Take every threat seriously.

If the bomb threat is called in, respond as calmly as possible. Make an attempt to get more specific information about the bomb's location, components or what makes it explode or trigger. Make an effort to keep the caller on the line as long as possible. It may be helpful if someone else can be signaled to listen in on the call. Pay close attention to the qualities of the voice, background noises, etc. to aid in the identification of the caller. Please see Bomb Threat Caller Checklist list below.

When a written threat is received, save all materials, including the envelope, packing materials or container. Once you realize it is a threat, further unnecessary handling of the package should be avoided. Do not touch unfamiliar or suspicious packages.

The security office will serve as the communications center in the case of a bomb threat. The police and fire department will be notified. The security officer will make the decision whether to evacuate the building. Notification of an evacuation order will be delivered as an announcement over the PA system or by the fire alarm. The protocol for responding to fire/explosion should then be followed.
