# "Cloud Media and Web 2.0"

**Outline:**   Have you ever had save a file to use somewhere else and the only way you could do it was to email it yourself?  Did you ever want to collaborate on a document with others but did not know how or want to share photos? Did you ever wonder how tough it is to use a webcam and do Skype, or to create a YouTube video or a Blog and wonder what they could be used for?  Have you ever gone to a web page and seen terms such as Digg, StubleUpon, Reddit, del.icio.us and wondered what they were?  All of these things are part of what is being called Web 2.0 and doing things in "the cloud."

**Program Content:**  Starting by creating a free "class" email, all the above items will be tried. Webcams will be available and we interact with each other as if we were miles apart.  Free programs such as: Del.icio.us, Google Docs, Dropbox.com, Skype. Flickr and others will be used.
