SUMMARY OF THE INSPECTION AND SERVICING

See page 3 for a summary of the general condition of the fire detection and alarm system.

Overall assessment of the inspection and servicing in terms of it's suitability for continued use $\!\!\!\!\!\!\!^\star$:

SATISFACTORY

* An unsatisfactory assessment indicates that dangerous (Code C1) and/ or potentially dangerous (Code C2) conditions have been identified.

OBSERVATIONS AND RECOMMENDATIONS FOR ACTIONS TO BE TAKEN

Referring to the attached Schedule(s) of Inspections and Test Results, and subject to the limitations specified on page 1 of this report under 'Extent of the Installation and Limitations of Inspection and Testing':

There are no items adversely affecting operational performance of the fire detection and alarm system or

N/AThe following observations and recommendations are made

Item No	Observ	rations	Classification Code	Investigation Required
				-
One of th	e following codes, as appropriate, has been allo le for the installation the degree of urgency for	cated to each of the observations made above remedial action:	to indicate to	the person(s)
Risk	nger Present C2 Poto Or required C2 Poto C2 Urgo	entially dangerous ent remedial action required	ement recom	mended
l m m e d i a	ate remedial action required for items:	N/ A

8	SUMMARY OF THE INSPECTION AND SERVICING

Where the overall assessment of the suitability of the fire detection and alarm system for continued use on page 1 is stated as 'UNSATISFACTORY', I/We recommend that any observations classified as 'Code 1 - Danger Present' or 'Code 2 - Potentially dangerous' are acted upon as a matter of urgency.

Investigation without delay is recommended for observations identified as 'Further Investigation Required'.

Observations classified as 'Code 3 - Improvement recommended' should be given due consideration.

General condition of the fire detection and alarm system:

Satisfactory

Date(s) of the inspection and servicing:

16/12/2014

N/A Outstanding defects reported to responsible person

Relevant details of the work carried out and faults identified have been entered in the system log book (see Clause 40.2)

During the past 12 months: 0 false alarms have occurred.

This number of false alarms equates to false alarms per 100 automatic fire detectors per annum: (for Category M systems enter 'Not Applicable').

9 NEXT INSPECTION AND SERVICING

Based upon risk assessment, taking into account the type of system and the environment, I/We recommend that this installation is further inspected and serviced after an interval of not more than:

6 Months (Enter interval in terms of years, months or weeks, as appropriate)

provided that any items in section 7 which have been attributed a Classification code C1 (danger present) are remedied immediately and that any items which have been attributed a code C2 (potentially dangerous) or require further investigation are remedied or investigated respectively as a matter of urgency. Items which have been attributed a Classification code C3 should be improved as soon as practicable (see section 7).

11 QUARTERLY INSPECTION OF VENTED BATTERIES

N/A Batteries checked and topped up as necessary

N/A Battery connections checked

12 SCHEDULE OF ITEMS INSPECTED

Premises Note that structural or occupancy changes may have affected compliance with BS 5839-1:2013.

Manual call points suitably sited

No partitions within 500 mm horizontally of any automatic fire detector (Clause 22.3g)

✓ Manual call points are unobstructed ✓ No storage within 300 mm of ceilings (Clause 22.3i)

Manual call points are conspicuous

Clear space of 500 mm exists below each automatic fire

Manual call points are conspicuous

detector (Clause 22.3n)

All exits, including any new exits, have manual call points

Each automatic fire detector's ability to receive the stimulus it is designed to detect has not been impeded by any other means

occupancy

Building use or occupancy does not make existing types of automatic fire detector unsuitable for detection of fire or prone to unwanted alarms

N/A

Fire alarm devices suitably sited

Additional fire detection and alarm equipment provided in any extensions or alterations to the building

Documentation

N/A System log book examined N/A Any faults recorded have been attended to

False Alarms

N/A Record of false alarms checked in accordance with Clause N/A 30.2i Rate of false alarms during the previous 12 months recorded (Clause 30.2i)

N/A Action taken in respect to false alarms complies with the recommendations of Clause 30.2j:
