

FEBRUARY VACATION CAMP

FIND ADVENTURE!

Looking for an exciting adventure during your school break? Check out all the cool activities we have at Alton Jones. At our overnight camp, you can have some hands-on fun and make new friends. Whether you're outside on our hiking trails or in the lodge getting cozy by the fire, you can find an adventure everywhere!

EXPLORE!

With 2,300 acres of lakes, forests and farmland, the W. Alton Jones Campus is like one big back yard. Learn to track animals, snowshoe, hike our trails or discover life in the wetlands. No matter what the weather, you'll get a chance to explore New England nature.

DISCOVER!

Winter can be one of the most exciting times to study nature. We designed our camp for kids just like you, who want to have fun while learning about protecting the environment. At Alton Jones, we make it our mission to blend education and fun, so learning seems like a vacation!

PLAY!

What's the best part about being on vacation? Having fun, of course! February Vacation Camp is filled with all kinds of team-building games, arts and crafts and activities like sledding and ice skating. Take advantage of warmer temperatures by going on a swamp tromp or honing your outdoor skills. At Alton Jones, there is no shortage of great activities no matter what the weather brings. Some activities are weather-dependent.

At recreation time, you can challenge your friends to games like soccer, volleyball and four square, or you can just hang out.

RELAX!

At the end of a busy day outside, our dining hall is the ideal place to gather for a warm, home-cooked meal — and have fun with themes like Backward Breakfast and Pirate

Dinner. Whether it's hot breakfast, hearty lunch or a full-course dinner, our meals are always kid-friendly and nutritionally balanced.

Spend nights in one of our heated cabins with cozy pine bunk beds, clean rest rooms and hot showers.

The Environmental Education Center is a self-supporting enterprise; financial contributions are welcomed.
